for the past 12 years. The variations are *negatives* when the mean for the week is less than the corresponding normal mean and *positives* when greater.

The number denoting cloud amount represents the part of the sky covered, the whole sky being denoted by 10. Under the head "district observ- stations for the period in question during the past 12 years The "means for the district" are the numerical averages of the rainfall returns received one on which at least an hundredth of an inch fell.

Statement of Rainfall in Bengal for the week ending Friday (6 p.m.), the 17th of August 1883.

Meteorological division.	District.	Station.	Rainfall.							Total.		Total rainfall from 1st to 17th August.	Average total rainfall from 1st to 17th August.	Total rainfall since 15th May.	Average rainfall from 15th May to date.
			Saturday, 11th August.	Sunday, 12th August.	Monday, 13th August.	Tuesday, 14th August.	Wednesday, 15th August.	Thursday, 16th August.	Friday, 17th August.	Number of rainy days.	Rainfall of week.

Explanation—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding pace is left blank. If some of the returns are ling, the corresponding spaces in the total rainfall columns are left blank.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 17TH AUGUST 1883.

THE meteorology of Bengal in the past, as in the case of the previous week, has been uneventful, for the weather has been of an ordinary monsoon character. At the close of the previous week, as was pointed out in the last meteorological summary, the Bay of Bengal monsoon current appeared to be somewhat weak; while in Behar and Chutia Nagpur the set of the winds was very strongly westerly, and in some cases north-westerly. From this it appeared that the Bombay current was still affecting these districts; while it was also bringing with it very little rain. The tendency, however, of these currents was to set up a sort of cyclonic circulation of winds in the Province, for there were the usual south-east monsoon winds blowing in East and North Bengal, and these abnormal winds in West Bengal. This tendency to cyclonic circulation was increased on the 10th instant, and it was a well-marked feature on the 11th and 12th, and less marked on the 13th. South Behar seemed to be more or less the centre of the circulation, and this district was, to a great extent, rainless up to the 13th instant. The westerly and north-westerly winds which prevailed in the western districts of the Province gave them naturally very little rain; while the Bay of Bengal current was almost entirely deflected into Eastern and Northern Bengal, where heavy rain was falling on the 11th instant. The heavy rainfall extended on the 12th to North Behar, and with the gradual disappearance of the cyclonic circulation of winds, and the setting in of southerly and south-westerly winds in South-West Bengal, the rainfall in the northern divisions became small, while the rainfall in the southern and south-western districts increased considerably, and they were at this period receiving heavy rain. The wave of rainfall, which thus was giving heavy rain to South-West Bengal on the 13th instant, gradually extended northwards, and on the following day gave the first general rainfall for the week over the whole of South Behar and over some parts of North Behar and North Bengal, which were free from rain on the 13th. During the whole of this period the barometer had been steadily rising, till on the average it was fifteen hundredths of an inch above the normal; but from the morning of the 14th instant pressure commenced to diminish rapidly over the whole Province, the fall continuing generally till the 17th. Ordinary monsoon weather prevailed in all districts on the 14th and 15th instant, and with the rapidly-falling barometer, and the high baric gradients over the Bay of Bengal, it appeared as if it was probable that there would be a very considerable in-rush of moist monsoon winds over the Lower Provinces, which would give heavy rainfall. On the 16th, however, the in-flow of monsoon winds ceased in South-West Bengal and Orissa, and wind directions in these areas showed distinct indraught towards a small barometric depression which was forming at the head of the Bay close to the Sunderbuns. The disturbance continued to give abnormal winds on the 17th instant, and was on that day a little to the south-east of Saugor Island; on the 18th it passed away inland, apparently between Balasore and Saugor Island, but it was a depression of very feeble character, and gave light winds and moderate rain only. During the formation and gradual advance of this depression, the weather in South-West Bengal and Orissa was somewhat unsettled with variable gusty winds and heavy thunder showers; but during the same period, from well-known causes, which have been explained in previous reports, the rainfall in all the other districts has been comparatively light.

As mentioned previously, pressure was a little above the average at the commencement of the week, and it continued to rise steadily for the first three days; on the 14th it commenced to fall briskly, and continued to do so till the 16th, and on the 17th the barometric changes were complicated by the existence and advance of the depression above noted. On this day pressure was increasing in all parts of the Province not subject to the influence of the depression, and falling in its immediate neighbourhood. The barometric averages for the week show that the pressure has been above the normal by considerable amounts. The excess pressure varies from 0·101″ at Durbhunga to + 0·029″ at Chittagong. The mean temperature of the week in consequence of the prevalence of overcast skies and of fairly heavy rainfall has been below the normal at most stations in South-West Bengal, East Bengal, North Bengal, South Behar, and Orissa, by amounts which vary from 1·8° at Patna to an average temperature at Saugor Island. At Hazaribagh, however, the temperature has been 2·6° above the normal.

The principal variations in the wind directions for the week have been before described, and it will have been seen that they have varied to a certain extent from the normal directions. The wind velocities, however, have, in all cases, been small throughout the week, and they appear to be considerably below the normal for the month. Thus, the normal daily wind movement at Saugor Island, in August, is 270 miles, the actual average for this week has been only 250 miles; the normal wind amount for August at Calcutta is 135 miles, the actual has been 89 miles; the normal at Chittagong is 145 miles, the actual for the week 117 miles, and so on. It is therefore evident that the monsoon winds during the past week have been very decidedly below their normal strength.

The following table gives the usual summary of the temperature and rainfall data for each of the seven meteorological divisions of the Province.

Meteorological District.	Temperature						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean week.	Of week.			Rainy days.			Since 1st of month.		Since May 15th.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number.	Variation.	Average.	Normal average.	Average.	Normal average.
Orissa	93·4	73·1	87·6	77·1	82·4	−0·7	2·01	2·75	+0·16	4·9	4·0	+0·9	6·76	7·36	38·49	30·07

It has previously been noticed that the strength of the monsoon current had been distinctly below the average during the past week, and it is therefore to be expected that the rainfall for the week has not been as heavy as it should have been. That this has really been the case is clearly seen from the above table, for while only two of the meteorological divisions have received a fall in slight excess of the normal, the other five divisions have received amounts distinctly below the average. When the whole area of the Province is considered, it may be roughly stated to have received a rainfall about 20 per cent. less than the normal, while of course in some districts the defect was largely in excess of this amount. From the figures in the table it may be seen that the district of North Behar received rainfall 33 per cent. in excess of the normal, and Orissa 5 per cent. in excess of the average; while, on the other hand, South-West Bengal received 18 per cent less than the normal, South Behar 33 per cent less than the normal, Chutia Nagpur 38 per cent. below the average, North Bengal 42 per cent. less than the normal, and East Bengal as much as 47 per cent less than the normal amount of rainfall. In North Behar the rainfall during the week has been particularly heavy in the Champarun and Purneah districts, though, on the other hand, the Sarun district was a little in defect. The Orissa division received fairly general rain, especially during the second half of the week; this division though showing an excess over the normal for the week only received this excess in one division, Cuttack, while Pooree and Balasore divisions were distinctly below the average. In South-West Bengal the rainfall was by no means equally distributed, for while Jessore, Khoolna, Nuddea, and Moorshedabad districts received very deficient falls, Burdwan, and Jehanabad in the Hooghly district continued to be centres of very heavy rainfall. In South Behar during the past week some of the stations were absolutely rainless: thus, the following places reported no rain:—Bhabooah, Sasseram, Aurangabad, and Gya, and the rainfall was very much in defect over the whole of the Shahabad and Gya districts and in some parts of the Patna district. Elsewhere in this division the rainfall was nearly up to the average. Chutia Nagpur also shows great variations, for while Singbhoom appears to have received an excess fall, all the other districts were in defect, and Ranchi was rainless. In North Bengal, Pubna, Bogra, Rajshahye, and Cooch Behar were specially in defect, and it may be noticed that Rungpore again received a rainfall considerably below the normal. East Bengal is much in defect in almost all districts. The number of rainy days, however, in each division has scarcely varied from the normal to the same extent as the rainfall has, and it is only in three divisions that there is any considerable departure from the mean. The three divisions where the days of rainfall were deficient are Chutia Nagpur, South Behar, and East Bengal, and these it will be seen are the areas of greatest deficiency of rainfall, so that on the whole probably the deficiency of rain has been mainly due to the lightness of the rain showers.

The rainfall in Bengal since the first of the month does not, however, show the extreme variations from the normal that have characterised the past week; and, speaking generally, each of the meteorological divisions has received nearly a normal fall during August. There are of course districts in each division, which are in excess in defect, as for instance, in South-West Bengal, Jehanabad, Burdwan, Ranigunge, Bankoora, and Beerbhoom have received more than a normal fall, while the 24-Pergunnahs and Nuddea are rather in defect, but there are no very extreme cases of variation in any parts of the Province where the rainfall during August up to date is considered. The rainfall up to date from May 15th has been in almost all divisions fully up to the average.

Saturday, 11th August.—Pressure commenced to increase. The rise of the barometer was greatest in Behar and North Bengal. At several stations in Behar the increase of pressure was considerably more than a tenth of an inch. Pressure was above the average of the day by amounts varying from 0·095″ at Durbhanga to 0·028 at Chittagong. Pressure was also relatively high in Behar. Temperature decreased considerably in North Bengal and

at some stations in Orissa. Elsewhere the changes were small. In South-West Bengal, in Chutia Nagpur, and in Behar, temperature was still about 2° above the average of the day. The wind directions altered considerably. The tendency towards cyclonic circulation, noticed in the report of the 10th instant, had very considerably developed, and there was a very well marked cyclonic circulation of winds round South Behar as a centre. Thus, in East Bengal the winds were mainly south-easterly, in North Bengal mainly easterly, in North Behar north-easterly, and in Chutia Nagpur and Western Bengal mainly westerly and south-westerly. Wind velocities were increasing generally. The humidity remained extremely high in Behar and in East and North Bengal. Elsewhere the humidity appeared to have decreased somewhat. Cloud proportion was also large in Behar and in East and North Bengal. Rainfall was very general and very heavy on this day, except in Orissa, South Behar, and Chutia Nagpur, where a few local showers only were reported. The rainfall was particularly heavy in some districts of North and East Bengal, and in the Purneah district of North Behar. The heaviest rainfalls reported to-day were Cox's Bazar 6·20 inches, Arrareah (Purneah district) 5·28 inches, Kissengunge 4·83 inches, Julpigori 4 35 inches, and Culna, Ruma, Dinagepore, Buxa, and Siligori amounts between three and four inches.

Sunday, 12th August.—Pressure continued to increase by nearly equal amounts over the whole Province. The average rise of the barometer was from 0·04″ to 0·06″ Pressure was very considerably above the average for the day. The average excess was about a tenth of an inch, but pressure was relatively high in Behar, where, as at Durbhanga, there was an excess of 0·010″. Temperature increased in North Bengal and Orissa, but decreased in Behar. Elsewhere the changes were small. Temperature was above the average in the southern and western divisions, and below it in Behar. The wind directions had become a little more irregular since the 11th instant, but there was still the strong tendency to cyclonic circulation noticed on that date. Winds were southerly and south-easterly in East Bengal, easterly in North Bengal, easterly and northerly in Behar, north-westerly in Chutia Nagpur and Western Bengal, and westerly in South Bengal, thus making fairly complete cyclonic circulation. Wind velocities, however, remained moderate. The variations of humidity and cloud were of slight importance. Humidity remained high, and the sky was much clouded at the majority of stations. Fairly general rain fell on this day in most districts. It was less general in Orissa, in North Bengal, in South Behar, and in Chutia Nagpur, and was heaviest and most general in North Behar. Amounts in excess of two inches were recorded at Tajpore in the Durbhanga district, at Mozufferpore, Motihari, Bettia, and Commilla, while amounts between one and two inches were reported from Jellasore Burdwan, Kaneegunge, Bankoora, Beerbhoom, Soory, Lalbagh, Moorshedabad, Rungamati, Agurtolla, Kissoregunge, Durbhanga, Banka and Purulia.

Monday, 13th August.—Pressure still continued to increase. The increase was greatest at the southern stations and least in Behar, and the pressure was above the average over the whole Province by amounts which averaged nearly 0 15″. The average increase of pressure was about ·01″. Temperature did not vary very materially, but was increasing in North Bengal and in Behar. It was still below the average in those areas, but elsewhere it was somewhat above the normal. Wind directions had again become more irregular in character, though the tendency to cyclonic circulation was still well marked round Behar as a centre. Wind velocities had increased in North Bengal and in Behar but winds continued light over almost the whole Province. Humidity decreased considerably in South Behar. Elsewhere the changes were small and of a variable character. The amount of cloud was also diminishing over the same area, but in East, North, and South West Bengal the sky remained heavily clouded. South Behar with some portions of North Behar and North Bengal were to-day practically without rain; in the other districts general rain, moderate, and sometimes heavy in amount, was received. The westerly divisions to-day received the largest amounts of rain, and the rainfall recorded in East Bengal was comparatively small. The heaviest rainfall recorded were Moheshreka (Howrah district) 3 50 inches, Tumlook 2·80 inches, Mahadebpore 2·87 inches, Midnapore 1 99 inches, Jehanabad 1·77 inches, Mymensingh 1·69 inches, and Kissoregunge 1 55 inches.

Tuesday, 14th August.—Pressure on this day commenced to diminish over the whole Province. The decrease averaged about five hundreths of an inch, but nevertheless pressure was still above the normal by amounts varying from 0·12″ at Cuttack to 0·07″ at Gya. Temperature had not varied much since the 13th instant, and the variations were irregular. Temperature was generally above the average in Orissa, South-West Bengal, and Chutia Nagpur, but below the average in Behar and in North and East Bengal. Winds had to a great extent reverted to their normal direction, and at most stations light to moderate winds were blowing. In Behar, however, wind directions were still somewhat irregular. Humidity had decreased in South-West Bengal, but was still very high in East Bengal. It was increasing in Behar. Cloud proportions were on the whole comparatively small over the whole Province. The amounts of rain recorded to-day were smaller than those of the previous day, but the area of rainfall had extended, and now included the greater part of South Behar, as well as the districts of North Behar and North Bengal, which were free from rain on the 13th instant. The rainfall, however, had distinctly decreased in South-West Bengal and in Orissa. The heaviest rainfall was at Darjeeling, which reported 3·03 inches; while at the following stations amounts varying from one to two inches were received:—Rajmehal, Banka, and Bhagulpore, Bettia, Bhowanigunge, Panchbibi, Netrokona, Cox's Bazar, Jhenidah, Meherpore, and Cutwa.

Wednesday, 15*th August*.—Pressure continued to diminish rapidly over the whole Province. The fall of the barometer in some cases, as at Mymensingh and Rampore Beauleah, exceeded a tenth of an inch, while the average fall was considerably over half this amount. Notwithstanding this rapid fall of the barometer, pressure was still above the normal for the day by amounts which varied from 0·06″ at Cuttack to 0·01″ at Chittagong. Temperature had increased somewhat in South-West Bengal and considerably in South Behar. Elsewhere the changes were small and variable. Temperature was above the normal in both the above districts. Wind directions had become a little irregular in some parts of the Province. The westerly set of the winds in Chutia Nagpur was still well marked, but in North and South Behar it was diminishing, and at some stations in these divisions more or less easterly and south-easterly winds were reported. Wind velocities also had increased slightly. The variations of humidity and cloud were not very important; they were about equal to the normal. South Behar was again comparatively rainless to-day. The other districts received fairly general rain, light to moderate in amount. The South-West Bengal stations reported the largest average amounts, while in East Bengal the rainfall was very light. Some of the stations in Orissa also received fairly heavy rain. Rainfalls in excess of two inches were reported from Dum-Dum, Serampore, and Netrokona (Mymensingh district), while falls in excess of an inch were received at False Point, Jajpore, Barrackpore, Baraset, Jehanabad, Hetampore, Jessore, Perozepore, Raigunge, Cooch Behar, and Chyebassa.

Thursday, 16*th August*.—Pressure again diminished by considerable amounts over the whole Province, with one or two local exceptions. The decrease was greatest at the southern stations, where it averaged nearly 0·07″, and least in North Bengal. Pressure was now below the average in almost all districts, except North Bengal and Chutia Nagpur. Temperature fell considerably at the stations in the southern districts in Bengal, but in Behar temperature continued to rise owing to the absence of rain. It was distinctly below the average in Orissa and South-West Bengal, but above it by small amounts elsewhere. The principal changes of wind direction since the 16th were in South-West Bengal and in Orissa, where, at the sea-coast stations specially, the wind directions showed indraught towards the sea area. This indicated the formation of a small barometric depression or cyclonic vortex near the Sunderbuns. The south-easterly winds noticed on the 15th in Behar had become stronger, and the westerly element which had prevailed in this district for so long almost disappeared. Wind velocities had increased somewhat at the southern stations. Elsewhere they had not changed much. Humidity had not scarcely varied, and it remained rather high in all districts. The sky in Orissa and South-West Bengal was heavily clouded, while in North Bengal the sky had cleared decidedly.

Light to moderate general rain fell in Orissa, in most districts of South-West Bengal, and in South Behar. The eastern districts of South-West Bengal, East Bengal, North Behar, and Chutia Nagpur all received rain, but not so general, or so large in quantity as in the previous cases, while in North Bengal only a few showers fell, not averaging more than a few hundredths of an inch. The rainfall was generally heaviest on this day in the Monghyr and Sonthal Pergunnahs districts, and also in the western districts of South-West Bengal. Rainfalls in excess of two inches were received at Diamond Harbour, Raneegunge, Hetampore (Beerbhoom), Buxa, Jamui, and Jamtara, while falls of between one and two inches were recorded at Saugor Island, Jehanabad, Bishenpore, Begooserai, Godda, Nya Doomka, and Deoghur.

Friday, 17*th*, *August*.—Pressure decreased at the Orissa stations and in the southern portions of South-West Bengal. Elsewhere pressure had increased by small amounts. The diminution of pressure in the above localities was produced by the westerly movement of the barometric depression noticed in the report of the 16th. Pressure was still below the normal of the day, except in Behar and Chutia Nagpur. Temperature had increased considerably in North Bengal. In the other districts the variations were small. Temperature was now above the average in North Bengal, in Behar, and in Chutia Nagpur, but was below the average by small amounts in the other districts. The wind directions in Orissa and South-West Bengal had varied with the advance of the small barometric depression, and they showed that at 10 A. M. the centre of the disturbance was to the south-east of Saugor Island. The wind directions in North Bengal and in Behar had become more northerly, and the velocity was so low that many stations in the latter district reported calms. Humidity had decreased in East and North Bengal, but in Orissa it had increased, and was very high. The sky was heavily clouded in South-West Bengal and in Orissa, but elsewhere it was generally clearing.

General rain, moderate in amount, again fell over Orissa and the western districts of South-West Bengal; in the eastern districts of this division and in the other divisions of the Province the rainfall was light and scanty, though again in the Sonthal Pergunnahs district there was an exception in that general rain was received, while the remainder of South Behar was practically rainless. The following were the heaviest amounts recorded on this day. Rangamati 3·28 inches, Balasore 2·35 inches, Satkhira 2·25 inches, Kendrapara (Cuttack) 2·20 inches, Chyebassa 2·14 inches, Cutwa 2·02 inches, Ranaghat 1·51 inches, Cuttack 1·28 inches, Jehanabad 1 27 inches, and Bhagulpore 1·12 inches.

METEOROLOGICAL OFFICE, BENGAL, ALEXANDER PEDLER, F.C.S.,

The 21st August 1883. *Offg. Meteorological Reporter to the Govt. of India.*

MEMORANDA.

During the week ending 4th August 1883, births and deaths were recorded in the first class municipalities in Bengal (*vide* subjoined table) at 17·3 and 28·7 per 1,000 of population, respectively, against 22·9 and 31·1 per 1,000, respectively, during the week immediately preceding.

2. The municipalities which exhibit the highest results in birth and death registration are :—

Births.	Ratio per mille.	*Deaths.*	Ratio per mille.
Arrah ..	.. 56·2	Gya ..	.. 80·6
Bhagulpore ..	.. 31·7	Monghyr ..	.. 48·8
Gya ..	.. 25·3	Patna ..	.. 37·3
Burdwan ..	.. 24·4	Arrah ..	.. 37·1
Ranaghat ..	.. 24·0	Burdwan ..	.. 33·6
		Bhagulpore ..	.. 33·5
		Mozufferpore ..	.. 28·0
		Midnapore ..	.. 27·8
		Suburbs of Calcutta	.. 27·5

3. Referring to the principal death-causes, cholera is reported to have claimed 3·6 per 1,000 of the population of these municipalities, against 5·0 per 1,000 in the preceding week ending 28th July ; small-pox ·5 against ·4 per 1,000 ; fever 12·8 against 13·1 per 1,000 ; bowel-complaints 3·9 against 5·0 per 1,000 ; injury ·5 per 1,000 against a similar ratio ; and "other causes" 7·3 against 7·1 per 1,000, indicating a decline in mortality from all diseases, excepting small-pox, which proved slightly more fatal.

4. In the undermentioned municipalities, cholera, small-pox, and fever were noticeably fatal :—

Cholera.	Ratio per mille.	*Small-Pox.*	Ratio per mille.	*Fever.*	Ratio per mille.
Gya ..	30·8	Gya ..	6·1		
Monghyr ..	8·1			Monghyr ..	26·2
Midnapore ..	7·7			Arrah ..	25·1
Patna ..	6·2				

5. The mortality of the week, distributed under the heads of *Sex*, *Class*, and *Age*, stands as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males ..	28·3	Christians ..	33·0	Under 1 year ..	261·4
Females ..	29·3	Hindus ..	30·0	1 and under 5 years ..	44·4
		Mahomedans ..	26·0	5 and under 10 years ..	21·7
				10 and under 15 „ ..	16·2
				15 and under 20 „ ..	17·2
				20 and under 30 „ ..	18·3
				30 and under 40 „ ..	16·3
				40 and under 50 „ ..	18·0
				50 and under 60 „ ..	22·7
				60 years and upwards ..	63·4

F. W. A. DEFABECK,

The mean pressure, temperatures, &c., are deducted from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, *g* gloomy, *t* thunder, *d* drizzling rain, *p* passing temporary showers, *lr* lightning reflection.

ALEXANDER PEDLER,
For Meteorological Reporter to the Government of India.

METEOROLOGICAL OFFICE, INDIA
The 20th August 1883.

Results of the Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 12th to 18th August 1883.

A. Glendower Newcomen,
For Traffic Superintendent.

GENERAL REMARKS AND EXPLANATIONS.

The total quantity of goods carried during the month of June 1883 aggregated maunds 3,08,024 as compared with maunds 3,66,889 carried during the corresponding period of 1882, and maunds 3,00,031 carried during the previous month, showing a decrease of maunds 58,865 in the one case, and increase of maunds 7,193 in the other.

Of the several increases and decreases, the following are the most prominent ones and worthy of separate explanation.

Increases.

Coal ... ... Mds. 7,821

This increase is due chiefly to the greater number of indigo factories now consuming coal for purposes of manufacture.

Food-grains ... ... Mds. 31,012

This is due to chiefly to the opening of the western and eastern extension, and changing the ghât to Mokameh.

Piece-goods ... ... Mds. 2,655

The increase under this head is chiefly due to the stocks in hand having been exhausted on account of brisk demand in local markets during the past month, and to the extension of the line to Motiharl and Jhanjharpore.

Tobacco ... ... Mds. 2,401

The increase under this head is chiefly due to Jhanjhar extension.

Decreases.

Lime and Kunkur ... ... Mds. 56,454

Owing partly to the completion of new civil station buildings at Durbhunga, partly from our inability to supply wagons for carrying kunkur as nearly as our open wagons were required for ballasting purposes on the latter half of the month.

Railway materials ... ... Mds. 24,631

Due to the completion of the extensions of this Railway.

Salt ... ... Mds. 13,668

Due to the suspension of the through booking of goods traffic from the 17th to the 26th on account of the heavy floods which rendered the line unsafe between Dalsinghserai and Semaria Ghât.

Saltpetre ... ... Mds. 11,938

Due to the demand for this staples in the Calcutta market being dull, and also to the state of the river.

Seeds ... ... Mds. 4,137

This is due to the East Indian Railway having restricted the through-booking of grains and seed from that Railway to Howrah to 50 tons per diem only from the 7th June to the 7th July.

Report of Fluctuation of Traffic on the Tirhoot State Railway for the month of July 1883.

Statement showing Increases and Decreases in Maundage of principal Staples carried over the Line during the month of July 1883 *as compared with the corresponding period of* 1882.

V. Rigby, *Manager.*

A. Glendower Newcomen,
For Traffic Superintendent.

GENERAL REMARKS AND EXPLANATIONS.

The total quantities of goods carried during the month of July 1883 aggregated maunds 2,77,849, as compared with maunds 3,30,612 carried during the corresponding period of 1882, and maunds 3,08,024 carried during the previous month, showing a decrease of maunds 52,763 and maunds 30,175, respectively.

Of the several increases and decreases the following are the most prominent ones and worthy of special explanations:—

Increases.

Food-grains ... ... Mds. 18,579

The increase is due chiefly to the crops having been better than last year, but about half of this quantity was booked from stations on the Jhanjharpur section that were not open for traffic last year, and the extension of the line can therefore be credited with a fair proportion of the increase.

Hides and horns ... ... Mds. 4,617

The increase under this head is due to the demand in the Calcutta market for Durbhunga hides.

Iron ... ... Mds. 2,845

This is due to some boilers and other machinery having been booked in the early part of the month for some indigo factories, and to the despatch of railway scrap-iron purchased by the Barrakur Foundry.

Salt ... ... Mds. 17,001

Owing to the dealers being unable to get all that was required last month, in consequence of the through booking of goods having to be suspended on account of the damage to the line by floods.

Tobacco ... ... Mds. 7,623

The increase is chiefly due to the clearing of accumulation of tobacco which we were not able to carry last month owing to paucity of rolling-stock.

Decreases.

Coal ... ... Mds. 19,310

This is due to contractors and factories having got up all they required, and to the completion of the railway extension.

Ghee ... ... Mds. 1,325

The rivers being high, and as this is all down traffic for Calcutta and Badreswar, merchants are despatching by boats.

Lime and kunker ... ... Mds. 5,119

This is due to the completion of the civil buildings at Durbhunga.

Piece-goods ... ... Mds. 3,108

The decrease of is chiefly attributable to the season for Hindoo marriages being over.

Railway material ... ... Mds. 33,032

Owing to the completion of the extensions of this railway.

Saltpetre ... ... Mds. 6,629

The rates prevailing last year were considerably higher than they are this, hence the decrease.

Seeds ... ... Mds. 33,013

Last year the monsoon reduced rates came into force on the East Indian Railway, on and from the 15th July, whereas this year the reduction did not come into force until the 1st of August, and merchants held back for the reduced rates. In addition to this, for the first seven days of the month the through booking of grain and seeds to Calcutta was restricted by the East Indian to 100 tons per diem.

Increase. Tons.

Coal — 34
This increase is due to coal being required for the working of the Rice-mills at Canning.

Rice — 583
This increase is due to working of the Rice-mills at Canning this season.

Railway materials — 34
This increase is due to materials required for the extension.

Wooloo — 68
This increase is due to favourable market.

Decrease.

Firewood — 304
This decrease is due to sufficient empty wagons not being available.

Hay — 298
This decrease is due to low rate in the market.

Straw — 23
This decrease is due to a dull market.

Sundries — 309
This decrease is due to works on the extension being finished.

Total	489	104	771	170	593	941	423	80

Increase. Tons.

Sugar and Jaggree — 33
The increase is due to high rate in the local market.

Sundries — 73
A large quantity of sál leaves and charcoal brought in this year.

Coal — 242
This increase is due to some of the silk merchants having arranged to bring their coal by rail instead of by boat.

Salt — 49
The increase is due to a greater demand at Azimgunge market.

Decrease.

Seeds of all sorts — 35
The decrease is due to low rate in the local market.

Secretary to the Govt. of Bengal.

NOTIFICATION.

The 20th August 1883.—The name of Baboo Gaur Mohun Ghose, a Commissioner of the Municipality of Raneegunj, in the district of Burdwan, who has been convicted before a court of competent jurisdiction, under section 57, Act V (B.C.) of 1876, on a charge of being interested in a contract made with the Commissioners, is hereby removed from the list of Commissioners of the above municipality.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 20th August 1883.—It is hereby notified for general information that, in the exercise of the powers conferred upon him by section 314, Act V (B.C.) of 1876, the Lieutenant-Governor intends to confirm the following bye-laws, which have been framed by the Commissioners of the Furreedpore Municipality at a meeting, under section 313 of the Act, unless good reasons to the contrary be shown within one month from the date of the publication of this notification within the above municipality:—

BYE-LAWS.

For regulating the conduct of persons employed by the Commissioners.

1. No person employed by the Commissioners shall engage in trade, either in his own name or in that of any other person, or shall take up, either in his own name or in that of any other person, any lease or farm of a ferry, or any other business.

Nothing in this bye-law shall be held to exempt any person from the punishment provided by section 168 of the Indian Penal Code, or by any other law for the time being in force.

2. Unless the Commissioners shall have expressly and in writing agreed otherwise, every person employed by them on a monthly salary shall be bound to give his whole time to their service.

Whoever commits a breach either of the bye-laws numbered 1 and 2 shall be liable to a fine of fifty rupees, and to a further fine of ten rupees for each day on which the offence is continued after conviction, or after the offender has been required by the Commissioners in a written notice to desist from such offence.

For regulating traffic in the streets.

3. Whenever a carriage, cart, or vehicle meets any other carriage, cart, or vehicle on any public road, each of such carriages, carts, or vehicles shall go to the left in due time before they meet and pass, each having the other to its right.

4. Except during bright moonlight, whenever a carriage, cart, or vehicle is taken on any public road, after half an hour after sunset and before half an hour before sunrise, there shall be constantly at least one clear light upon such carriage, cart, or vehicle.

5. Whenever a cart carrying anything more than twelve feet long is taken on any public road, not less than two persons shall be in immediate attendance upon such cart, of whom one shall drive the animals, and another shall be constantly close behind the cart. Each of such persons shall be bound so to conduct such cart as to prevent any injury, damage, wrongful loss, or undue obstruction to the public or to any person.

6. The wheels of all carts and vehicles shall, when in use, be properly greased and otherwise treated so as to avoid undue noise.

Whoever, being the owner, hirer, user, or person in charge of any carriage, cart, or vehicle, commits a breach of any of the bye-laws numbered 3 to 6, both inclusive, shall be liable to a fine not exceeding ten rupees.

7. Except during bright moonlight, whoever carries anything more than six feet long on any public road, after half an hour after sunset and before half an hour before sunrise, shall also constantly carry a clear light, or shall have such a light carried constantly close to him.

Whoever commits a breach of this byelaw shall be liable to a fine not exceeding two rupees.

8. Whoever, being the owner, hirer, user, rider, or conductor of an elephant, shall take it on any public road without the written permission of the Commissioners, previously obtained, shall be liable to a fine not exceeding fifty rupees.

For regulating the use of fire-balloons, &c.

9. No one shall let off any fire-balloons, fire-works, fire-arms, or any missiles in or near a public street, without the written consent of the Municipal Commissioners, previously obtained.

The penalty for infringement shall be a fine not exceeding ten rupees.

For regulating burial and burning grounds, and generally for the purposes of Chapter II of the Act.

10. No person shall bury any corpse at a depth less than five feet from the surface of the ground.

11. No person shall dig or build any grave within two feet, clear, of any other grave.

12. No person shall carry or conduct a corpse on any public road or place unless every part of such corpse is decently covered and wholly concealed from public view.

Whosoever infringes any of the byelaws numbered 10, 11, and 12 shall be liable to a fine not exceeding twenty rupees.

13. Whoever, without the written permission of the Commissioners, previously obtained, or against any condition which may be prescribed with such permission, infringes any direction made under section 256 of the Act by the Commissioners at a meeting, shall be liable to a fine not exceeding twenty rupees, and to a further fine not exceeding five rupees for each day on which such infringement is continued after conviction, or after either the owner or the occupier of the hut or other building has been required by the Commissioners in a written notice to desist from such infringement.

14. Whoever puts or allows to remain in or upon any building any pipe or spout by which water may fall on to any road, or into any drain belonging to the Commissioners, in contravention of any written notice issued by them, shall be liable to a fine not exceeding ten rupees, and to a further fine not exceeding two rupees for each day during which the offence is continued after conviction, or after either the owner or the occupier of the building has been required by the Commissioners in a written notice to desist from such offence.

15. No person, without the written permission of the Commissioners, previously obtained, and then only subject to all such conditions (if any) as may be prescribed with such permission, shall wash, soak, steep, or put or allow to remain under water any skin, offal, blood, bone, bamboo, jute, flax, hemp, or anything which, by being washed or by remaining in water, may either corrupt the water or cause an offensive smell. Whoever commits a breach of this bye-law shall be liable to a fine not exceeding thirty rupees, and to a further fine not exceeding ten rupees for every day on which the offence is continued after conviction, or after the offender has been required by the Commissioners in a written notice to desist from such offence.

COLMAN MACAULAY,
Secretary to the Govt of Bengal.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 9th August 1883.—In the notification dated the 18th June 1874, published at page 1175, Part I of the *Calcutta Gazette* dated the 29th July 1874, the boundary between the districts of Sylhet and Tipperah was defined to be that laid down on the revenue survey maps of seasons 1860-61, and the boundary between Sylhet and Hill Tipperah that shown on the maps of seasons 1860-65 and marked on the ground by pucca pillars, but by an oversight the former boundary was described as ending, and the latter as beginning, at the Iktiarpur masonry pillar. To rectify this mistake, the Lieutenant-Governor is now pleased to declare that the following are the correct boundaries between the districts of Sylhet and Tipperah, and between Sylhet and Hill Tipperah :—

The common boundary between Sylhet and Tipperah extends, as defined on the revenue survey maps of seasons 1860-61, from Rampur masonry pillar on the north to the Khuejuri nuddee on the south.

The common boundary between Sylhet and Hill Tipperah commences westward at the Khueajuri nuddee, and from that river to Iktiarpur masonry pillar is as laid down on the revenue survey maps of seasons 1860-61. Thence it extends eastward to the Chatterchura or Koylalyon hill station, as defined on the maps of seasons 1860-65, and marked on the ground by pucca pillars ordered by Government letter No. 1265, dated 31st March 1865, from the Secretary to the Government of Bengal to the Surveyor-General of India.

Note.—Pergunnah Mantala of the district of Tipperah is included in the civil, criminal, and revenue jurisdiction of the district of Sylhet.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 22nd August 1883.—The following Notice to Mariners is published for general information.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 37).

INDIA—EAST COAST.

BAY OF BENGAL—COAST OF ORISSA.

Intended alteration of Colour and Height of Puri Light.

NOTICE is hereby given that the Puri *white* fixed light will shortly be altered to a *red* fixed light.

Further, that a small masonry turret will be erected on the South-West corner of the roof of the Circuit-house, 10 feet high, which will give the light an increase in elevation of about 6 feet.

Due notice will be given of the date of exhibition and alteration of the light.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 21st August* 1883.

NOTIFICATION.

The 22nd August 1883.—The following Notice to Mariners is published for general information.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 38).

MALAY PENINSULA—WEST COAST.

MALACCA STRAIT.

PENANG OR PRINCE OF WALES' ISLAND.

Revolving Light exhibited from Muka Head.

THE Colonial Secretary, Straits Settlements, Singapore, has notified that, on and after the 15th August 1883, a light would be exhibited from a lighthouse erected on Muka Head on the Island of Penang.

The light is a *revolving* white light, showing alternate flashes and total eclipses. It is elevated 795 feet above the sea, and should be visible in clear weather, in every direction seaward, from a distance of 30 miles.

The lighthouse is situated on the summit of the hill, which is 750 feet high. The structure is a square two-storied building, with a circular tower in the centre, all of gray granite, on which the lantern is placed. The balcony and lantern are painted white: the rest of the building is unpainted.

Position—Latitute 5° 27′ 40″ N., longitude 100° 10′ 30″E.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 21st August* 1883.

[Second Publication.]

NOTIFICATION.

The 21st August 1883.—The following notice is published for general information.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 36).

INDIA—EAST COAST.

BAY OF BENGAL—GODAVERY DISTRICT.

COCANADA.

Replacing of Red Buoy off Point Gordeware (Godavery).

WITH reference to this Departmental Notice to Mariners, No. 28 of the 4th July 1883, the Port Officer, Madras, has notified that the large *red* buoy, with pole and basket, which was laid in 6¼ fathoms, low water, to the northward of the Godavery shoals, has been replaced.

The bearing of the Hope Island light from the *red* buoy is S. by W. ¾ W.; the Vakalapudi light bears from the buoy N. W. by W. (magnetic).

Approaching Cocanada from the southward by night, a ship should not haul in for Vakalapudi light till it bears W. N. W.; by day, she should pass fully half a mile northward and eastward of the buoy.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 17th August* 1883.

DECLARATION.

The 20th August 1883.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Hooghly Municipality for a public purpose, viz. for the construction of a road from Katgolaghat to Kasi Kundoo's Ghat, in the town of Hooghly, to be called "the Strand Road," it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 bighas 7 cottahs and 3 chittacks of standard measurement, situated in the villages of Joyrambati and Gobindapur, pergunnahs Boro and Chandernagore, respectively, in the district of Hooghly, is required. The land to be acquired is bounded on the north by the wall of a garden belonging to Baboo Ashootosh Ghose and others; south by the land belonging to Baboo Rameshar Khan and others; east and west by lands belonging to Koilash Chunder Ghose and others.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 23rd August 1883.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz for the improvement of Kala Bagan Bustee, situated in the town of Calcutta, district 24-Pergunnahs, it is hereby declared that for the above purpose pieces of land Nos 18, 22, and 24, Machooa Bazar Street; 38 and 39, Bhobani Churn Dutt's Lane; 4, Shumbhoo Chunder Chatterjee's Street; and 12 and 12-1, Nilmadhub Sen's Lane, measuring, more or less, one bigha, eight cottahs, fourteen chittacks and twenty-four square feet (1 bg. 8 cot. 14 ch. and 24 sq. ft.) are required.

The boundaries of the plots are as follows:—

Portion marked A on plan.—On the north partly by Machooa Bazar Street and partly by No. 22, Machooa Bazar Street; on the east partly by No. 18, Machooa Bazar Street, and partly by No. 22, Machooa Bazar Street; on the south by sewered ditch road, and on the west by sewered ditch road.

Portion marked B on plan.—On the north by No. 22, Machooa Bazar Street; on the east by sewered ditch road; on the south by sewered ditch road; and on the west by Nos. 22 and 24, Machooa Bazar Street.

Portion marked C on plan.—On the north by No. 3, Shumbhoo Chunder Chatterjee's Street; on the east by No. 4, Shumbhoo Chunder Chatterjee's Street, and No. 38, Bhobani Churn Dutt's Lane; on the south and west by sewered ditch road.

Portion marked D on plan.—On the north and east by sewered ditch road; on the south by No. 39, Bhobani Churn Dutt's Lane; and on the west by sewered ditch road.

Portion marked E on plan.—On the north and east by sewered ditch road; on the south partly by No. 11, Nilmadhub Sen's Lane, and partly by Nilmadhub Sen's Lane; and on the west by Nilmadhub Sen's Lane.

A plan and specification of the lands required are filed in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 2032A.

The 17th August 1883.—Baboo Girish Chunder Deb is appointed to be an Honorary Magistrate for the municipal bench at Serampore, in Hooghly, and is vested with the powers of a Magistrate of the third class.

High Court Mukhtyars.

NOTIFICATION.

THE High Court are pleased to order that the security, required by Rule 1 of the Rules made by the High Court on the 17th May 1882, under section 16, clauses (*a*), (*b*), and (*c*), Act XVIII of 1879, shall be deposited with the Registrar of the Court on its Appellate Side on or before the 31st August 1883.

Failure to deposit such security by the prescribed date will result in the defaulter's name being struck off the list of selected applicants.

By order of the High Court,

C. A. WILKINS, *Offg. Registrar.*

FORT WILLIAM, *the* 10*th August* 1883.

Rule 1 *referred to above.*

"THE persons approved by the Court, and named in the list hereafter to be published, shall be admitted as Mukhtyars on their making in each case a deposit in the High Court of Government securities to the value of Rs. 1,000."

EDUCATIONAL NOTICES.

Calcutta University.

NOTICE.

THE Senate will proceed in the month of March 1884 to the election of a Tagore Professor for the term of one year, to commence on the 1st of September 1884.

The salary of the Professorship is Rs. 10,000 per annum, and the Professor will be expected to deliver a course of not less than twelve lectures upon one of the following subjects :—

(1)—The law of testamentary devise as administered in British India.
(2)—The law relating to damages.
(3)—The law relating to joint Hindu families.
(4)—The law relating to riparian rights, including the law of alluvium, diluvium, and the law of property in navigable and non-navigable rivers.

Candidates for the Professorship are requested to forward their applications to the Registrar on or before the 1st of January 1884, and at the same time to state on which of the above-mentioned four subjects they are prepared to lecture.

SENATE HOUSE, *the 23rd August* 1883. G. BELLETT, *Registrar.*

IN accordance with the resolution of Government, dated 21st August 1880, two agricultural scholarships of the annual value of £200 each, tenable for two years and a half at the Royal Agricultural College, Cirencester, will be awarded for the session of 1883.

An allowance of Rs. 1,000 will be made to each scholarship-holder for his journey to England, and a similar allowance for the return journey on the completion of his course.

Only natives of Bengal, Behar, or Orissa, who have passed the B. A. examination on the Physical side, will be eligible.

Applications will be received by the undersigned up to the 30th September next.

G. BELLETT, *Offg. Director of Public Instruction.*

CALCUTTA, *the 23rd August* 1883.

NOTICE.

IN accordance with Government of Bengal No. 287T of the 21st May 1881, Education Department, and No. 531 of the 11th April 1882, Medical and Municipal Department, notice is hereby given to those whom it may concern that the next half-yearly examination of compounders will be held, at 11 A.M., on Monday, the 22nd of October 1883, and subsequent days, at the Campbell Medical School.

2. Every candidate must produce a certificate signed by a qualified medical man, who knows of his personal knowledge, that he has worked for three years as a compounder, and is of opinion that he has a good practical knowledge of Materia Medica and Pharmacy.

3. All applicants will have to register their names and submit their certificates, accompanied with a fee of Rs. 3, on or before the 15th September 1883, at the office of the Superintendent, Campbell Medical School.

4. Should any candidate fail to pass the required examination, he will forfeit his fee.

S. C. MACKENZIE, M.D., *Surgeon-Major,*
Supdt., Campbell Medical School.

The 20th August 1883.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 893B.

NOTICE is hereby given that the Ninth Sale of Opium, the provision of 1881-82, will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Monday, the 3rd September 1883, at 11 A.M., and will comprise 4,450 chests, viz :—

Letter from the Government of Madras, No. 465, dated 24th February 1879, and enclosure.

Letter to the Government of Madras, No. 33C, dated 28th March 1879.

Letter to the Government of Bengal, No. 34C, dated 28th March 1879.

Endorsement from the Government of Bengal, No. 350T, dated 14th June 1879, and enclosures

Letter to the Government of Bengal, No. 1951, dated 24th December 1879.

Endorsement from the Government of Bengal, No. 1422—33S, dated 6th April 1880, and enclosures.

Letter from Lieutenant F. Pogson, dated 27th January 1883.

Letter from the Commissioner of Northern India Salt Revenue, No. 67C, dated 13th July 1883, and enclosures.

RESOLUTION.—A frequent objection to the salt-tax in this country is that it makes salt so dear that the people cannot afford to give it to cattle in quantities sufficient for the

health of their stock. In several European countries where salt is subject to a heavy duty means have been found for supplying owners of stock with cheap salt for the use of their cattle and sheep. Without attempting to prejudge the case in any way, and without committing the Government beforehand to any pledges which it may be found impossible or inexpedient to fulfil, it may be admitted that in India, where the bulk of the population is dependent on agriculture, it would be a distinct gain to be able to issue cheap salt for cattle, and the question of meeting this necessity in a way compatible with the safety of the salt revenue has more than once engaged the attention of the Government of India. On the last occasion on which the question was taken into consideration, it was suggested that the object aimed at would be secured if a process could be discovered by which salt could be rendered so unfit for human consumption that its restoration to an edible condition would be neither easy nor cheap, while it would still remain suitable for use by cattle. This suggestion commended itself to the Government of India, for, if this could be done, salt could safely be issued for stock at a comparatively cheap rate without coming into competition with salt intended for human consumption.

2. Experiments for denaturalising salt were accordingly undertaken in Bengal and the Punjab, details of the processes used in Germany and France having been obtained through the Secretary of State. The experiments were a failure, in so far that they did not satisfy the main condition that the restoration of the medicated salt could not be cheaply and easily effected, while the German and other processes were found either unsuitable or otherwise objectionable in this country. The problem of issuing salt for cattle in a form which will not endanger the public revenue, therefore, still remains unsolved.

3. The Governor-General in Council has again had the question under his consideration, in connection with a process devised by a private individual, and submitted for trial to the Commissioner of Northern India Salt Revenue. This process, like those previously tested by Government officers, has not given satisfactory results in practice. But His Excellency in Council is inclined to think, on perusal of the papers read in the preamble, that the experiments as yet made have not been as wide or exhaustive as the importance of the subject demands. If any satisfactory method could be devised which fully met the requirements of the case, a great boon would be conferred on the country, and it is hoped that a process may yet be discovered, which, if not satisfying all the conditions hitherto prescribed, may yet be sufficient for all practical purposes. His Excellency in Council accordingly requests that the Local Governments will be good enough to arrange with their chemical analysers, or with any other thoroughly skilled and competent officer, for the commencement of systematic and careful experiments in the direction indicated. The officer selected should be furnished with a complete copy of the papers containing the details and results of all the attempts already made, and the results of the experiments made under these instructions should be communicated to the Government of India. If any private person should wish to take up the enquiry, the Government will be glad to furnish him, on application, with copies of the correspondence read in the preamble to this Resolution.

No. 2877.—In exercise of the powers conferred by section 8 of the Obstructions in Fairways Act, 1881 (Act XVI of 1881), the Governor-General in Council is pleased to make the following rules for the fairways leading to the ports of False Point, Balasore, and Chittagong, respectively:—

1. No person shall, without permission of the Port Officer, do any of the following acts in a fairway leading to any of the said ports:—

(*a*) Fix any apparatus or part of any apparatus for fishing.
(*b*) Lay pieces of wood as floats.
(*c*) Spread or fix fishing nets.
(*d*) Raise an embankment.
(*e*) Cast or throw ballast or rubbish.
(*f*) Sink, strand, or abandon a vessel.
(*g*) Throw in or abandon any tree or trees, log of wood, spar or any other thing which would be likely to form into a snag, or to cause an accumulation of silt, or in any way to alter the conformation of the bottom of the fairway.

2. The owner or master of a vessel desiring to cast or throw ballast or rubbish in a fairway leading to any of the said ports may apply to the Port Officer for permission to do so, and he shall not, if the permission is granted, cast or throw the ballast or rubbish except at a place selected by the Port Officer for the purpose.

3. Any person desiring to place any apparatus for fishing, or spread any net, or to use any float, or to raise any embankment in a fairway leading to any of the said ports, may apply to the Port Officer for permission to do so. On receipt of such application, the Port Officer shall examine the site fixed upon by the applicant, and if satisfied that the placing of fishing apparatus, or the doing of any other act for permission to do which application has been made, will not cause or be likely to cause obstruction or danger to navigation, he shall report the matter to the Collector for orders, and the Collector, if similarly satisfied, shall grant permission. It shall be in the discretion of the Collector at any time to withdraw such permission, and to call upon the owner to remove the apparatus, nets, floats, or embankments within a reasonable time, and on failure on the part of the owner to do so, to remove them at the cost of the owner.

D. M. BARBOUR,
Secy. to the Govt. of India.

The following orders, issued by the Government of India in the Military Department are republished for general information.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

Simla, the 24th August 1883.

FURLOUGH AND LEAVE.

No. 466.—The undermentioned officers have been granted extensions of furlough by the Right Hon'ble the Secretary of State for India:—

PART II.

Advertisements.

[N B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of the Sonthal Pergunnahs will be put up to sale at the Dumka Collectorate on Friday, the 28th September 1883, corresponding with 13th Assin 1290 B.S.

The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold revenue-free to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3*rd*.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th*.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Calcutta, the 23rd August 1883.

J. GORDON, Chief Accte. & Dy. Secy.

(1450—1)

NOTICE.

PUBLIC WORKS DEPARTMENT, IRRIGATION BRANCH.

1. OFFERS are invited from private firms or companies desirous of taking over the steam transport service now kept up by Government on the Sone Canals.

2. Copies of the following documents relating to the service may be had on application to the Under-Secretary in this Department, Writers' Buildings, Calcutta, or to the Superintending Engineer, Sone Circle, Arrah, Shahabad :—

I.—Description of the steamers employed.

II.—General rules under which the service is now conducted, shewing also the fares charged and distances run.

III.—Detailed statement shewing the receipts and working expenses of the service during the year 1882-83.

3. The tolls leviable, under Act V (B.C.) of 1864, on boats or steamers plying in the Sone Canals are shewn in a notice published in the *Calcutta Gazette* for the 18th January 1882, Part I, page 59. They are in amount as follows :—

	Per 100 maunds of displacement. Rs. A. P.
Arrah Canal—	
Dehree to Arrah railway bridge	2 3 0
Buxar Canal—	
Bedadi to railway, Buxar	2 0 0
Patna Canal—	
Baroon to railway, Khagoul	2 15 0

4. The purchase of the steamers now employed on the canals must form an integral part of any tender. The descriptions of the steamers referred to in paragraph 2 of this notice are believed to be correct, but persons proposing to tender should examine the boats for themselves, as no errors of description will be admitted as a reason for cancelling a tender.

5. Reduced rates of tolls may, for a period not exceeding one year, be stipulated for ; but in that case the fixed intervals at which the steamers will run must be mentioned in the tender, and the maintenance of an effective service will be required as a condition of the concession.

6. The Government will, so long as a service is regularly carried on, cease from carrying passengers by boat or steamer, or goods not required for Government works.

7. No exclusive concession can be granted, the canals being open to all boats, whatever the motive power, on payment of the tolls prescribed by law.

8. It is proposed to make over the service, should a tender be accepted, from the 1st of October next, but a later date may be named.

9. All tenders must be addressed to the Secretary to the Government of Bengal in the Public Works Department, and must be accompanied by a receipt from the officer in charge of the Third Calcutta Division, or from some Executive Engineer for Rs. 500 earnest-money, to be forfeited if the person tendering fails to carry out the offer made. Tenders will be received up to the 1st of September next.

10. The highest or any tender will not necessarily be accepted.

J. M. HEYWOOD,

Joint-Secy. to the Govt. of Bengal,
P. W. Dept.

Commissioners for making Improvements in the Port of Calcutta.

NOTICE

UNDER SECTION 69 OF ACT V (B.C.) OF 1870.

JOHN ELIOT, M.A., *Meteorological Reporter to the Govt. of Bengal.*

CALCUTTA, the 26th August 1875.

The Indian Law Reports.

Published under Authority of the Governor-General in Council.

THE Reports appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series.

The Parts of each series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set.

Terms of subscription, payable annually in advance.

	Without postage.	With postage.
For the Calcutta Series...	Rs. 35	Rs. 40
„ Madras Series ...	„ 8	„ 9
„ Bombay Series...	„ 8	„ 9
„ Allahabad Series	„ 8	„ 9
Complete set	45	„ 50

The Price of each part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

	Rs.	A.
For a part of the Calcutta Series ...	3	8
„ „ Madras Series ...	1	0
„ „ Bombay Series ...	1	0
„ „ Allahabad Series ...	1	0
Complete set	4	0

Persons desiring to subscribe for or purchase the Reports, should apply to—

Messrs. Thacker, Spink and Co., Calcutta;
„ Thacker, Vining and Co.;
„ Higginbotham and Co., Madras;
The Government Central Book Depôt, Bombay;
The Government Book Depôt, Allahabad.

Notes on Forestry,

BY C. F. AMERY,

Deputy Conservator, Forests, N.-W. Provinces.

THIS little work, published with the approval of the Government of India, treats of the general principles of forest management in all its branches, and is recommended not only to forest officers, but to all who are interested in the progress of forest management in this country.

May be obtained of Messrs. King, King & Co., Bombay, and of Messrs. Wyman & Co., Calcutta. Price Rs. 3-8, or including postage, Rs. 4. Or of the publishers, Messrs. Trübner & Co., Ludgate Hill, London. Price five shillings.

Notice.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 17 stations on or near the coast of the Bay, with a chart and summary This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 30 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i.e.* from May, 15th, to November, 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 38 observing stations, and of rainfall recorded at 160 sub-divisional stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

JOHN ELIOT,
Meteorological Reporter to the Govt. of Bengal.

Meteorological Office, Bengal, the 3rd July 1883.

Rainfall, Weather, and State and Prospects of the Crops

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 25th August 1883.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
	BENGAL.		
	Western Districts.		
1	Burdwan, Aug 24 '83	2·37	Weather—very hot. Transplanting almost finished. Prospects fair. Fever prevalent.
	Raneegunge ...	4·0	
	Culna ..	0·4	
	Cutwa ...	2·3	
2	Bankoora, „ 25 „	0·51	Weather—hot and cloudy, with clear sky at intervals. Prospects of crops continue very promising. Early and late rice crops doing well. *Bali* and *talka* rice, hemp and Indian-corn being reaped and yielding a 12-anna outturn. Public health good.
	Bishenpore ...	1·03	
	Maliara ...	1·61	
	Khatra ..	1·84	
3	Beerbhoom, „ 25 „	0·35	Weather—hot and close. A few showers. Transplanting of rice crop finished in many places. Prospects of early crop good. Prices stationary. Health of district generally good.
	Rampore Haut ..	0·89	
4	Midnapore „ 25 „	1·63	Weather—seasonable. Prospects favourable, except in some parts of the Ghattal and Contai sub-divisions, where the paddy crops have mostly been damaged by inundation. Public health fair.
5	Hooghly, „ 25 „	1·12	Weather—hot and rainy. Prospects of crops good. Some sporadic cases of cholera reported. Public health otherwise good.
	Howrah „ 27 „	2·00*	Sufficient rain. *Aus* rice and jute being harvested. *Aman* rice being transplanted. About Rs. 10,000 worth of damage reported by floods caused by bursting of embankments. Sugarcane healthy.
	Colocberia ...	2·05	

Burdwan Div.

* For week ending 26th instant.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date
BENGAL.—*concld.*			
	Central Districts.		
PRESIDENCY DIVN. 6	24-Pergunnahs, Aug. 27 '83	0·70*	Weather—hot and clear with occasional rain. Prospects of both of early and late crops satisfactory. Transplanting of the latter is still going on in some parts of the district. Harvesting of early rice has begun. Public health good.
7	Nuddea, „ 25 „	.....	Weather—cloudy, rainy, and sultry. Harvesting of *aus* being rapidly carried on. Other crops doing fairly well. Fever on the increase.
	Kooshtea ...	0·29	
	Meherpore ...	0·56	
	Chooadanga ...	2·86	
	Ranaghat ..	0·68	
8	Khoolna, „ 25 „	0·81	Weather—rather warm and cloudy. Harvesting of *aus* and transplanting of *amun* continue. Rain wanted in some parts of the district. Public health generally good. Fever continues at Satkhira.
9	Jessore, „ 25 „	0·36	Weather—normal Harvesting of early crops is in progess. Transplanting of *amun* is still going on. Prospects seem to be favourable. General health good. Fever reported from some parts of Magura and Bongong.
	Jhenida ...	0·66	
	Magura ...	0·21	
	Narail ..	0·23	
	Bongong ...	0·65	
10	Moorshedabad, „ 25 „	0·14	Weather—extremely hot and close. A break in the rains. All crops promise well, but rain is beginning to be wanted for the late rice. *Aus* harvest has commenced; results favourable. Public health good.
RAJSHAHYE AND COOCH BEHAR DIVS. 11	Dinagepore Aug. 21 '83	1·12	Weather—hot and cloudy with rain at intervals. Rain is wanted in the south of the district for transplanting. The weather is favourable for *bhadoi* and jute.
12	Rajshahye, „ 25 „	2·39	Weather—very hot; slight rain. State of crops good. Fever prevails in some villages.
	Nattore ..	0·32	
13	Rungpore „ 24 „	0·06	Weather—hot and cloudy with very little rain. Transplanting of rice in low lands about to be brought to a close. Harvesting of *aus* going on. Jute is being cut. Other crops continue good. Public health generally good. Fever is increasing in the Sudder sub-division.
	Nilphamari ...	4·08	
	Kurigram ...	Nil	
	Gaibanda ...	0·38	
14	Bogra, „ 25 ...	0·34	Week has been almost rainless; only two slight showers fell; weather quite oppressive in consequence. Transplanting of *amun* has been retarded to some extent for want of rain. *Aus* outturn has been fair but jute will be only a moderate crop. Public health fair for this time of the year.
15	Pubna, „ 25 „	Nil	Weather—hot and close. Rivers falling. State of crops continues good. Rain wanted.
16	Darjeeling, „ 25 „	7·08	Weather—seasonable. Transplanting of late rice nearly complete. Millets in the hills promise well. Indian-corn scarcely realizing expectations. Cholera has disappeared from the hills; only four cases this week in the Terai.
17	Julpigoree, „ 25 „	3·38	Weather—seasonable. Prospects of crops fair. *Bhadoi* paddy nearly cut. Late rice nearly transplanted. Jute backward. Public health fair.
	Cooch Behar „ 23 ... up to 22nd.	3·26	Local showers and thunderstorms with considerable heat in the intervals. Transplanting of late rice still going on. Some *bitri* rice still remains to be cut. Jute is being cut. Public health good.
	Dinhatta .. up to 19th	0·41	
	Mathabhanga .. up to 18th.	1·07	
	Meckliganga ... up to 18th	1·03	
	Eastern Districts		
18	Dacca Aug. 25 '83	0·32	Weather—hot. *Aus* paddy and jute are being cut. *Roachia* paddy is being sown. Prospects of crops good.
	Manickganga ...	0·07	
	Munshiganga ...	0·65	
19	Furreedpore, „ 25 „	0·21	Weather—hot and dry, but rivers high. Harvesting of *aus* rice and jute going on. Sugarcane doing very well. Other crops good. A good deal of fever about.
	Goalundo ..	Nil	
	Madaripore ...	0·41	
20	Backergunge, „ 23 „	0·25	Weather—seasonable. Very close and hot. Prospects of crops good. Transplanting of *amun* continues. Cattle-disease still continues in the sub-division of Patuakhali.
21	Mymensingh. „ 24 „	0·34	Weather—warm owing to less rain. Transplanted rice promises better. Outturn of *aus* not yet reported. Rivers high. Fever somewhat prevalent, but general health good.
	Jamalpore ...	0·88	
	Kishoregunge ...	2·60	
	Attea ...	0·53	
	Netrokona ..	4·23	
22	Chittagong, Aug. 28 '83	1·69	Weather—hot with occasional rain. Harvesting of *aus* proceeding with fair outturn. Transplanting of *amun* still in progress. Prices steady. Public health good.
23	Noakholly, „ 23 „	1·72	Weather—sultry; occasional rain; maximum temperature 85·5°. Reaping of *aus* and transplanting of *amun* still continue. Young *amun* plants promising.
24	Tipperah, „ 23 „	2·46	Weather—seasonable. Sultry. Very little wind. State and prospects of crops good.
	Brahmanbaria ..	2·88	
	Chandpore ..	0·50	
25	Chittagong Hill Tracts „ 21 „	7·16	Heavy rain with thunderstorms. *Jum* paddy harvest begun. Plough paddy transplanting nearly complete. Cotton crop very short.
	Hill Tipperah „ 22 „	2·10	Weather—hot and rainy. Transplanting of *amun* and reaping of *aus* still continue. Sugarcane doing well. Public health good.
BIHAR			
26	Patna. Aug. 24 '83	2·67	Weather—very hot. Prospects of *bhadoi* favourable. Transplanting of paddy in progress. Cholera prevailing in the mofussil.
	Barh ...	0·25	
	Dinapore ...	1·10	
27	Gya, „ 25 „	0·56	Weather—very hot. A few light showers. Maximum reading of thermometer in the shade 98·6°. Around Gya and to the west and north rain is very badly wanted. In other places prospects slightly better. Cholera slowly abating, but is still bad in Aurungabad. Prices rising slightly.
28	Shahabad, „ 25 „	Nil	Weather hot. In Arrah rice crop seems to be a little injured by the long break in the rains.
	Buxar ..	0·96	
	Bhaboosh ..	1·75	
29	Durbhunga, „ 25 „	1·48	Weather—very hot. Prospects favourable, except where the crops have been damaged owing to the overflowing of the Bagmati and Kamla rivers. Prices stationary.

* For week ending 25th instant.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
	BEHAR—*concld*		
	Eastern Districts.—concld.		
PATNA DIVN.—*concld.* 30	Mozufferpore, Aug. 26 '83	2·34	Weather—generally fine, though occasionally cloudy and showery. The comparatively fine weather of the past week has been beneficial. The inundation is generally subsiding, and the flood water is slowly draining off the country, though the Bagmati is reported to have again risen slightly. The flood in all the rivers is said to have been the highest known. The number of houses which have fallen is very large. The *bhadoi* crops, especially maize, have been destroyed over large areas. The *aghani* crops have suffered in a less degree. Subscriptions for the relief of the poor in Mozufferpore town are being raised.
	Hajeepore ...	0·54	
	Seetamurhee ...	0·54	
31	Sarun, „ 25 „	0·86	Weather—close and sultry. Prospects generally fair. Rain wanted for transplanting paddy in high lands, and bring on the paddy already planted. Manufacture of indigo (first cuttings) completed with fair results. Public health good.
	Sewan ...	0·64	
	Gopalgunge ...	1·35	
32	Chumparun „ 25 „	2·36	Weather—cloudy, with rain. The Sikrehna flood has caused great damages to standing crops over particular areas. A few cases of fever reported. General health good.
BHAGULPORE DIVN. 33	Monghyr Aug. 25 '83	0·26	Weather—hot, with east wind. Crops generally in fair condition. Cholera abating in Monghyr town.
	Begusarai ..	1·56	
34	Bhagulpore, „ 25 „	0·57	Weather—very hot. Break in the rains. Prospects of crops generally good. Some damage has been done in the north by the unusually heavy floods from the Koosi and other rivers.
35	Purneah, „ 25 „	2·11	Weather—normal. State and prospects of crops satisfactory.
	Kissengunge ..	0·91	
36	Maldah, „ 25 „	1·55	Weather—humid and oppressive. Rainfall moderate. Reaping of early rice going on. Other crops thriving. Common rice selling at 19 seers per rupee. General health good.
37	Southal Perghs. „ 25 „	2·32	Weather—hot, with showers. More rain is wanted for the rice crop. The outturn of the Indian-corn will be below the average.
	Deoghur ..	1·83	
	Rajmehal ..	1·99	
	Jamtara ..	0·64	
	Pakour ...	1·58	
	ORISSA.		
ORISSA DIVN. 38	Cuttack Aug. 24 '83	2·45	Weather—cloudy, with alternate sunshine and rain. *Beali* in ear and in some places ripening. *Sarad* being transplanted and promising well. Sugarcane being manured. Price of rice stationary. Public health good. A few scattered cases of cholera reported.
39	Pooree, „ 23 „	0·62	Weather—hot. Sky occasionally cloudy. *Sarad* doing well. *Beali* ripening. Some damage done to low-lying crops in South Khoorda by flood. Sporadic cases of cholera reported from Koth lesh and Oldhar Pergunnahs, and small-pox from thana Banpur. There is cattle-disease in thana Gope. Common rice selling at from 22 to 42 seers per rupee.
	Khoorda ...	2·33	
40	Balasore, „ 24 „	1·61	Weather—hot and cloudy, with occasional drizzling rain. Weeding and transplanting of *sarad* paddy in progress. Re-cultivation in parts affected by the late flood of the Subarnarekha still going on. *Beali* crops in some places in ear. Public health good.
	CHOTA NAGPORE.		
	South-West Frontier Agency.		
41	Hazaribagh, Aug. 24 '83	1·74	Weather—warm and seasonable. State and prospects of crops continue good, but the insufficiency of rain is still complained of. Some of the *bhadoi* crops are ready for harvest. Cases of cholera are still heard of from the interior of the district. General health good.
42	Lohardugga, „ 25 „	1·52	Weather—seasonable. More rain wanted for transplanting in Palamow and towards Lohardugga. Prices steady. Cholera on the decrease in Gurhwa and Hossainabad. Fever prevalent in Lohardugga.
	Palamow ...	1·83	
43	Singbhoom, „ 24 „	4·09	Weather—generally bright, with a strong sun. Indian-corn yielding well. Prospects of early and late rice, and of all other crops promising. Cattle-disease reported from a few villages. General health good.
44	Manbhoom, „ 25 ...	1·93	Weather—cloudy and cool. Prospects of all crops exceptionally promising.
	Govindpore ...	2·96	Small-pox and slight cholera at Topechanchi; otherwise public health good.

Published for general information.

Explanation of Summary.—The normal means of air pressure and temperature are the arithmetical averages or means of the readings during the [illegible]. The *humidity* of the atmosphere is expressed as a percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast [illegible]. In the "observations, rainfall," the normal means are the numerical means or averages of the rainfall in that district determined from the returns sent in by the sub-[illegible] from that district, (*i.e.*) the total rainfall at the sub-divisional stations in the district sending in returns divided by the number of stations. A

* Mean of six days.

e week ending 24th August 1883.

Explanation—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If some of the returns are missing, the corresponding spaces in the total rainfall columns are left blank.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 24TH OF AUGUST 1883.

At the close of the preceding week, that is on Friday, the 17th instant, as was noted in the last report, there was a small barometric depression at the head of the Bay, not very far south of Saugor Island. The depression was, however, of feeble character and somewhat diffused, and it was a little difficult to define its exact position. The changes in the wind directions during the 18th and 19th in the north-west angle of the Bay showed that during the afternoon or night of the 18th instant it passed inland over Orissa, where it apparently partly filled up or disappeared. The wind velocities recorded during its advance were very small, and it was accompanied only by moderate rainfall The rainfall was very general, and moderately heavy on the 18th and 19th over the whole of Orissa, in the western parts of South-West Bengal, and in Chutia Nagpur, and with the setting in of south-easterly winds over the whole Province, which followed the advance and disappearance of the depression, rainfall became more general on the 20th, though on the 21st the area of rainfall again decreased, and general rain was received in Orissa and in South-West Bengal, though in small amounts only. At this period the barometer was above the normal all over the Province, except in the southern portions of Orissa, where there was a distinctly marked area of comparatively low pressure. A rapid general decrease of pressure now set in, which continued up to the 24th instant, and the area of comparative low pressure in the southern portions of Orissa intensified considerably, until on the 23rd and 24th it formed a clearly defined area of barometric depression, round which there was a well-marked cyclonic circulation of winds. The presence of this area of very low pressure (for on the 24th Gopalpur reported a pressure of 29·494″, and on the 25th 29·479″) has had a very considerable influence on the meteorology of Bengal for the second half of the week. From the 21st instant a strong easterly set of the winds in the whole of Bengal was noticeable, and this has continued up to the close of the week. South-easterly and easterly winds have thus prevailed over the whole Province, and on some days moderately strong south-easterly winds were blowing up to the further limits of Behar and over Chutia Nagpur, and there appears to be no doubt that the extension of the rains at this period to some portions of the North-West Provinces, which had previously been rainless for some time, was partly due to these south-easterly monsoon winds. During this period, from the easterly set of the winds in Bengal, comparatively little rain was falling over the greater part of the Province, except in Orissa. At the close of the week the well-defined area of low pressure still existed over Gopalpur, but the tendency to the cyclonic circulations of the winds was diminishing, and strong south-easterly winds were setting in over the Ganjam and Orissa coast, which would probably carry rain to the Central Provinces, and to Central India generally.

The changes of the barometer during the past week have therefore been of a marked character. On the 18th instant the pressure was a little above the normal over the whole Province, except in those portions of South-West Bengal which were affected by the depression; with its advance towards Orissa, this district on the 19th showed a pressure below the normal, while pressure was generally increasing over the whole Province. On the 20th the barometer was rising in all parts, and this rise continued on the 21st in the whole of the northern divisions, but a decrease set in over the southern divisions, especially in Orissa. From this period up to the 24th pressure has continued to decrease generally, the decrease being greatest in the south of Orissa, so that, while on this date the whole Province was generally only from 0·1″ to 0·15″ in defect; at Gopalpur the defect was at least 0·25″. On the average for the whole week pressure has therefore been below the normal by amounts which vary from ·012″ at Hazaribagh to ·06″ at False Point. The variations of the mean temperatures from the normals have been considerable, but they clearly follow the points in the meteorology of the week noted above, and thus while Orissa, which has been receiving comparatively heavy rainfall during the greater part of the week, shows a nearly normal temperature, Behar, where the rainfall has been scanty, shows a mean temperature in some cases between 2° and 3° above the normal.

In the summary for the past week, it was noticed that the wind velocities of the stations at the head of the Bay were below the normal amounts, and the same statement is true for the present week. The actual variations of the wind directions for the normal may be summed up from the previous descriptions, by saying that the winds have been much more easterly than usual, and the monsoon currents have been deflected towards the north-west coast of the Bay; the variations of the winds from their normal velocities may be seen in the following small table:—

Station.	Average daily air motion in August.	Actual daily air motion, August 17th to 24th,
Chittagong ...	145 miles.	86 miles.
Saugor Island ...	270 „	165 „
Calcutta ...	135 „	86 „
Burdwan ...	93·6 „	62 „
Cuttack ...	66·8 „	58 „
False Point ...	215·6 „	206 „

Thus it will be seen clearly that in Bengal the strength of the winds has been much below the average, for in most cases the actual wind velocity is not more than two-thirds the normal. In Orissa, however, the variation from the normal is comparatively small, and these numbers confirm the above statement as to the set of the monsoon currents in an easterly direction towards Orissa during the past week. The continued defect in the amount of wind motion in the Bay of Bengal monsoon current would appear to be connected with the lightness or almost absence of rainfall which has prevailed in Northern India for some time past.

The following table gives the usual summary of the temperature and rainfall data for each of the seven meteorological divisions of the Province.

Meteorological District.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean week.	Of week.			Rainy days.			Since 1st of month.		Since May 15th.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number.	Variation.	Average.	Normal average.	Average.	Normal average.
Orissa	92·9	75·6	87·4	79·1	83·4	+0·5	2·03	2·44	−0·39	4·6	4·0	+0·6	8·79	9·80	40·54	33·11
South-West Bengal ...	93·3	74·9	89·5	78·8	84·2	+0·9	1·24	3·09	−1·85	3·5	4·4	−0·9	8·71	10·80	27·53	35·33
East Bengal	91·3	75·8	87·0	78·5	82·7	+0·6	1·44	3·53	−2·09	3·5	5·0	−1·5	10·96	13·70	47·80	55·49
North Bengal	93·6	74·7	89·3	78·7	84·2	—	1·52	3·44	−1·92	2·7	4·2	−1·5	12·21	10·81	43·95	51·96
North Behar	93·3	75·0	89·1	79·1	84·1	+1·6	1·36	2·64	−1·28	2·5	3·6	−1·1	9·58	8·66	37·06	29·10

Chutia Nagpur	86·5	69·9	84·2	72·3	78·3	+0·7	1·61	3·44	−1·83	3·7	4·2	−0·5	9·06	11·26	33·94	35·37

It has been before noticed that during the past week the Bay of Bengal monsoon current has been very weak, so much so that at the head of the Bay it was only equal to about two-thirds of the normal strength. As may be expected, therefore, under these circumstances, the rainfall over the whole Province has been much below the normal during the past week. In no single Meteorological division does the rainfall at all equal the normal, and, taking the whole area into consideration, the rainfall of the Province has during the past week only been about one-half the amount received in normal years. The division in which the greatest defect has occurred is South Behar, where the actual amount received was only about 22 per cent. of the normal. South-West Bengal and East Bengal follow next with a rainfall of about 40 per cent. of the normal, while North Bengal, Chutia Nagpur and North Behar receive amounts varying from 44 to 51 per cent. of the average quantity. The district which was least in defect was Orissa, where a defect of only 16 per cent. was noticed. Taking the divisions to be more or less of equal value, the rainfall for the week over the whole Province has been 54 *per cent. below* the *normal* amount.

During the previous week, from the 10th to the 17th of August, North Behar and Orissa had been receiving a rainfall rather in excess of the normal, but all the other districts were much in defect, and combining the results in the previous report with those shown above, it may be stated that for the past two weeks South Behar, Chutia Nagpur, and Northern and Eastern Bengal have not received more than half the usual amount of rain, while South-West Bengal has been somewhat better off, and has received about 60 per cent. of the normal fall. There has, during the past week, been a distinct break in the rains for three or four days, which has been clearly felt in Behar and Northern Bengal, and to a smaller extent in Chutia Nagpur and South-West Bengal. In South Behar, in particular, the average of rainy days has been only 1·5 during the week, while Arrah, Dinapore and Jamui have received no rain at all. In this division the districts of Gya, Patna and Bhagulpore are particularly in defect, the rainfall not having averaged much more than three-tenths of an inch, and thus having been about one-tenth of the normal fall. The South-West Bengal, Nuddea, Jessore, and Burdwan districts show a marked deficiency of rain even above the other districts of the division; the last is a striking case, for hitherto, during this monsoon, Burdwan has been a centre of heavy rainfall. The districts in East Bengal, in which the largest defect during the week have occurred, are Furreedpore, Dacca, Backergunge, and Mymensingh, while North Bengal, Bogra, Pubna and Rungpore are most in defect. In this division, in the hills and over their base, the rainfall has been purely up to average. In Chutia Nagpur the districts are all about equally below the normal, but in North Behar the rainfall has been very local, and such stations as Durbhunga, Tajpore, Hajipore, Sewan, &c., have received only a five-tenths of an inch of rain. In Orissa, the Balasore district was much below the average, while the Pooree and Cuttack districts received rainfalls almost equal to the normal.

The number of rainy days during the week has been on the whole much below the normal amount. This was particularly the case in Behar, in North and in East Bengal, and to a less extent in South-West Bengal and Orissa. The variation from the normal in this respect is not, however, so large as the variation of the actual from the normal rainfall, so that it would appear that the rain showers have been light. The rainfall in the Province

from the 1st August up to the 24th does not on the whole vary very much from the normal. It is a little in defect in South Behar and in Chutia Nagpur, but elsewhere the variations from the normal are not large.

Saturday, 18th August.—Pressure had increased at all the reporting stations. The increase was smallest in South-West Bengal and in Orissa, where the barometric depression noticed on the 17th instant was still influencing the pressure. In South-West Bengal pressure was somewhat below the normal, but in other districts it was above the average. Temperature rose rapidly in all districts and was considerably above the normal, except at a few stations in South-West Bengal and Orissa, where rain was falling. The changes in wind directions were partly due to the advance of the barometric depression in a westerly direction towards Balasore. So far as the wind directions showed, the depression was at 10 A. M. about south-south-east of Saugor Island, but it was a feeble one, and gave rise to moderate winds only. In the other districts southerly and south-easterly winds were well established, and they prevailed even in Behar and Chutia Nagpur. The wind velocities, however, were feeble at most stations. Humidity in South Behar was comparatively small. Elsewhere it was about normal. Cloud proportion was very high in Orissa and South-West Bengal, but in Behar it continued small. Rainfall was generally light to-day over the whole Province. Most of the stations in Behar reported no rain. In the other divisions local showers only were received, though in the western and south-western districts of South-West Bengal, and in some portions of North Bengal, especially at the foot of the hills, rainfall was very general and moderate in amount. The heaviest rainfall reported to-day were Bogdogra (Rungpore) 3·21 inches, Kishoregunge 2·42 inches, Busseerhat 2 35 inches, Satkhira 2·10 inches, and Jehanabad 2·03 inches.

Sunday, 19th August.—Pressure decreased in Orissa, in South Behar, and at some stations in North Bengal; elsewhere pressure was generally increasing. Pressure was above the average of the day in all districts, except the west and part of the south-west, where it was distinctly below the average. This area was still slightly influenced by the small barometric depression which passed over the land on the afternoon of the 18th. Temperature changed very slightly since the 18th. It was below the normal in Orissa and at some stations in South-West Bengal, but was considerably above the average in almost all the other districts. The changes of wind direction in South-West Bengal and Orissa showed distinctly that the small barometric depression, which was on the morning of the 18th south of Saugor Island, had passed inland south of Saugor Island during that afternoon. Wind directions in the other districts continued strongly easterly, while in Behar the directions were even north-easterly. Wind velocities were, however, in all cases slight. Humidity in South and East Bengal and in Orissa was very high. It also appeared to be increasing in Behar. Cloud proportion was also very high in South and East Bengal, but in Behar it continued comparatively small. General rain usually moderate in amount fell in Orissa, in South-West Bengal, in East Bengal, and in Chutia Nagpur. In North Bengal rainfall was less general, and in South Behar only a few local showers were reported. North Behar received the smallest amount of rainfall. The following were some of the heaviest rainfalls recorded:—Fenny 2·55 inches, Comilla 2·10 inches, Bhubooah 1·75 inches, Rangamati 1·63 inches, Moheshrekha and Hetampore 1·53 inches.

Monday, 20th August.—Pressure increased at almost all stations. The increase was greatest in East and North Bengal, and it decreased towards the western divisions. Pressure was above the normal for the day by amounts which varied from 0·07″ at Dacca to 0 01″ at Cuttack, shewing clearly that pressure was relatively in defect in the districts nearest to the Central Provinces. Temperature was somewhat lower in East and North Bengal, and also at the stations in Behar and Chutia Nagpur, and was generally slightly below the normal. The principal change in the wind directions since the 19th was the development of a very strong easterly set in all the divisions of the Province. Wind velocities increased at most stations by small amounts, but they were still very small. Humidity decreased in East and South-West Bengal, but was increasing in North Bengal and Behar. The amount of cloud was also increasing in the two latter areas and decreasing in Orissa. Rainfall was generally moderate in amount, though irregularly distributed over the whole Province. In Chutia Nagpur and in some parts of North and South Behar, and in North Bengal, it has been tolerably general, and in some cases heavy showers are reported. In other districts the fall was less general. Darjeeling received 4 05 inches, Raigunge 3·08 inches, Netrokona (Mymensing) 2·72 inches, Mozufferpore 2·25 inches and Arareah 2·15 inches.

Tuesday, 21st August.—Pressure began to fall in Orissa, in Southern and Eastern Bengal, but rose generally in North Bengal, in Behar, and in Chutia Nagpur. Pressure continued relatively low in the southern and western portions of Orissa. In all districts, except Orissa, pressure was above the normal for the day. Temperature increased in South-West and East Bengal, where it was somewhat above the normal. In the other districts the changes were small and variable, though at Arrah a rapid increase of 4° was noted. The very strong easterly set of the winds, noticed in the report for the 20th continued over the whole Province. South-easterly winds prevailed even to the limits of Behar, which was a more favourable sign for the extension of the area of rainfall to the North-West Provinces. Wind velocities continued to increase slightly. Humidity again decreased slightly in South-West Bengal and in Orissa, but in the other districts the changes were not marked. Cloud proportion was comparatively low over the whole Province, except in North Bengal and Chutia Nagpur. In South Behar especially the sky was very free from cloud.

Rainfall was particularly light over the whole Province; in fact North Bengal and the greater part of Behar were practically rainless. Orissa, the western districts of South-West Bengal, and the Purneah district were the only areas that reported anything like general rain, but even in these districts the amounts did not average more than a few tenths of an inch. Only a few heavy local showers were reported; these were received at Buxa 1·95 inches, Darjeeling 1·45 inches, and Banpur (Pooree district) 1·20 inches.

Wednesday, 22nd August.—Pressure decreased considerably over the whole of the Province. The decrease was somewhat irregular, and was least in Orissa. Pressure continued abnormally low in Orissa, and particularly at the southern stations of this division. Pressure was below the normal for the day by amounts which varied from 0·07″ at False Point to 0·01″ at Patna. Temperature continued to rise generally over the whole Province, and was above the normal of the day at almost all stations. The easterly set of the winds noticed during the past two days was, if anything, still more strongly marked. South-easterly winds became even more pronounced and stronger in Behar than they were on the 21st. Wind velocities continued comparatively small over the whole Province. Humidity generally decreased, though some of the stations in Behar shewed an increase in the dampness of the air. Cloud proportion remained comparatively small over the whole Province.

Rainfall was again scanty over the whole Province, and only one or two districts in North Bengal close to the hills and Orissa reported anything like general rain. The amounts recorded even in these districts were on the whole small; while over the other areas rainfall was to a great extent absent. This was particularly the case over the greater part of North Bengal and in Behar, and thus a partial break in the rains had become established in these districts. The only heavy rainfalls recorded to-day were 2·82 inches at Cooch Behar, and 1·10 inches at Tumlook.

Thursday, 23rd August.—Pressure again decreased considerably over the whole of the Province. The decrease was on the average of the whole area equal to nearly a tenth of an inch, but it was actually greatest in South Behar, where at some stations it was between 0·12″ and 0·13″. South Behar and some parts of Orissa now constituted areas of relatively low pressure; but in all parts of the Province pressure was below the normal of the day by amounts, which varied from 0·17″ at False Point to 0·11″ at Durbhunga. Temperature rose generally over the greater part of the Province, especially in Behar. Temperature was above the normal at all stations by amounts which varied from 4° at Jessore to 0·5° at Cuttack. Winds became a little more variable since the 22nd. In Behar the south-easterly winds were less prominent, and the velocities were decreasing. The winds in South-West and East Bengal were strongly easterly in direction, but the the wind directions today were clearly influenced by the low pressures in Behar and in Orissa. Wind velocities were in all cases small. Humidity increased in North and East Bengal, but decreased in Orissa. It remained comparatively small in Behar. Cloud proportion was small in Behar and in some parts of Orissa, but elsewhere the sky was moderately clouded.

Rainfall continued light on this day, and was to a great extent confined to those districts which reported rain on the 22nd In all cases only small amounts were received, and over the greater part of the area they consisted of very small local showers. The only heavy showers fell in the districts in the hills, and thus Dinhatta reported 1·16 inches, Matabhangha (both in Cooch Behar) 1·07 inches, and Kalimpong (Darjeeling district) 1·06 inches.

Friday, 24th August.—The changes of pressure to-day were somewhat irregular. Generally there was an increase in North Bengal, in Behar, and in Chutia Nagpur, while pressure was falling in Orissa and South-West Bengal. Pressure was everywhere below the normal by amounts which varied from 0·19″ at Cuttack to 0·1″ at Hazaribagh. Temperature continued above the average by amounts which varied from nearly 3° at Ranigunge to 0·3° at Cuttack. Winds were again somewhat irregular, though the strong easterly set still continued. Feeble south-east winds continued to blow in Behar. The wind velocities over the whole Province were small. Humidity continued low in South Behar, but in North Behar it had increased. Elsewhere slight changes only were reported. Cloud proportion was generally increasing.

Heavy rain fell today in Orissa. A few districts in East and in North Bengal near the hills also received general rain, but elsewhere local showers only were reported. In North Behar, however, at one or two centres, heavy rainfall was received, but South Behar was practically rainless. The following were the largest amounts reported:—Buxa 4·4 inches, Sitamarhi 2·9 inches, Banpur 2·8 inches, and Motihari 2·36 inches; while the following stations received between one and two inches:—Khurdah, Bhuddruck, Cuttack, Saugor Island, Julpigoree, Mickligunge, Siliguri and Darjeeling.

METEOROLOGICAL OFFICE, BENGAL,
The 28th August 1883.

ALEXANDER PEDLER, F.C.S.,
Offg. Meteorological Reporter to the Govt. of Bengal.

MEMORANDA.

DURING the week ending 11th August 1883, births and deaths were reported to have occurred in the first class Municipalities in Bengal at the rates, respectively, of 20·6 and 32·2 per 1,000 of their population, against 17·3 and 28·7 per 1,000, respectively, during the preceding week ending 4th August, indicating a fair advance in the registration of both events.

2. These events were returned in the highest proportions from the following Municipalities :—

Births.	Ratio per mille.	*Deaths.*	Ratio per mille.
Arrah ..	39·5	Monghyr ..	83·2
Bhagulpore ..	38·9	Gya ..	64·2
Gya ..	35·5	Ranaghat ..	59·9
Burdwan ..	32·0	Bhagulpore ..	48 9
Santipore ..	30·2	Arrah ..	47·9
Serampore ..	29·4	Patna ..	45 4
		Chuprah ..	36 1
		Midnapore ..	31·0
		Poori ..	27·8
		Suburbs of Calcutta ..	25 0

3 From the figures in the subjoined table it appears that, excepting small-pox and injury, the mortality from which had declined to a small extent, all the other death-causes proved more fatal than during the preceding week :—

	Ratio per mille during the weeks ending—	
	11th August.	4th August.
Cholera	5 3	3·6
Small-pox	·3	·5
Fever	13·2	12·8
Bowel-complaints	5·0	3·9
Injury	·4	·5
Other causes	8·0	7 3

4. Of the above-named diseases, cholera, small-pox, fever and bowel-complaints were reported to have caused the highest mortality in the following towns :—

Cholera.	Ratio per mille.	*Small-Pox.*	Ratio per mille.	*Fever.*	Ratio per mille.	*Bowel-complaints.*	Ratio per mille.
Monghyr ..	37·1	Gya ..	4·1	Ranaghat ..	53·9	Chuprah ..	14·6
Gya ..	23·2			Monghyr ..	30·7	Patna ..	11·0
Arrah ..	12 0			Bhagulpore ..	29·9	Monghyr ..	10·0
Midnapore ..	7 7					Midnapore ..	9·3
Bhagulpore ..	7·2						
Krishnaghur	6 3						
Patna ..	6·2						

5. Distributed under the heads of *Sex*, *Class* and *Age*, the mortality of the week under notice stands as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males ..	33·1	Christians ..	23·6	Under 1 year ..	258·0
Females ..	31·3	Hindus ..	34·9	1 and under 5 years ..	59·5
		Mahomedans ..	26·2	5 and under 10 years ..	25·7
		Other classes ..	36·4	10 and under 15 „ ..	18·0
				15 and under 20 „ ..	19·9
				20 and under 30 „ ..	20·2
				30 and under 40 „ ..	21·2
				40 and under 50 „ ..	23·8
				50 and under 60 „ ..	20·5
				60 years and upwards ..	59·5

F. W. A. DEFABECK,

The 27th August 1883. *Officiating Sanitary Commissioner for Bengal.*

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, *g* gloomy, *t* thunder, *p* passing temporary showers, *d* drizzling rain.

ALEXANDER PEDLER,
For Meteorological Reporter to the Government of India.

GENERAL REMARKS AND EXPLANATIONS.

The present fluctuation statement of traffic for the Northern Bengal State Railway is submitted in this form in accordance with the instructions given in Government of India Circular No. 17R, dated July 9th, 1883. The general results of the month's working, as compared with the same period last year, cannot but be regarded as most satisfactory. Heavy increases have taken place in the despatches of Food-grain, Jute, Railway materials, Salt, Tea, and Tobacco, particulars of which will be found in the above abstract; while the decreases are inappreciable. The increase under Food-grain is particularly encouraging, seeing that this traffic has almost been extinct for the past two years.

The net increase is 5430·72 tons, or 47 50 per cent.

The following are the increases and decreases with their respective explanations :—

Food-grain ... ... Tons 1256·39

It appears from the above increase, and that recorded last month, that the traffic in this staple is reviving, and will no doubt do so if the Calcutta prices continue as favourable as they have been for the past few days. It will be observed from the abstract that the increase is both in upwards and downwards traffic, which points to a better demand from the hill districts.

Gunny-bags ... ... Tons 18·51

There has been very little doing in this article in Calcutta.

Jute ... ... Tons 676·71

Calcutta prices have remained very steady both for loose and baled jute.

Railway material ... ... Tons 2009·85

Of the total quantity carried under this head, 3265 60 tons coal for the Locomotive Department forms 2733 83 tons. The rest is made up of stores, &c., for the Dinagepore extension.

Salt ... ... Tons 1144·63

The despatches under this head have been very heavy during the past three months.

Sugar ... ... Tons 11·21

This increase will partially make up for recent short despatches.

Tea ... ... Tons 100 99

Though last year's tea season was a very successful one, it would appear from the above figures that the present one will equal it, if it does not exceed it.

Tobacco ... ... Tons 782·88

A very fair demand existing for local consumption and for shipment; the despatches in this staple have improved, and will, it is hoped, continue to do so.

Decreases.

Ale ... ... Tons 12·24

The despatches under this head are chiefly for the convalescent depôt stationed at Darjeeling, and they are regulated by the number stationed there.

Ginger ... ... Tons 37·43

There is no demand at present for this article.

Piece-goods ... ... Tons 31·52

The Calcutta markets have been very quiet and local markets being fairly stocked, a decrease was to be expected.

All other goods ... ... Tons 489·26

The decreases under this head continue. It is hoped they will be met by corresponding increases later on.

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 2033A.

GENERAL.—*The 24th August* 1883.—Mr. J. Monro, Commissioner of the Presidency Division, is allowed furlough for five months, under section 49, chapter V of the Civil Leave Code, with effect from the 24th November next, or any subsequent date on which he may avail himself of it.

The 28th August 1883.—Baboo Rakhal Dass Mookerjee, Deputy Magistrate and Deputy Collector, Howrah, is allowed leave for six months, under section 127 of the Civil Leave Code, with effect from the date on which he availed himself of it.

Baboo Bhoobuneshwar Sing, Deputy Magistrate and Deputy Collector, Bankoora, returned to duty on the forenoon of the 26th May 1883.

Mr. C. N. Bannerjee, Deputy Magistrate and Deputy Collector, Howrah, returned to duty on the forenoon of the 1st instant.

Mr. R. H. Anderson, Officiating Joint Magistrate and Deputy Collector, Barh, Patna, is allowed leave for six weeks, under section 71 of the Civil Leave Code, with effect from the date on which he may be relieved.

Mr. W. Grindlay, Officiating Joint Magistrate and Deputy Collector, Patna, is appointed to have charge of the Barh sub-division of that district, during the absence, on leave, of Mr. R. H. Anderson, or until further orders.

Mr. A. W. Paul, Joint Magistrate and Deputy Collector, 24-Pergunnahs, on leave, is appointed to act, until further orders, in the first grade of Joint Magistrates and Deputy Collectors, with effect from the forenoon of the 13th instant.

The 31st August 1883.—Mr. A. E. Staley, Officiating Joint Magistrate and Deputy Collector, Dacca, is appointed to act, until further orders, as Magistrate and Collector of that district.

The services of Mr. A. D'B. Gomess, Deputy Magistrate and Deputy Collector, Bhagulpore, are placed temporarily at the disposal of the Board of Revenue for employment on the special duty of acquiring land for public purposes.

Mr. Gomess is vested with the powers of a Collector under Act X of 1870.

POLICE.—*The 28th August* 1883.—Mr. C. Jennins, Assistant Inspector-General, Government Railway Police, is promoted to the third grade of District Superintendents of Police with effect from the 25th May last.

Mr. Jennius will continue in his present appointment until further orders.

Mr. A. H. James, District Superintendent of Police, Hooghly, is promoted to the third grade of District Superintendents of Police, with effect from the 25th May last, *vice* Mr. A. Anley, deceased.

Mr. B. Rattray, District Superintendent of Police, Pubna, is promoted to the fourth grade of District Superintendents of Police, with effect from the 25th May last, *vice* Mr. A. H. James.

Mr. Rattray will continue to act, until further orders, in the third grade of District Superintendents of Police.

Mr. W. B. Savi, Officiating District Superintendent of Police, Darrang, Assam, is appointed to be a District Superintendent of Police of the fifth grade, with effect from the 25th May last, *vice* Mr. B. Rattray.

Mr. G. W. S. Cox is promoted temporarily to the first grade of Assistant Superintendents of Police, *vice* Mr. J. F. Needham, on deputation as Assistant Political Officer at Sadiya in Assam.

Mr. Cox will continue to act as District Superintendent of Police, Howrah, until further orders.

Baboo Jadub Chunder Deb, Assistant Superintendent of Police, 24-Pergunnahs, is promoted temporarily to the second grade of Assistant Superintendents of Police, *vice* Mr. G. W. S. Cox.

Baboo Jadub Chunder Deb is also appointed to act in the first grade of Assistant Superintendents of Police until further orders.

Mr. T. C. Orr, Officiating Assistant Superintendent of Police, Monghyr, is appointed to be an Assistant Superintendent of Police of the third grade with effect from the 24th April 1883.

Mr. Orr is also appointed to act, until further orders, in the second grade of Assistant Superintendents of Police with effect from the above date.

Mr. F. H. Tucker, Officiating Assistant Superintendent of Police, Palamow, Lohardugga, is appointed to be an Assistant Superintendent of Police of the third grade with effect from the 24th April 1883.

Mr. Tucker is also appointed to act, until further orders, in the second grade of Assistant Superintendents of Police with effect from the above date.

Mr. A. B. Barnard, Officiating Assistant Superintendent of Police, Gya, is appointed temporarily to be an Assistant Superintendent of Police of the third grade with effect from the 24th April 1883.

Mr. Barnard is also appointed to act, until further orders, in the second grade of Assistant Superintendents of Police with effect from the above date.

Mr. H. C. Clogstoun, Officiating Assistant Superintendent of Police, Mymensingh, is appointed temporarily to be an Assistant Superintendent of Police of the third grade with effect from the 24th April 1883.

Mr. Clogstoun is also appointed to act, until further orders, in the second grade of Assistant Superintendents of Police with effect from the above date.

Mr. T. C. Orr, Assistant Superintendent of Police, Monghyr, is promoted to the second grade of Assistant Superintendents of Police, *vice* Baboo Nobo Kisto Ghose, retired.

Mr. Orr is also appointed to act in the first grade of Assistant Superintendents of Police until further orders.

Mr. F. H. Tucker, Assistant Superintendent of Police, Palamow, Lohardugga, is appointed to act in the first grade of Assistant Superintendents of Police until further orders.

Mr. A. B. Barnard, Temporary Assistant Superintendent of Police of the third grade, is confirmed in that grade, *vice* Mr. T. C. Orr.

Mr. Barnard is also appointed to act in the first grade of Assistant Superintendents of Police until further orders.

Mr. H. C. Clogstoun, Temporary Assistant Superintendent of Police, Mymensingh, is appointed to act in the first grade of Assistant Superintendents of Police until further orders.

The 1st September 1883.—Mr. C. E. Gouldsbury, Officiating District Superintendent of Police, Manbhoom, is allowed leave for seventeen days, under section 127, chapter X of the Civil Leave Code, in extension of the leave granted to him under the order of the 31st July 1883.

EDUCATION.—*The* 18th *August* 1883.—Baboo Nundo Gopal Banerjee, District Engineer, is appointed to be a member of the District School Committee of Manbhoom.

The 24th August 1883.—The following gentlemen are appointed to be members of the District School Committee of Noakholly:—

Baboo Chandra Kumar Roy, Munsif, *vice* Baboo Abinash Chandra Mukerjee, transferred.

Baboo Tarak Chandra Guha, *vice* Baboo Adyot Charan Dutt, deceased.

The 28th August 1883.—Mr. G. A. Stack, Professor, Patna College, is allowed leave for two months, under section 127, chapter X of the Civil Leave Code.

Baboo Bhyrub Chunder Banerjee, Pleader, High Court, Calcutta, is appointed to act as second Secretary to the Committee for the management of the Bethune School, during the absence of Mr. Monomohun Ghose from Calcutta.

The 30th August 1883.—Mr. W. Booth, Professor, Presidency College, returned to duty on the forenoon of the 28th July 1883.

The 1st September 1883.—Baboo Kali Kumar Mittra, Head Master, Patna Normal School, is appointed to act, until further orders, in the third class of the Bengal Subordinate Educational Service, *vice* Baboo Bireswar Chuckerbutty, on leave.

Baboo Sree Nath Dutt, Officiating Assistant Inspector of Schools, Chota Nagpore Division, is appointed to act, until further orders, in the fourth class of the Bengal Subordinate Educational Service, *vice* Baboo Kali Kumar Mittra.

FORESTS.—*The 25th August* 1883.—Mr. G. W. Strettell, Deputy Conservator of Forests, Sunderbuns Division, is allowed privilege leave for three months, with effect from the 1st September 1883.

JAILS.—*The 28th August* 1883.—Mr. P. Donaldson, Superintendent of the Buxar Central Jail, is allowed leave for seventeen days, under section 71, chapter V of the Civil Leave Code, with effect from the 15th proximo, or such subsequent date as he may avail himself of it.

Mr. H. G. Tayler, Assistant Superintendent of Jails, Buxar, is appointed to act as Superintendent of the Buxar Central Jail, during the absence, on leave, of Mr. P. Donaldson, or until further orders.

MEDICAL.—*The 28th August* 1883.—The privilege leave, for two months and nine days, granted to Assistant Surgeon Doorga Das Roy, under the order of the 22nd May last, is commuted to leave on private affairs for six months, under sections 129 and 139, chapter X of the Civil Leave Code, with effect from the 7th June 1883.

MUNICIPAL.—*The 25th August* 1883.—The Lieutenant-Governor approves the election by the Commissioners of the Bussirhat Municipality, in the district of the 24-Pergunnahs, of Baboo Judunath Basu to be their Vice-Chairman, *vice* Baboo Kunja Behary Chatterjea, resigned.

The 27th August 1883.—The Lieutenant-Governor approves the election by the Commissioners of the Kotechandpore Municipality, in the district of Jessore, of Baboo Sreedhar Roy, Sub-Registrar, to be their Vice-Chairman.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

NOTIFICATION.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 27th August 1883.—It is hereby notified that the Road Cess Committee of the district of Shahabad have determined to levy road cess for the cess year commencing from the 1st October 1883, at the maximum rate of six pies, or two pice, on each rupee of the annual value of lands, and of the annual net profits from mines, quarries, &c., and the said rate having been approved by the Commissioner of the Division, is hereby published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 27th August 1883.—It is hereby notified that the Road Cess Committee of the district of Sarun have determined to levy road cess for the cess year commencing from the 1st October 1883, at the maximum rate of six pies, or two pice, on each rupee of the annual value of lands, and of the annual net profits from mines, quarries, &c., and the said rate having been approved by the Commissioner of the Division, is hereby published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 28th August 1883.—It is hereby notified that the Road Cess Committee of the district of Julpigoree have determined to levy road cess for the cess year commencing from the 1st October 1883, at the maximum rate of six pies, or two pice, on each rupee of the annual value of lands, and the said rate having been approved by the Commissioner of the Division, is hereby published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 25th August 1883.—It is hereby notified for general information that, on the recommendation of the Commissioners of the Chittagong Municipality, the Lieutenant-Governor intends, under section 54 of Act V (B.C.) of 1866 (an Act to make better provision for the regulation of hackney carriages and palankeens in the town and suburbs of Calcutta), to extend the provisions of that Act to the said municipality, unless good reasons to the contrary be shown within one month.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 27th August 1883.—It is hereby notified for general information that, on the recommendation of the Commissioners of the Municipality of the Suburbs of Calcutta, made at a meeting, the Lieutenant-Governor approves the revised boundaries mentioned below for the operation of Act VI (B.C.) of 1878 within the said municipality, in modification of the boundaries specified in the notification dated the 27th August 1878.

A line commencing on the north of the Paramanick's ghat on the river Hooghly and along the northern side of the Paramanick's ghat road eastward to the point where it meets the Cassipore road, thence northward along the western side of the Cassipore road to its junction with the Dhariabagan road, thence eastward along the northern side of the Dhariabagan road to the place where it meets the Barrackpore trunk road, thence across the Barrackpore trunk road and eastward along the North Sinthee road to a point where it meets the Sinthee first lane, thence southward along the eastern side of the Sinthee first lane to the place where it meets the South Sinthee road, thence eastward along the northern boundary of the South Sinthee road to the point where the latter meets the Seven Tanks' lane, thence southward along the eastern side of this lane to the point where it meets the Dum-Dum road, thence eastward along the southern side of the Dum-Dum road to the point where it meets the Beerparrah third lane, thence southward along this lane and in a diagonal line across a paddy-field to the point where it meets Beerparrah first lane, thence southward along the eastern side of the Beerparrah first lane to a point where it meets the Gangooliparah lane, thence southward along the Gangooliparah lane to the point where it meets the Pykeparah road, thence eastward along the northern side of the Pykeparah road to its junction with the Belgatchia road, thence eastward along the Belgatchia road to the point where the latter meets the Eastern Bengal Railway line, thence southward along the western side of the railway line to the place where it crosses the Manicktollah road and joins with the Kancoorgatchee road, thence southward along the eastern side of the Kancoorgatchee road to the place where it touches the Narcoldanga main road, thence it crosses the Narcoldanga main road to Soorah road, thence southward along the Soorah road to the point where it meets the Balliaghatta road, thence eastward along the Balliaghatta road to the place where it meets the Nimtollah road, thence southward along the Nimtollah road to the point where it meets the Chowlputty road, thence westward along the northern bank of the Balliaghatta canal to a point opposite the Cooliah Tengrah third lane, thence it crosses the canal and southward along the Cooliah Tengrah third lane to the point where it touches the Chengreeghatta road, thence across the Chengreeghatta road to the point where it meets the Chengreeghatta lane, thence southward along the Chengreeghatta lane to the point where it meets the Tengrah road, thence westward along the Tengrah road to its junction with the Camardangah road (east), thence southward along the Camardangah road (east) to a point where it meets the Camardangah road (south), thence southward along the Camardangah road (south) to its junction with the Gobrah road, thence westward along the Gobrah road to the railway bridge No. 3 on the Calcutta and South-Eastern State Railway line, thence southward along the line of the railway to a point where it crosses over bridge No 4, thence westward along the northern side of the Tiljullah first lane to the point where it meets the Ghoogoodangah road, thence southward along the eastern side of the Ghoogoodangah road to the point where it meets the old Ballygunge first lane, thence eastward along the old Ballygunge first lane to the point where it meets the old Ballygunge third lane, thence southward along the eastern side of the above lane to the point where it meets the Bundel road, thence across the Bundel road and eastward to the point where it meets Hareeparah lane, thence southward and westward along the Hareeparah lane to the points where it touches the Gurriah Haut road, thence northward along the Gurriah Haut road to its junction with the Gurriah road, thence westward along the Gurriah road to the point where it meets the Hazrah, thence southward along Hazrah and Punditia roads to the point where the latter meets the Monoharpooker road,

thence westward along the Monoharpooker road to the place where it meets Monoharpooker third lane, thence southward along the Monoharpooker third lane to the point where it meets Dhacooriah road, thence across the Dhacooriah road to the point where it meets the Borage road, thence southward along the Borage road to the place where it meets the Mollahatty road, thence westward along the Mollahatty road to the point where it meets the Russa road, to the point where the same meets the Tallygunge bridge road, thence westward along the Tallygunge bridge road to the Tallygunge bridge, thence across the Tolly's nullah and westward along the Tallygunge circular road to the point where it meets the Boistubparrah first lane, thence along the Boistubparrah first lane to the point where it meets the Diamond Harbour road, thence northward along Diamond Harbour road to the point where it meets the Monimpur lane, thence westward along the Monimpur lane to the point where it joins the Budge-Budge road, thence eastward along the Budge-Budge road to the point where it joins the Bhookoylash road, thence northward along the Bhookoylash road to the point where it meets the Hurrobash road, thence westward along the Hurrobash and some roads to the point where the latter meets Tarratollah road, thence northward along Gurragatcha road to the place where it meets the Circular Garden Reach road, thence westward along the present boundary line to the point where it meets the river Hooghly.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 28th August 1883.—It is hereby notified that the Lieutenant-Governor intends, in the exercise of the power conferred on him by section 78 of the Municipal Act, V (B.C.) of 1876, and in accordance with the recommendation of the Commissioners of the Bogra Municipality, made at a meeting, to sanction the levying by the Commissioners, under section 122 of the Act, of a tax on carriages and horses and other animals mentioned in the third schedule of the Act, which are kept or habitually used within the municipality, at rates not exceeding those mentioned in the said schedule, with effect from the 1st October 1883, unless good reasons to the contrary are shown within one month from the date of this notification.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 28th August 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, in accordance with the recommendation of the Commissioners of the Meherpore Municipality, in the district of Nuddea, made at a meeting, and in the exercise of the power conferred on him by section 234, Act V (B. C.) of 1876, to extend the provisions of Part VII of the Act to the above municipality, with effect from the 1st October next, unless good reasons to the contrary be shown within one month from the date of the publication of this notification within the municipality.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 29th August 1883.—It is hereby notified for general information that, in the exercise of the power conferred on him by section 144 of the Code of Criminal Procedure, the Lieutenant-Governor directs that the order passed by the Magistrate of Midnapore, set forth below, regulating the passage of pilgrims to and from Pooree with a view to lessen the risk of the introduction of cholera in the town of Midnapore, be made permanent:—

Notice issued by the Magistrate of Midnapore.

"As there is danger of cholera being propagated in the town of Midnapore by pilgrims on their way to and from Pooree, the following orders are hereby issued under section 144 of the Criminal Procedure Code.

1. Pilgrims approaching the town by the Gurbetta and Keshpur roads will not be permitted to enter the town by those roads, but will be required to proceed to the Sudder Ghât by the cross road specially constructed for this purpose.

2. Pilgrims on their way from Pooree, wishing to proceed by the Gurbetta or Keshpur road, will be required to go from the Sudder Ghât by the route prescribed in paragraph 1 above.

3. Whatever route they come by, Pooree pilgrims will not be allowed to enter the town beyond the Nuton Bazar road without a pass from the District Superintendent, or such officer as he may authorize to grant such passes."

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 29th August 1883.—It is hereby notified for general information that, in the exercise of the power conferred on him by section 144 of the Code of Criminal Procedure, the Lieutenant-Governor directs that the order recently passed by the Magistrate of Midnapore, mentioned below, prohibiting the burning of dead bodies, and the committing of other nuisances on the banks of the two tanks, named Bidyadhar and Raulia, at Dantoon, on the trunk road to Orissa, be made permanent:—

Notice issued by the Magistrate of Midnapore.

"Whereas the water of the tanks, named Bidyadhar and Raulia, which are situated by the side of the public road in station Dantoon is used by the public, and whereas the said water is rendered foul by travellers, and villagers burning or throwing dead bodies on the banks of the said tanks, or near the water thereof, or committing other nuisances, and whereas the use of the water thus rendered foul may cause injury to health, it has become necessary to issue a notice under section 144, Criminal Procedure Code, to prevent the commission of the nuisances mentioned: wherefore notice is hereby issued for general information that no one shall do anything either by burning or throwing dead bodies on the banks of the said tanks or by committing other nuisances whereby the water of the said tanks which is used by the public, is rendered foul. Any one disobeying this prohibiting order will be liable to punishment under sections 291 and 188, Indian Penal Code."

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 29th August 1883.—It is hereby notified for general information that, in accordance with the recommendation of the Commissioners of the Madhubani Municipality, in the district of Durbhunga, made at a meeting, and in the exercise of the powers conferred upon him by section 13, Act V (B.C.) of 1876, the Lieutenant-Governor intends to declare that, for the purposes of the Act, the village of Maharajgunge and portions of the villages of Bhawra and Sapta shall be united with the above municipality, unless good reasons to the contrary be shown within one month from the date of the publication of this notification within the municipality and the villages referred to above. The boundaries of the municipality thus extended shall be as follows:—

On the North—By the village boundary between Madhubani and Magrowni, and between Madhubani and Ranti.

On the South—By a straight line from the point of meeting of Madhubani, Ranti, and Bhawra drawn west to a masonry pillar at the south-west corner of Madhubani, thence along the boundary between Madhubani on one side and Bhawra and Bhachi on the other.

On the West—By a straight line from the meeting points of Maharajgunge, Bhachi, and Sapta to the north-west corner of Raja Misser's tank, thence by a straight line running north-east to the meeting point of Kamal, Bhowanipoor, and Jugutpore.

On the North—By the boundary between Madhubani on one side and Jugutpore and Magrowni on the other.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 29th August 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the powers conferred on him by section 3, Act IV (B.C.) of 1865, to extend the provisions of the above Act to thanas Sudharam and Bamni, in the district of Noakholly, unless good reasons to the contrary be shown within one month from the date of the publication of this notification within the above thanas.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 30th August 1883.—In the exercise of the power conferred on him by section 314 of Act V (B.C.) of 1876, and on the recommendation of the Commissioners of the Rampore Beauleah Municipality made at a meeting, the Lieutenant-Governor intends to confirm the bye-laws set forth below, which have been framed by the Municipal Commissioners, unless valid objections to the contrary be shown within one month.

BYE-LAWS.

17*a*. No person shall, without the permission of the Commissioners, take an elephant along any of the public roads within the limits of the municipality except by such routes and at such hours as shall be fixed for the purpose by the Commissioners.

The penalty for infringement shall be a fine not exceeding Rs. 20.

17*b*. No person shall lead, drive, or in any way conduct along any of the public roads within municipal limits any cart laden with bamboos projecting beyond it, unless such cart be attended by more than one person.

The penalty for infringement shall be a fine not exceeding Rs. 2.

10*d*. When any private privy is to be constructed for the first time on a new site, notice of such intended construction shall be given to the Commissioners by the occupier of the premises not less than seven days before commencement.

The penalty for infringement shall be a fine not exceeding Rs. 5.

34*a*. Within the limits of the municipality the walls of all huts and other buildings made of grass, leaves, mats, or other inflammable materials shall be plastered on both sides with mud or some other non-inflammable substance of the thickness of one inch.

The occupier for the time being of the hut or other building will be held responsible for the carrying out of this bye law.

The penalty for infringement shall be a fine not exceeding Rs. 10.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 30th August 1883.—In modification of previous orders, the Lieutenant-Governor is pleased to appoint the Accountant-General to be *ex-officio* Auditor and Examiner of Municipal and Local Accounts, conjointly with the officer who may for the time being hold the substantive appointment of Examiner of Local Accounts.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 30th August 1883.—It is he reby notified for general information that, in the exercise of the powers conferred upon him bv section 59 of Act IV (B.C.) of 1876, the Lieutenant-Governor appoints the Accountant-General, Bengal, to be *ex-officio* Auditor of the accounts of the Corporation of the Town of Calcutta, conjointly with the officer who may for the time being hold the substantive appointment of Examiner of Local Accounts.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 3rd September 1883.—Under section 4 of Act IX of 1847, and section 3 of Act V (B.C.) of 1875, it is hereby notified that the dearah surveys of the banks of the Brahmaputra, in the districts of Dacca and Mymensingh, commencing from Bhyrub Bazar and extending upwards to the point of bifurcation of the Brahmaputra and the Jamuna, called also Jaboona, and of the banks of the rivers Megna, Ilsha, and Tetoolia, with their channels in the districts of Backergunge and Noakholly, commencing from island Gazeer Chur, in the district of Backergunge, and from the point where the districts of Tipperah and Noakholly meet, down to which the completion and approval of the dearah survey of the Megna was notified in the *Calcutta Gazette* of the 13th July 1881 (page 713), and extending southwards to the Bay of Bengal, including Dakhin Shahbazpore, Hattyah, and Sundeep, and other islands situated at the mouths of the Megna, with their intervening and boundary channels from base lines laid down by the dearah survey party, have been completed and approved by Government.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

The 31st August 1883.—The following letter, from the Consul-General for France at Calcutta, dated the 15th July 1883, is published for general information.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

Dated Calcutta, the 15th July 1883.

From—The French Consul-General at Calcutta,
To—The Secretary to the Government of India.

THE Minister for Foreign Affairs has informed me by telegraph that the following sanitary measures will, until the issue of new orders, be applied to ships coming from India, Indo-China, Ceylon, Malta, and Cyprus on their arrival in the French ports of the Mediterranean, the Ocean, and the Channel:—

1*st*.—In the French Mediterranean ports, suspected vessels, *i.e.*, vessels coming from India, Indo-China, Ceylon, Malta, and Cyprus will be submitted to a quarantine of seven days as far as crew and passengers are concerned. Disinfection and sanitary unloading of the ships are obligatory.

In case of established infection, the quarantine will last ten days, and the disinfection will be carried out with the greatest severity.

2nd.—In the French ports on the Ocean and in the Channel the quarantine of observation will be applied to all vessels coming from India, Egypt, Malta, and Cyprus.

Any infected vessel will be submitted to a quarantine of seven days. Disinfection of the ships is in any case obligatory.

JAVA ISLAND.—WEST COAST.

SUNDA STRAIT.

Destruction of Islands, Lighthouses, &c.

THE Government of India has received telegraphic information from the Consul at Batavia to the effect that, in consequence of a violent volcanic eruption on the island of Java, the southern entrance to Sunda Strait has been changed, some islands have disappeared, the Anjer lighthouse destroyed, and some other lighthouses in the neighbourhood damaged.

Note.—Masters of vessels proceeding thence are hereby warned.

By direction of the Government of Bengal,
J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 31st August* 1883.

[Second Publication.]

NOTIFICATION.

The 9th August 1883.—In the notification dated the 18th June 1874, published at page 1175, Part I of the *Calcutta Gazette* dated the 29th July 1874, the boundary between the districts of Sylhet and Tipperah was defined to be that laid down on the revenue survey maps of seasons 1860-61, and the boundary between Sylhet and Hill Tipperah that shown on the maps of seasons 1860-65 and marked on the ground by pucca pillars, but by an oversight the former boundary was described as ending, and the latter as beginning, at the Iktiarpur masonry pillar. To rectify this mistake, the Lieutenant-Governor is now pleased to declare that the following are the correct boundaries between the districts of Sylhet and Tipperah, and between Sylhet and Hill Tipperah :—

The common boundary between Sylhet and Tipperah extends, as defined on the revenue survey maps of seasons 1860-61, from Rampur masonry pillar on the north to the Khuejuri nuddee on the south.

The common boundary between Sylhet and Hill Tipperah commences westward at the Kuneajuri nuddee, and from that river to Iktiarpur masonry pillar is as laid down on the revenue survey maps of seasons 1860-61. Thence it extends eastward to the Chatterchura or Koylalyon hill station, as defined on the maps of seasons 1860-65, and marked on the ground by pucca pillars ordered by Government letter No. 1265, dated 31st March 1865, from the Secretary to the Government of Bengal to the Surveyor-General of India.

Note.—Pergunnah Mantala of the district of Tipperah is included in the civil criminal, and revenue jurisdiction of the district of Sylhet.

MALAY PENINSULA—WEST COAST.

MALACCA STRAIT.

PENANG OR PRINCE OF WALES' ISLAND.

Revolving Light exhibited from Muka Head.

THE Colonial Secretary, Straits Settlements, Singapore, has notified that, on and after the 15th August 1883, a light would be exhibited from a lighthouse erected on Muka Head on the Island of Penang.

The light is a *revolving* white light, showing alternate flashes and total eclipses. It is elevated 795 feet above the sea, and should be visible in clear weather, in every direction seaward, from a distance of 30 miles.

The lighthouse is situated on the summit of the hill, which is 750 feet high. The structure is a square two-storied building, with a circular tower in the centre, all of gray granite, on which the lantern is placed. The balcony and lantern are painted white: the rest of the building is unpainted.

Position—Latitute 5° 27′ 40″ N., longitude 100° 10′ 30″E.

COCANADA.

Replacing of Red Buoy off Point Gordeware (Godavery).

WITH reference to this Departmental Notice to Mariners, No. 28 of the 4th July 1883, the Port Officer, Madras, has notified that the large *red* buoy, with pole and basket, which was laid in 6½ fathoms, low water, to the northward of the Godavery shoals, has been replaced.

The bearing of the Hope Island light from the *red* buoy is S. by W. ¾ W.; the Vakalapudi light bears from the buoy N. W. by W. (magnetic).

Approaching Cocanada from the southward by night, a ship should not haul in for Vakalapudi light till it bears W. N. W.; by day, she should pass fully half a mile northward and eastward of the buoy.

By direction of the Government of Bengal,
J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

DECLARATION.

The 29th August 1883.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for opening out new roads on the south and west of Taltollah Bazar and widening the narrow portions of Taltollah Lane for the improvement of the Baman Bagan Bustee, it is hereby declared that for the above purpose pieces of land Nos. 46 and 50, Jaun Bazar Street; No. 1, Taltollah Bazar Street; Nos. 3, 7, 8, 10, 76, 77, and 78, Taltollah Lane, measuring, more or less, nine cottahs, fourteen chittacks and twenty-seven square feet (*9cots. 14chs. 27s. ft.*), situated in the town of Calcutta, in the district of the 24-Pergunnahs, are required. The boundaries of the lands required are as follows:—*Portion marked A on plan.*—On the north partly by premises No 46, Jaun Bazar Street, and partly by the public drain; on the east by the public drain; on the south partly by the public drain and partly by Taltollah Lane; and on the west partly by premises No. 78, Taltollah Lane, and partly by premises No. 46, Jaun Bazar Street. *Portion marked B on plan.*—On the north by the public drain; on the east by Taltollah Bazar Street; on the south by premises No. 1, Taltollah Bazar Street, No. 50, Jaun Bazar Street, and Nos. 76 and 77, Taltollah Lane; and on the west by Taltollah Lane. *Portion marked C on plan.*—On the north by Taltollah Lane; on the east and south by Taltollah Lane; and on the west by premises No. 10, Taltollah Lane. *Portion marked D on plan.*—On the north and east by Taltollah Lane; on the south by premises Nos. 7 and 8, Taltollah Lane; and on the west by Taltollah Lane. *Portion marked E on plan.*—On the north, east, and south by Taltollah Lane, and on the west by premises No. 3, Taltollah Lane.

A plan and specification of the land required are filed in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

DECLARATION.

The 31st August 1883.—Whereas it appears to the Lieutenant-Governor that land is required to be taken up by Government at the expense of the Naraingunge Municipality for a public purpose, viz., for a trenching ground for the burial of nightsoil, it is hereby declared that for the above purpose a piece of land measuring, more or less, 5 beeghas 7 cottahs and 1 chittack of standard measurement, situated in the village of Khanpore, pergunnah Khizirpore, in the district of Dacca, is required. It is bounded on the—

North—By the cultivated lands of Dino Nath Goala and Bewra Nama.

South—By the low lands north of the Dacca road belonging to Kunjo Behari Basack and others.

West—By the beel east of Khetro Mohun Bania's bari and cultivated lands of Indrojit and Khetro Mohun Banias.

East—By the low ditch west of Dalu and Misri Tanti's bari and lands.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 29th August 1883.—Under the power vested in him by the concluding portion of section 141 of the Code of Criminal Procedure, the Lieutenant-Governor hereby directs that the injunction issued by the Deputy Magistrate of Lalbagh, in the district of Moorshedabad, upon Rai Dhunput Singh Bahadoor of Azimgunge, directing him to abstain from removing three blocks of stone which have fallen into the river Bhagirati, near his house, shall be of full force and effect for three months from the date on which the Deputy Magistrate's order ceased to be in operation, viz., the 23rd July 1883.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

[Second Publication.]

DECLARATION.

The 20th August 1883.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction of a building for the police outpost of Dingrah, in the village of Bongroura, pergunnah Badour, district Purneah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 bighahs 10 cottahs and 9 dhurs of standard measurement, bounded on the north by the Ganges and Darjeeling road; on the south by the Kast of Shaik Bahardi; on the east by the Kast of Mani Ram Barhi and the Kast of Najaf Ali; and on the west by the Dingrah post office and its compound, is required within the aforesaid village of Bongroura.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT,—BENGAL.

The 3rd September 1883.

No. 299.—*Notification.*—This department's notification No. 290 of the 20th August last, transferring Mr. J. C. Wyatt, Assistant Engineer, first grade, to the Nagpore Railway Surveys is hereby cancelled.

CIVIL BUILDINGS.

The 3rd September 1883.

No. 300.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the site of the Post Office at Julpigoree, in the village of Khurria, pergunnah Baikuntpore, zillah Julpigoree, it is hereby declared that for the above purpose a piece of land measuring, more or less, 1 bigha 6 cottahs and 8 chittacks of standard measurement, bounded on the north by the Julpigoree police station compound, south by Lal Chand Kundoo's godown, west by the public road leading to the bazar, and east by the Kurla river, is required within the aforesaid village.

This declaration is made, under the provisions of section 6, Act X of 1870, to all whom it may concern.

The 4th September 1883.

No. 301.—*Leave.*—Baboo Bhoobun Mohun Bose, Assistant Engineer, first grade, Rajshahye Division, is granted one year's furlough, under section 131 of the Civil Leave Code, with effect from the 16th instant, or such date as he may avail himself of it.

RAILWAYS.

The 4th September 1883.

No. 302.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the junction railway on the east side of river of Hooghly, in the villages of Garifa and Naihati, pergunnah Hablishahar, zillah 24-Pergunnahs, it is hereby declared that for the above purpose a piece of land measuring, more or less, 182 beegahs 16 cottahs 12 chittacks of standard measurement, bounded on the north by the other lands of Garifa; on the west partly by the lands already taken up for bungalow, &c., purposes in connection with Hooghly Bridge works, and partly by the other lands of Garifa and Naihati; on the south by the other lands of Naihati; and on the east partly by the other lands of Garifa and partly by the Eastern Bengal Railway, is required within the aforesaid villages of Garifa and Naihati.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern

G. F. E. S. NEILL, *Major*, M.S.C.,
Under-Secy. to the Govt. of Bengal, P. W. Dept.

HIGH COURT NOTICE.

High Court Mukhtyars.

NOTIFICATION.

IN supersession of the notification dated the 10th August 1883, published in the *Calcutta Gazettes* of the 15th, 22nd, and 29th August 1883, the High Court are pleased to order that the security required by Rule 1 of the Rules made by the High Court on the 17th May 1882, under section 16, clauses (*a*), (*b*), and (*c*), Act XVIII of 1879, shall be deposited with the Registrar of the Court, on its Appellate Side, on or before the 17th November 1883.

Failure to deposit such security by the prescribed date will result in the defaulter's name being struck off the list of selected applicants.

By order of the High Court,

C. A. WILKINS, *Offg. Registrar.*

FORT WILLIAM, *the 31st August* 1883.

SMALL CAUSE COURT NOTICES.

IN modification of the notification in force, notice is hereby given, under section 14, Act XI of 1865, that, subject to the orders of Government, the Judge of the Courts of Small Causes of Krishnaghur, Ranaghat, and Bongong will, in the month of September 1883, hold his sittings in the Bongong Court from the 18th instead of from the 19th, and sit again in the Ranaghat Court from the 25th instead of from the 26th of that month.

For all subsequent months the previous notification shall prevail.

BROJO MOHUN DUTT, *Offg. Judge.*

RANAGHAT SMALL CAUSE COURT, *the 28th August* 1883.

UNDER section 14, Act XI of 1865, it is hereby notified that the Judge of the Court of Small Causes at Monghyr will, subject to orders of Government, hold additional sittings in the Small Cause Court at Monghyr on Monday, the 17th, and Tuesday, the 18th of September 1883.

WOOMA CHURN DUTT, *Offg Judge.*

BHAGULPORE SMALL CAUSE COURT, *the 1st September* 1883.

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of the Sonthal Pergunnahs will be put up to sale at the Dumka Collectorate on Friday, the 28th September 1883, corresponding with 13th Assin 1290 B.S.

The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold revenue-free to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3*rd*.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th*.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Notes on Forestry,

BY C. F. AMERY,

Deputy Conservator, Forests, N.-W. Provinces

THIS little work, published with the approval of the Government of India, treats of the general principles of forest management in all its branches, and is recommended not only to forest officers, but to all who are interested in the progress of forest management in this country.

May be obtained of Messrs. KING, KING & Co., Bombay, and of Messrs. WYMAN & Co., Calcutta. Price Rs. 3-8, or including postage, Rs. 4. Or of the publishers, Messrs. TRÜBNER & Co., Ludgate Hill, London. Price five shillings.

Notice.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1st.—Bay of Bengal Daily Report giving observations taken at 17 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P.M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2nd.—Bengal Daily Report containing observations taken at 30 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 10 A.M. observations of each day is printed in time for the evening mail. This report for the present will only be published during the south-west monsoon, *i.e.* from May, 15th, to November, 15th. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 38 observing stations, and of rainfall recorded at 160 sub-divisional stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

JOHN ELIOT,
Meteorological Reporter to the Govt. of Bengal.
Meteorological Office, Bengal, the 3rd July 1883.

The following report on the working of the Jute-Warehouse and Fire-Brigade Act in the Municipality of Howrah, during the year 1882-83, is published for general information.

COLMAN MACAULAY,

Secretary to the Government of Bengal.

No. 412, dated Chinsurah, the 20th August 1883.

From—J. BEAMES, Esq, Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit herewith a printed copy of the report on the working of the Jute-Warehouse and Fire-Brigade Act in the Howrah Municipality during the year 1882-83. I have no remarks to make.

Annual Report on the working of the Jute-Warehouse and Fire-Brigade Act in the Howrah Municipality during the year 1882-83.

IN accordance with the provisions of section 27 of Act V of 1879 (B C), the following is a report on the working of the Jute-Warehouse and Fire-Brigade Act during the official year ending the 31st March 1883.

2. There were 32 jute-warehouses licensed, which shows an increase of 8 over the previous year. This was owing to a plentiful crop of jute and consequent low prices.

3 One new jute-warehouse was established during the year by the Ghoosery Jute Mills Company, the plans for which were duly inspected by the Commissioners at a special meeting and approved.

4. The total income amounted to Rs. 5,385, under the following heads :—

	Rs.	A.	P.
License fees	5,200	0	0
Fines	185	0	0
Total ..	5,385	0	0

5. There has been an increase of Rs. 1,280 as compared with the income of the previous year This increase was partly caused by the increased trade as explained in paragraph 2, and partly to the concession made in granting licenses for portions of premises, which was not the practice formerly.

6. A list specifying the jute-warehouses for which licenses were granted is given in appendix I.

7. The expenditure on the inspection of jute-warehouses amounted to Rs. 602, as follows :—

	Rs.	A.	P.
Salary of Inspector	600	0	0
Contingencies	2	0	0
Total ..	602	0	0

8. A statement showing the prosecutions instituted during the year is given in appendix II.

Fire-brigade.

9. The fire-brigade establishment continued under the police, the reserve force Inspector acting as Superintendent. There were 20 fires reported during the year. Out of the above number, 16 were confined to private dwellings consisting of tiled and thatched huts, and originated in the majority of instances from negligence on the part of the occupants. The losses, however, in such cases were inconsiderable. There were four large fires. One at Sheebpore, in a timber yard, causing a loss estimated at Rs. 7,000. The cause of the fire is unknown. The Calcutta fire-brigade gave prompt assistance, and helped to get the fire under; and were it not for their timely aid, the conflagration might have extended to the Sheebpore Jute Mills, which stand within a few yards. Another fire occurred at Ghoosery at the Express Cotton Mills, which did serious damage to the machinery and a portion of the building, causing an estimated loss of Rs. 9,000. This fire is said to have been caused by friction in the spindles. Two other large fires took place. One at the Howrah Jute Mills destroying a large quantity of jute and a portion of a warehouse, the estimated loss being Rs. 16,000. The cause of the fire is supposed to have been spontaneous combustion. The other fire was at Ghoosery, at the premises of Messrs. Harton & Co., which destroyed a large quantity of rope, oil, coal-tar, &c., and it was understood to have been caused by lightning. The loss was estimated at Rs. 10,000.

10. The fire-brigade attended all the fires, and did their best to put them down. A statement of particulars is given in appendix III.

11. The following is an abstract of the expenditure in the Fire-Brigade Department during the year :—

	Rs.	A.	P.
1 Superintendent	300	0	0
Personal allowance	420	0	0
2 Tindals at Rs. 9	216	0	0
2 Do. at „ 8	192	0	0
18 Khalasees at Rs. 6	1,281	11	6
2 Syces at Rs. 6	144	0	0
Feed and keep of horses	262	10	6
Rewards	117	0	0
Repairs to fire-engines	303	11	6
Contingencies	180	12	0
Total ..	3,417	13	6

E. V. WESTMACOTT,
Chairman.

The 1st August 1883.

APPENDIX I.

Jute-Warehouses for which Licenses were granted during the year 1882-83.

EXHIBITION OF SILK COCOONS.

THE following correspondence is published for general information.

COLMAN MACAULAY,
Secretary to the Government of Bengal.

Circular No. 54 (Fibres and Silk), dated Simla, the 4th October 1882.
Endorsed by—The Government of India, Revenue and Agricultural Department.
COPY forwarded to the Government of Bengal for information.

No. 1440, dated Simla, the 9th August 1882.

From—J. M. DOUIE, Esq., Junior Secretary to Financial Commissioner, Punjab,
To—The Secretary to Government, Punjab.

I AM directed to submit in original, for the information of His Honor the Lieutenant-Governor, a letter, No. 1696, dated 7th June, from the Commissioner of Amritsar, and its enclosure, containing a report on the exhibition of silk cocoons held at Madhopur in the month of May.

2. The number of exhibitors was 720, as compared with 417 last year. There was a large increase both of agriculturist and non-agriculturist exhibitors, and but for disease among the worms, which has now spread to the foreign stock, the prospects of the new industry would be very bright. Last year only silkworm-rearers from Gurdaspur and Kangra were present, but this year a few came also from Sialkot, Amritsar, and Hoshiarpur.

3. The result of the prevalence of disease among the silkworms has been a greatly diminished outturn in the cocoons. The falling off has been so serious that Messrs. Lister and Co. have had to obtain some part of the requirements of their filature from Bengal, and the Commissioner of Amritsar fears that, unless prompt measures are taken to replace the diseased by healthy stock, sericulture in his division will suffer "irreparable injury." The main original cause of the disease in Kangra and Gurdaspur is probably the uncleanliness of the huts in which the worms are reared: apparently when disease has once begun in a rearing shed it spreads by contagion. It appears from a recent article in the *Indian Agriculturist* that more than once silkworm-rearers in Italy have lost the whole of their stock from disease, and have had to depend for fresh rearing on ova imported from other countries. The Financial Commissioner agrees with Colonel McMahon in considering that there is serious risk of the extinction of a very promising industry. He thinks, therefore, that the Commissioner of Amritsar should be asked to submit, after consultation with the agents of Messrs. Lister and Co., a special report as to the measures he deems necessary, and as to the cost which the destruction of the diseased, and the supply of healthy, seed would involve. At present we are quite in the dark on the latter point. Messrs. Lister and Co. might, in their own interests, bear a considerable part of the expense, and the rest might be met by the District Committees, aided, if necessary, by help from Government.

4. Rupees 1,700 were given away in prizes. The Gurdaspur District Committee contributed Rs. 1,000, the Kangra District Committee Rs. 400, and Messrs. Lister and Co. Rs. 300.

5. The Deputy Commissioner of Gurdaspur proposes that in future years the exhibition should be held at Pathankot instead of Madhopur. There is no accommodation at Madhopur for the natives who attend the exhibition, and they have to encamp in the open air: there is also no bazar to speak of, and the mere supply of food is a difficult matter. Pathankot is just on the borders of Kangra and Gurdaspur, and would be convenient for the people of both districts. Mr. Lyall therefore recommends that, next year at any rate, the exhibition should take place at Pathankot.

6. The extract from the annual revenue report of Kangra, which is enclosed, will show that a good deal is being done in that district to encourage sericulture. It would be a good thing if some of the tea-planters in the Kangra Valley would take up the industry, for their example might teach the natives better methods.

Extract from the Annual Revenue Report of the Kangra District for the year 1881-82.

SERICULTURE is likely to make great strides in this district if it is properly fostered A separate report has been sent to the Commissioner in connection with this subject and the Madhopur fair. I need say nothing more now, except that the amalgamation of the Nurpur and Gurdaspur fairs at Madhopur was a most unlucky step, and that, to ensure any success in sericulture in Kangra, the fair must again be made local. Rearing sheds on proper principles must be built if the worms are to be protected from suffocation and death. These should, in the first place, be built by the District and Municipal Committees. People should be taught to manage their worms on a proper principle, and should be taught the simple problem that if X is the selling price of any article, the man who can produce it for X — 1 anna is making a profit, while he who produces it for X + 1 anna will in the end be ruined. It is only a difference of 2 annas, but it is the difference between prosperity and ruin. It is a difference caused by one sericulturist working on scientific principles, and another by rule of

thumb. Mulberries of the China and Phillipine variety should be planted in large quantities, nor should planting of country mulberries be neglected.

We have hitherto been playing with sericulture, but if we now exert ourselves there is no reason why it should not in time rival tea in its capacity for bringing wealth into the district. If we had only four or five acres of tea in the district turning out 1,000lbs. of tea, the result would be inappreciable. Now that we turn out a few maunds of cocoons annually the result is also inappreciable. If we turned out several thousands annually—and there would be no difficulty in this—we might consider that a fresh source of wealth was open to the people. In sericulture I consider we have as yet done nothing: we might do a great deal.

No. 1696, dated the 6th June 1882.

From—Colonel C. A. McMahon, Commr and Supdt., Amritsar Division,
To—The Secretary to the Financial Commissioner, Punjab.

I have the honour to submit a copy of Deputy Commissioner of Gurdaspur's No. 24 of the 30th May, furnishing a report on the annual exhibition of silk cocoons held at Madhopur on the 2nd May.

2. The Deputy Commissioner writes (paragraph 8):—"Although the number of exhibitors was far greater than in previous years, the samples of cocoons were on the whole inferior, owing to the disease among the silkworms originating, it is said, with the indigenous country seed and spreading to the foreign, owing to the natives not having been careful enough to prevent the two kinds of seeds from getting mixed;" and again in paragraphs 14 and 17:—"The worms this year, both from indigenous as well as foreign seed, were much diseased; the outturn of cocoons and silk was consequently much affected. The loss from country seed was very considerable. The quality of the country cocoons is not nearly so good as the product from foreign seed. The sickness was among the indigenous worms much greater than among the foreign seed ones. It is said that silk reeled from country cocoons is much lighter than that reeled from foreign ones."

3. The disease thus affected both the quantity and quality of the outturn.

4. In my last year's report I suggested that the remains of the country stock should be bought up and destroyed, fearing that, if this were not done, "the newly imported foreign stock would sooner or later become infected," and this suggestion was supported by the Financial Commissioner. His Honour the Lieutenant-Governor "did not think it necessary to take any special steps in the matter," on the ground that "it is not likely that the moths and worms of the two classes are allowed to mix."

5. It would now appear, however, that they are allowed to mix, and that the disease has already spread to the imported worms. The danger arises, not only from the actual mixing of eggs,* as supposed by the Deputy Commissioner, but from the two classes of worms being fed together on the same tray; for Pasteur has shown experimentally that, when a healthy worm crawls over a leaf defiled by a diseased worm, the disease passes to the previously healthy worm, and eventually to the eggs laid by the moth of the latter.

6. I understand that, owing to the spread of the disease, Messrs. Lister & Co. are unable to obtain enough silk to keep their filature in constant work, and that they are now seeking supplies of silk in Bengal.

7 It seems to me that, unless some attempt is made to stamp out the disease, there is danger of this new Punjab industry suffering irreparable injury.

8. Pasteur has shown that the disease can be readily detected in the *moth* with the aid of a microscope, and the eggs of diseased moths being destroyed, healthy broods can be insured. This method is not applicable to the scattered households of the Punjab silkworm-rearers; and the only plan that suggests itself to me is to destroy all the eggs belonging to a rearer whose worms appear to be diseased, substituting good seed in exchange for doubtful seed.

9. From the Deputy Commissioner's remarks, contained in paragraphs 1 to 5, Pathankot would appear to be generally a more convenient place for future exhibitions than Madhopur.

10. The steady increase in the number of exhibitors shown in paragraph 11 of the Deputy Commissioner's report is very gratifying.

No. 24, dated the 30th May 1882.

From—Colonel E. P. Gurdon, Deputy Commissioner, Gurdaspur,
To—The Commissioner and Superintendent, Amritsar Division.

I have the honour to report that the annual exhibition of silk cocoons was held at Madhopur on the 2nd May.

2. Messrs. Lister and Co. had expressed a preference for Madhopur over Pathankot as the place where the exhibition should be held, and you had yourself, upon my referring the matter to you, directed me to communicate with Messrs. Lister and Co. on the subject.

3. Although manifestly most convenient for Messrs. Lister & Co., Madhopur is not well adapted for the exhibition in the interests of natives attending the show, and many

* The young worms are probably mixed as they are hatched from day to day, trays of worms being made up daily as the hatching proceeds.

complaints were made on the subject. There is no serai or place at Madhopur where the natives bringing cocoons to the exhibition can live, and they are obliged to remain out in the open under the shade of such trees as the place affords. There is no bazar at Madhopur, consequently it is no easy matter providing food-supplies for a number of natives. The cocoons having been for the last two years arranged for exhibition in Messrs. Lister & Co.'s buildings, many of the native owners of cocoons complain that they find a difficulty in getting back their cocoons; at any rate there is a great deal of delay about the matter, and many of them go away rather than be bothered by waiting long at an inconvenient place like Madhopur for the return of their exhibits.

4. If rain or a dust-storm happened to come on during the time of the exhibition, the native public would be exposed to much suffering; and as it is, the being located out in the open, exposed to the heat of a May sun, is no small inconvenience.

5. I would propose that future exhibitions be held at Pathankot, where there is a commodious serai for travellers, as also a zailghur; and the town, with its bazars and shops, necessarily affords vast conveniences for procuring supplies which Madhopur can never possess. The cocoons could be arranged in the Government school.

6. The exhibition passed off very well and was very largely attended, and bore quite the appearance of a fair. Mr. Gladstone, Judicial Assistant Commissioner, was deputed by the Deputy Commissioner, Kangra, to attend. I myself presided and gave the prizes, and the judges appointed were Mr. Moore, an expert of the firm of Messrs. Lister and Co., Mr. Barrett of the Forest Department, and Lala Sanjhi Mal, B A, Officiating Extra Assistant Commissioner, who had acted in this capacity on one or two previous occasions

7. The Gurdaspur district contributed Rs. 1,000, Kangra Rs. 400, and Messrs. Lister and Co. Rs. 300, as they did last year: Messrs. Lister and Co also presented three handsome silver medals.

8. Although the number of exhibitors was far greater than previous years, the samples of cocoons were on the whole inferior, owing to the disease among the silkworms originating, it is said, with the indigenous country seed and spreading to the foreign, owing to the natives not having been careful enough to prevent the two kinds of seeds from getting mixed.

9. The following table shows the number of exhibitors:—

District.	Exhibitors.		Total.
	Cultivators.	Mixed professions.	
Gurdaspur district	170	368	538
Kangra ,, ...	20	141	171
Sialkot ,, ...	1	1	2
Hoshiarpur	1	.....	1
Amritsar ,, ...	4	2	6
Nadaon (Kangra district)	.....	2	2
1883	206	514	720
1881	124	323	447

10. The prizes were awarded on the same principles as last year, agriculturists and mixed trades and professions being separately classed. Some few persons, whose names had not been entered in the list, and who arrived late, were admitted to the competition. The examination by the judges commenced at 10 A. M., and prizes were awarded at 5-30 P. M. by the President

11. The following table shows the result as compared with former years:—

	1876.	1877.	1878.	1879.	1880.	1881.	1883.
Cultivators	.....	56	Not stated.	No exhibition.	63	124	206
Other professions	.....	108			166	323	514
Exhibitors .	98	164	.....	.....	229	447	720

The result is satisfactory, and shows that, year by year, the industry of sericulture is acquiring a firmer root.

12 I annex also below a tabular statement of the number of agriculturists and other trades or professions, arranged according to their respective tehsils, together with the number of prizes and amount thereof awarded :—

Serial number.	Tehsil.	Cultivators.	Other professions.	Number of Prizes.		Amount of Prizes		Total amount of prizes.
				Cultivators.	Other professions.	Cultivators.	Other professions.	
						Rs.	Rs.	Rs.
1	Pathankot	65	193	5	36	55	689	744
2	Shakargarh	75	107	11	.....	120	.. .	120
3	Gurdaspur	48	62	6	8	35	170	205
4	Batala	2	0	.. ...	2	... ..	15	15
5	Amritsar	4	2	.....	...	... ..	.....	.
6	Kangra	5	51	1	5	5	70	75
7	Sialkot	1	1	.....	..	.....	... .	.
8	Nurpur	25	100	4	32	20	405	425
9	Hoshiarpur	1	.....	.....	.....	.. ..	.....	...
10	Nadaon (Kangra district)	...	2	.....	2	... ..	75	75
	Total 1882 ...	206	514	27	83	235	1,424	1,659
	Total 1881 ...	124	223	32	81	500	1,060	1,560

13. The following shows a detail of fresh silk cocoons produced by agriculturists and mixed classes :—

Year	Cultivators.		Mixed Professions,		Number of persons who used Government Leaves.	
	Seed.	Produce.	Seed.	Produce.	Cultivators	Other professions.
	M. s. c.	M. s. c.	M. s. c.	M. s. c.		
1881	0 13 0	54 15 0	2 5 0	258 0 0	35	135
1882	0 31 8	65 28 0	2 12 0	203 11 0	251	.. ...

14. As previously stated, the worms this year, both from indigenous as well as foreign seed, were much diseased. The outturn of cocoons and silk was consequently much affected. The loss from country seed was very considerable.

15. The tehsildars had made known to the rearers that the silkworms required feeding by night as well as day. Subjoined is shown a statement of classes of prizes and number of persons of each class to whom prizes were given, together with the amount of the prizes. The table shows first the prizes for foreign seed cocoons, and afterwards for the country seed product :—

Classes	Prizes for Foreign Silk Cocoons, Gurdaspur.			Prizes for Foreign Silk Cocoons, Kangra.		
	Number of persons of each class.	Amount of prize of each class.	Amount of prizes given.	Number of persons of each class.	Amount of prize of each class.	Amount of prizes given.

16. The proportion of foreign to that of country cocoons produced is calculated to be 1 maund of foreign to about 1 maund 8 seers and 9 chittacks of country cocoons.

17. The quality of the country cocoons is not nearly so good as the product from foreign seed. The sickness was among the indigenous worms much greater than among the foreign seed ones. It is said that silk reeled from country cocoons is much lighter than that reeled from foreign ones.

18. I regret to say I cannot keep the report for the returns of plantation of mulberry trees, as the tehsildars have not sent them in, but considerable progress has been made in the matter, and by another year I hope there will be a large distribution of the China mulberry trees in the district, which are principally valuable owing to the trees coming into leaf much earlier than the common country tree.

19. The proportion of cocoons exhibited to the whole quantity produced is calculated to have been as 1 maund to 29 maunds 35 seers 8 chittacks.

20. I am doing my best to influence the villagers to extend the cultivation of the mulberry tree as much as possible throughout the district, so as to give further impetus to sericulture.

21. The members of Messrs. Lister & Co.'s firm were most courteous and obliging in all matters connected with the exhibition, and I beg to tender them my acknowledgments for the same. Lala Sanjhi Mal, Officiating Extra Assistant Commissioner, rendered most useful services on the committee of judges, and in compiling *precis* of facts from which I have drawn up the present report.

Statement showing the result of exhibition of Cocoons held at Madhopur on 2nd May 1882.

E. P. Gurdon, *Colonel*,
Deputy Commissioner.

No. 162, dated Lahore, the 28th August 1882.

From—H. C. Fanshawe, Esq., Under-Secy. to Govt., Punjab, Revenue Dept.,
To—The Junior Secretary to Financial Commissioner, Punjab.

I am directed to acknowledge the receipt of your letter No. 144 of 9th August, submitting a report on the exhibition of silk cocoons held at Madhopur in the Gurdaspur district last May.

2. It is much to be regretted that the prevalence of disease among the country worms, and the spread of it to the foreign worms, should have so seriously affected this promising industry, and should have reduced the amount of cocoons exhibited to 50 maunds below that shown in the previous year, although the number of exhibitors was nearly double of those in 1881. The Lieutenant-Governor will await the receipt of the special report which the Financial Commissioner proposes to call for on the feasibility of the plan suggested by the Commissioner, Colonel McMahon, of buying up and destroying all diseased worms. If, however, the disease of country worms is caused by the dirtiness of the habitations of the breeders, the prospect of the foreign worms entirely escaping this evil is not altogether a hopeful one.

3. It is proposed that the exhibition next year shall be held at Pathankot, and, for the reasons given in the correspondence, this recommendation is sanctioned by the Lieutenant-Governor. When the place of exhibition was transferred to Madhopur in 1880, it was expressly stated that this was an experimental change only, until the results of the transfer had been seen; and as it is found that the exhibitors are put to a good deal of inconvenience at Madhopur, there are not sufficient reasons to induce the Lieutenant-Governor to decide that the exhibition shall continue to be held there in future.

4. The arrangements for the exhibition appear to have been well made, and the acknowledgments of the Lieutenant-Governor should be conveyed to the officers connected with them, and to the district officers of Gurdaspur and Kangra, for the interest taken by them in the development of sericulture.

No. 163, dated Lahore, the 28th August 1882.

From—H. C. FANSHAWE, Esq., Under-Secy. to Govt., Punjab, Revenue Dept.,
To—The Secretary to the Government of India, Revenue and Agricultural Dept.

I AM directed to forward, for the information of the Government of India, copy of a report on the exhibition of silk cocoons held at Madhopur in the Gurdaspur district in May last, and of my letter No. 162 of to-day's date.

2. On receipt of the report which the Financial Commissioner is calling for on the subject of the destruction of the diseased worms, a copy of it also will be submitted for information.

Nos. 2305-9T—F, dated Darjeeling, the 1st November 1882.

From—COLMAN MACAULAY, Esq, Secretary to the Government of Bengal, Financial Department,
To—The Commissioners of the Rajshahye and Cooch Behar, Patna, Bhagulpore, Presidency, and Burdwan Divisions.

I AM directed to forward the accompanying copies of the papers noted in the margin, containing a report on the exhibition of silk cocoons held at Madhopur, in the Gurdaspur district of the Punjab, in May last, and to request that you will be so good as to report, after consultation with the district officers and the leading silk manufacturers, on the feasibility of establishing such an exhibition at some central place.

Letter No. 163, dated 28th August 1882, and enclosures, from the Under-Secretary to the Government of the Punjab, to the Secretary to the Government of India, Revenue and Agricultural Department.

No. 21M.A., dated Alipore, the 16th February 1883.

From—J. WARE EDGAR, Esq, C S I., Offg. Commr. of the Presidency Division,
To—The Secretary to the Government of Bengal, Financial Department.

WITH reference to your letter No. 2308T.—F., dated the 1st November last, and enclosures, I have the honour, after consultation with the several district officers and the leading silk manufacturers in this division, to submit the following report on the feasibility of establishing an exhibition of silk cocoons at some central place in this division.

2 Of the five districts in this division, silk is manufactured only in two, viz. Nuddea and Moorshedabad. In the former district, however, the industry has almost become extinct. There is only one silk filature at Plassy, and the work there is not a very flourishing one. The Collector, in consultation with the manager of the above concern, is of opinion that exhibitions of silk cocoons, if held in Bengal, could not but lead to good results, as they would no doubt give an impetus to the rearing of this crop. The manager thinks that, as the district of Moorshedabad is one of the largest silk-producing districts in Bengal, the exhibition should be held at Berhampore, which is the most central place for the purpose.

3. The Collector of Moorshedabad consulted Mr Gallois of Messrs. Louis, Payen & Co, and Mr. Stocks, manager for the Bengal Silk Co., on the subject Mr Gallois advocates a yearly exhibition at Berhampore, and proposes a committee of European silk manufacturers and zemindars of silk-growing districts in Bengal to draw up rules, &c., under which the exhibition should be held yearly. He also thinks that a fund for the purpose might be raised by subscription. Mr. Stocks would also hold a yearly exhibition at Berhampore. Mr. Marshall, sub-manager for the Bengal Silk Co., who has paid much attention to rearing silk worms, and who has consulted Mr. Stocks, states that there are three principal *bunds** in the year, and that one exhibition should be held every year, the first year in one bund, the second in another, and the third in the last bund, recurring the fourth year to the bund first started with, and so on He is also of opinion that small sums of money, accompanied by a copper medal, inscribed with the name of the rearer, might be given in the shape of prizes. Mr. Marshall adds—"The Collector remarks that the costs of the exhibition must be met by private subscriptions. Had Government started these exhibitions when I proposed them—*vide* page 30 of Mr. Geoghegan's Blue-book on the silk industry of India, dated 1874—all the silk firms would most liberally have contributed to them.

"Now, however, times are so much changed for the worse that the silk firms are retrenching expenses to the very lowest limits. If the exhibitions have to be kept up by private subscriptions, they would fall through. The firms *cannot afford* to support them"

* The word *bund* has thus been defined by Dr Hunter:
"There are in each year three seasons, locally termed *bunds*, of hatching the eggs, spinning, and gathering the cocoons The November *bund*, from 1st October to end of February, March *bund* from 1st March to 30th June, July (or harest) *bund* from 1st July to 30th September. The worms thrive best in the cold season, and the silk is then better in quality and much more valuable. The March *bund* is not so good, and the rainy season *bund* the worst."

4. As regards native manufacturers, the Collector consulted the Sub-Divisional Officer of Jungipore, and he agrees with him in thinking that Government should publish "a pamphlet in Bengali describing briefly the advantages of such an exhibition, the objects which Government has in view, &c." It would not, he thinks, be advisable for him or any one else to attempt to explain to them till the matter had been put into shape by experts.

5. The Sub-Divisional Officer of Kandi does not think a central exhibition feasible. He thinks that, though some large manufacturers might exhibit, the bulk of the people would not take the trouble.

6. Mr. Mosley's own opinion is that, if such exhibitions could be regularly held, great benefit would ensue, but he doubts very much whether they *could* be so held. He writes:—"To be of benefit they must receive contributions from all the districts, to contrast the varieties of worm and difference of culture, and the people of this part of Bengal are too apathetic to throw themselves into such an arrangement, and the prospect of gain would be too remote; and I am afraid that, when the time came to try and raise money for prizes and expenses, it would be found that Mr. Gallois is too sanguine. From what I know of this district, and the neighbouring one of Maldah, I should imagine that there is not the remotest chance of realizing sufficient subscriptions"

7. I am afraid there is much truth in Mr. Mosley's remarks, and that it would be scarcely possible to get exhibitors from any distance to bring their cocoons to Berhampore, but the experiment seems well worth trying. It seems unlikely that the entire funds for the exhibition would be contributed locally—at least in the beginning. The expenditure, however, need not be heavy, and the Government might contribute half, up to a maximum of Rs. 800, for the first year.

No. 900T.—F., dated Darjeeling, the 6th June 1883.

From—COLMAN MACAULAY, ESQ., Secretary to the Government of Bengal, Financial Department,

To—The Commissioner of the Presidency Division.

I AM directed to acknowledge the receipt of your letter No. 21M.A., dated the 16th February last, in which you submit the report called for in connection with the proposal of the Government of India for holding a local exhibition of silk cocoons. The silk-producing districts of your division are Nuddea and Moorshedabad, and the gentlemen connected with the silk industry in those districts are of opinion that such an exhibition would lead to good results, and that it should be held at Berhampore. You are somewhat doubtful whether it will be possible to induce exhibitors living at a distance to bring their cocoons to Berhampore, but you are of opinion that the experiment is well worth a trial, and you recommend that, as it is unlikely that the whole of the funds required would be contributed locally, at least in the beginning, Government should contribute half the necessary expenditure, up to a maximum of Rs. 800, for the first year.

2. In reply, I am desired to say that the Lieutenant-Governor concurs with you in thinking that such an exhibition would probably lead to good results, and that the experiment is in any case worth making. The most suitable place appears to be Berhampore, and I am desired to request that you will be good enough to place yourself in communication with the Collector of Moorshedabad with a view to making the necessary preliminary arrangements. A committee should be formed, under the chairmanship of the Collector, and should include European and native spinners and manufacturers of the district. Representatives from other districts in Bengal should also be invited to join. The committee should be asked to draw up rules for the management of the exhibition for the approval of Government, and should take steps to raise local subscriptions for the purpose. The Lieutenant-Governor will be prepared to double any amount that may be so raised up to a limit of Rs. 2,000. The time at which the exhibition should be held should be one of the matters for the consideration of the committee. Mr. Rivers Thompson considers that, in view of the approaching International Exhibition to be held in Calcutta in the ensuing cold weather, the exhibition of silk cocoons should be postponed until the cold-weather of 1884. This, however, will depend largely on the opinion of the committee. The Lieutenant-Governor will be glad to be informed of the progress made in carrying out these instructions.

No. 9M A., dated Calcutta, the 18th August 1883.

Memo. by—The Commissioner of the Presidency Division.

COPY, with enclosures, forwarded to the Secretary to the Government of Bengal, Financial Department, with reference to his No. 900T—F, dated the 6th June last. A further report will be submitted in due course.

No. 948G., dated Berhampore, the 11th August 1883.

From—H. MOSLEY, ESQ., Collector of Moorshedabad,

To—The Commissioner of the Presidency Division.

WITH reference to your No. 5M.A., dated the 14th June last, forwarding copy of Bengal Government No. 900T—F, dated the 6th idem, I have the honour to forward herewith a copy of the minutes of a meeting held on the 8th instant to consider the question of holding exhibitions of silk cocoons, together with copies of the circular and letters alluded to in the fourth resolution.

Meeting held to consider the question of holding Exhibitions of Silk Cocoons, the 8th August 1883.

PRESENT :

Collector of Moorshedabad, *Chairman.*
J. W. Stocks, Esq.
E. Gallois, Esq.
W. C. Smart, Esq.
C. A. Dubus, Esq.
Baboo Radhica Churn Sen.
Baboo Sriram Dutt.
„ Mokund Lal Barman.
Rai Dhunput Sing Bahadur.
Baboo Gobind Jivan Hazra.
„ Trolukho Nath Naik.
Moulvie Fazle Rubbee.

Resolved—

1. That such exhibitions would be very beneficial to ryots, zemindars, and silk manufacturers.

2. That a committee of the following gentlemen be appointed with liberty to the Collector to add, and that a sub-committee, as under, be appointed to draw up rules and to collect subscriptions.

Committee.

Collector of Moorshedabad, *Chairman.*

Sub-Committee.

Collector of Moorshedabad.
J. W. Stocks, Esq.
E. Gallois, Esq.
Baboo Boikunta Nath Sen.
C. W. Marshall, Esq.
Baboo Radhica Churn Sen.
„ Ram Das Sen.
Moulvie Fazle Rubbee.
Baboo Sriram Dutt.

3. That Messrs. Stocks and Marshall be Joint Secretaries.

A subscription list was passed round, and *resolved*—

4. That a circular be sent round and letters written to the Collectors of Beerbhoom, Maldah, Rajshahye, Nuddea, Midnapore, Burdwan, and Hooghly.

H. MOSLEY,
Chairman.

The 8th August 1883.

GOVERNMENT has circulated a report of an exhibition of silk cocoons in the Punjab, and suggested that similar exhibitions should be held at Berhampore.

A committee has accordingly been appointed to draw up rules and raise subscriptions for expenses and prizes. At the first meeting the 12 gentlemen present promised Rs. 725 donations and Rs. 200 annual subscription : in all Rs 925.

There is no doubt but that an annual exhibition of cocoons from all the silk districts would be of immense benefit to all—ryots, manufacturers, and zemindars. Ryots, spinners, and manufacturers would all benefit by the improvement which the spirit of emulation would induce. Better silk would be produced and a better market obtained, consequently all engaged in the production would reap larger profits. Zemindars would benefit largely from the improved position of their tenants.

But to effect this the exhibitions must be annual, and for this money is necessary.

I therefore appeal to all zemindars and manufacturers to subscribe liberally for this excellent object, and thus help to revive a failing industry and increase the prosperity of the districts concerned.

BERHAMPORE,
The 9th August 1883.

H. MOSLEY,
Collector of Moorshedabad.

Circular No. 946G, dated Berhampore, the 9th August 1883.

From—H. MOSLEY, Esq., Collector of Moorshedabad,

To—The Collectors of Beerbhoom, Maldah, Rajshahye, Nuddea, Midnapore, Burdwan, and Hooghly.

I HAVE the honour to inform you that, in accordance with the wishes of Government, a committee has been formed to arrange for an exhibition of silk cocoons similar to that held in the Punjab, as reported on in the enclosures to Government letter Nos 2305-9T—F, Agriculture, dated 1st November 1882, a copy of which you doubtless received through the Commissioner.

2 In a subsequent letter (Agriculture No. 900T—F, dated 6th June 1883) the Government of Bengal approved the holding of such exhibitions at Berhampore as the most central and most convenient place, and a committee has been formed for the purpose of making arrangements.

3. As your district is a silk-producing one, I ask for your co-operation in forwarding the object in view. Local committees could give much help in the way of suggestions and raising subscriptions. And it would be most advantageous if representatives from your district could join the general committee established here.

4. It is the general feeling here that the first exhibition should be held in December or January next, so that there is little time to be lost.

5. I enclose a copy of a circular I propose to issue here, and shall be happy to send you copies if you wish for them.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE PATNA DIVISION FOR THE YEAR 1882-83.

GENERAL DEPARTMENT—MISCELLANEOUS.

Darjeeling, the 29th August 1883.

RESOLUTION.

READ—

The Annual Administration Report of the Patna Division for 1882-83.

The report on the administration of this important division is submitted by Mr. Halliday, who filled the post of Commissioner throughout the year. It is in most respects a full and instructive review of the events of the year in all branches of the administration ; and if it errs at all, it is that the Commissioner, while allowing Collectors to speak for themselves, has failed at times to collate their opinions with the suggestions of the wider views and inferences to be drawn from them. The Commissioner's long experience and intimate knowledge of the questions affecting the Patna Division renders him peculiarly competent to inform the Government of the general tendency of things there, and of the significance of particular facts.

2. *Tours.*—The Commissioner's tour was somewhat interrupted by ill-health, and by the Lieutenant-Governor's visit to Behar ; but Mr. Halliday was still able, by marching through a large portion of his charge, to see in person the state of the country. He also managed to inspect all the district offices except one, and all the sub-divisional offices except three. The body of the report shows that the Commissioner turned to good account the opportunities which his tour afforded. The tours of the district officers were this year generally full and complete : those of the Collectors of Patna, Mozufferpore, and Durbhanga falling short of the prescribed duration, the fault being in some measure due to changes in the *personnel* of the district staff. In Shahabad Mr. Nolan's tour was all that could be desired, and the Collectors of Chumparun, Sarun, and Gya were each in the interior of their districts for more than three months, and made good use of their time. The tours of the Sub-Divisional Officers (the Barh officer excepted) were useful and sufficiently long, Mr. Collins' tour in Hajeepore being specially noteworthy. Mr. Lee, Joint-Magistrate of Sarun, spent ninety days in the interior, thus showing how a Joint-Magistrate at head-quarters may find it possible to see a great deal of the mofussil. Intercourse with the people, bringing to light their wants and lessening their difficulties, is necessary everywhere in these provinces ; but nowhere more necessary than in the Patna Division, which, as far as the people's knowledge of their rights is concerned, is still apparently in a backward condition. In this respect things in that division are not yet what they should be, and this is the reason why the Lieutenant-Governor is specially anxious that all Behar officers should take the fullest advantage of the pleasant climate of their province to see the most of the country and of its manly and interesting people.

3. *Weather and Crops.*—The year was again unfavourable for agriculture, and, except in the Chumparun district, the crops throughout the division suffered considerably. As regards the poppy, the year was disastrous for the division as a whole ; but the losses in the districts north of the river were far greater than in the districts to the south of it. In the Patna and Gya districts a scanty rainfall resulted in a very poor *khareef* crop, though the *bhadoi* and *rubbee* were not far from the average. In Shahabad the deficiency of rain was to a large extent supplied by irrigation, though less recourse was had to the canals than might have been expected under the circumstances. In Mozufferpore the harvest varied greatly with the locality, but the broad result was a poor *bhadoi*, with a *khareef* and *rubbee* below the average. The same description seems to apply to Durbhunga, from which district, however, somewhat meagre information has been supplied on this important part of the annual report. Finally, the crops in Sarun, notwithstanding a deficiency of rain in the beginning, and an excess in the end of the monsoon, were, with the exception of mustard and poppy, fair on the whole.

4. It has been stated that the year was disastrous as regards poppy. This crop promised well until December, when, says Mr. Halliday, "a complete change came over the fields, and before the end of January there were whole tracts of poppy cultivation on which there was nothing to be seen but withered leaves and brown and shrunken stems. The causes generally assigned for the failure were east winds, a high temperature, and fogs. As to the particular nature of the disease, no opinion can be given; but the extent of the loss suffered varied considerably according to the soil. Poppy in light sandy soil, where the outturn had been exceptionally high in the previous year, appeared to fare worst, while crops in heavier soil, with a larger admixture of clay, suffered least." In the Patna Division, last year's failure in the poppy crop has lost the ryots nearly half a crore of rupees.

5. *Public Health.*—The fever which last year prevailed throughout the division has diminished in extent and virulence. During the year under review, it was chiefly noticeable in the Durbhunga and Chumparun districts. Small-pox also was less than in previous years—a fact which some local officers attribute to the extension of vaccination. The Lieutenant Governor would be glad to believe that vaccination is, despite ignorant prejudice, becoming so popular as to influence in any material degree the prevalence of small-pox in rural tracts. On the other hand, the division suffered severely from cholera, which in the Mozufferpore, Durbhunga, and parts of the Sarun district, assumed an epidemic form, causing heavy mortality. The disease appeared with the hot weather in April, and began to diminish with the setting in of the rains. Medical relief was everywhere afforded, some indigo-planters being especially prominent in this work of charity; but the disease ran its course, and did not disappear altogether till the cold-weather had well set in. Cholera apart, the year was, on the whole, a fairly healthy one in this division. The Lieutenant-Governor notices the endeavour made in the Behar sub-division to employ a portion of the road cess funds to clearing the villages where cholera prevailed. The Commissioner is no doubt right in his conclusion that such an application of these funds is beyond the provisions of the law by which their expenditure is regulated; but the real source of the evil is none the less rightly indicated in the attempt to purify the filthy condition of native villages, and to establish among the residents a better observance of sanitary laws.

6. *Material condition of the People.*—Under this head the Commissioner says that, the deficient harvests notwithstanding, there was "little decrease in the comfort of the people, the surplus of previous years having the result which might be expected" The fact, however, that the preceding year was also one of short crops, and the quotations from the local reports which the Commissioner gives, seem to indicate that, if Mr. Halliday's view be not actually optimist, it at all events shows the brightest side of things. "The material condition of the people varies directly with the rainfall," says the Collector of Durbhunga, and the Lieutenant-Governor has no doubt that what is true of Durbhunga is to a large extent true of all Behar districts, portions of Shahabad perhaps excepted. In those parts of Shahabad we find a body of substantial ryots with permanent interests in the soil for which they pay moderate rents. These ryots, among the mass of the Behar peasantry, are alone above the vicissitudes of season, presenting a marked contrast to those other ryots whose tenures are not secure, and whose rents are not moderate. The Commissioner is disposed to dispute the view that it is fixity of tenure at fair rents which differentiates the Bhojepori from his fellow ryot throughout the division. Other distinctions of a minor character may exist; but even if they be not traceable to tenant right, still, in the Lieutenant Governor's opinion, that is the true and efficient cause of the Bhojepori's prosperity. Similar effects will follow similar causes. Until fixity of tenure at fair rents be the rule, and not the exception, throughout the Behar districts, we may expect to find the condition of the agricultural classes "varying directly with the rainfall," and we may be prepared to find the people, and the Government which has charge of them, alternating between hope and fear with the progress of each monsoon. From another point of view the prospect is not encouraging. There can be little doubt, from the general tenor of the Commissioner's report, that population already presses with great severity upon the soil

throughout the division; and notwithstanding the temporary benefits secured by a higher rate of wages for labour in some districts, in consequence of the extension of railways and other public works, the fact remains that the condition of large numbers of the day labourers throughout Behar is one of extreme impoverishment, and perhaps from the recklessness which poverty engenders, they are the most thriftless section of the community. If people marry when they are children, and have families when they ought to be at school, and a population grows up which is always ready to borrow money at usurious interest on the single security of their own capacity for manual labour, all the constituents are present which go to establish irredeemable slavery. If what Mr. Nolan describes as "the bitter complaint of want of land" prevails among the well-to-do guzashta ryots of Shahabad, the evil case must be much worse in other places. The only apparent remedy in the hands of Government is the encouragement of emigration.

7. *Emigration*.—But the number of emigrants—all from the South Ganges districts—registered for Assam and the Colonies during the year was only 3,242, though this does not represent the total emigration from Behar, as many Beharis are recruited and registered in Calcutta and elsewhere. Recent enquiries have, however, shown that emigration to the Colonies can be better recommended to Behar labourers than it yet has been, and it is to be hoped that the improvements which have been suggested by Mr. Grierson in his valuable report on emigration from Behar may lead to better results than have yet been obtained.

Although people do not emigrate from the districts north of the river, they migrate in large numbers to the eastern districts in search of work. This migration usually reaches large dimensions; but last year, owing to the abundance of remunerative labour to be had on the railway works in progress, the movement was smaller than usual. The Collector of Chumparun reports that the movement towards the unoccupied lands of the district, which was noticed last year, still continues; and Mr. Nolan believes that a portion of the population in Shahabad is ripe for any well-considered scheme of emigration. That is a matter which might well form the subject of enquiry and arrangement between the Commissioners of Patna and Chota Nagpore. There are large tracts of good land belonging to Government in the adjacent district of Palamow which await the plough, and if emigrants will go further afield, they can be accommodated in the Government khas mehals of Bogra, or in the Dooars. With the completion of the railway system which will connect Behar with Assam, many of the difficulties in the way of free emigration will be removed.

8. *Prices of Food and Labour*.—Throughout the division generally the price of food rose considerably during the year under review, no doubt owing to the scantier supply. It is stated, however, that the dearer prices had no material effect on the labouring classes. The wages of agricultural labour being paid in kind are not seriously reduced by a moderate deficiency in the harvest, while the wages of non-agricultural labour rose somewhat owing to the demand created by the public works which were in progress, and also no doubt owing to the rise in the price of food. Thus things found their level, and the close of the year left the labouring classes much in the position in which its commencement had found them. There is, however, a tendency towards a general rise in wages perceptible throughout the division as compared with other parts of Bengal, the rates for manual unskilled labour are certainly low.

9. *Manufactures and Mines*.—The Commissioner responds to the wish expressed by the Lieutenant-Governor last year that he should discuss the condition of the trades and handicrafts of his division; but on this occasion Mr. Halliday contents himself with a mere enumeration of trades, and devotes too little attention to the mercantile importance of each to his division. Such an enumeration, however, and the enquiries which have been instituted on the point in each district, cannot fail to be of use to district officers in making their selections of exhibits for the Calcutta Exhibition. In future reports Mr. Halliday will doubtless be able to take up the chief subjects of trades and manufacture, and consider their bearings and influence on the well-being of each district, and of the division as a whole. The good effect of their presence

in the large employment of labour in the densely crowded population can scarcely be exaggerated In each district of the division there are the ordinary manufactures of iron and brass utensils for domestic use, of cotton and woollen cloths, and of cheap trinkets; but some districts have specialities. In Patna, for instance, embroidery on silk and velvet, the manufacture of ornamental glassware, of perfumed oils, and some silk-weaving, are carried on. In Gya there is a thriving trade in brass and stone vessels, while in the south of the district the lac industry is progressing in the establishment of many new factories and the enlargement of the old ones. The artizans of Shahabad are not noted for their skill, and in none of the districts north of the Ganges are there any important manufactures, except in Sarun, where bell-metal and earthenware utensils of a superior kind are produced.

10. The chief manufacturing products of the division—those which have a large foreign demand—are indigo, saltpetre, and sugar. Tobacco, in the hands of Messrs Begg, Dunlop and Company at Poosah, bids fair to hold a place in this class; but as yet the manufacture, though promising, can scarcely be said to have passed beyond the experimental stage. The manufacture of sugar, particularly in the districts south of the Ganges, where canal irrigation is possible, is extending, and the exports from the Shahabad district alone, during the year under review, are said to have exceeded 14 lakhs of maunds, or over 50,000 tons. The saltpetre trade is everywhere reviving under the influence of more liberal custom-rules and better prices; while the indigo industry during the year under report was carried on with little friction, and with profit to the planter. The Lieutenant-Governor will take an opportunity later on in this Resolution of making some remarks on the present condition of indigo in Behar. The numerous paper manufactories in Nasrigunge deserve whatever encouragement the local officers can give them; and the same may apply to the explorations for iron ore discovered near the township of Behar.

11. *Trade and Commerce.*—Under this head the report gives a good deal of detailed information, which, however, one is warned against accepting as entirely trustworthy. From a mass of doubtful figures and indefinite descriptions, it is difficult to shape any precise ideas as to the trade of the division as a whole. In an annual administration report, what is wanted is not a mass of doubtful statistics regarding the imports and exports of particular articles into particular marts, or even into sub-divisions of districts (of these the annual trade report gives us a sufficiency), but a general idea as to the ebb and flow of trade on the main heads of commerce. For instance, we know that the Patna Division exports some descriptions of food-grains, oil-seeds, hides, saltpetre, tobacco, indigo, and sugar besides other minor commodities; and we know that it imports other descriptions of food-grains, piece-goods, woollen goods, hardware, and salt. A section of the annual report giving an appreciative estimate of the ebb and flow of trade on these main heads of commerce for each district, and for the division, would be of far more value than the undigested mass of details now presented, from which indeed the Lieutenant-Governor finds it difficult to draw any useful inferences at all. It seems, however, certain, from the Commissioner's remarks, that the extension of railway and other communications in Behar is effecting a revolution in the old routes and methods of trade in that province. This process of change, noticed in last year's report, has been accentuated during the year under review. Patna has ceased to be the emporium of trade for Behar, importing now for local wants merely, and exporting only the local surplus produce. The trade of the Gogra still centres at Revelgunge; but the importance of that riverine mart is seriously threatened by the Patna-Baraitch Railway, which taps the country whose trade highway has hitherto been a shallow and tortuous river. For the Gya district the information supplied is meagre and disjointed, owing, doubtless, to the Collector's inability to procure information from the Railway authorities. The Lieutenant-Governor is not aware of any reason why the Railway authorities in such a matter as this should not attend to the timely requisition of the district officers, and intimation to this effect will be conveyed to them through the Public Works Department of this Government. The Tirhoot State Railway served the trade of the Mozufferpore district more satisfactorily this year than last, as a considerable

increase in the traffic testifies. Complaints, however, are still made of the insufficiency of rolling-stock. Possibly the increase of trade may be in part due to the opening of the Bettiah extension; but as that line was only opened towards the close of the year, it is fair to assume that the increase was mainly due to activity in trade in Mozufferpore itself. The Collector of Durbhunga reports that the trade of his district flows in two great streams—one north, the other south; but he confesses himself unable to estimate the volume of either. The export of rice, sugar, and tobacco was brisk; while wheat, piece-goods, iron and salt were imported From Sarun Mr. Quinn reports that "the trade in food-grains, which had been slack in the previous year, considerably improved, and the trade in sugar and saltpetre also prospered. There was a considerable increase in the import of piece-goods, and on the whole the trade of the district was in a more prosperous condition than in the previous year." Finally, the following remarks by Mr. Henry, the Collector of Chumparun, merit quotation:—

"The imports into this district are estimated at about 35 lakhs of rupees. The bulk of the imports consisted of piece-goods valued at 26 lakhs. These are imported partly for local consumption and partly for export to Nepal. The other imports consisted mainly of salt, iron, spices, brass and copper vessels. The exports were timber, food-grains, oil-seeds, indigo, opium, sugar, saltpetre, and hides. Nearly all the exports from the Bettiah sub-division were sent down by boat to Patna; these boats, on the return trip, bringing back cargoes of salt, iron and brassware. Piece-goods were for the most part brought from Calcutta *vid* Mozufferpore, a small proportion being brought up the Gunduck from Patna and the river marts of the Sarun district. The bulk of the piece-goods imported is sent out to the large bazars of the interior, such as Chainputtea, Bagaha, Louriya, Kessurria, Modhubun, Gobindgunj, Segowlee, Burhurwa, and Lackowia, whence they are distributed throughout the length and breadth of the district. A considerable portion finds its way into Nepal.

"The prices of piece-goods are about the same here as in the neighbouring districts. There is no local manufacture of cloth worthy of notice. A coarse kind of cloth is woven by the Jolahas, but to a very inconsiderable extent. Blankets of a coarse texture are imported from Nepal. There are some *aurri markers* in the village of Mehsi, but their trade is insignificant. When supplied with good materials, they make *su runjis* of fair quality. The imports into the district from Nepal are of small importance. Besides coarse blankets, spices, medicinal drugs, bamboo, papers, spades, and ghee are imported to the value of a few thousand rupees annually. The greater portion of the imports are brought down the Gunduck by boats. In years of abundant harvests, large quantities of grain are brought down from the Nepal Terai for export to the southward. Nearly all the exports are sent down the Gunduck to Patna Timber is floated down from Trebance, Bagaha, and Rutwal, but by far the greater portion of it goes from Bagaha. During the last three months a good deal of timber was exported from the recently-opened depôts at Ghagha and Chainputtea. Piece-goods, sugar, salt, and dried fruits are sent from Bettiah into Nepal. No taxes are levied on the export of merchandise by Nepalese subjects. British subjects engaged in the grain trade with Nepal have to pay an anna in the rupee on the value of paddy, and 15 per cent. on the value of oilseeds brought away by river. The rates for the same kinds of produce, when brought away by land, are 10 annas per cart-load for paddy and Rs. 1-8 per cart-load for oilseeds. No special tax is levied on timber exported A royalty of 25 per cent. on its value is paid for every tree cut down, whether by Nepali or by British subjects. Imposts at the rate of 3½ per cent. on the value of European piece-goods, 12 annas per maund on native piece-goods, and Rs. 5 per cent. on the value of lace and other articles embroidered with silver or gold, are levied on the goods imported into Nepal from British territory."

12. *State of Public Feeling.*—On this important subject the Commissioner makes the following remarks:—

"Discussions on subjects of public interest are really confined to a few of the more educated and intelligent, and the *people* really care nothing and know nothing of any one of them. I agree with the Collector of Patna, who writes—'The great mass of the people have really only one feeling common to them all, and that is, the desire to be let alone. All the noisy excitement and vapouring, of which we have seen so much in the newspapers of late, is lost upon them. The Local Self-Government Bill and the Criminal Procedure Code Amendment Bill are alike viewed with absolute indifference. One example of the value of the opinion of the average semi-educated gentlemen is sufficient. The story is vouched to me as true by my informant. A respectable Mahomedan of the upper classes, but not mixing much with Europeans, when asked what he thought about the Criminal Procedure Amendment Bill, said he had heard that 'it was intended by it to give Bengalis power to try Mahomedans, and therefore he disapproved of it.' It is difficult which to admire least in this characteristic reply, either the absolute ignorance of the law as it at present stands, or the race dislike which prompted the opinion.'

"In the same way the Magistrate of Durbhunga remarks that, so far as 'the millions' are concerned, the odd thousands may begin to think, but it is only the hundreds who make any noise; while the Magistrate of Shahabad states that the *people* have been less agitated by all these subjects than might have been expected, and he rightly remarks that Shahabad is a district in which political feeling is strong, but the politics which have interest for the ordinary natives here are rather those of war or peace, rebellion or loyalty, than the ordinary topics of domestic reform. The people of this district are more active on either side than that of any other—perhaps than the inhabitants of all the rest of these provinces together. But they have little aptitude for the agitation which now seems prevalent in Bengal.

"To take first the Local Self-Government Bill. In Patna, as the Magistrate says, this is approved of only by a few vakils attached to the Judge's Court and their friends, aided by some of the noisier school-boy newspaper critics. I can endorse what Mr Grierson says, that he is in a position to state that the introduction of the measure is looked upon with grave apprehension by the leaders of the educated native society at Patna itself, and that the greater number of the Municipal Commissioners are strongly opposed to it. Numbers of them have told me that what they dread is the Chairman not being the district officer A non-official Chairman, they say, *must* take sides, being either a Hindu or a Mahomedan, and the result will be wholesale plunder and oppression. In Gya the opinion seems to be that when zemindars find they will have to work, if they become members of the Local Self-Government Boards, they will decidedly object to serve on them. On the Local Self-Government scheme, the Collector of Shahabad states that those who expect to be made Commissioners, and to receive titles, are in its favour, with others of their class, who expect indirectly to be made rulers. The masses are opposed to the change, as they expect only transfer of power, in which they do not hope to share, and they prefer their present to their future guides I think Mr. Nolan exactly expresses what the feeling of the people is in regard to this matter, by saying that a plebiscite would result in a vote of 20 to 1 against any change which would deprive the district authorities of control and responsibilities.

"On this question of Local Self-Government the Collector of Mozufferpore states that the lower and middle classes, who form the vast bulk of the population, appear to be quite ignorant of its promulgation. The upper class, especially those who know English, are said to talk a little on the subject, but not to take any deep or permanent interest in the matter. Mr. Norman says that his conversations with them lead him to believe that this is an accurate account of their sentiments; for although ready to declare generally that they consider the scheme a benevolent one, yet they evince no interest or curiosity on the subject, and evidently do not care to discuss its details.

"This has been my experience also throughout the division.

"The Criminal Procedure Amendment Bill is a subject of excitement amongst only the European members of the community. Petitions against it have been circulated amongst them, and numerously signed, but there is not any strong native feeling on the subject.

"In the North Gangetic districts, where the large majority of Europeans reside, this Bill has excited a spirit of intense alarm and determined opposition. Large sums of money have been subscribed, and every possible method of resistance is discussed. The Collector of Durbhunga states that the non-official English, of course, feel and speak very strongly, but still he thinks the first thought among them was that, bad as the Bill was, still there must not be a whisper of resigning among the Behar Mounted Volunteers. He adds:—'The folly and wickedness of the threat of some of the Eastern Volunteers seemed even more remarkable than the needlessness of the Bill. The natives seem to me to care nothing about it.'

"The Bengal Tenancy Bill has seriously interested the few zemindars who read the papers, and meetings have been held by the Behar Landholders' Association, where opinions strongly opposed to the Bill have been expressed. They deprecate all change, considering, as the Maharajah of Doomraon stated at a public meeting, that Government never interferes except to make matters worse. Mr. Nolan truly remarks that the ryots do not understand the proposals, but have a general idea that Government is devising rules to protect them. From Mozufferpore the Collector, Mr. Norman, writes that some zemindars are attempting to get their land into their own hands, and refuse to renew any leases which may fall in, for the avowed purpose of defending their own interests against the ryots on the passing of the Bill. Mr. Tobin's enquiry in Shahabad, under the orders of Government, as to rent-rates on the property of the Maharajah of Doomraon, where quit-rents, fixed in perpetuity, prevail, is said by the Collector to have excited but little alarm, and he remarks that, had not the ryots confidence in administration, such an enquiry would have provoked much hostility as a preliminary to enhancement.

"The war in Egypt attracted considerable attention in Shahabad among Mahomedans, and among sepoy families, who form a considerable part of the population.

"In Mozufferpore the war was a subject of general gossip. The educated Mahomedans are said to have awaited the issue with some concern, without, however, misconstruing the motives by which the British Government was actuated. Mr. Nolan, the Collector of Shahabad, considers that the moral effect produced by the campaign in this part of India was excellent. The story carried to every Mahomedan fanatic, and to every sepoy home, the convictions that the power of England as against other nations has hitherto been underestimated rather than exaggerated."

All the district officers notice the unpopularity of the existing system of chowkidari tax assessments. Mr. Nolan remarks on the dissatisfaction felt with the method of assessing canal water-rates, and Mr. Henry expresses the belief that indigo cultivation continues to be unpopular with the Chumparun ryot. The chowkidari system is now under revision; the plan of five years' leases now growing in favour will remedy the chief abuses in water-rate assessments to which the Collector of Shahabad refers, while it is to be hoped that the Tenancy Bill will supply indigo-planters with a means of reconciling the interests of the ryots with their own to a larger extent than has ever yet been done. On this question of the relation of indigo-planting with the people some remarks will be made further on.

13 *Public Press.*—There are two English newspapers—the *Behar Herald* and the *Indian Chronicle*—published in the Division, and a third—*The Indigo Planters' Gazette*—published in Calcutta, is also interested in Behar affairs. Two Urdu papers—the *Guldasta* or 'Nosegay,' and the *Sarful Akbar*—were started during the year, but as yet have reached no degree of importance. The *Behar Bandhu*, an excellent periodical in the Nagri character, possesses more influence than all the other papers put together, and the influence it exercises is entirely for good. Finally, two monthly magazines—the *Harish Chandra*, published at Benares, and the *Khetreya Patrika*, at Patna—supply the educated Hindus with non-political articles, slightly coarse perhaps at times, but humorous and true to nature. On the whole, the tone of the Behar Press throughout the year was loyal, if at times, perhaps, too personal; and there was observable in it nothing like that gross misrepresentation of public measures, and those unfair criticisms of individual action, which, with rare exceptions, disfigured the Vernacular and Anglo-vernacular Press of Bengal throughout the year. The Lieutenant-Governor is glad on this occasion to acknowledge the moderation of the Behar Press, and he trusts that as time goes on it will gather strength and become a more useful aid to good government and popular education.

14. *Administrative Changes.*—Although the substitution of the Nagri and Kaithi for the Persian character in official documents is now of some standing in Behar, the progress of the change calls for some remarks. The Lieutenant-Governor is assured that the change has everywhere taken root, while in some localities it has been so much appreciated by the people as to form the subject of popular minstrelsy. The following translations of two ballads sung in the Shahabad district furnish curious proof of how the people view the change, while they enshrine in popular memory the name of a worthy servant of the State:—

One song runs:—

"Thanks to the English Government, which confers comfort on its subjects. It has put far away the Persian character, and introduced Nagri. Bhudeb Baboo called out to the Lord Sahib (saying) 'put far away the Persian character, and thereby put far away a grievance. My Lord, many forgeries are committed through it, and the people will be happy when they obtain their own (peculiar) learning.' O! brother, praise the wisdom, learning, and counsel which has done justice in Hindustani by introducing the character of its people."

The other one is as follows:—

"Government gave the order, O! people, learn Nagri. Put the Persian character far from your hearts. Learn Nagri, and when you are qualified do Government work. Take books and read steadily, but sell your Persian ones to the druggists. Until you know Nagri well write Kaithi in your *kachahris*. Praise be to the counsellers who are well-wishers of the people."

It will be seen from the last that the common people at any rate well understand the relationship between Kaithi and Nagri.

The Lieutenant-Governor also desires to quote in this connection the following passage from Mr. Halliday's report in regard to the real nature of the change from the so-called Urdu to Hindi:—

"The want of primary text-books in 'Kaithi' is much felt, and has been a serious hindrance to progress of mass education. Mr. Grierson has strongly urged the necessity of printing and circulating elementary reading books in the Kaithi type for use in our schools. He has also drawn my attention to the necessity of books being written in ordinary Hindustani, *i.e.*, in the words of Sir George Campbell, 'the language of the streets,' spoken and understood by everyone, instead of in Urdu-Hindustani, full of Persian and Arabic words, understood only by learned Mahomedans; or Hindi-Hindustani, overloaded with big

Sanskrit words, understood only by the pundits. His remarks on the subject are so opposite that I make no apology for quoting them *in extenso* :—

"To make my meaning clear, it is necessary to explain that Hindustani is, like English a very composite language in the matter of vocabulary. Its foundation and the bulk of its vocabulary are composed of what we may call here (to avoid technical terms) 'country words.' They form the bulk of the 'language of the streets' spoken of by Sir George Campbell, and are really those words which are in every one's mouth, and which are understood everywhere. Some of them are Arabic words, understood everywhere, like *mulk* 'a country,' and some are Sanskrit or Sanskrit-derived words like *ghar* 'a house.' Their nationality is not considered. Their only test is whether they are words in common use or not. If they are, they are 'country words.' Under the old Persian *regimé*, however, a pedantic custom arose of being ashamed of these honest words, and they were avoided in books as much as possible. In fact the language in the hands of these pedants became a collection of long Arabic compounds, strung together by a rare verb or conjunction of country use. This phase of the Hindustani language, full of Arabic and Persian words, which only Mahomedans could understand, was called Urdu. In rivalry to this Persian-ridden Urdu, the Hindu pedants followed suit, equally abandoning 'country words,' and using nothing but long rolling Sanskrit compounds that only pundits could understand. Arabic and Persian words were rigorously excluded, and hence Mahomedans could not understand it, and the use of Sanskrit words made it unintelligible to the mass of non-highly educated Hindus. This phase of Hindustani was called Hindi. It will have been noted that the language was Hindustani all the time, and that the difference was only one of vocabulary, much as (only in a greatly exaggerated form) we have two phases of English, some writers affecting what is called 'Saxon English' and others 'Johnsonese.' Urdu may be compared with 'Johnsonese' and Hindi with 'Saxon English.' We thus find three phases of Hindustani :—

(1)—Urdu-Hindustani, understood only by learned Mahomedans.

(2)—Hindi-Hindustani, understood only by the learned Hindus.

(3)—Ordinary Hindustani (*alias* the language of the streets) spoken and understood everywhere by everyone. When the Persian character was in vogue, the Urdu-Hindustani had the mastery, and no ordinary Hindu could understand it. Now, however, that Nagri and Kaithi have been adopted, Hindus are having their revenge. The commonest foreign words are excluded, and boys' school-books, such as histories and geographies, are overloaded with far-fetched Sanskrit words and conceits. The language is not ordinary Hindustani as Government wishes, but is Hindi. The result is that Mahomedan boys are practically excluded from education, from their inability to understand the text-books. This is strong language, but it is my deliberate opinion that it is the case. It is this which is at the bottom of the dislike which Mahomedans have to the Kaithi and Nagri character, because they see that even when they can read the books printed in it they cannot understand them. A good example of what I mean is found in the translations of the Penal Code. A Mahomedan pedant, who wishes to say, 'the right of private defence' says, estihqáqí hefázati khúd ikhtiyárí. The modern Hindu pedant says 'átmárakshá ka adhikar,' but the ordinary sensible man says 'apne bachoo ka haqq.' The Hindu pedant is now trying to get the upper, and he must be stopped, just as the Mahomedan pedant was stopped before him. If books are written in 'the language of the streets' no one can object, and I am convinced that Mahomedan education would make vast strides.

"It may be asked what is the test for this language of the streets, *alias* Hindustani; and the answer is a simple one. It is that the language should be equally legible in the Persian and in the Nagri (or Kaithi character). Urdu, full of Persian and Arabic words, cannot be read, and can with difficulty be written in Nagri; and on the other hand, Hindi is simply illegible when written in the Persian character. Hindustani, however, can be read with equal facility in either, and that is the test For examples of this practical Hindustani, I can refer to the *Behar Bhandhu*, a newspaper published in Patna, and to several up-country newspapers, where the same matter is printed twice over in parallel columns—one in the Persian, and the other in the Nagri character—so that all classes of the community can read them."

The views expressed in the concluding paragraph of the extract are in accordance with those which have already been communicated by the Lieutenant-Governor to the Education Department in connection with the question of providing text-books for the Patna Medical School.

Other administrative changes noticed by the Commissioner are the employment of Special Deputy Collectors as treasury officers, and the system of farming cattle-pounds. Both changes are not without their drawbacks—the former in a sacrifice of economy of strength; the latter in the danger of abuses of the system. Those changes, however, are of recent introduction,

and it is too early to pronounce a decisive opinion yet on either. As regards the first, the Lieutenant-Governor is inclined to think that, having regard to the specialities and responsibilities of treasury work, a separate department, though perhaps less expensive than the present, is necessary for its administration: and that in the matter of the cattle-pounds, the best remedy will be found in securing the interest of local boards for their management. The change in the Criminal Procedure Code, whereby Court Sub-Inspectors are debarred from prosecuting cases in the Magistrates' courts, is unfavourably commented upon. This matter will be dealt with in the Judicial Department.

15. *Statistical Enquiries.*—The registration of vital statistics in all the districts of the division continues to be as inefficient as ever. The Magistrate of Chumparun reports an attempt to improve it by using the chowkidari punchayets as a reporting agency. This is a revival of the system which was tried with some success in the Durbhunga district a few years ago, and as long as local officers take an active continuous interest in the matter, registration will improve under it. When their interest wanes, or their places are taken by successors less concerned in the subject, matters will fall back into the old groove, and we shall have in unhealthy years a death-rate of (say) 5 per thousand, unless the police or the punchayets happen to have learnt that 25, if reported, will save them explanations. Not very long ago a high sanitary authority declared that mortuary statistics in a certain city were worthless if under 22½ per cent. per annum. Thenceforward during an energetic mayoralty the death-rate was steady at that percentage.

Every attempt at improved administration is laudable and to be encouraged; but the Lieutenant-Governor thinks that, if any lasting benefits are to be produced in the way of statistical enquiry, we must substitute for the isolated spasmodic efforts of individuals the continuous systematic action of an organized agency. The creation of such an agency, for the record from day to day and year to year of information connected with the people, is now under the consideration of Government.

16. *Police and Crime.*—Compared with the preceding year, there has been some apparent increase in crime in this division, and this increase is explained by the Commissioner on the ground that food was dear in 1882, and "the subduing influence of sickness" was less. There is room, however, for thinking that the increase is more apparent than real. It is true that the total number of reported cognizable cases rose from 21,670 in 1881 to 23,971 in 1882, but property was not less secure, nor the public tranquillity more disturbed in the latter than in the former year; while the increase of miscellaneous crime and of offences against the person is said by district officers to be due to the greater activity of the police in prosecuting nuisance cases, and to a better system of registering crime. While the Lieutenant-Governor thinks these explanations probable, he is yet disposed to agree with what the Magistrate of Sarun says regarding the concealment by the police of the actual state of crime in their jurisdictions. This is especially true of burglaries reported at police outposts. Crime reported at stations in charge of sub-inspectors is better dealt with, but the head-constables in charge of outposts, being on smaller pay, use the opportunities they have of making money by concealing crime Some improvement in the pay and position of head-constables of police has recently been made, and it remains with District Superintendents of Police to see that proper supervision is maintained. An officer in charge of a station is not absolved from the duty of inspecting the outposts subordinate to him.

The total number of persons arrested during the year was 19,207, of whom 18,383 were brought to trial. The trials resulted in the conviction of 68·9 of those arraigned, which is a slight improvement over last year's figures. The results were best in the Patna district and worst in Gya, where they were very bad indeed. The value of property stolen and recovered during the year is stated to be Rs. 1,37,965 and Rs. 50,498 respectively. These figures, however, are not trustworthy. During the year a careful enquiry was made into the chowkidari system in this as well as other divisions by a Commission presided over by Mr. Monro, till recently Inspector-General of Police in these provinces. The proposals of the

Commission are in favour of an alteration in the system of collecting chowkidars' pay, while leaving the assessment of it in the hands of local bodies. A closer connection between the regular and village police has also been recommended. These recommendations are in accordance with the experience of the district officers, but the amendment of the Chowkidari Act must be delayed for a time till the measures in connection with the Local Self-Government schemes are more matured.

17. *Civil Justice.*—The information furnished under this head by the Commissioner is this year incomplete, some Collectors having submitted defective figures. Mr. Halliday promises a complete statement later on; meanwhile he submits the following:—

Districts.	Suits for money and moveable property.	Suits under the Rent law.	Title and other suits.	Total number of cases instituted during the year	Cases disposed of.	Pending.
Patna	2,480	1,938	507	4,925	4,835	1,039
Gya	1,290	1,347	605	3,242	2,690	1,363
Shahabad	2,061	4,391	828	7,280	.....	2,162
Mozufferpore	1,717	1,722	625	4,064	4,206	1,164
Durbhunga	.....		.....	3,335	.....	.....
Sarun	1,484	1,958	699	4,141	....	.....
Chumparun	998	534	204	1,736	1,632	464

18. As far as these figures admit of comparison with those given last year, they show an increase of civil litigation generally, and an increase in rent suits in all districts except Patna and Mozufferpore. In regard to the small number of rent-suits in the latter district, the Collector, Mr. Norman, says:—

"With regard to rent-suits, the first point that strikes one as remarkable is their fewness. A total of 1,722 suits per annum, in a district containing a population exceeding 2¼ millions, is very small compared with the proportions of suits brought in many other districts. Considering the high-handed nature of the proceedings of the zemindars in recovering their rents, I cannot say that I consider this abstention from litigation a matter for congratulation, and in my opinion a more free resort to the courts would be a healthy symptom. So far as I have been enabled to form an opinion by conversation with natives of different classes, I should say that civil courts are decidedly unpopular, not that any objection is entertained to the *personnel* of the courts, but the people complain that they are expensive, troublesome, and slow. It appears to me that comparative distaste of the Behari for civil litigation is founded on his natural characteristics: he is more tenacious than the Bengali, and not so patient."

19. The Commissioner again reports unfavourably of the experiment of conferring civil powers on Joint-Magistrates. After reviewing the other administration reports, the Lieutenant-Governor will be in a better position to consider the question than he is now.

20. *Land Revenue.*—The land revenue demand for the division fell from Rs. 82,13,659 on 47,162 estates in 1881 to Rs. 82,00,851 on 48,495 estates in 1882. The increase in the number of estates was almost entirely due to partitions, while the decrease in revenue was owing to the lower rent assessed on Government estates, and to the relinquishment by Government of an alluvial accretion in the Sarun district, to which, however, it might, with a probability of success, have asserted a prescriptive title. The total collections of Government revenue were Rs. 80,66,645, or 98·3 per cent. of the demand. In permanently-settled estates, the rental of which in Behar is manifold, greater than the Government demand, the collections were quite satisfactory. In temporarily-settled estates collections were unsatisfactory in Patna and Gya, and good elsewhere; in Government estates they were bad. The arrears of the year on Government estates amount to Rs. 63,000, which in itself is not a very large sum, and is chiefly remarkable as an indication that the demand was either not properly adapted to the circumstances, or not properly enforced. It is possible, however, that satisfactory explanations may exist on the point, the further discussion of which may be postponed till the land revenue administration Report comes under review.

21. The land registration operations of the division have been finished and a complete register of title to every acre of land in the division made out,

with slight cost to the owners, and with a remarkable absence of litigation. The movement towards the holding of landed property in severalty, which is what butwarra proceedings mean, still continues unabated. Its effects up to this have been to overweight with work the officers of Government and to raise ryots' rents. It is hoped that legislation now to be undertaken in amendment of the Butwarra Act will correct the former, while the Tenancy Act may be looked to as a remedy for the latter abuse.

22. In last year's report the Commissioner was invited to discuss the position of the indigo question in his division, and Mr. Halliday now responds in a satisfactory manner, partly under the head of manufactures, and partly of affairs connected with the land. The Lieutenant-Governor will deal with the question in this place. In the districts south of the Ganges but little indigo is sown, and there the indigo question is not now, and has never been, complex. Some difficulties of course arose from time to time, as difficulties will arise in every industry when capital seeks labour; but whether it be due to the spirit of independence engendered among Shahabad ryots by fixity of tenure, or to the small power of combination among planters in that locality, or to the unimportance of the indigo industry there, the fact remains that labour in the struggle with capital has fared better south of the river than north of it. There is no indigo question in South Behar.

In North Behar, on the other hand, the question still is complex—a question of capital, labour, and land. Recent improvements, due in part to the prudent foresight of planters themselves, have lessened the conflict between first and third factors; but the land difficulty remains unabated. As long as it lasts, the best interests of both planter and ryot must continue insecure; and the desire to abate this danger is one of the many reasons why the Lieutenant-Governor wishes that the Tenancy Bill, now before the Legislature, should, without any delay, be passed into law. Mr. Halliday, whose long experience of Behar entitles him to speak with authority on this subject, makes the following remarks on the indigo question:—

"I now come to indigo in its relation to the land system. Mr. Quinn remarks that in Sarun the manner in which the ryot is concerned in the cultivation of indigo is not at first apparent, inasmuch as, in the vast majority of cases, the crop is grown on what are called the factory zerats. Now, zerat ordinarily means the portion of a village which is in the direct occupation of the landlord, and it might be supposed that when a lease is taken of a village by a factory, it is only this home farm which is cultivated with indigo. If this were so, there would practically be no indigo question, but such is not the case under the system which has hitherto been followed. The first thing which a planter does on obtaining the lease of a village is to induce the ryots to give him up a portion of their lands for indigo, and these lands he forthwith calls and treats as zerat lands; and so long as he holds or renews his lease, he considers himself entitled to hold these lands, for which he pays the ryots neither rent nor compensation; and when he gives up the lease, the landlord, who has been well paid during its currency, resumes these so-called zerats and settles them afresh at high rents, as they are generally the best lands in the village.

"The above I believe to be a correct description of the system hitherto in force, although there may be cases in which the holdings have been bought or compensation has been given, and there are certainly some managers of factories who have kept the ryots' names on their books in respect of these lands, so that on the expiration of the lease they may be able once more to include them in their holdings. It is of course true that the planter does not require the ryot to pay rent for the land taken out of his possession, but as a rule the only compensation which the ryot, under this system, receives for the loss of his land, is that he gets a market for his labour and that of his bullocks at the factory. Can it then be wondered at that the introduction of indigo into a village is viewed with aversion.?

"The landlord almost invariably gains; the planter may gain or lose, but the ryot is sure to be a loser by the transaction. Before any real progress can be made, this system of growing indigo, which it is impossible to defend, must be definitely abandoned, and the planter who wants to grow indigo on land in the occupation of a ryot must come to terms with the occupant of the soil, and not think that everything has been done when he has settled with the landlord. I am happy to say that this view has apparently been accepted by the Planters' Association, and I hope and believe that the method of creating or converting zerat, which I have described, may soon be considered as a thing of the past.

"I think that during the past year some progress has been made in the right direction. The example set by Mr. Donald Reid, of entering into direct engagements with the ryots, has been followed by several other planters, who have found that even under the present law it is in many cases, though not in all, quite possible to grow indigo in this way in spite of the obstruction which they often have to encounter at the hands of the zemindars

"When a ryot agrees to grow indigo on the *khuski* system, the usual practice is to make him an advance, amounting in some cases to as much as Rs. 20 per bigha The plant is delivered at the vats, and is paid for at the rate of 2 annas per maund, the price being set off against the advance, and it is stated that in a favourable season the ryot obtains more than Rs. 20 per bigha for the crop taken on these terms. The only objection to this system, I think, is that the rate of advance is rather high. The advance is no doubt a strong inducement, and it is the more valued by the ryot because it is either made without interest, or on very low interest. In some cases no advance is given, and a much higher rate is then paid for the plant.

"Mr. Brett is of opinion that the evils of forced labour, forced hire of carts, and forced exchange of lands still exist, though the ryots do not complain. Some pressure, I have no doubt, is used in these respects, but I believe that, if there were serious oppression, the ryots would complain. Further on Mr. Brett remarks that there have been very few cases in which planters have been engaged during the year."

Again, quoting from the Mozufferpore Collector's report, the Commissioner says :—

"In addition to this money payment (of Rs. 9 per bigha=Rs. 14 per acre for indigo grown in villages held by the planter on lease), the indigo-growing ryot enjoys a certain protection against enchancement of rent. The following is a rule of the Association :—

"'That no ryot who cultivates 3 cottahs of indigo for each bigha of his holding should have his rent enchanced.'

"Under the operation of this rule the ryots of thiccadari villages, who agree to the indigo-planter's terms, escape enchancement during the currency of the thicca; and where villages have remained in possession of indigo concerns for a series of years, the ryots pay now the same rent they did 30 years ago; whereas in neighbouring villages rents have doubled during that period There is, however, a system in vogue in many factories of cajoling or coercing ryots into giving over a portion of their holdings, varying from one-fifteenth to one-eighth of their lands, for the period of the planter's thicca lease, without any remuneration further than a set off in their rent account. This is a most objectionable practice, and is a relic of the olden time, when ryots never dreamt of questioning an arrangement made between a zemindar and a planter, even when it infringed on their rights. I find that indigo-planters complain bitterly of the subservience of ryots to the zemindars, and of the hostile influence of the village putwaris, and some of them look forward with hope to the working of the new Rent law. They say that it is difficult in the present state of the law for a planter to deal with the ryots direct, as the zemindar almost invariably interferes and upsets the arrangement; and as long as the planter is forced to pay the zemindar the heavy fines he does now for his permission to deal with the ryots, indigo cannot be made as remunerative to the ryots as it ought to be. They think, however, that the provisions of the new Rent law will place the planter and ryot in a better position for dealing with each other direct, without, what they consider, the mischievous interference of the zemindar and of the village putwari. A good deal of trouble and dispute has always existed with reference to the occupation by indigo-planters of real or so-called *zerat*, and the question of passing a rule prohibiting the taking possession of such land, otherwise than in a legal and formal manner, has been under the consideration of the Behar Indigo Planters' Association since August 1881. They have recently passed a rule to the following effect, viz, 'that no land whatever should be taken for indigo *zerat* without a written agreement from the owner or tenant of such land.' This rule is an attempt to put a stop to a very objectionable system, and if thoroughly carried out, ought to prove highly beneficial. As it requires the ryot's written consent to any arrangement of this sort, they will be placed in a position to demand a fair consideration for yielding such consent.

"The few managers who are persisting in introducing the *khuski* system in the face of all obstacles are to be commended, and those who have succeeded in doing so are to be congratulated. The general adoption of this system, when facilitated by a change in the law, which will give the ryots an independent status, and render them capable of acting as free agents, ought to work an immense improvement in the system of indigo cultivation. Registering officers report that already, apparently in anticipation of the enactment of the Bengal Tenancy Act, there has been a large increase in the number of agreements registered by ryots in favour of indigo-planters."

23. Thus the great difficulty with indigo-planters now-a-days is the land difficulty. It scarcely needs words or arguments to condemn any system under which, as described by the Collector of Sarun, the indigo cultivation in Behar was carried on against the interests of those who possess direct and indefeasible rights in the soil; and happily the spirit which refused to allow the ryot to share in the profits of the industry is giving way under various influences among which a knowledge of his rights by the ryot is becoming a patent factor. Most planters will now pay the ryot as much as the precarious nature of indigo-planting, and perhaps a remembrance of its former profits, will let them. Improvements of various sorts, some from within, most from without, have raised the Behar ryot for the time to a position of greater independence.

If the permanency of these improvements can be secured; if a better land law assures to the ryot security in his holding, he will be in a position to give the planter what he wants—land, and to compel the return of a fair equivalent. Freed from the necessity of taking thiccas at impossible rents, and large bonuses, the planter will have a larger share of capital to expend in the hire of land; and the security of the contract he might make with the ryot should lead to the general growth of such dealings. No doubt there would still be found some who would cling to thiccas for the sake of "factory influence" which a veteran planter recently deposed to be synonymous with "a thick stick." But with an altered Rent law engendering independence among ryots, with a continuance of active administration, and with a better spirit abroad amongst the planting community, "factory influence" of that sort would probably not be long-lived. Therefore the Lieutenant-Governor is disposed to think that whatever improvements in the land laws will benefit the ryot must of necessity benefit the indigo, as it must benefit every other agricultural industry.

The question of the system of planting, which may be found most advantageous in the future, is one for the planters themselves. They know their own business best, and besides the working of economic laws is not easily controlled. But if he may hazard an opinion, it seems to Mr. Rivers Thompson that, from an administrative as well as a commercial point of view, the chances of success are in favour of the "zerat" system in which the planter holds the land and hires his labour. There must be some fixity in the extent of the planters' operations. With 5,000 acres of land under indigo this year, he cannot well run the risk of a reduction of area to 2,000 acres next year through vicissitudes of season or the competition of other crops. There must be certainty in his operations within some limit, and this certainty the zerat system seems best calculated to afford. The assamiwar and khuski system may well be employed as supplementary to the zerat, just as *baouli* are supplementary to *nukdi* tenures in the indigo districts; but entire reliance, it must not be forgotten, on the assamiwar and khuski indigo systems, means advances extending over years. These advances open the door to abuses of various sorts, and to a reluctance in bad years to keep their contracts on the parts of ryots, which in Bengal was fatal to the indigo industry itself.

For the rest, it is satisfactory to learn that the relations of planter and ryot were on the whole smooth throughout the year. This is in a great measure due to the good offices of the Planters' Association, and the Lieutenant-Governor joins with the Commissioner in thanking that body for the valuable assistance they afforded in the cause of good administration in the indigo districts of Behar.

24. *Excise.*—The total excise demand for the year was Rs. 25,03,205, which was an increase of nearly 4 per cent. on the preceding year's high income. The increase was spread over nearly all excisable articles except tari. The increase is assigned by the Commissioner to "the fact that in 1881-82, for the first time, a very careful adjustment was made in the number and in the localities of outstill shops, a large number of outstills having been abolished, with the result of keen competition for, and consequent increase in, the jummas of the remainder." This adjustment of the number of outstills to locality and area was begun (in the Sarun district) in 1880, and it has now been extended to the whole division, with, so far, satisfactory results. Fewer shops mean diminished competition among vendors, restricted supplies, and higher prices. High prices discourage consumption, and in this direction, therefore, is to be sought the remedy for that increase of drinking and its consequent evils, which some declare, and others deny, has followed the extension of the outstill system. That the readjustment of spirit shops to area has not yet had the effect of discouraging consumption is apparent from the increased revenue obtained in a year of agricultural depression. Therefore it behoves the Commissioner to push his adjustment still further to the point when any further contraction in the sources of legitimate supply would lead to illicit manufuture.

On the policy of the outstill system and its effects on the people, Mr. Halliday has the following remarks:—

"The outstill system has now been in force for the last five years, and considering the marvellous expansion of revenue which has taken place under it, there can be no difference

of opinion as to its success financially. It has been deprecated by some on the ground that it has increased drunkenness among the people. This question has been so fully discussed in the former reports, that I do not think it necessary to enter upon it again here. I adhere to the opinion that whatever increase of drunkenness has taken place among the people of late years, is due not entirely to the development of the outstill system, but to the cheapness of the necessaries of life, and to the prosperous condition of the people. The lower orders of the people of Behar (the higher orders are as free from drink now as heretofore) have a natural desire for drink, and they must satisfy it to the extent of the means at their disposal. The increase or decrease of drunkenness does not depend on any particular system under which liquor is sold, but on the material condition of the people who are addicted to drink. In times of cheap food-grains and consequent prosperity, there must necessarily be greater consumption of liquor. The expansion of revenue under the outstill system must not be taken as an index to the increase of consumption of liquor among the people. Owing to the development of the outstill system, great check has been put on the nefarious practices of the licensed distillers, as also on the illicit distillation and sale of spirits. The consequence is the general displacement of illicit by licit liquor, which did not, and could not, during the continuance of the distillery system, reach a larger area which used to be supplied with the produce of illicit distillation."

The whole question touched on in this extract is now receiving the Lieutenant-Governor's consideration.

25. *License-tax and Stamps.*—Last year the Lieutenant-Governor referred to certain considerations of a general character, which tended to show that the Patna Division, as a whole, was under-assessed with license-tax. This year's figures show a still further reduction of income from this source, and the position is now reduced to this, that the traders and money-lenders who supply the wants of 15 millions of people contribute barely two lakhs of rupees to the Exchequer. This is not the occasion for a detailed criticism of the working of the license-tax in the Patna Division; but the brief abstract of the figures as given in the report presents some peculiar features. For instance, the Patna district, which this year is reported to have altogether lost its trade, gives a larger income than it did last year; while the Sarun and Mozufferpore districts, where trade in 1882 was brisker than in 1881, show each a diminished assessment. The figures for 1881 were less than the figures for the year before, the reason assigned being excessive assessments in 1880. This year over-assessments in 1881 are made to do duty in explanation of the further decrease in 1882, and the Collector of Durbhunga complacently holds out the hope that next year a further lowering in the demand will bring us nearer a perfect assessment. Meanwhile, the Lieutenant-Governor has an uneasy consciousness that those classes who benefit most from British rule in the Patna Division are the very classes who contribute least to the public finances. In Mr. Rivers Thompson's opinion, traders' contributions in the Patna Division are out of proportion with their profits, and it will probably be for consideration whether this question of license-tax assessments in Behar should not be dealt with in a special manner.

26. The income from stamp revenue has increased from Rs. 16,14,123 in 1881 to Rs 17,14,864 in 1882, the increase being almost entirely under the head of non-judicial stamps—a proof that loan transactions, and consequently the profits of money-lenders, were large during the year. The following table shows the steady progressive increase in stamp revenue in this division:—

Years	Non-judicial.	Judicial.
	Rs.	Rs.
1878-79	3,52,798	11,47,894
1879-80	3,85,933	11,25,421
1880-81	4,12,452	11,05,850
1881-82	4,13,780	12,07,305
1882-83	4,78,050	12,11,235

The transactions in currency notes were less than in the preceding year, except in the Durbhunga district, where a large but unexplained increase in these transactions occurred. Mr. Nolan brings to notice an abuse which prevailed in the Shahabad treasury, whereby local traders were enabled to denude the treasury of notes and sell them at a premium to the public. The prohibition of this practice led to a reduction in the issues, which should, however, be temporary merely. It would be well in future reports to

distinguish between issues to the public and remittances to the reserve treasury, if, as seems probable, the statistics now submitted include both. The stock-note and savings bank systems still miss being popular in the Patna Division.

27. *Public Works*.—The year was one of much activity in the way of railway extensions in this division. A branch line from Mokameh station to the Ganges, in communication with the Tirhoot State Railway, was completed; the extensions to Bettiah and Jhinjarpur were opened; the line from Hajeepore to Mozufferpore was commenced, and much progress was made with the Patna-Baraitch line. With the completion of the last-mentioned line, the continuation of the Durbhunga line through the great rice tracts of North-East Tirhoot to the Khoosi river, the extension of the Gya line to the coal-fields of the central Indian plateau, and perhaps a light line from the East Indian line to the town of Behar, the country comprised in the Patna Commissionership will be well provided with trunk communications. If it be remembered that in 1874 the only railway in Behar was the East Indian line, it will be admitted that a great deal has been done in this decade to improve that portion of the province.

28. And not in railways alone is this improvement apparent. The various Road Cess Committees have done much for their districts in the way of roads and bridges. It is, indeed, true that too much attention has hitherto been given in many districts to earthwork repairs renewable every season to the neglect of permanent metalling; and the year under review shows that this fault has not yet been fully corrected. There are also many rivers in each district yet unbridged, which not only oppose a serious physical obstacle to intercourse and trade, but hamper and depress them by the exactions which ferry farmers levy on the travelling and trading classes. Still correct principles as to road-making have been adopted in some districts, notably in Shahabad, and with the uniformity of practice which the Superintendent of Local Works should enforce, these principles will no doubt in time be adopted generally. Thus a system of permanent feeder roads, practicable at all seasons of the year, and freed from the vexatious harassment of ferries and transit dues, will be in course of time completed; possibly to be supplied with light tramways as traffic expands.

29. *Education*.—The following table shows the progress made by education during the year:—

Class of Institutions.	1881-82.		1882-83.	
	Number of schools.	Number of pupils.	Number of schools.	Number of pupils.
High English schools	16	4,310	16	4,691
Middle „ „	88	4,007	105	5,095
„ vernacular „	103	5,092	109	5,066
Primary „	10,181	120,066	11,287	131,862
Indigenous „	1,628	12,252	1,698	15,510
Other „	19	739	23	817
Total ...	12,035	147,066	13,238	162,941

Thus there has been a general increase in the number of schools and students attending them, the increase being most marked in Chumparun, where the Magistrate devoted special attention to the subject. Mr. Henry was particularly successful in stimulating primary education. In other districts the development of the chief guru system is said to have had a beneficial effect on primary schools. In the absence of a proper system of training schools for primary school teachers—a want which must in course of time be supplied—the chief guru system is perhaps the best substitute that could be fashioned. Mr. Quinn, the Collector of Sarun, thus describes the working of the system in his district—

"A map of the district was prepared, and each thanna was divided into chief gurus' circles, of which 80, or an average of eight to each thanna, were established, against 45 in

the previous years. The principle adopted was to secure a fair number of really good primary schools, and to devote the rest of the grant to encourage the maintenance of as many non-stipendiary schools as possible by a system of rewards to teachers and pupils, according to the result of the periodical examinations, and this system so far promises to be successful. There has been a considerable increase both in the number of schools and in the number of pupils attending them, and the result of the examinations has been on the whole satisfactory."

Female education in Behar has as yet made but little progress, there being but 17 girls' schools with 575 pupils. A beginning, however, has been made, and some of the more prominent leaders of Behar society, notably the Maharajah of Hutwah, are aiding with their countenance and pecuniary help the cause of female education. Finally, a word of thanks is due to Mr. Grierson for his earnest and valuable labours in the cause of education in Behar.

30. *Road Cess and other Committees.*—The Road Cess Committees have in every district worked successfully and usefully during the year. In Gya and Chumparun the native members did not exhibit that want of interest which is to be desired, but in all the other districts the native members were useful members of these bodies. On the subject of associating natives and Europeans on the same committees, Mr. Nolan, the Collector of Shahabad, makes the following sensible remarks, in which the Commissioner agrees:—

"The present system of associating independent residents with executive officers in the administration has proved a complete success in Shahabad. The work has been better done than it would have been either by the executive alone or the residents alone, while friendly feelings have been cemented, and the leaders of the people taught to understand the motives of Government. Still better results may be expected from an extension of the system of co-operation, so as to include other departments and to carry with it greater power. But if the system is to be abandoned, and the local executive entirely separated from the representatives of the people, all that is best in the working of the committees will be changed. Instead of the policy of co-operation, which has succeeded, we will have the policy of isolation, of separating the Government from the affairs of the country and its leading men, which has not yet been tried."

The Education Committees had but little to do during the year, but the Municipal Committees everywhere took great interest in their work, and displayed a real wish to see public money well spent. The usefulness of the Patna Municipality was marred by differences of opinion on the selection of officers, and by a factious spirit of mutual opposition on important questions. Much valuable time was thus lost, and this the Commissioner attributes to the policy of the Chairman in leaving matters too much in the hands of the Commissioners. As the local press, which generally took a sensible view of the Commissioners' shortcomings, was of Mr. Halliday's opinion in this matter, the Lieutenant-Governor has hopes that the force of local opinion, combined with the Chairman's advice, will in time induce the Commissioners to think more of public business and less of their private differences. The Commissioner reports favourably of the management of the zemindari dâk, and of the postal and telegraphic services during the year. Every district of the division is now served by the telegraph, to the great convenience of the public and of the officials.

31. *Court of Wards.*—There were 11 estates under management during the year, of which three were released before its close. The only estate of importance is that of Nurhan in Durbhunga, the debts due on which are being steadily reduced.

32. *Conduct of Zemindars.*—The general view of the conduct of the zemindars in the division represents the lower class of land proprietors to be indifferent to the welfare of their ryots, backward in acts of beneficence and liberality, and careless of the obligations and responsibilities of their position. Even among these, however, there are notable exceptions, and the Lieutenant-Governor notices with regret the death during the year of Baboo Sridhur Sahi, the owner of the Manjah property, whose kindly dealings towards his tenanty are favourably recorded. The general condemnation needs qualification no doubt in the cases of the great territorial magnates—the Maharajahs of Doomraon, Durbhunga, Bettiah, and Hutwah, and the Maharani of Tikari—and the Collectors of the districts in which these noblemen's estates are situated speak favourably, on the whole, of their management. But excluding the great

landed proprietors, whose necessities are not such as to compel recourse to constant exactions and enhancements of rent, Mr. Rivers Thompson believes that the reported description accurately states the facts in the smaller estates. Large estates are favourable to the growth of fixity of tenure at moderate rates of rent. Small estates are opposed to it. No tenants are so rack-rented as the tenants who pay rent to a number of petty proprietors, usually quarrelling with each other about their shares; and when these quarrels lead to a partition, always impatient to raise their rents. The Tenancy Bill will, it is hoped, apply a remedy to this intolerable state of things. From that Bill the good landlord has nothing to fear. It will do him more good than harm. It is the grasping landlords—those who have reduced the Behar peasantry to their present low condition, and who are still incessant in their exactions—that the Bill will affect.

33. *Conduct of Officers.*—The Commissioner's remarks on this head will be communicated to the Appointment Department. Most Behar officers are favourably reported upon, but here it may be mentioned that among Collectors, Messrs. Worsley, Nolan, and Quinn; among Joint-Magistrates, Messrs. Grierson, Faulder, Collin, and Lee; and among Deputy Collectors, Moulvie Abdul Jubber, have specially distinguished themselves during the year. Finally, the Lieutenant-Governor thanks Mr. Halliday for his administration of an important charge.

By order of the Lieutenant-Governor of Bengal,

A. P. MacDONNELL,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1882.

POLICE.

Darjeeling, the 1st September 1883.

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1882.

Read also—

The Annual Reports of the Chief Presidency Magistrate, and the Presidency Magistrate of the Northern Division, on the Criminal Administration of their Courts for the year 1882.

Read also—

The Reports for the year 1881, and the orders of Government recorded thereon.

The following table shows the total number of cases cognizable and non-cognizable, reported to have occurred in the Town and Suburbs during 1882 and the five preceding years:—

		1877.	1878.	1879.	1880.	1881.	1882.
Cognizable	Penal Code ...	6,260	6,102	5,557	4,644	4,476	5,118
	Miscellaneous ...	13,236	13,074	13,112	14,230	13,603	13,963
Non-cognizable	Penal Code ...	6,759	6,213	7,843	7,688	8,886	9,544
	Miscellaneous ...	18,201	18,108	18,141	18,499	18,308	18,214
Total ...		44,696	43,507	44,653	45,161	47,272	46,838

The total number of offences reported is considerably lower than the number in 1881, and is also lower than in any of the five preceding years. There was an increase in the number of offences reported under the Penal Code of 1,300 as compared with the number reported in 1881, while the offences under miscellaneous laws were less by 8,734 than during the preceding year. The net decrease in the total number of cases reported was 7,434. There was an

increase of 642 in the number of cognizable offences under the Penal Code, which fell principally under the classes of "serious offences against the person and property, or against property only," "minor offences against the person," and "minor offences against property," while the number of cognizable offences under miscellaneous laws was less by 2,640 than during the preceding year. The laws under which the decrease was greatest were the Contagious Diseases' Act, the Port Acts, the Stamp Act, the Stage-carriage Act, the Railway Acts, the Excise Acts and the Gambling Act. Under the head of non-cognizable offences, those under the Penal Code showed an increase of 658, chiefly under the heads of "rioting," "mischief," and "public nuisance," while under offences against miscellaneous laws there was a decrease of 6,094 cases, which occurred principally in municipal prosecutions. The total number of persons who were arrested, or who appeared on the issue of a summons, was 40,470 as compared with 47,119 in 1881, and of these 33,044, or 81·65 per cent., were convicted as against 38,713, or 82·16 per cent., convicted during the preceding year. Though the percentage of convictions was slightly lower than during 1881, the results were, on the whole, satisfactory. Of the persons convicted, 11,009 were convicted of offences under the Penal Code, and 22,035 of offences under miscellaneous laws. Deducting from the total number of offences reported, those cases which were declared to be false, the number of offences against the State fell in the town from 65 in 1881 to 44 during the past year, and the number of serious offences against the person also fell from 201 to 190. On the other hand, the number of serious offences against the person and property, or against property only, increased from 119 in 1881 to 149 during the past year, the number of minor offences against the person from 278 to 336, and the number of minor offences against property from 2,080 in 1881 to 2,319 during 1882. In the Suburbs the number of true cases of serious offences against the person fell from 69 in 1881 to 44 during the past year; there was, however, a slight increase in the number of cases of serious offences against the person and property, or against property only, the number of cases being 49 in 1882 as compared with 47 in the preceding year; the number of minor offences against the person also increased from 130 to 161, and minor offences against property from 630 in 1881 to 678 in the past year.

2. With a decrease in the total number of offences reported, there was an increase in the number of cases declared to be false, and a considerable increase in the percentage of false to true cases. The following table gives the statistics for the past two years:—

	Town.	Suburbs.	Percentage of false crime to true crime.
1881.			
Cases reported	38,902	8,370	1·12
False cases	519	13	
1882.			
Cases reported	33,177	6,361	2·07
False cases	783	43	

In 71 cases in the Town, prosecutions were instituted against the complainants; in 66 cases the complainants were fined, in four warned, and in one the complainant was discharged. In the Suburbs eight prosecutions were instituted; in two the complainants were imprisoned, in five they were fined, and in the remaining case the complainant was discharged with a warning. It thus appears that out of 79 cases in which prosecutions were instituted for making a false complaint, the persons charged with the offence were, in every case but one, found guilty, though in five cases it was deemed sufficient to discharge them with a warning. The results of the prosecutions, so far as they went, were satisfactory, but there is ground for the conclusion that the prosecutions did not proceed far enough. It seems hardly likely that so large a proportion as 712 cases out of a total of 783 cases in the Town should have not been due to malice, but should have been the result of mistakes either of law or of fact. The decision of the question

whether a false case falls within the one category or the other rests, as the Commissioner of Police points out, with the Magistrate by whom the case is tried. Fluctuations must, therefore, be expected, and it may be that in the particular year under notice, all intentionally false cases have been prosecuted, though the probabilities seem to point the other way. What, however, the Lieutenant-Governor desires to impress on the Presidency Magistrates is that nothing tends so much to discourage the institution of maliciously false cases than the knowledge that they who bring them will be criminally prosecuted. It will frequently happen that the evidence against the originals of the false charge may break down, and that a conviction will not be obtained, but the certainty of a prosecution involving trouble and expense of defending it will act as a deterrent. It appears that no regular record is kept showing which cases are maliciously false, and which are false through mistake of law or fact, but the Commissioner of Police hopes that they may be separately shown in future reports. The Lieutenant Governor, in reviewing the report of the administration of the Police Department for 1881, recorded, in paragraph 15 of the Resolution on that report, instructions regarding the manner in which false and doubtful cases should be dealt with; and such cases in the Town and Suburbs should be dealt with in accordance with those instructions, proper steps being taken to secure the necessary distinction between cases maliciously false and those which are false through a mistake of fact or law.

3. The following table shows the value of the property stolen and the value of that recovered during the past three years:—

		Value of property stolen.	Value of property recovered.	Percentage of value of property recovered.
		Rs.	Rs.	Rs.
1880	Town	1,12,212	70,867	63 15
	Suburbs	22,284	12,982	58 25
	Total ...	1,34,496	83,849	62 33
1881	Town	1,26,045	78,800	62 51
	Suburbs	11,582	8,654	74 71
	Total ...	1,37,627	87,454	63 54
1882	Town	97,000	58,307	59 55
	Suburbs	13,936	5,682	40 77
	Total ...	1,11,836	63,989	57·2[illegible]

The decrease in the percentage is said to be due to small recoveries in one or two cases in which a large amount of property was stolen. Looking to the percentage of cases in which property was recovered on the total number of cases in which property was stolen, the results during the past year were better than those of the two preceding years. The following table shows the percentage in each of these years:—

	1880.	1881.	1882.
Town	62·32	63·59	65·74
Suburbs	61·01	62·44	74 11
Total ...	62·03	63·36	67·24

The proportion of cognizable crime to population in the Town was 1 to 30·99, and in the Suburbs 1 to 76 75, as compared with 1 to 25·61 and 1 to 95·38 respectively during the preceding year.

4. *Cognizable crime in the Town.*—The number of true cognizable cases in the Town was 13,978 as compared with 16,882 in 1881 and 15,399 in 1880. There were only 8 cases of offences relating to coins and stamps as against 17 in 1881 and 26 in 1880. There were 7 cases of murder as compared with 2 in 1881; in 3 cases the defendants were convicted, in 2 they committed suicide before trial, in one case the evidence was not considered by the jury sufficient to support a conviction, and in the remaining case, which was remarkable

from the absence of any cause or motive for the deed, no trace of the murderer has been found. There were 2 cases of attempts at murder, as in 1881, while the number of cases of culpable homicide were 3 as against 2 in that year. There were only 2 cases of rape as compared with 5 in 1881. There were 22 cases of grievous hurt, and 28 of hurt by dangerous weapons, the offences in each case being one in excess of the number in the preceding year. The number of cases of kidnapping or abduction was 18 as against 12 during 1881. There was one case of selling a minor for prostitution. In this case a man named Sheikh Nazir sold his sister, who was under the age of 16, for Rs. 25 to a brothel-keeper. Sheikh Nazir was on conviction sentenced to 10 years' rigorous imprisonment, the brothel-keeper to 7 years' rigorous imprisonment and a fine of Rs. 2,000, and her paramour to 7 years' rigorous imprisonment. The case appears to have caused much excitement, and the severity of the sentences passed upon the prisoners should have a salutary effect upon the class of people with whom the accused were connected. Not only were the number of cases of burglary and lurking house-trespass and of theft more than in the preceding year, but the number of cases detected was proportionately smaller than in 1881. In 1882 there were 149 true cases of burglary and lurking house-trespass, as against 116 in 1881; of these, 69 were detected, and property to the value of Rs. 4,513 recovered out of property worth Rs. 7,430 stolen, as compared with 63 detected, and property worth Rs. 5,776 recovered out of Rs. 8,625 stolen in 1881. The true cases of theft were 1,839 as compared with 1,593 in 1881, 891 cases being detected, and property worth Rs. 53,754 recovered out of Rs. 89,481 stolen, as compared with 842 cases detected and Rs. 63,513 worth of property recovered out of Rs. 1,07,461 stolen in 1881. It is stated that the increase in the number of cases under each of these heads was due to the increased commercial activity and the larger number of ships which came into port. These causes, by stimulating the demand for labour, augmented the floating population, at the same time that they increased the amount of property exposed to the depredations of the criminal classes. Of the cases of theft, 442 were committed by servants. The large proportion of such thefts to the total number is attributed by Mr. Harrison to the carelessness of natives in hiring servants without making any enquiries as to their character, or even their place of residence—a practice which not only encourages robberies, but renders the detection of the culprits almost an impossibility. Towards the close of 1881 the area in which the Contagious Diseases' Act was in force was considerably restricted, and in consequence the number of offences under this Act was much lower during the past year than during that which preceded it. In 1881 the number of true cases amounted to 1,902, while during 1882 there were only 369 true cases. Under the head of "street offences" also there was a considerable decrease, the number of such cases during the past year being only 3,641 as compared with 4,437 during the preceding year, while the number of true cases of cruelty to animals increased from 2,727 in 1881 to 2,928 in 1882.

5. The number of non-cognizable offences in the town was less by 2,785 than during the preceding year, the number of offences being 18,716 during 1882, as compared with 21,501 in 1881. There was a slight increase in the number of cases of cheating and mischief, and an increase of 634 in the number of cases of public nuisance. On the other hand there was a slight decrease in the number of cases of criminal force and intimidation and insult. There was a decrease of 3,415 in the number of municipal prosecutions instituted, the decrease being chiefly under the head of prosecutions for not taking out trade and profession licenses: the decrease is attributed to licenses being more freely taken out in 1882 in consequence of the large number of prosecutions instituted in 1881.

6. *Cognizable crime in the Suburbs.*—There was an increase of 647 in the number of cognizable offences in the Suburbs, the number having risen from 2,629 in 1881 to 3,276 during the past year. There was an increase under the head of hurt and breach of trust, and a large increase of 853 in the number of street offences. There was a decrease of 2 in the number of murders, of 4 in the number of cases of grievous hurt, of 5 in the cases of kidnapping, of 14 in the cases of using criminal force to a public servant, of 4 in cases of causing death by a rash act, of 22 in offences under the Carriage Act,

of 17 under the Excise laws and of the same number under the Railway laws. There were 56 cases of burglary and house-trespass as compared with 47 during the preceding year; the value of the property stolen was, however, only Rs. 1,437 as compared with Rs. 5,400 in 1881. Though the number of such cases was higher than in 1881, it was considerably lower than in any of the three previous years, the number in 1880 being 83, and the numbers in 1879 and 1878 being 109 and 110 respectively. There were 430 cases of theft as compared with 434 in 1881. The value of the property stolen was Rs. 12,499, that recovered being only of the value of Rs. 4,719. The small percentage of the recoveries was due to only Rs. 524 being recovered out of Rs. 6,000 stolen in the case at the Zoological Gardens, the particulars of which are well known. It is satisfactory to observe that there has been a gradual decrease each year in the number of theft cases since 1878, when the number of such cases was 776.

7. The number of non-cognizable offences in the Suburbs fell from 5,728 in 1881 to 3,042 during the past year. There was a decrease of 15 in the number of minor non-cognizable offences against property, and of 2,788 in the number of offences under Local Acts, the number of offences under Conservancy Acts alone falling from 3,617 in 1881 to 836 in 1882.

8. There were 45 cases of suicide as compared with 49 in 1881 and 67 in 1880; of these, 34 occurred in the Town and 11 in the Suburbs. In 28 cases the persons who committed suicide were males and in the other 17 cases females. In 19 cases the persons committed suicide by hanging themselves, in 12 by taking opium, and in 7 by means of arsenic or some other poison; the others committed suicide by cutting their throats, by drowning themselves, or by other means. The number of accidental deaths which occurred in the Town was 127 as compared with 103 in 1881, while the number in the Suburbs was 74 and on the river 82, as compared with 77 and 52 respectively in 1881. Of the deaths on the river, 41 were due to drowning and the same number to other causes; of the 201 deaths in the Town and Suburbs, 59 were due to drowning, 35 were caused by falls from trees and buildings, 19 were caused by carriages or horses, 7 by snake-bite and the rest were due to other causes. Of 19 persons killed and 344 injured in street accidents, 4 deaths and 47 injuries were due to tram-cars. The proportion of accidents due to these conveyances, which should of all kinds be the most easily controlled, is large, and would seem to indicate a want of proper care on the part of the drivers, though the report does not state if any of them were prosecuted. Two steam-launches and 20 other boats were sunk by coming into contact with the Hooghly Bridge; only three deaths resulted from these accidents.

9. *Arms Act* (*XI of* 1878).—The quantity of arms and ammunition imported through the Port of Calcutta during the past seven years is shown in the following table:—

Years.	Sporting rifles.	Double and single-barrel sporting guns.	Pistols and revolvers.	Gunpowder.	Shot.	Percussion caps.
	No.	No.	No.	lbs.	Bags.	No.
1876	280	1,536	283	93,300	15,290	21,208,000
1877	186	716	453	84,560	18,894	28,886,700
1878	174	365	306	80,000	11,024	11,234,000
1879	23	69	341	88,050	10,940	10,660,500
1880	118	135	356	43,200	20,040	14,841,000
1881	60	180	252	81,894	12,876	10,330,000
1882	201	196	259	84,000	9,000	20,565,350

The Commissioner observes that there was a decrease in the amount of shot shown as imported; this was, it is said, due to the fact that small bird-shot has been allowed to be imported without a license. When the question was originally raised, the Legal Remembrancer, who was consulted whether bird-shot came under the definition of ammunition, was clearly of opinion that it did not, and this view would seem to be supported by the fact that under the Tariff Act of 1875, while the import duty on ammunition was 10 per cent. *ad valorem*, the import duty on bird-shot was only 5 per cent., and it was not entered under the head of "ammunition," but under the heading "metals." Mr. Harrison considers, however, that this view is inconsistent with the ruling of the Government of India in 1881, that iron droppings or pellets, which are

used instead of shot in some parts of the country, come under the definition of ammunition. There appears to be some force in the objection, and the matter will again receive the Lieutenant-Governor's attention. There were only eight prosecutions under the Act during the year. They were all instituted in the Suburbs, and were of a petty nature. Of the persons prosecuted, six were convicted.

10. There were 35 European vagrants admitted into the work-house during the year, and 12 were in that institution at its commencement. Of the 47 vagrants, 19 were released on finding employment, 14 were released for whom employment could not be found, 5 were deported, 2 absconded, 1 died and 6 were in the work-house at the close of the year. In addition to these persons, 3 others were deported, 2 to England and 1 to Australia. The total cost of working the European Vagrancy Act during the year was Rs. 4,162, of which Rs. 2,650 was spent in connection with the work-house, and Rs. 1,299 in deporting vagrants and Rs. 213 in providing clothing.

11. There were 36 fires during the year in the Town and Suburbs as compared with 27 in the preceding year, the value of the property destroyed being Rs. 16,87,523, exclusive of the value of property destroyed in two fires on the river, which could not be ascertained, as compared with Rs. 8,77,216 in 1881. In two fires alone, which occurred in jute mills in the Suburbs, property worth more than 9 lakhs of rupees was destroyed. Most of the fires were connected with jute-presses, and a separate communication on the subject has been submitted by the Commissioner of Police. The Fire Brigade did good service.

12. The total cost of the police in the Town was Rs. 4,23,896 as compared with Rs. 4,34,441 during 1881. Of this amount, Rs. 2,80,805 were paid by the municipality, the rest being paid by Government, to which Rs. 49,490, received on account of fees and fines, was credited. The cost of the Suburban Police was Rs. 1,53,743, of which Rs. 70,048 were paid by the municipality, and the rest by Government, the amount received on account of fees and fines being Rs, 13,647. The cost of the River Police was Rs. 29,778, of which Rs. 7,444 were paid by Government and Rs. 22,334 by the Port Commissioners.

13. The number of Bengalees in the Police Force in the Town and Suburbs was 278, including officers, while the number of up-countrymen amounted to 1,836. During the year 300 men resigned, 63 were discharged on pension or gratuity, 122 were dismissed, 30 were discharged, 22 deserted, and 37 died. The number of resignations rose from 235 in 1881 to 300 during the past year, the great demand for labour being, it is stated, the cause of the increase. No doubt, as Mr. Harrison points out, resignations must always be numerous in Calcutta, where the men can get other employment, in which, while the remuneration is as good as in the Police, the duties are much less irksome and laborious. Only 15 men, as compared with 23 in the preceding year, were judicially punished—a fact which speaks strongly in favour of the conduct and character of the force.

14. The number of cognizable cases tried by the Chief Presidency Magistrate decreased from 8,195 in 1881 to 6,879 during the past year. Of these cases, 883 were taken up by the Magistrate direct and 5,996 were instituted by the Police. In connection with these cases, 8,821 persons were put upon their trial, of whom 8,202 were convicted, 553 were acquitted or discharged, 36 were committed, 1 died, and 29 were under trial at the close of the year. The number of cognizable cases tried by the Magistrate of the Northern Division was 4,737 as compared with 5,999 in the preceding year. Of these, 4,337 were instituted by the Police and 400 were taken up by the Magistrate direct. Of 6,984 persons put on their trial before him in these cases, 6,492 were convicted, 448 were acquitted, 38 were committed, 1 died, and 5 were under trial at the end of the year. In the Court of the Chief Presidency Magistrate, 3,506 non-cognizable cases were instituted as compared with 3,283 in 1881, and of 4,155 persons who appeared before the Court, 3,774 were convicted and 8 were committed. In the Court of the Magistrate of the Northern Division, the number of similar cases was 3,347, the number of persons who appeared before the Court 3,433, and of these 3,134 were convicted and one was committed. The work done by the Bench of Presidency Magistrates was satisfactory;

11,755 cases, including 10,746 under the Municipal Act, came before the Bench. The Chief Presidency Magistrate reports that the Honorary Magistrates as a body showed great interest in their work, and were ready to attend Court even on gazetted holidays. The Lieutenant-Governor is sure that the assistance given by these gentlemen contributes largely to the speedy decision of the cases tried in the Police Court, and thereby to the general convenience of the public. Some instances have occurred, however, of unpunctual attendance, and even of neglect to attend altogether, after attendance had been promised. The Chief Presidency Magistrate has addressed a circular to the Honorary Magistrates on the subject, pointing out the great inconvenience and loss of valuable time caused by these irregularities. The Lieutenant-Governor trusts that this action will have the desired effect, and that it will not be necessary again to advert to the subject.

15. The Lieutenant-Governor has to acknowledge the energy and ability with which Mr. Harrison, the Commissioner of Police, performed his duty during the year. Mr. Wilkins, the Deputy Commissioner, has worked with untiring energy, and has displayed both ability and discretion. He has, as the Commissioner remarks, fully justified his selection for the responsible post he holds. Superintendent Percy, of the Reserve Force, re ired during the year after a long career of active and honourable service. Mr. Rivers Thompson has noted with satisfaction the names of the other Superintendents whose services during the year met with the approval of the Commissioner of Police.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information, and for communication to the Presidency Magistrates.

Ordered also that a copy of the Resolution be forwarded to the Commissioner of the Presidency Division for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Secretary to the Gov rnment of Bengal.

Rainfall, Weather, and State and Prospects of the Crops

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 1st September 1883.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
	BENGAL.		
	Western Districts.		
	Burdwan Divn.		
1	Burdwan. Sept. 1 '83	2·00	Weather—hot and steamy with occasional showers. Transplanting finished. Prospects favourable.
	Culna ...	0·97	
	Kuneegunge ...	1·13	
	Cutwa ...	1·41	
2	Bankoora, „ 1 „	1·90	Weather—alternately cloudy and clear, with rain at intervals. Prospects of rice crop continue very favourable. *Aus* paddy in the ear and in places beginning to be cut. Other crops in the field also doing well. Public health good.
	Bishenpore ...	0·87	
	Maliara ...	1·23	
	Khatra ...	2·11	
3	Beerbhoom, „ 1 „	3·54	Weather—cloudy; frequent showers. Transplanting of paddy plants finished. Prospects of crops good. Health of district satisfactory.
	Rampore Haut ..	0·91	
4	Midnapore „ 1 „	1·27	Weather—seasonable. Crops doing well Public health fair.
5	Hooghly, „ 1 „	1·03	Weather—seasonable. A little damage has been done by excessive rain, but prospects of crops generally good. A few sporadic cases of cholera reported; general health otherwise good.
	Howrah „ 3 „	2·27*	Sufficient rain. *Aus* rice and jute are being harvested *Amun* rice nearly all. planted out. Damage by floods estimated at Rs 1,50,000. Sugarcane healthy.
	Oolooberia ...	3·36	
	Central Districts.		
	Presidency Divn.		
6	24-Pergunnahs. Sept. 3 '83	1·86*	Weather—hot and cloudy, with occasional rain. Harvesting of early rice has commenced and transplanting of late rice going on in some parts of the district. Prospects of both are good. Public health good.
7	Nuddea, „ 1 „	.....	Weather—hot, with occasional showers of rain. Harvesting of *aus* continues.
	Kooshtea ...	1·11	Other crops doing well. Fever unchanged.
	Meherpore ...	1·71	
	Chooadanga ...	0·92	
	Ranaghat ..	0·49	
8	Khoolna, „ 1 „	1·03	Weather—very warm. State and prospects of crops continue to be favourable, but more rain is wanted for transplanting of *amun*. Public health generally fair, but fever continues at Satkhira and Bagirhat.
9	Jessore, „ 1 „	0·93	Weather—hot, with occasional slight showers. Harvesting of *aus* crop almost completed, Transplanting of *amun* continues Prospects favourable. More rain wanted. Health good.
	Jhenida ...	0·76	
	Magura ..	1·33	
	Narail ..	0·52	
	Bongong ...	2·90	
10	Moorshedabad, „ 1 „	0·63	Weather—cloudy and cool with high winds. Harvesting of early rice continues; results reported good. Prospects of late rice crop are not good, owing to continued absence of an adequate rainfall and the low rise of the rivers.
	Rajshahye and Cooch Behar Divs.		
11	Dinagepore Aug 31 '83	3·34	Weather—cloudy, with occasional rain. More rain is wanted for *amun* rice. *Aus* rice is being harvested with a fair yield. Outturn of jute will be fair.
12	Rajshahye, Sept. 1 „	1·09	Weather—cooler; cloudy, with occasional showers Good jute and *aus* crops being gathered in. *Amun* so far in good order, but much of the *ropa* paddy is still not transplanted for want of water.
	Nattore ..	0·87	
	Nowgong ...	2·22	
13	Rungpore Aug. 31 „	3·41	Weather—hot and cloudy with occasional rain. Harvesting of *aus* rice nearly at an end. Jute is still being cut Prospects of all other crops good. Public health generally good. Fever is increasing at head-quarters.
	Nilphamari ...	5·14	
	Gaibanda ...	2·96	
	Kurigram ...	1·58	
14	Bogra Sept. 1 „	4·01	Rain fell daily, and the weather is again pleasant. The recent rain has done much good, but more is wanted for the transplanting of *amun*. *Aus* rice and jute are still being harvested. Public health fair for this time of the year, but fever is prevalent in many parts of the district.
15	Pubna „ 1 „	0·56	Weather—dry and cloudy. Heavy showers at Serajgunge. *Aus* rice being reaped; an average crop. Other crops fair.
16	Darjeeling, „ 1 „	5·73	Rain heavier than usual for the season. Indian-corn and potatoes being harvested in the hills; the latter a good crop, the former hardly up to the average, Transplanted rice doing well both in Hills and Terai. Jute in Terai below average. Public health good.
17	Jalpaiguree, „ 1 „	7·80	Weather—seasonable. State and prospects of crops generally favourable. Jute in parts of district backward. Public health better.
	Cooch Behar Aug. 31 „ up to 29th.	4·84	Weather—seasonable; rain at intervals. Prospects of late rice improved. Late rain has enabled cultivators to extend area of cultivation. Jute prospects also good. Public health good.
	Dinhatta ... up to 26th.	1·84	
	Mathabhanga ... up to 25th.	2·23	
	Meckligunge ... up to 23rd	4·50	
	Eastern Districts		
	Dacca Divn		
18	Dacca Sept. 1 '83	1·18	Weather—hot. *Aus* paddy and jute are being cut. Sowing of *roashia* paddy, *mug* and *maskalai* is going on. Prospects of crops are good. In Nawabgunge prospects of jute crop are not so favourable.
	Manickgunge ...	1·59	
	Munshigunge ...	0·41	
	Naraingunge ...	1·63	
19	Furreedpore, „ 1 „	1·91	Weather—breezy and drier than usual at the season. *Aus* and jute being cut with moderate outturn. Prospects of *amun* pretty fair. Rivers falling, and more rain wanted. Fever prevalent.
	Goalundo ...	0·94	
	Madaripore ...	2·11	
20	Backergunge. Aug. 30 „	1·48	Weather—seasonable Transplanting of *amun* crop going on very rapidly. A few deaths from fever reported from the Sudder sub-division. General health good.
21	Mymensingh. „ 31 „	3·54	Weather—warm. South-east breeze. Unfrequent showers. Cloudy sky. Prospects of winter rice good. General health good. Fever in Kishoregong.
	Jamalpore ...	1·13	
	Kishoregunge ...	4·65	
	Attea ...	1·49	
	Netrokona ...	6·02	

* For week ending 1st September.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL—*concld.*			
***Eastern Districts.*—concld.**			
CHITTAGONG DIVN. 22	Chittagong, Sept. 4 '83	0·89	Weather—hot More rain wanted in some parts. Prospects fair. Transplanting almost over. Prices somewhat high. Cattle-disease still reported.
23	Noakholly, Aug. 30 „	5·90	Weather—Nights and mornings generally cloudy and rainy; day generally clear. Wind southerly. Reaping of *aus* paddy and transplanting of *amun* paddy still continue.
24	Tipperah, „ 30 „	0·40	Weather—fair and seasonable Wind strong and southerly. The crops would be the better for rain. *Amun* still being planted out.
	Brahmunbaria ..	3·49	
	Chandpore ...	4·50	
25	Chittagong Hill Tracts. „ 28 „	1·91	Weather—cloudy, with occasional high wind and heavy showers. *Jhum* paddy good, harvesting of it has begun. Plough-paddy transplanted and doing well. Cotton crop will be very short.
	Hill Tipperah „ 29 „	1·20	Weather—occasionally rainy. Gathering of *aus* rice nearly finished. Transplanting of *amun* rice still continues. Prospects of sugarcane fair. Public health good.
BEHAR			
PATNA DIVN. 26	Patna, Sept. 1 '83	0·97	Weather—hot. Transplanting of rice seedlings going on. Prospects of *bhadoi* not good. More rain wanted. Cholera reported from Barh and Behar sub-divisions.
	Barh .	0·03	
	Behar ..	0·83	
	Dinapore ..	0·20	
27	Gya „ 1 „	0·75	Weather—cloudy; very clear air; light showers. Rain very badly wanted. Crops in many places drying up. Cholera abating slowly. Prices rising.
28	Shahabad, „ 1 „	1·77	Weather—hot and cloudy with east wind. More rain wanted. Harvesting of *bhadoi* crops has commenced. Cholera and fever diminishing in Bhabooah.
	Buxar ..	0 20	
	Bhabooah ..	1·32	
29	Durbhunga, „ 1 .	0·82	Weather—hot and seasonable. Prospects of *maksi* and *bhadoi* crops continue to be fair, except where the inundation has spoilt them. Prices of food-grains rising slightly. Health of the district fair.
30	Mozufferpore. „ 2 „	1·28	Weather—generally bright with strong sun; heat oppressive. The flood-waters are draining off the country, but only slowly, as the rivers continue very full. The loss of crops and damage to houses and roads have been severe in the north of the district, but the Hajeepore sub-division has almost escaped all injury. Efforts are being made to re-plant the *aghani* crop, but it is too late in the season to effect much in this way.
	Hajeepore ...	0·13	
	Sitamurhee ...	2·99	
31	Saran, . 1 „	Nil	Weather—hot and close. *Bhadoi* crops doing well. *Marwa* and *tangoni* ready for cutting. Rain much wanted for paddy. Public health good. Prices easy.
	Sewan .	0·90	
	Gopalgunge .	0 05	
32	Chumparun „ 1 „	0·05	Weather—hot and cloudy. Prospects of crops, with the exception of those damaged by flood water, good. Some cases of fever and cholera reported from the interior. General health on the whole good.
BHAGULPORE DIVN. 33	Monghyr Sept. 1 '83	0·70	Weather—seasonable. Prospects of crops continue fair Some damage has been done to *bhadoi* crops by floods in the north of the district. Public health good. Cholera diminishing.
	Begusarai ..	1·08	
	Jamui .	0·61	
34	Bhagulpore, „ 1 „	0·44	Prospects continue good. Transplanting of *aghani* rice still going on. More rain is wanted, especially in the Sudder sub-division
	Janka ...	1·61	
	Muddehpoorah ..	1·64	
	Soopole ...	1 50	
35	Purneah „ 1 „	1·78	Weather—alternate cloud and sunshine. *Bhadoi* crops are still being cut and *aghani* planted out. The rain has saved the crops.
	Arrareah ..	3·97	
36	Maldah, „ 1 „	1·58	Rainfall moderate. Weather rather damp and oppressive. Prospects of crops fair. Prices of food-grains stationary. General health good.
37	Sonthal Purgha „ 1 „	1·56	Weather—cloudy, with occasional rain. Prospects of rice crop generally satisfactory, but more rain is wanted in Pakour and Godda. *Bhadoi* harvest has begun.
	Deoghur .	1·10	
	Rajmehal .	1·43	
	Jamtara .	1·18	
	Pakour .	0 37	
	Godda ...	1·40	
ORISSA.			
ORISSA DIVN. 38	Cuttack Aug. 31 '83	2·17	Weather—cloudy, but warmer still. *Beali* ripening and in some places being reaped. *Sarad* thriving well. *Guru sarad* being reploughed Price of rice stationary. Public health good. A few cases of cholera in the interior.
39	Pooree, „ 30 „	1·54	Strong south-east wind with frequent sharp showers. *Sarad* doing well. *Beali* ripening Miscellaneous crops, viz. *arhar*, *nabiri*, are sprouting. Some damage done to *beali* in pergunnah Kotrahang by insects. Cholera reported from pergunnah Kotdesh. Small-pox still lingers in Banpore. Cattle-disease in thana Piplee. Common rice selling at from 24 to 42 seers per rupee.
	Khoorda ..	2·12	
40	Balasore „ 31 „	3·54	Weather—cloudy and rainy, with occasional gleams of sunshine. *Beali* crops in ear, and in some places ripening. *Sarad* being weeded and transplanted at places. General health good.
CHOTA NAGPORE.			
South-West Frontier Agency.			
41	Hazaribagh. Aug 31 '83	1 80	Weather—warm and cloudy. More rain wanted for transplanting operations. Some of the *bhadoi* crops are being harvested. Common rice selling at 15½ seers per rupee. General health good.
42	Lohardugga, Sept. 1 „	1·28	Weather—seasonable. Prospects of rice crop good in the head-quarters sub-division. In Palamow rain is wanted, one-fourth of the rice crop remaining to be planted out. Cholera still prevalent in Palamow. Prices steady.
	Palamow ..	0 12	
43	Singbhoom, .. 31 „	1·17	Weather—generally fine; bright, cloudless skies; and very hot. All crops doing well, and prospects continue favourable. Fever prevalent: public health otherwise good.
44	Manbhoom, Sept. 1 ...	1·95	Weather—rainy and cool. Prospects of rice crop good. Sugarcane and Indian corn slightly affected by excessive rain. Small-pox continues in Topchanchi; elsewhere public health good.
	Govindpore ...	0·97

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, *g* gloomy, *p* passing temporary showers, *d* drizzling rain, *t* thunder, *lr* lightning reflection.

Explanation of Summary.—The normal means of air pressure and temperature are the arithmetical averages or means of the readings during The *humidity* of the atmosphere is expressed as a percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an ov vations, *rainfall*," the normal means are the numerical means or averages of the rainfall in that district determined from the returns sent in by th from that district, (*i. e.*) the total rainfall at the sub-divisional stations in the district sending in returns divided by the number of stations.

* Mean of 5 days.
† Mean of 3 days.

the week ending 31st August 1883.

Explanation.—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If some of the returns are missing, the corresponding spaces in the total rainfall columns are left blank.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 31ST AUGUST 1883.

At the close of the preceding week the most noticeable meteorological feature was the existence of a well-defined area of low pressure over South Orissa. The seat of minimum pressure appeared to be near Gopalpore, and on the 24th instant, at 10 A M, this station reported a pressure of 29·494″. Around this area of low pressure, there was a well-marked tendency to cyclonic circulation of winds, and the wind directions of the whole of the southern districts of the Province were to a certain extent affected by it. Pressure continued to fall over Southern Orissa on the 25th, and on that morning Gopalpore reported the low pressure of 29·479″. During this day, however, the area of low pressure advanced apparently into the Central Provinces, and at Nagpur a fall of the barometer of one-tenth of an inch was noted on the 26th. The area of low pressure continued to travel in a north-westerly direction, becoming, however, shallower as it progressed, until it apparently filled up and finally disappeared. With the advance of the depression inland, there was a rather strong inrush of moist monsoon winds over the whole Province, and this continued for several days. As a natural result of the distribution of pressure, the monsoon winds have been rather strongly south-easterly, and these winds have apparently extended up the whole Gangetic valley, and have carried moderate to light rain to the North West Provinces and the Punjab, which had been suffering from want of rain for some time previously.

With the very considerable inrush of moist monsoon winds, which followed the advance of the depression, rainfall in Bengal became now general. On the 25th and 26th the rainfall in most districts was light but general, but on the 27th very heavy rain was reported, especially in East and North Bengal. On this day the stations in the hills in several cases received more than five inches of rain in the 24 hours. The rainfall was still fairly general on the following days, though the amounts received were scarcely so large as on the 27th. The monsoon winds, however, gradually decreased in force towards the close of the week, and on Friday, the 31st, in the north-west angle of the Bay, at some of the stations wind directions changed round, so as to indicate indraught towards the sea area, and thus to give the first intimation of the formation of a new barometric depression, probably only of small size, at the head of the Bay. Thus it will be seen that the weather during the past week has been of the usual monsoon character, for, during the greater portion of the time, southerly winds have been blowing fairly strongly over the whole Province, and have brought moderate rain to all districts. From the fact that the barometric depression above alluded to passed over Orissa at the commencement of the week, this division has, from well known causes, received a rainfall much heavier than the normal.

Pressure was at the commencement of the week very considerably in defect of the normal; the defect was, as pointed out in the previous report, more than a tenth of an inch in some districts. With the advance of the area of low pressure inland, the barometer began to rise in Bengal, and notwithstanding that pressure has generally continued to increase throughout the week the barometer was still on the 31st below the normal of the day at the majority of stations. The defect at the close of the week was greatest in South-West Bengal at Calcutta. It will thus be seen that the average pressure for the week must be considerably below the normal, and the numbers given in the tabular statement show that it was below the normal by amounts which vary from 0·1″ in Orissa and South-West Bengal to about 0·05″ in South Behar. In consequence of the heavy rainfall over the greater part of the Province, and from the prevalence of overcast skies, temperature has generally been below the normal; this is the case in all districts except Behar, where the temperature has been almost normal, and at some stations even slightly in excess. This of course is probably due to the fact that for several days at the commencement of the week some of the districts in Behar were comparatively rainless.

It has been pointed out in the reports for the two previous weeks that the velocity of the winds blowing over Bengal had been very considerably below the normal. This was particularly well marked in the week ending August 24th, and it was then seen that the average wind velocity for that week was not more than two-thirds the normal velocity. During the past week, however, matters have much improved in this respect, and, as will be seen in the following table, wind velocities on the

average have been nearly up to the normal velocity for the period, and in some cases even rather above it—

Meteorological Division.	Station.	Normal daily air motion during August and September.	Actual average daily air motion during week ending 31st August 1883.
		Miles.	Miles.
Orissa	False Point	195·1	247
	Cuttack	66·8	65
South-West Bengal ...	Saugor Island	249 2	178
	Calcutta	126·0	123
	Burdwan	85 2	96
	Berhampore	92 4	83
	Jessore	88·8	127
East Bengal ...	Chittagong	126 8	120
	Dacca	132 9	103
North Behar ...	Durbhunga	96 7	147
	Purneah	64 8	40
South Behar ...	Gya	56·4	48
	Patna	68·4	158
Chutia Nagpur ..	Hazaribagh	174·2	139

An almost average monsoon has therefore been blowing during the past week in almost all districts. An excess of wind velocity above the normal is apparently well marked in Behar, where very steady south-east winds have been blowing throughout the week. The relative increase of the wind velocities may also be very clearly noted by a comparison of the above numbers with those given in the previous week. The connection of this considerable increase of the wind velocities over Bengal during the past week, with the extension of the rainfall to the North-West Provinces and the Punjab, is apparently obvious.

The following table gives the usual summary of the temperature and rainfall data for each of the seven Meteorological divisions of the Province:—

Abstract of the Meteoroloical Return of the Province of Bengal for the week ending 31*st August* 1883.

Meteorological District.	Temperature.						Rainfall.							
			Averages for week.				Of week.			Rainy days.			Since 1st of month.		Since May 15th.	
	Highest observed during week.	Lowest observed during week.	Of highest of each day.	Of lowest of each day.	Of mean for each day.	Average mean of week above or below normal mean week.	Average. Notwithstanding that the monsoon winds which have been blowing over Bengal during the past week appeared to have been nearly of normal strength, the rainfall has been in most districts distinctly below the average for the period. In all the meteorological districts, except Orissa, the rainfall has been below the normal. In South-West Bengal, in East Bengal and in North Bengal the defect is comparatively slight, but over the whole of Behar, and in Chutia Nagpur, the amounts received were not much more than half the usual quantity. Orissa, as pointed out before, having come under the influence of a very considerable barometric depression in the earlier part of the week, registers rather an excessive fall. Compared with the normal amounts for these districts, Orissa reported an excess fall of 51 per cent., East, South-West and North Bengal were in defect by amounts varying from 10 up to 20 per cent., while Chutia Nagpur, North and South Behar were in defect by quantities ranging from 46 up to 60 per cent. In connection with this point, however, it is remarkable that in almost all parts of the Province the number of rainy days during the past week has been in excess of the average. The only exception to this point is the case of Behar, where the number of rainy days was slightly in defect, and was caused by this district being comparatively rainless during the earlier days of the week. It is clear therefore that the defect of rainfall during this week has been due not so much to any actual want of rain showers, as to the lightness of the showers themselves.

Taking the meteorological divisions more in detail, it would appear that in Orissa the excess fall was fairly uniformly distributed. In South-West Bengal, which over the whole area was 16 per cent. in defect, the Saugor Island, and Calcutta districts received falls above the normal, while the Midnapore, Berhampore, and Nuddea districts were largely in defect. In East Bengal, which was generally 9 per cent below the normal, Noakholly and Mymensingh districts have received falls above the average, while Chittagong Dacca and Furreedpore were much in defect. North Bengal on the whole was 20 per cent. in defect, and again the Dinagepore, Rungpore, Julpigori and Darjeeling districts received almost normal falls, while Bogra, Pubna, and Rajshahye were in very considerable defect. In Behar the defect was general in all districts, and in almost all instances only about half the average fall has been received. Only one station, Chupra, has been perfectly rainless throughout the week The defect in Chutia Nagpur also is general in all districts.

Saturday, 25th August.—Pressure increased at almost all stations, except at those in Orissa. The rise was least in the western and southern divisions, and greatest in the eastern and western divisions. Pressure was below the average of the day by amounts which varied from 0·2″ at False Point to 0·05″ at Durbhunga. Temperature had fallen in South-West Bengal and Orissa, but in all other parts of the Province it had not varied much. It was, however, above the average over the greater part of the Province. Winds again became more south-easterly in most divisions and especially in Behar. The winds had also strengthened in south Behar. Strong south-easterly winds were blowing over the whole of South-West Bengal and Orissa. With the inrush of south-easterly monsoon winds, humidity and cloud proportion generally increased, though in Behar the cloud proportion was not large Very general rain fell over the whole reporting area, except in North Behar. The rainfall was on the whole light, but it was rather heavier in Orissa and in North Bengal, and decidedly lighter in South Behar and over the greater part of Chutia Nagpur than in the Mymensingh districts. The following are the only heavy rainfalls recorded on this day:—Bhuddruck 2·15 inches, Bagdogra 2·12 inches, Rungpore 1·80 inches, Mickligunge 1·50 inches, while Banpore, Banki, Balasore, Berhampore and Godda received between one and one-and-a-half inches.

Sunday, 26th August.—Pressure again increased over the whole Province, except at a few stations in South Behar. The increase was greatest in Orissa, and was due to the inland advance of an area of low pressure which had been over South Orissa for some days. The area of low pressure advanced into the Central Provinces, and a fall of a tenth of an inch was reported from Nagpur. Notwithstanding this increase of pressure, the barometer was still below the normal by amounts which varied from 0·135″ at Cuttack to 0·04″ at Chittagong Temperature continued to fall slightly at almost all stations, and was nearly normal over the whole Province. In no case was the variation from the normal greater than about 1°. Winds continued strongly south-easterly in all districts, even up to the limits of Behar. The south-easterly winds were particularly strong along the Orissa Coast. Humidity continued fairly high in all districts, and was somewhat increasing in Behar. The proportion of cloud was also high in all divisions, except in some parts of North Behar. Fairly general rain, light to moderate in amount, again fell on the Province. The rainfall was somewhat scanty in North and South Behar, and it was heaviest in North and East Bengal. Noakhally reported 2·96 inches, Kishoregunge 2·48 inches, and Bhola, Dinagepore, Julpigori and Banka (Bhagulpore district) amounts between one and two inches.

Monday, 27th August.—Pressure continued to increase at almost all stations. The increase was greatest in the southern parts of Orissa, and was again due to the advance further inland of the area of low pressure which for several days had existed near Gopalpore. Notwithstanding the further increase of pressure, it continued below the normal at all stations by amounts which varied from 0·1″ at Hazaribagh and Calcutta to 0·03″ at Chittagong. Temperature was below the normal in all districts, except in South-West Bengal, where at most stations it was slightly above the average. It was considerably below the normal in East Bengal and in Orissa. The wind directions in Orissa became more south-westerly, and in South-West Bengal more southerly than reported on the 26th. These changes were apparently due to the advance of the barometric depression. Wind velocity increased considerably in Orissa, but in other districts the changes were not marked. Humidity increased considerably in North Bengal and in North Behar, and to a smaller extent in South Behar. Cloud proportion was particularly high in North Bengal, so much so that all stations, except one in that district, reported it completely overcast. In other districts the sky was rather heavily clouded. Rainfall again continued fairly general in all districts except South Behar and Chutia Nagpur, which districts were comparatively rainless. Rainfall was light in Orissa, in South-West Bengal and in North Behar, moderate to heavy in East Bengal, but extremely heavy in North Bengal, especially in the hill districts. Thus in the Cooch Behar district, Matabhanga reported 8·14 inches, Mickligunge 5·18 inches, Cooch Behar 3·80 inches, and Dinhatta 2·21 inches. Julpigori also reported 5·38 inches, Darjeeling 3 inches, and Siliguri, Buxa, and Kalimpong nearly 2 inches each. In other districts the following stations reported amounts in excess of an inch:—False Point, Noakhally, Feuny, Chandpur, Kishoregunge, Netrokona, Serajgunge, Nowkhilla, Raigunge, Bhowanigunge, Bagdogra, Kissengunge.

Tuesday, 28th August.—Pressure continued to increase by small amounts at almost all stations. The rise of the barometer was somewhat irregular, though on the whole it was greatest in South Behar. Pressure was still relatively low in Orissa and in some parts of South Behar, while it was actually below the normal at all stations. Temperature was

falling in South-West and East Bengal, but in other districts it was increasing. Winds continued generally south-easterly in all districts, except Orissa and at some stations in South-West Bengal. Wind velocities had not changed much since the 27th, and moderately strong monsoon winds were blowing over the Province. Humidity decreased in East Bengal, but increased in South-West Bengal. It continued rather high in all districts. The amount of cloud diminished generally except in South-West Bengal, where it was heavily clouded. Very general rain again fell on the whole reporting area, except in Behar, where local showers only were received. In Orissa and Chutia Nagpur the rainfall was generally light, in South-West Bengal it was light to moderate in amount, while in East and North Bengal in some cases heavy rainfall was reported. The following stations reported amounts in excess of two inches:—Bongong, Kishoregunge, Netrokona and Mohadebpore; and the following in excess of an inch:—Baraset, Moheshrika, Jungipur, Patuakhally Perozepore, Noakhally, Mymensingh and Bogra.

Wednesday, 29th August.—Pressure again increased in the northern divisions, but elsewhere a fall of the barometer had commenced. The changes of pressure were, however, in no case very large, and the average decrease or increase was not more than ·02″. Pressure continued below the normal by amounts which varied from ·109″ at False Point to ·05″ at Purneah. Temperature rose in Behar and in Chutia Nagpur, but the changes in the other divisions were small, and in many cases of opposite character. Temperature was below the normal at nearly all stations by amounts which averaged nearly 2°. Wind was strongly south easterly and easterly over the whole Province, except in Orissa, where it was mainly south-westerly. Wind velocity appeared to be increasing at most of the inland-reporting stations, but it was still only moderate in force. Humidity was high in all divisions, except at a few stations in South Behar. Cloud proportion was also fairly high except over the same area. Rainfall was again very general in this day and extended in all parts of the Province, including North and South Behar. In all divisions the amounts received were considerable, while in some cases they were very large. The rainfall reported from Behar in this day was the first general heavy rain which had been received in this area during the week, but it was heavier in North than in South Behar. Orissa was receiving very heavy rain, for False Point reported 5·20 inches * * * The following stations received amounts exceeding one inch:—Diamond Harbour, Khatra, Serajgunge, Bogra, Churamon, Soopool Tajpore, and Madhubani.

Thursday, 30th August.—Pressure increased generally over the southern districts and, decreased in the northern divisions. The changes were, however, in almost all cases small, and did not average more than from one to two hundreths of an inch. Pressure was still comparatively low at the Orissa stations, while there was a second minimum pressure in South Behar. Pressure continued below the normal for the day by amounts which varied from 0·1″ at False Point to 0 04″ at Purneah. Temperature had not varied much. It continued below the normal for the day in most districts, especially in Orissa, where it was between 3° and 4° below the average. Wind directions continued strongly south-easterly over the whole Province except in Orissa, where south-westerly prevailed. Wind velocity again slightly increased in most districts, and moderately strong winds were therefore blowing over almost the whole reporting area. Humidity increased in the southerly and western districts, but appears decreased in the northern divisions. The amount of cloud was large at the southern stations, and smaller in North Bengal and Behar.

General rain again fell in most districts, except in Behar, which was almost rainless, though in the district of Sonthal Pergunnahs general rain was received. The rainfall was heaviest in Orissa, and in most other districts light showers only were received. The heaviest falls recorded were—Khurdah 1·23 inches, False Point 1·18 inches, Tajpore 3 05 inches, Balasore 1·25 inches, Jellasore 2·00 inches and Noakholly 1·39 inches.

Friday, 31st August.—Presure rose over the whole Province. The increase was least in North and East Bengal, but notwithstanding that pressure had been generally increasing for several days, it was below the normal of the day at most stations by amounts which varied from 0 07″ at Calcutta to a nearly normal pressure in Behar and South Orissa. Temperature diminished distinctly in Orissa, in South-West and East Bengal, but in Behar and Chutia Nagpur the tendency was towards an increase of temperature. In Behar it was above the normal, but elsewhere it was below. At False Point temperature was nearly 6° below the normal. Wind directions became a little irregular. From the greater part of the reporting area the wind directions were a little more easterly, though in Behar south-east winds still prevailed. Wind velocities were generally somewhat smaller over the whole Province The changes in humidity since the 30th were small, and the air was very moist in South-West Bengal and in Orissa. Cloud proportion remained high in these two divisions, but was showing a tendency to decrease in other divisions.

Rainfall was again very general, though still a few stations in South Behar and a smaller number in North Behar did not receive rain. The heavy rainfall had extended to South-West Bengal and also to some parts of East Bengal, but in the other districts rainfall was comparatively light. Diamond Harbour reported 3·30 inches, Chandpore 2·15 inches, Noakholly 1 99 inches, Saugor Island 1 17 inches, Beerbhoom Soory 1·28 inches, Balasore 1 14 inches, Rampore Haut 1·20 inches and Jehanabad 1 08 inches.

METEOROLOGICAL OFFICE, BENGAL, ALEXANDER PADLER, F.C.S.,

The 4th September 1883. *Offg. Meteorological Reporter to the Govt. of Bengal.*

MEMORANDA.

1. The first class Municipalities in Bengal returned, during the week ending 18th August 1883, the birth and death-rates of 21·9 and 30·0 per 1,000 of their population, respectively, as opposed to 20·6 and 32·2 per 1,000, respectively, in the preceding week ending 11th August, indicating an advance in the registration of births, but a falling off in that of deaths.

2. Referring to the local distribution of the births and deaths of the week, the following Municipalities show the highest rates :—

Births.	Ratio per mille.	*Deaths.*	Ratio per mille
Ranaghat ..	.. 125·8	Monghyr ..	.. 66·0
Bhagulpore ..	.. 50·7	Gya ..	.. 64·9
Burdwan ..	.. 33·6	Burdwan ..	.. 45·8
Serampore ..	.. 33·4	Bhagulpore ..	.. 45·3
Arrah ..	.. 31·1	Chuprah ..	.. 39·1
Darjeeling ..	.. 29·6	Poori ..	.. 38·5
Gya ..	.. 28·7	Patna ..	.. 35·7
		Suburbs of Calcutta	.. 34·9
		Santipore ..	.. 32·3
		Chittagong ..	.. 30·5
		Hughli ..	.. 28·2

3. The subjoined table demonstrates that the decrease in the total death-rate of the week was contributed by cholera, small-pox and the diseases coming under the head of "Other causes," and that from all the other death-causes there was increase of mortality to a more or less extent.

	Ratio per mille during the weeks ending—	
	18th August.	11th August.
Cholera	3·7	5·3
Small-pox	2	·3
Fever	13·7	13·2
Bowel-complaints	5·8	5·0
Injury	·6	·4
Other causes	6·9	8·0

4. Of the above-named diseases, cholera, fever and bowel-complaints are reported to have proved conspicuously fatal in the following towns :—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Bowel-complaints.*	Ratio per mille.
Monghyr ..	30·7	Santipore ..	30·2	Chuprah ..	15·6

Secretary to the Govt. of Bengal.

NOTIFICATION.

The 1st September 1883.—In modification of the notification dated the 14th March 1881, published at page 340, Part I of the *Calcutta Gazette* of the 23rd idem, it is hereby notified that, under section 22 of Act III of 1880, the Cantonments Act, the Lieutenant-Governor directs that the provisions of Act V (B.C.) of 1876, for the assessment and recovery of taxes, shall apply to the assessment and recovery of taxes in the Barrackpore Cantonment.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 1st September 1883.—The following rules, which have been drawn up, with the concurrence of the Director-General of the Post Office in India, to facilitate the supply to the public of one-anna revenue stamps through the agency of the Sub and Branch Post Offices, are published for general information :—

Rules.

I.—Stamp vendors' licenses in the prescribed form should be issued to every Sub or Branch Post Master in the Lower Provinces of Bengal by the Collector or Deputy Commissioner for the sale of one-anna revenue stamps, ordinarily called receipt stamps.

II. Immediately after the issue of the license a supply of one-anna revenue stamps up to the value of Rs. 25 should be advanced to the Sub or Branch Post Master from the nearest treasury, and sent to him in an insured parcel at the cost of the Revenue Department. For all subsequent supplies the Sub or Branch Post Master should send a requisition to the officer in charge of stamps at the sudder or sub-treasury, as the case may be, and remit with it to the treasury the value of the stamps required in an insured parcel at the cost of the Revenue Department.

III.—The requisition should be forwarded whenever the stock of stamps in store of the Sub or Branch Post Master is not more than the local demand for one week, and should be promptly complied with by the treasury officer, who should send the stamps in the manner laid down in the preceding rule.

IV. Every Sub or Branch Post Master shall be allowed discount at the following rates on the value of the one-anna revenue stamps sold by him :—

Sub and Branch Post Masters in Calcutta and at the sudder stations of Howrah, 24-Pergunnahs, Burdwan, and Hooghly	3½	per cent., or two pice in the rupee.
Sub and Branch Post Masters of all other places ...	4 1/16	per cent., or three pice in the rupee.

V.—Copies of the Stamp Act and Rules for the sale of stamps in English and in the vernacular language of the district and a signboard should be supplied by the district officers to each Sub or Branch Post Master appointed under these rules to be a vendor of revenue stamps.

VI.—A monthly account of the sale of revenue stamps should be submitted in English* by every Sub or Branch Post Master to the officer in charge of the treasury from which he receives his supply of stamps.

* When the Sub or Branch Post Master does not understand English, the Post Master-General will arrange for the submission of the account through the Head Office.

VII.—When the Superintendents and Inspectors of the Postal Department are on tour, they should require the Sub or Branch Post Master to produce his advance in stamps and in cash, as is done in the case of postage stamps. Any deficiency which may be discovered should be immediately reported to the Collector or Deputy Commissioner of the district.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 4th September 1883.—The following Notice to Mariners is published for general information.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 41).

INDIA—EAST COAST.

BAY OF BENGAL—GODAVERY DISTRICT.

COCANADA.

Beacon on Point Gordeware or Godavery.

THE Port Officer, Madras, has given notice that, as a guide to vessels approaching the harbour of Cocanada, and in order to distinguish the foul ground extending off Point Gordeware, a *beacon* with a *pole* and *basket* is erected on the point.

The *beacon* stands on a tripod beam 28 feet above the northern extremity of the Sandy Point, and bears from the Hope Island lighthouse N. E. by N. ½ N.; the Old Cocanada lighthouse S. E by E. ½ E.; and the *red* buoy moored off Point Gordeware S. by W. ½ W., nearly, distant 3¾ nautic miles.

Note.—Vessels should not pass between the *beacon* and the *red* buoy, between which a long dangerous sand bank extends, in some parts nearly dry at low water ordinary springs, and on which the sea breaks very heavily at times.

By direction of the Government of Bengal,

J. MENTEITH BRENNER,

Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 1st September* 1883.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS—(No. 42).

INDIA—WEST COAST.

BOMBAY HARBOUR

Occulting Light on Sunk Rock.

NOTICE has been received from the Government of Bombay that, on and after the 1st April 1884, an *occulting* light will be exhibited from a lighthouse recently erected on Sunk Rock, Bombay Harbour, and that the Inner lightship will be withdrawn.

The Occultations last for periods of *five seconds*, the duration of the light in each period being from *three* to *four seconds*, and the eclipse from *one* to *two seconds*.

The light will show through an arc of 244°, or from S. 7° W. round Eastward to N. 69° E, and is a red light with two white direction beams, one showing between S. 7° W. and S. 30° W, and the other between N. 15° E. and N. 31° E, and will be visible from a distance of 14 sea miles.

The lighthouse, which is a circular masonry tower of a dark gray colour, approaching to black, is elevated 71 feet above the mean level of lowest ordinary spring tides.

The illuminating apparatus is *dioptric*, or by lenses, of the 3rd order.

Note.—The proposed interchange of lights between the Prongs Reef and the Kundari island will not be made.

The bearings are magnetic and from seaward.

By direction of the Government of Bengal,

J. MENTEITH BRENNER,

Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 4th September* 1883.

[Second Publication]

NOTIFICATION.

The 3rd September 1883.—Under section 4 of Act IX of 1847, and section 3 of Act V (B.C.) of 1875, it is hereby notified that the dearah surveys of the banks of the Brahmaputra, in the districts of Dacca and Mymensingh, commencing from Bhyrub Bazar and extending upwards to the point of bifurcation of the Brahmaputra and the Jamuna, called also Jaboona, and of the banks of the rivers Megna, Ilsha, and Tetoolia, with their channels in the districts of Backergunge and Noakholly, commencing from island Gazeer Chur, in the district of Backergunge, and from the point where the districts of Tipperah and Noakholly meet, down to which the completion and approval of the dearah survey of the Megna was notified in the *Calcutta Gazette* of the 13th July 1881 (page 713), and extending southwards to the Bay of Bengal, including Dakhin Shahbazpore, Hattyah, and Sundeep, and other islands situated at the mouths of the Megna, with their intervening and boundary channels from base lines laid down by the dearah survey party, have been completed and approved by Government.

A. P. MACDONNELL,
Offg Secretary to the Govt of Bengal.

[Second Publication.]

NOTIFICATION.

The 4th September 1888.—The following Notice to Mariners is published for general information.

NOTICE TO MARINERS.—(No. 40.)

EASTERN ARCHIPELAGO.

JAVA ISLAND.—WEST COAST.

SUNDA STRAIT.

Destruction of Islands, Lighthouses, &c.

THE Government of India has received telegraphic information from the Consul at Batavia to the effect that, in consequence of a violent volcanic eruption on the island of Java, the southern entrance to Sunda Strait has been changed, some islands have disappeared, the Anjer lighthouse destroyed, and some other lighthouses in the neighbourhood damaged.

Note.—Masters of vessels proceeding thence are hereby warned.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 31st August* 1883.

[Third Publication]

NOTIFICATION.

The 9th August 1883.—In the notification dated the 18th June 1874, published at page 1175, Part I of the *Calcutta Gazette* dated the 29th July 1874, the boundary between the districts of Sylhet and Tipperah was defined to be that laid down on the revenue survey maps of seasons 1860 61, and the boundary between Sylhet and Hill Tipperah that shown on the maps of seasons 1860-65 and marked on the ground by pucca pillars, but by an oversight the former boundary was described as ending, and the latter as beginning, at the Iktiarpur masonry pillar. To rectify this mistake, the Lieutenant-Governor is now pleased to declare that the following are the correct boundaries between the districts of Sylhet and Tipperah, and between Sylhet and Hill Tipperah :—

The common boundary between Sylhet and Tipperah extends, as defined on the revenue survey maps of seasons 1860-61, from Rampur masonry pillar on the north to the Khuejuri nuddee on the south.

The common boundary between Sylhet and Hill Tipperah commences westward at the Khuejuri nuddee, and from that river to Iktiarpur masonry pillar is as laid down on the

revenue survey maps of seasons 1860-61. Thence it extends eastward to the Chatterchura or Koylalyon hill station, as defined on the maps of seasons 1860-65, and marked on the ground by pucca pillars ordered by Government letter No. 1265, dated 31st March 1865, from the Secretary to the Government of Bengal to the Surveyor-General of India.

Note.—Pergunnah Mantala of the district of Tipperah is included in the civil criminal, and revenue jurisdiction of the district of Sylhet.

NOTICE TO MARINERS.—(No. 38).

MALAY PENINSULA—WEST COAST.

MALACCA STRAIT.

PENANG OR PRINCE OF WALES' ISLAND.

Revolving Light exhibited from Muka Head.

THE Colonial Secretary, Straits Settlements, Singapore, has notified that, on and after the 15th August 1883, a light would be exhibited from a lighthouse erected on Muka Head on the Island of Penang.

The light is a *revolving* white light, showing alternate flashes and total eclipses. It is elevated 795 feet above the sea, and should be visible in clear weather, in every direction seaward, from a distance of 30 miles.

The lighthouse is situated on the summit of the hill, which is 750 feet high. The structure is a square two-storied building, with a circular tower in the centre, all of gray granite, on which the lantern is placed. The balcony and lantern are painted white: the rest of the building is unpainted.

Position—Latitute 5° 27′ 40″ N., longitude 100° 10′ 30″E.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

The 6th September 1883.—The Lieutenant-Governor accepts the resignation tendered by Rai Doorga Prosad Ghose Bahadoor of his appointment as Honorary Magistrate of the sudder bench at Hooghly.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 29th August 1883.—Under the power vested in him by the concluding portion of section 144 of the Code of Criminal Procedure, the Lieutenant-Governor hereby directs that the injunction issued by the Deputy Magistrate of Lalbagh, in the district of Moorshedabad, upon Rai Dhunput Singh Bahadoor of Azimgunge, directing him to abstain from removing three blocks of stone which have fallen into the river Bhagirati, near his house, shall be of full force and effect for three months from the date on which the Deputy Magistrate's order ceased to be in operation, viz., the 23rd July 1883.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

[Third Publication.]

DECLARATION.

The 20th August 1883.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction of a building for the police outpost of Dingrah, in the village of Bongroura, pergunnah Badour, district Purneah, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 bigahs 10 cottahs and 9 dhurs of standard measurement, bounded on the north by the Ganges and Darjeeling road; on the south by the Kast of Shaik Bahardi; on the east by the Kast of Mani Ram Barhi and the Kast of Najaf Ali; and on the west by the Dingrah post office and its compound, is required within the aforesaid village of Bongroura.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

PUBLIC WORKS DEPARTMENT,—BENGAL.

The 10th September 1883.

No. 803.—*Leave.*—Mr. J. Willcocks, Assistant Engineer, second grade, Tirhoot State Railway, is granted three months' privilege leave, with effect from the 17th September 1883, or any subsequent date from which he may avail himself of the same.

No. 804.—*Notification.*—Mr. C. J. Cole, Assistant Engineer, second grade, Northern Bengal and Tirhoot State Railway Extensions, passed the lower standard examination in Hindustani on the 6th August 1883.

CIVIL BUILDINGS.

The 10th September 1883.

No. 805.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for an escape channel from the water-supply channel to the Buxar Central Jail, it is hereby declared that for the above purpose a strip of land measuring, more or less, 625 feet in length, and varying from 35 to 50 feet in width, and containing an area of 2 roods 26 poles more or less, situated in mouzah Mullah Chakia, pergunnah Bhojepore, is required in the district of Shahabad.

This declaration is made, under the provisions of section 6 of Act X of 1870, to all whom it may concern.

RAILWAY.

The 10th September 1883.

No. 806.—*Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is likely to be required to be taken by Government at the public expense for a public purpose, viz. for the extension of the Poradah section of the Northern Bengal State Railway along the right bank of the river Ganges, it is hereby declared that a strip of land measuring, more or less, seven miles in length, with an average width of 35 feet, is likely to be required in the villages of Damukdeah, Khemodea, Ramkishenpur, and Gopenathpore, in Kushteah sub-division of the Nuddea district.

This declaration is made, under the provisions of section 4 of Act X of 1870, to all whom it may concern.

The 11th September 1883.

No. 807.—*Notification.*—The services of Mr. T. Beatty, Executive Engineer, second grade, are placed at the disposal of the Commissioner of the Rajshahye and Cooch Behar Division for employment as Divisional Superintendent of District Works.

G. F. E. S. NEILL, *Major*, M.S.C.,
Under-Secy. to the Govt. of Bengal, P. W. D.

HIGH COURT NOTICES.

High Court Original Side.

Dated 8th September 1883

THE following rules, passed by the High Court of Judicature at Fort William in Bengal, are published for general information :—

By Order,
R. BELCHAMBERS, *Registrar.*

IT is ordered that the following rules, under the provisions of section 645A of Act 14 of 1882, be read and passed as the rules of the High Court of Judicature at Fort William in Bengal, to take effect from the 1st day of October 1883.

Registrar to frame list of Assessors.

To be approved by the Chief Justice.

And published in the *Calcutta Gazette*.

Persons named in list liable to be summoned.

Amount of Assessor's fee.

The Registrar of the High Court in its Original Jurisdiction shall from time to time frame a list, to be approved by the Chief Justice, without whose approval it shall have no validity, of persons of nautical skill and experience, residing or having places of business within the jurisdiction of the High Court, to act as Assessors in any Admiralty or Vice-Admiralty cause of salvage, towage, or collision, under the provisions of section 645A of the Code of Civil Procedure, and shall cause the list to be published in the *Calcutta Gazette*.

2. Any persons named in the said list may be summoned to act as Assessors in any such cause as aforesaid.

3. Every person who shall so act as an Assessor shall be entitled to a fee of four gold-mohurs for each day's attendance.

Application to summon Assessors.

4. Either party in any such cause as aforesaid may apply that it may be heard with the assistance of Assessors. Unless otherwise ordered, the application should be made, by summons, as follows:—Where the cause is pending before the Court in its Original Jurisdiction, to the Judge before whom it is appointed that the cause shall be heard; or, where the cause is pending in appeal, to the Judges or one of the Judges before whom it is appointed that the cause shall be heard in appeal.

Letter in the nature of summons.

To be served as process.

5. Where Assessors are to be summoned, this shall be done by a letter under the signature of the Registrar, which may be served in like manner as process under the provisions of the Code of Civil Procedure.

Assessor's fee by whom to be deposited.

6. The Assessors' fees shall, before each day's hearing, be deposited with the Registrar by the party at whose instance they were summoned, or in default thereof by the other party.

How to be disposed of.

7. The Registrar shall pay the fees so deposited with him to the Assessors, or, in any case where their attendance is not required, shall, unless otherwise ordered, refund the same to the party by whom the same was deposited

To be deemed costs in the cause.

8. Unless otherwise ordered, all fees paid to Assessors under these rules shall be deemed to be costs in the cause.

HIGH COURT, *Calcutta, the 7th September* 1883.

High Court Mukhtyars.

NOTIFICATION.

IN supersession of the notification dated the 10th August 1883, published in the *Calcutta Gazettes* of the 15th, 22nd, and 29th August 1883, the High Court are pleased to order that the security required by Rule 1 of the Rules made by the High Court on the 17th May 1882, under section 16, clauses (*a*), (*b*), and (*c*), Act XVIII of 1879, shall be deposited with the Registrar of the Court, on its Appellate Side, on or before the 17th November 1883.

Failure to deposit such security by the prescribed date will result in the defaulter's name being struck off the list of selected applicants.

By order of the High Court,
C. A. WILKINS, *Offg. Registrar.*

FORT WILLIAM, *the 31st August* 1883.

SMALL CAUSE COURT NOTICES.

IN modification of the arrangements of the sittings published in the *Calcutta Gazette* of the 25th July last, it is hereby notified, under section 14 of Act XI of 1865, that, subject to the order of Government, the Judge of Small Cause Courts of Dacca and Munshigunge will hold sittings in the latter court from 24th to 26th September current. The above notification will hold good with regard to the other sittings therein notified.

DACCA SMALL CAUSE COURT, *the 3rd September* 1883. KEDARESSUR ROY, *Judge.*

IN modification of the notification dated the 28th August 1883, published in the *Calcutta Gazette* of the 5th instant, notice is hereby given, under section 14, Act XI of 1865, that, subject to the orders of Government, the Judge of the Courts of Small Causes of Kishnaghur, Ranaghat, and Bongong will, in the month of September current, hold his sittings in the Ranaghat Court from 13th and from 24th; at Bongong from 17th; and at Kishnaghur from 27th and for the remaining days of September.

For all subsequent months the previous notification shall prevail.

BROJO MOHUN DUTT, *Offg. Judge.*

KISHNAGHUR SMALL CAUSE COURT, *the 7th September* 1883.

UNDER section 14, Act XI of 1865, it is hereby notified that the Judge of the Courts of Small Causes of Kooshtea, Chuadanga, and Meherpore will, subject to orders of Government, hold sittings in the month of November 1883 on the dates noted below, Sundays and holidays excepted :—

Kooshtea from	...	2nd to 18th November 1883.
Chuadanga on the	...	19th November 1883.
Meherpore from	...	20th to 24th November 1883.
Chuadanga again from	...	25th to 30th ditto.

JUDOONAUTH ROY, *Judge.*

KOOSHTEA SMALL CAUSE COURT, *the 10th September* 1883.

LAND SALE NOTICES

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of the Sonthal Pergunnahs will be put up to sale at the Dumka Collectorate on Friday, the 28th September 1883, corresponding with 13th Assin 1290 B.S.

The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold revenue-free to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3*rd*.—If the amount of the purchase-money do not exceed Rs 100, the whole amount to be paid down at once.

4*th*. If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

JAS. TAYLOR,
Asst. Comptr.-Genl., in charge, Paper Currency.
PAPER CURRENCY DEPARTMENT, the 11th Sept. 1883.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine and can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanical Garden, Calcutta, *for cash only*, at the following rates:—per four ounce tin, *Rs.* 4 *ans.* 8; per eight ounce tin, *Rs.* 8 *ans.* 8; per pound tin, *Rs.* 16 *ans.* 8. The general public can be supplied by the Superintendent, Botanical Garden, *for cash only*, at the undernoted rates:—per four ounce tin, *Rs.* 5 *ans.* 8; per eight ounce tin, *Rs.* 10 *ans.* 8; per pound tin, *Rs.* 20. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage eight annas per 4 and 8 oz. tins, and twelve annas per pound tin, in addition to the foregoing rates.

Notice.

Oudh Forest Department.

BYRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHUND RAILWAY.

FROM this date the prices of sál beams and scantlings supplied from this depôt will be as follows:—

BEAMS.—21 feet in length, at Rs. 2-10 per cubic foot.
22 „ „ 2-12 „
23 „ „ 2-14 „
24 „ „ 3 „

Above the lengths given two annas per foot run will be charged.

Any inches over the foot will be charged as a foot.

SCANTLINGS.—From 12 to 20 feet, at Rs. 2-8 per c. ft.
Under 12 and over 7, at „ 2-4 „
Under 7 feet, at „ 2 „

The above prices are for ordinary building purposes.

For *Planking, Sleepers*, &c., special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion

Second and Third Class Timber will be sold and price fixed by agreement

Auction Sales will be held from time to time to clear off stock

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, Oudh Circle.

KANHYA LAL, in charge Byramghat Depôt.

The 22nd May 1879.

Forest Department, Bengal.

SUNDERBUNS DIVISION.

Notice.

ONE hundred and sixty-six pieces of teak are now lying at the Government Timber Depôt of Satorhog Forest Toll Station.

Any person having claim upon the same is requested to come forward and prove his claim within two months from this date to the Officer in charge of the Depôt, or at the office of the undersigned, and after paying salvage, &c, upon the pieces, to remove the same.

No claims will be admitted after two months from this date, when the timber will be sold for the benefit of Government.

G. W. STEETELL, Deputy Conservator of Forests, Sunderbuns Division.

Dated Calcutta, the 28th July 1883;
No. 3, Hungerford Street.

Notification.

NOTICE is hereby given that, on and after the 1st September 1883, the following will be the rates for the removal of forest produce from the Sunderbans Reserve Forests in supersession of those published in the *Calcutta Gazette* of 29th September 1880, Part II, page 1541:—

(1) Sundri, Pussur, and Amoor timber in pieces measuring 10 feet and upwards in length, *or* 3' 9" and upwards in girth at the thick end, for every maund, one anna.

(2) Sundri, Pussur, and Amoor timber in pieces measuring 6 feet and under 10 feet in length, *or* 2' 3" and under 3' 9" in girth at the thick end, for every maund, one half anna.

(3) Keora timber in pieces measuring 6 feet and upwards in length *and* 2' 3" and over in girth at the thick end, for every maund, one quarter anna.

(4) Any other forest produce except honey and wax, for every maund, one quarter anna.

(5) The right to collect honey and wax for each man, per month, one rupee eight annas.

A. L. HOME, Consvr. of Forests, Bengal.
Darjeeling, the 11th August 1883.

Notice.

TO PROFESSIONAL SURVEYORS.

THE Municipal Commissioners of Sewan, district Sarun, offer Rs. 300 for an accurate survey by theodolite of the town of Sewan; area about one square mile. The above sum to include all charges, necessary *instruments* alone being provided by the municipality. Apply, with copies of testimonials, to the undersigned before the 30th September 1883.

G. K. LYON, Chairman of the Sewan Municipal Commissioners.

Sewan, 28th August 1883. (1489—3)

Notice.

IN modification of the notification* sent from this office, dated the 14th May 1883, it is hereby notified, under section 5 of the Indian Treasure Trove Act, 1878, that about nine months ago the undermentioned treasure was found by Wadda Nagadu in the compound of Dasaffa Kurmun Mirasidar, residing in the village of Talamarla, in Penukonda taluk, in the district of Anantapur. All persons claiming this treasure or any part thereof are required to appear personally or by agent before the Collector's office at Anantapur on the 20th day of February 1884.

Silver coin called Wunta Namila to the value of Rs 17-8.

One silver chain valued at Rs. 3-3.

* Published in the *Calcutta Gazette* of the 30th May 1883.

———, Tempy. Deputy Collr., for Collr.
Anantapur, Collector's Office, the 22nd August 1883.

Notice.

THE Public are hereby informed that the well-known Kartick Baruni Mêla, which is held every year on the banks of the Dhaleshwari, near Munshigunge, in the district of Dacca, will commence on the 14th November 1883 A.D., corresponding to the 29th Kartick 1290 B.S., and continue up to the 25th December 1883. Tradesmen, dealers, and others may buy and sell there during these six weeks.

A. W. PAUL, Magistrate of Dacca.

PURSUANT to a decree of the High Court of Judicature at Fort William in Bengal, in its Ordinary Original Civil Jurisdiction, made in suit No. 579 of 1882 (wherein) Cecilia Reilly is plaintiff and Janet Clarissa Reilly and others are defendants), the creditors of Edward Reilly, late of Calcutta, Resident Medical Officer of the Chandney Hospital who died on the 1st day of February 1881, are, on or before the 19th day of November 1883, to send to the office of the Registrar of this Court in its Original Side, their names, addresses, and descriptions; the full particulars of their claims; a statement of their accounts and the nature of the securities (if any) held by them; or in default thereof they will be peremptorily excluded from the benefit of the said decree.

Every creditor holding any security may produce or transmit the same to the Registrar with the particulars of his claim, or shall produce the same before the Hon'ble Mr. Justice Norris in the Court-house, on Saturday, the 1st day of December 1883, at 11 of the o'clock in the forenoon, being the time appointed for adjudicating on the claims.

R. BELCHAMBER, Registrar.
Dignam and Robinson, Attorneys.
Calcutta, High Court, O. J., the 3rd September 1883.
(1505—1)

Charles Lennox Davies, deceased.

IN pursuance of Section 42, Act XXVIII of 1866, notice is hereby given that all persons having claims against the estate of Charles Lennox Davies, late of Garland Mallow, in the county of Cork in Ireland, deceased, who died at Garland Mallow aforesaid, on the 16th August 1882, should send in their claim to David Lawford Cowie, a member of the firm of Messrs. D. L. Cowie and Co., of No. 4, Hastings street, Calcutta, the administrator of the said estate, on or before Thursday, the 1st November 1883, after which date no claims will be admitted, and the assets of the estate will distributed.

ROBERTS, MORGAN & Co.
Calcutta, the 30th August 1883. (1485—2)

Holta Tea Company, "Limited."

THE Twenty-first Half-yearly General Meeting of the Shareholders of the above Company will be held at the registered office, No. 81, Clive Street, Calcutta, on Saturday, the 15th September 1883, at 3 P.M., to receive the Directors' report and transact such other business as may be brought before the meeting. The share transfer register will be closed from 1st to 15th proximo, both days inclusive.

By order of the Directors,
MITCHELL, REID & Co., Agents and Secretaries.
Calcutta, the 29th August 1883. (1481—2)

The Sonai Tea Company, Limited.

NOTICE is hereby given that an Extraordinary General Meeting of the Sonai Tea Company, Limited, will be held at the registered office of the Company, No. 12, Mission Row, Calcutta, on Tuesday, the 2nd day of October 1883, at 12 o'clock, when the sub-joined special Resolution will be proposed—

1. That the Company be wound-up voluntarily and that Mr. W. A. Browne be, and he is hereby, appointed liquidator (at such remuneration as the Company may fix) for the purposes of such winding-up, with power to do such of the several acts and things specified in the Indian Company's Act, 1882 (and especially sections 141 and 177 of such Act), as shall be found necessary or proper for winding-up the affairs of the Company and distributing its assets.

BEGG, DUNLOPS & Co., Managing Agents.
Calcutta, the 20th July 1883. (1506—3)

India General Steam Navigation Company, "Limited."

NOTICE is hereby given that the Ordinary Half-yearly General Meeting of Shareholders of the above Company will be held at the registered office of the Company, No. 4, Fairlie Place, Calcutta, on Friday, the 14th day of September 1883, at noon; ALSO that warrants for such dividend, as may be declared will be forwarded by post to those whose names stand in the Company's register on the 13th September, from which date until the 21st idem inclusive, the Company's transfer register will be closed.

NOTICE is also hereby given that, upon the conclusion of the above Ordinary General Meeting, an Extraordinary General Meeting will be held in terms of the notification issued to the shareholders under date of the 30th June last, for the purpose of considering the advisability of subdividing the share capital of the Company into shares of Rs. 100 each. In the event of the general sense of the meeting being favourable to this proposal, the following resolution will be proposed:—

"That the Articles of Association of the Company be amended by inserting between Articles 35 and 36 of the Articles of Association of the Company, the following Article, namely:—

Subdivision of Shares.

"35*a*. The Company may from time to time by consolidation and subdivision divide the capital of the Company or any part thereof into shares of larger or smaller nominal amount."

By order of the Directors,
J. GILLMAN, Offg. Secretary.

Calcutta, 30th August 1883. (1479—2)

Lost.

THE Government Promissory Notes Nos. B161053 and 161054 of the 4 per cent. loan of 1865 for Rs. 1,000 each, originally standing in the name of the Comptroller-General and last endorsed to the proprietor, by whom it was never endorsed to any other person. Payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue for the duplicates in favour of the proprietor.

PANNA LALL, late Command Gomasta,

JOHN ELIOT, M.A., *Meteorological Reporter to the Govt of Bengal.*

CALCUTTA, the 26th August 1875.

The Indian Law Reports.

Published under Authority of the Governor-General in Council.

THE Reports appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series.—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series

The Parts of each series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set.

Terms of subscription, payable annually in advance

	Without postage.	With postage
For the Calcutta Series...	Rs 35	Rs. 40
„ Madras Series ...	„ 8	„ 9
„ Bombay Series...	„ 8	„ 9
„ Allahabad Series	„ 8	„ 9
Complete set	„ 45	„ 50

The Price of each part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

	Rs.	A.
For a part of the Calcutta Series ...	3	8
„ „ Madras Series ...	1	0
„ „ Bombay Series ...	1	0
„ „ Allahabad Series ...	1	0
Complete set	4	0

Persons desiring to subscribe for or purchase the Reports, should apply to—

Messrs. Thacker, Spink and Co, Calcutta;
„ Thacker, Vining and Co.;
„ Higginbotham and Co, Madras;
The Government Central Book Depôt, Bombay;
The Government Book Depôt, Allahabad.

Notice.

THE following Reports of the Bengal Meteorological Department, issued by orders by the Government of Bengal, can be supplied to the public at the prices annexed:—

1*st*.—Bay of Bengal Daily Report giving observations taken at 17 stations on or near the coast of the Bay, with a chart and summary This is published in connection with the Calcutta Storm Signal Service. The report giving 10 A.M. observations of the day is distributed by peon in Calcutta after 4 P M. Price to subscribers in Calcutta, Rs. 2 per mensem.

2*nd*.—Bengal Daily Report containing observations taken at 30 meteorological stations, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours The report giving the 10 A M observations of each day is printed in time for the evening mail. This report for the present will only be published during the south west monsoon, *i.e.* from May, 15th, to November, 15th. Price Rs. 2-8 per mensem, including postage.

3*rd*.—A Weekly and Monthly Statement of Meteorological Observations taken at 38 observing stations, and of rainfall recorded at 160 sub-divisional stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable in advance, and of the Monthly Summary Report, Rs. 2 per annum, payable in advance,

Subscriptions payable to the Meteorological Reporter to the Government of Bengal for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

JOHN ELIOT,
Meteorological Reporter to the Govt of Bengal.
Meteorological Office, Bengal, the 3rd July 1883.

☞ The following books may be purchased from the Office of Superintendent of Government Printing, India, No. 166, Dhurrumtollah Street, for private use only, which should be stated in the requisition.

DISTRICT ROAD FUND.

PUBLIC WORKS DEPARTMENT.—ROAD CESS.

Calcutta, the 3rd September 1883.

No. 2972RC.

READ—

Letter from the Accountant-General, Bengal, No. 238LF, dated the 28th August 1883, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending the 31st March 1883.

RESOLUTION.

The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees for the second quarter of the cess year 1882-83 be published in the *Calcutta Gazette*, and be circulated to the officers concerned.

ORDER—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded to all Commissioners of Divisions, to all Superintending Engineers of Public Works Circles in Bengal; and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

G. F. E. S. NEILL, *Major*, M.S.C.,

Under-Secretary to the Government of Bengal,

P. W. Dept.

A. COTTERELL TUPP,

Accountant-General.

RESOLUTION ON THE ANNUAL REPORT OF THE SHIPPING OFFICES AT CALCUTTA AND THE OUTPORTS DURING THE YEAR 1882-83.

GENERAL DEPARTMENT.—MARINE.

Calcutta, the 8th September 1883.

RESOLUTION.

READ—

A letter from the Board of Revenue, No. 566B, dated the 16th July 1883, submitting the report on the operations of the Shipping Offices at Calcutta and the outports during the year 1882-83.

THE financial results of the working of the Calcutta Shipping Office during the past year were satisfactory, the receipts having amounted to Rs. 27,004, the disbursements to Rs. 21,141, and the profits to Rs. 5,863. Compared with the preceding year, the receipts show an excess of 6 per cent, attributable to the larger number of seamen with whom the Office had to deal. The shipping and discharging fees were, as usual, the largest items of income, and their amount was doubtless enhanced, as explained in the report, by the plan of inviting seamen who were free and willing to take engagements from other ports to Calcutta, and by the relaxation, for some months, of the rule which requires European seamen in all cases of discharge by mutual consent to deposit a portion of their wages as a provision against their falling into distress. The expenditure also exhibits an increase, but this is explained by the fact that exceptional charges were incurred for furniture, for the pay of an European constable, and for a large supply of forms, which will in a great measure meet the wants of the current year.

2. The transactions of the year in funds held in trust for British and native seamen are shown in the following statement :—

	1881-82	1882-83.
	Rs.	Rs.
Balance	6,677	7,119
Receipts	60,574	77,382
Total ...	67,251	84,501
Repaid and lapsed to Government ...	60,132	77,277
Balance ...	7,119	7,224

It is satisfactory to find that, notwithstanding a large increase in receipts during the year, the balance in the hands of the Shipping Master at the close of the year was but a few rupees larger than that at the end of the previous year. The balances on account of the deposit money of both British and native seamen, however, were large, and arrangements should be made for the early payment of old deposits, and the prevention of accumulated balances in future. The Lieutenant-Governor again observes with regret the want of success attending the measures devised for the purpose of securing to their heirs the estates left by deceased native seamen. Instead of a reduction, there has been a steady increase during the past three years in the balance of these estates remaining undisposed of at the end of each year. The explanation submitted by the Shipping Master is scarcely satisfactory : and in the absence of full particulars being recorded of the homes and relations of seamen, there could be very little prospect of success. The Lieutenant-Governor desires that the matter may again be considered by the Board, when the question regarding the system on which native crews are now recruited has been settled, and that every endeavour may be made to draw up a practical scheme for the approval of Government.

3. The number of seamen of all nationalities shipped and discharged during the last two years was :—

	1881-82	1882-83.	Increase.
Shipped	15,868	16,225	357
Discharged	14,678	15,039	361

There was an increase in the number of British seamen both shipped and discharged, (attended by a decrease in the number of native seamen), this result being attributed by the Shipping Master to the suspension for a time of the rule

requiring the deposit of security by British seamen on discharge by mutual consent, to which reference has been already made. Fifty-two distressed seamen, for the most part invalids, were sent home during the year, against 42 in 1881-82. Desertions were far more numerous than in the previous year, owing, it is stated, to the dearth of seamen, and the efforts made by boarding-house keepers and runners to tempt men away from their ships. There were 247 cases against 191 in 1881-82 This offence would be greatly checked if the men, and especially those by whom they are instigated, were sometimes prosecuted after the vessels have left the Port; but neither the masters nor the agents of vessels have hitherto been willing to take any steps towards such prosecutions, although it has been pointed out that, under the provisions of section 327 of the Code of Criminal Procedure, the evidence of the leading witnesses might be placed on record before their departure from Calcutta, and be made available on the subsequent arrest of the offenders The police have, however, recently undertaken the prosecution of some boarding-house keepers for abetting the desertion of seamen, and these proceedings should be productive of some good.

4. The general health of European sailors at sea is reported to have been good. Eight cases of scurvy occurred on five vessels which arrived during the year, but it is believed that the men attacked brought the germs of the disease with them on board, enquiry here having shown that the ships' stores and water were good, and that lime-juice had been regularly served out on the voyage. The Shipping Master observes that the physical and moral condition of European seamen continues slowly to improve, and also that the number of those who can write is gradually increasing. Gratifying proof of increasing thrift among British seamen is afforded by a marked advance in the amount of their remittances home by money-orders. Last year no less than Rs. 42,256, equivalent to £3,565, inclusive of commission, were so remitted, against Rs. 21,779, or £1,837, in 1881-82.

5. The health of lascar crews is also stated to have been good. Complaints regarding the quality of provisions issued during the voyage were made in the case of four vessels, but the ships' stores were found on inspection to be good. An outbreak of scurvy on the ship *Bayard*, however, appears to have been due to neglect to take on board a sufficient quantity of vegetables for a daily issue to the men. The case should, the Lieutenant-Governor considers, be brought to the notice of the Board of Trade. With regard to the general condition of native seamen, the Lieutenant-Governor desires that a copy of the further report called for from the Shipping Master, with reference to his remark that "Asiatic seamen are not as much in demand as formerly," may be submitted for his consideration.

6. The Board have, in paragraphs 26 to 35 of the report, given a full account of various important matters affecting the interests of seamen which came under consideration during the year. The passing of Act V of 1883, which comes into force on the 1st January next, has disposed of several questions which had been under discussion for a considerable period. The appointment of Port Health Officers has been legalised, and they have been vested with the requisite powers for the inspection of provisions and water carried for the use of seamen, for the medical examination of seamen and apprentices, and for requiring the production of log-books and other papers for the purpose of enquiring into the medical condition of vessels. For the better protection of lascars who may be liable to discharge in foreign ports, the Act has provided for the insertion of a stipulation in their agreements that fit employment shall be found for them on board some other ship bound to the port at which they were shipped, or another port in British India, or that they shall be granted a return passage to British India The Lieutenant-Governor will again take into his consideration the question raised by the Superintendent of the Presidency General Hospital in connection with the admission of sick seamen into that hospital.

7. The Lieutenant-Governor will await a further report from the Board regarding the effect which the system of licensing boarding-houses for native seamen has had in checking the practice of giving substitutes which exists among lascar crews in Calcutta. The subject should certainly have been noticed by the Shipping Master in his annual report.

8. The transactions of the shipping offices at the Orissa Ports were unimportant. At Chittagong the total receipts of the year amounted to Rs. 437 only, against Rs. 727 in 1881-82, the falling off being due to fewer discharges and fewer local engagements of seamen. The total amount of trust funds received by the Shipping Master was Rs. 14,069, and it is creditable that the whole of this sum was paid away, with the exception of only Rs. 136 held on account of two seamen, one of whom was imprisoned for theft, and the other arrested and made over to the Military authorities as a deserter. The number of men shipped and discharged was 503, as compared with 735 in 1881-82—112 being British seamen and 314 lascars. There were three cases of illegal discharge by masters of vessels, for two of which the master concerned was prosecuted and fined, while in the third case the master's conduct was reported to the Registrar General of Seamen in London. Nine desertions took place during the year, and it appears from the report that some of the cases were practically connived at by the masters in order to relieve themselves of the services of obnoxious men. The Lieutenant-Governor is glad to observe that the inspection of vessels by the Shipping Master were far more frequent in the past than in the previous year.

9. The Board acknowledge the efficient services rendered by Lieutenant Stiffe as Shipping Master at Calcutta.

By order of the Lieutenant-Governor of Bengal,

A. P. MACDONNELL,

Offg. Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal as reported to Government during the week ending the 8th September 1883.

No	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
Burdwan Divn. 1	Burdwan, Sept. 8 '83	0·29	Weather—close. Prospects of all crops favourable. Public health fair.
	Culna ...	1·1	
	Cutwa ...	0··7	
	Raneegunge .	1·56	
2	Bankoora, „ 8 „	4·09	Weather—seasonable; cloudy and clear at intervals. Rice crop coming on with a fair prospect, and the state of weather continues favourable A bumper outturn is expected. Other crops also doing well. Public health good, but fever is making its appearance in some parts of the Bishenpore sub-division.
	Bishenpore ..	1·51	
	Mahara ..	1·20	
	Khatra .	3·59	
3	Beerbhoom, „ 8 „	1 85	Weather—showery. Weeding of rice crop going on. Prospects good, except in some of the low-lying lands. Prices moderate. Health of district satisfactory.
	Rampore Haut ..	1·46	
4	Midnapore „ 8 „	2·94	Weather—seasonable. Prospects of paddy favourable. Public health fair.
5	Hooghly, „ 8 „	0·41	Weather—seasonable General prospects of crops good. *Aus* is being reaped in places. General health good for the time of the year.
	Howrah „ 10 „	1 51	Weather—rainy. *Aus* being harvested. *Aman* nearly planted out Jute and sugarcane good.
	Oolooberia ..	3 14	
	Central Districts		
Presidency Divn. 6	24-Pergunnahs, Sept. 10 '83	1 44	Weather—hot, and cloudy with occasional rain. Prospects of both early and late rice good. Harvesting of the former is going on, and the latter is still being transplanted in some parts of the district. Public health good.
7	Nuddea, „ 8 „	1 14	Weather—cloudy, cool, and showery. Harvesting of *aus* continues. Rain wanted in some places for *aman*. Fever increased slightly. One or two cases of small-pox reported from Karimpore.
	Kooshtea ..	1 15	
	Meherpore ..	0·46	
	Chooadanga ...	0·80	
	Ranaghat ..	0 95	
8	Khoolna, „ 8 „	1 37	Weather—windy and cloudy. Transplanting of *aman* going on; more rain wanted. Public health at head-quarters good. In Satkuira sub-division fever still continues.
9	Jessore, „ 8 „	1·39	Weather—hot and cloudy, with drizzling showers of rain. Harvesting of *aus* crop not yet completed. It has yielded a fair outturn. Prospects of *aman*
	Jhenida ...	0 96	
	Magura ..	1·1	continue good in some places, but very indifferent in others. More rain
	Narail ..	0·18	urgently wanted. Cases of fever reported from Magura and Bongong.
	Bongong ...	0·85	
10	Moorshedabad, „ 8 „	0·52	Weather—cool and cloudy, with high easterly winds. *Aman* rice suffering greatly from want of rain, which is also retarding transplanting operations. *Aus* harvest progresses with good results. Public health good.
11	Dinagepore. Sept 7 '83	0·06	Hardly any rain. Rain wanted for the *aman* which is now nearly all transplanted. *Bhadoi* outturn fair.
Rajshahye and Cooch Behar Divn. 12	Rajshahye, „ 8 „	0 66	Weather—hot; light showers. Crops doing well. *Aus* a fair crop. Fever reported bad over a limited area only.
	Nattore ..	0·29	
	Nowgong ...	0·07	
13	Rungpore „ 7 „	0·16	Weather—seasonably hot. Jute is still being cut. Tobacco seeds are being sown, and land is being prepared for the cultivation of mustard in some places.
	Gaibanda ...	0·88	
	Nilphamari ..	0·37	Prospects of other crops good. More rain wanted. Fever prevalent. Public
	Kurigram ..	0 17	health otherwise good.
14	Bogra. „ 8 „	0·14	Weather—excessively dry and hot; slight rain fell on 3rd. Rain badly wanted. Transplanted seedlings suffering. Fever still prevalent in many parts of the district.
15	Pubna, „ 8 „	0 68	Weather—very dry, with hot days and cool nights. Rain much wanted for *aman* rice. Jute a poor crop.
16	Darjeeling. „ 8 „	3 53	Weather—seasonable. *Bunn murwa* and late paddy promise well, Early paddy ripening. More rain wanted for standing crops in the Terai. Public health good in the hills. A few cases of fever reported from Siliguri.
17	Jalpaiguri, „ 8 „	2 53	Weather—seasonable. Crops are promising, except jute, which, in the east and south of the district, is reported to be backward. Public health fair.
	Cooch Behar „ 7 „ up to 6th.	1 04	Weather—fair; very hot and close. Prospects of late rice fairly good, but more rain will be needed by and bye for the later transplantings. Prospects of other crops favourable. Public health good.
	Dinhatta .. up to 2nd	2 52	
	Mathabhanga .. up to 1st.	3 18	
	Mecklegunge ... up to 1st	5·42	
	Eastern Districts		
Dacca Divn. 18	Dacca Sept. 8 '83	0·87	Weather—hot. *Aus* paddy and jute are being cut. Sowing of *roachia* paddy, *mug* and *maskalai* continues. Prospects of crops good.
	Munickgunge ...	1·30	
	Munshigunge ...	0·77	
	Naraingunge .	0 51	
19	Furreedpore, „ 8 „	1··5	Weather—changeable, with frequent high winds. Harvesting of *aus* over, with fair outturn. Jute steeping in progress. Sugarcane doing well. *Aman* on the higher lands suffering for want of water. Rivers have fallen very quickly. Some fever in most parts.
	Goalundo .	0 45	
	Madaripore ..	2 10	
20	Backergunge, „ 6 „	1·37	Weather—seasonable. Prospects of crops good. *Aus* crop harvested. Transplanting of *aman* nearly finished. Public health good. Cattle-disease continues in the sub-division of Patuakhali.
21	Mymensingh, „ 7 „	0·58	Weather—grown warmer, with hot sun, clearer sky and less wind, and little or no rain. Outturn of *aus* crop about 10 annas. Jute crop poor, but prices up to Rs. 4 a maund. Prospects of transplanted rice good, but more rain is beginning to be wanted. Fever prevalent in the south.
	Jamalpore ...	0 30	
	Kishoregunge ..	2 08	
	Attea ...	2 09	

No.	District, and date of return				Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.—*concld.*						
***Eastern Districts.*—concld.**						
Chittagong Divn. 22	Chittagong,	Sept.	11	'83	3·56	Weather—seasonable. Harvesting of *aus* nearly completed. *Amun* still being planted in some places Prospects favourable. Prices stationary. Cholera abating. Cattle-disease still continues
23	Noakholly,	„	6	„	6·70	Weather—rather warm and close; nights generally rainy. Reaping of *aus* paddy and transplanting of *amun* paddy still continue.
24	Tipperah,	„	6	„	0·66	Weather—very sultry; good weather for growing crops. Rain required in the centre of district Prospects in north and south excellent. Jute crop inferior to that of last year.
	Brahmunbaria				3·97	
	Chandpore				2·91	
25	Chittagong Hill Tracts.	„	4	„	1·20	Weather—variable; fine for the last three days *Jum* paddy harvest continues with good results. Cotton crop very short. Plough paddy doing well. Sugarcane prospects not quite so good.
	Hill Tipperah	„	5	„	2·68	Weather—hot, with occasional rain. Reaping of *aus* finished. *Amun* still being transplanted. Sugarcane doing well. Public health good.
BEHAR						
Patna Divn. 26	Patna.	Sept.	8	'83	0·33	Weather—hot. *Makai* commenced to be cut. Transplanting of paddy continues. More rain wanted. Cholera reported from Behar and Islampore thanas.
	Barh				0 23	
	Behar				0 68	
	Dinapore				0·40	
27	Gya.	„	8	„	0 45	Weather—cloudy, with clear air and cool east wind Prospects of all crops very bad. Rivers are as low as in April. Paddy is drying up. Cholera still decreasing. Prices rising.
28	Shahabad,	„	8	„	0·34	Weather—hot; clear and cloudy alternately. Crops require a great deal more rain. From parts of the district the accounts are bad. Fever reported from Bhaboosh, and cholera in that sub-division is abating.
	Buxar				0 89	
	Bhaboosh				1·68	
29	Durbhunga,	„	8	„	Nil	Weather—hot, with east wind. More rain urgently needed in the Sudder sub-division. Generally, prospects of rice crop favourable. *Bhadoi* being harvested with fair outturn. Prices have risen slightly. General health good.
30	Mozufferpore.	„	8	„	0·02	Weather—sunny and windy with clear sky. About half the *bhadoi* crop in the Sudder and Seetamarhi sub-divisions appear to have been destroyed by the inundation; re-transplanting of the *aghani* is still in progress. Rain is wanted for all crops.
	Hajeepore				0 49	
	Seetamarhi				0 15	
31	Saran,	„	8	„	0·30	Weather—hot and sultry. East wind prevailing Prospects of *bhadoi* continue favourable *Marwa* and *tangani* being harvested. Rain much wanted for paddy. Manufacture of indigo (second cuttings) commenced, but only a small outturn expected. Several cases of fever reported. Prices easy
	Sewan				0 88	
	Gopalgunge				Nil	
32	Chumparun	„	8	„	Nil	Weather—hot, with easterly wind. Rain much wanted all over the district for standing crops. Some cases of cholera and fever reported from the interior. General health on the whole good
Bhagulpore Divn. 33	Monghyr	Sept.	8	83	0·40	Weather—cool and cloudy. Harvesting of *bhadoi* crops commenced. Prospects of *aghani* crops favourable. Public health good.
	Begusarai				0 92	
	Jamui				0·61	
34	Bhagulpore,	„	8	„	0 45	Weather—bright and fine; occasional gusts of wind, but very little rain In the Banka sub-division the rainfall was 1·03, elsewhere it was less than half an inch The protracted break in the rains, and the scanty rainfall of the last three weeks, have considerably impaired the prospects of the winter rice crop. The *bhadoi* crops are being cut, but the unusually heavy rain at first, succeeded by a long break of bright sunshiny weather, has reduced the outturn to an yield of from 8 to 12 annas, while in Bihpur thana the Kosee floods have destroyed a good deal of the *bhadoi*.
35	Purneah.	„	8	„	0·75	Weather—normal. State and prospects of crops good.
	Kissengunge				0 19	
	Arrareah				0 37	
36	Maldah.	„	8	„	0 07	Rainfall scanty, weather less humid, wind easterly. Prospects of crops continue fair, but rain is wanted for the proper growth of the transplanted winter rice crop. General health good.
37	Sonthal Pergha	„	8	„	0 66	Weather—like that of a break in the rains. From Rajmeehal prospects of crops reported satisfactory; elsewhere more rain is wanted.
	Deoghur				0·35	
	Rajmehal				0·31	
	Jamtara				1 74	
	Pakour				1 79	
	Godda				1 48	
ORISSA.						
Orissa Divn. 38	Cuttack	Sept.	7	'83	5·63	Weather—cloudy and rainy. *Beali* paddy ripening and in some places being cut. *Sarad* paddy progressing well. Price of rice stationary Public health generally good. Scattered cases of cholera reported from the interior.
39	Pooree,	„	6	„	6 78	Heavy rain during the week. Prospects of crops generally good. Small-pox still reported from Banpur, and cattle-disease from thanas Gope and Khoorda Prices stationary.
	Khoorda				4 42	
40	Balasore.	„	7	„	3·27	Weather—cloudy, with rain. *Beali* crops ripening. *Sarad* doing well. Fever somewhat prevalent, but general health good.
CHOTA NAGPORE.						
South-West Frontier Agency.						
41	Hazaribagh,	Sept.	7	'83	2·05	Weather—seasonable. Rain has much improved the suffering rice crop. Harvesting of *bhadoi* crops continues. Public health good.
42	Lohardugga,	„	8	„	3 87	Weather—rainy. Prospects good in head-quarters division More rain badly wanted in Palamow, where there has been a slight rise in prices in consequence of the short rainfall *Gora* paddy being cut; average outturn. Cholera lingers in Hussainabad and Gadhuri.
	Daltongunge				1 12	
43	Singbhoom,	„	7	„	2·20	Weather—fine; occasionally cloudy, hot, and close. Prospects of crops continue favourable. General health good, with the exception of fever, usual at this time of year.
44	Manbhoom,	Sept.	8	...	3·08	Weather—cool and unusually rainy. Rice crop promises unusually well. Indian-corn has suffered from rain in places. Small-pox at Topchanchi; with this exception, public health good.
	Govindpore				0 70

ALEXANDER PEDLER,
Offg. Meteorological Reporter to the Government of Bengal.

METEOROLOGICAL AND RAINFALL SUMMARY FOR THE MONTH OF AUGUST 1883.

THE month of August is in Bengal only slightly less important from a meteorological point of view than July. The character of the month is of course similar to that of the previous month, for the monsoon currents, when of normal strength and direction, continue to blow with full force over the whole province During August, however, the wind velocity at most stations in normal years begins to diminish slightly from those which are registered in July, thus showing that even in this month the monsoon currents commence to weaken slightly. In normal years, however, this diminution is small only, but its effect is seen in the fact that the rainfall in Bengal in August is on the whole decidedly, though very slightly, smaller than in July. With the exception of this one feature of slightly diminished velocity, the air motion in August in normal years over Bengal scarcely changes its character from that of July. As pointed out in the summary for the previous month, the greater part of the rainfall over this province is brought by the monsoon current from the Bay of Bengal, which, starting as a south-westerly wind, becomes first more southerly as it reaches the land, then south-easterly, and is finally, by the physical configuration of the land, converted into an almost easterly breeze blowing up the Gangetic valley. In normal years also, as pointed out in the previous monthly report, the Arabian Sea monsoon current penetrates apparently as far as the western districts of Chutia Nagpur, where it meets the western parts of the Bengal current, and causes a certain amount of interaction or interference, which undoubtedly produces ascensional movement and consequent precipitation of rain.

During August, therefore, the actual amount of rainfall received in Bengal will depend mainly on the strength of the Bay of Bengal current, while its distribution will be affected by the causes which were discussed in the summary for July. That is to say, areas of increased rainfall are always to be expected, first, from proximity to a sea area ; second, from the neighbourhood of ranges of hills, mountains, or high land generally ; and third, increased precipitation may be looked for in those areas where any interaction or interference of moisture-laden currents takes place, and which must of necessity also produce ascensional movement of the air. Secondary actions are also frequently at work modifying such distribution, and in Bengal, prominent among such actions, we have the formation and passage of certain areas of low pressure or small cyclonic vortices, which bring large amounts of rain to the districts through which they pass. The formation of these barometric depressions is a prominent characteristic of many rainy seasons, though they are to a certain extent absent in others ; and as the line of country through which they pass varies very considerably, they are prominent causes in modifying the distribution of rain in particular years and in producing abnormal variations

The normal distribution of rain in the Province of Bengal in August shows very clearly the influence of two out of the three permanent causes of rainfall variation mentioned in the last paragraph, for the areas of heaviest rainfall are first those which are in the hills or close to them, and second those which are adjacent to the sea. The heaviest rainfalls during this month occur in two localities ; thus amounts in excess of 20 inches are received on the Arrakan coast and in Eastern Bengal, including the Noakholly and Backergunge Divisions ; the second area is in the North Bengal hills district, and includes the Julpigoree, Cooch Behar, and the Darjeeling districts. The area which receives amounts of rain between 20 and 15 inches starts from Saugor Island, runs nearly parallel to the sea coast, then turns to the north, and includes the Tipperah and Sylhet hills, and finally almost meets a second area of the same rainfall which runs parallel to the foot of the Darjeeling hills. Inside these areas the greater part of Chutia Nagpur and of South-West, Central, East and North Bengal receives a rainfall of from 15 to 12 inches. The greater part of Behar receives only an average fall of from 12 to 10 inches, while districts of North Behar and some stations in South Behar show a rainfall of less than 10 inches. It may be here noted that Chutia Nagpur shows a rainfall in excess of those parts of Behar which are in the same latitude, or at the same distance from the sea, or the source of the monsoon winds. This would thus suggest that the third cause, namely the interference of the two monsoon currents over the western parts of Chutia Nagpur, is the cause of the increased precipitation noted.

Meteorology of the month.—At the close of the previous month a small shallow barometric depression had formed in East Bengal, the centre of which was near Dacca ; this was giving rise to moderately strong winds of convergence, and also to general rain over the Province. On the 1st and 2nd of the month the depression advanced in a north-westerly direction, and then filled up and disappeared, and with its advance moderately strong monsoon winds set in over the whole Province giving heavy rain to most districts. At this period it would appear that both the Bay of Bengal and the Bombay branches of the monsoon current were of nearly normal strength, but on the 5th and following days that portion of the Bombay branch of the current which reaches Bengal increased in strength, and westerly winds prevailed over the whole of Chutia Nagpur and South Behar, and even in South-West Bengal. The fact that the Bombay current was thus able to overpower and sweep to one side the Bengal current would appear to indicate clearly that the Bengal current must have been at this time gradually decreasing in strength and volume. During the advance of these westerly winds, the Bay of Bengal current was forced towards East and North Bengal, and this effect, together with the intermingling or interference action of the two currents, produced heavy and very general rain over the whole Province. These westerly

winds continued to blow over the western districts of the Province with varying force until about the 12th or 13th instant; and it was also noticed that during this period the Bengal monsoon current was becoming somewhat weaker. The diminution in the force of this current was not, however, very clearly noticeable up to the middle of the month, but it became afterwards very distinctly marked. The Bombay branch of the monsoon current after having, for the first two weeks, been making itself felt in Bengal with unusual strength, then decreased in power or altered in direction, and for the remainder of the month it ceased to be so strongly pronounced a feature. Ordinary light monsoon winds had prevailed for some days in Bengal, when on the 16th instant a slight barometric depression began to form at the head of the Bay; this commenced to move in a westerly direction and to develop slightly, and on the 18th instant it crossed into Orissa. In its advance it was accompanied by moderate rainfall, but it appeared to break up rapidly on reaching the land. Moderate south-easterly winds began to blow in all districts with the advance of the depression, and these carried general rain over the whole Province. At this period the winds in Behar became strongly south-easterly, and this feature has continued to be prominent to the close of the month. The extension of the rains to some portions of the North-West Provinces, which had previously been rainless for some period, was apparently due to this extension of south-easterly winds up to the Gangetic valley. A rapid and general fall of pressure, however, set in about the 22nd instant in all districts, and this continued for several days, so that, even up to the close of the month, pressure has remained considerably below the normal over the whole Province. With the high baric gradients, which have been established over the Bay during this period, the strength of the Bengal monsoon current has again increased, till at the close of the month it was about normal. While the barometer was thus falling over the whole Province, pressure was decreasing even more rapidly along the Ganjam and Orissa coasts, and the result was the formation of a very considerable barometric depression, which gradually developed near the South Orissa coast. On the 23rd, 24th and 25th instant this barometric depression was clearly defined, and had its centre near Gopalpore, and the cyclonic circulation of winds was well marked round it. The depression moved inland during the 25th instant, and advanced in a north-westerly direction through the Central Provinces, and with its advance a further inrush of moist monsoon winds took place, and rainfall again became general and in some cases heavy. After the first inrush the monsoon winds again decreased in force, and moderate winds only were blowing at the close of the month. The depression above alluded to appears also to have had a considerable influence on the meteorology of some parts of Northern India in helping to break up the distribution of pressure which had obtained during the prolonged break in the rains there, but this point is beyond the scope of this summary.

Prominent attention has just been drawn to the marked variations in the force of the monsoon current during August. These variations are most clearly shown by taking the wind velocities for each week at certain typical stations in the Province and comparing them with the normal velocity for the month. The following table shows this comparison:—

Table of daily wind velocity for August (the numbers representing the actual wind motion in miles per day.)

	Average for week ending 4th August.	Average for week ending 10th August.	Average for week ending 17th August.	Average for week ending 24th August.	Average for week ending 31st August.	Normal Average for August.

Patna	69	72	69	88	158	71
Hazaribagh	199	189	165	147	139	180

At the beginning of the month, it will be obvious a strong monsoon was blowing over the whole of Bengal, and the very great diminution of wind velocity which has taken place since the commencement of the month can here be very clearly seen. Leaving the Orissa stations out of consideration, it will be noticed that the monsoon current in Bengal, from the period 10th to 24th August, was very considerably below normal strength, though it is also evident that in the last seven days of the month a very large increase in the air motion took place, and the strength of the monsoon winds had become more nearly normal. The Orissa stations must be considered apart in the matter of wind velocity, for, as previously recorded, these stations have been under the influence of two barometric depressions during the latter part of the month, which have of course added to the wind velocity of this period.

From what has just now been stated, it will be seen that for considerably more than half the month a comparatively feeble monsoon has been blowing over the greater part of the Province. This fact will of course re-act on the actual amount of rainfall received and on its distribution. For it has been shown by previous work in the meteorology of India that a weak monsoon generally produces considerable irregularities of rainfall distribution. Thus it is to be expected that not only will the rainfall over Bengal on the whole be in defect for the past month, but that also considerable irregularities will be found in the local distribution

Taking the general averages of each great meteorological district into consideration, the numbers recorded show that in all cases, except North Bengal, the rainfall has been below the normal.

The amounts by which the other areas are in defect may be expressed in the following percentages of the normal fall. South Behar has been 4 per cent. in defect of the normal fall, Chutia Nagpur 25 per cent., East and South-West Bengal 18 per cent., and North Behar and Orissa have recorded about 8 per cent. in defect of the normal fall. On the other hand, North Bengal has received a slight excess of 3 per cent. Now, though these variations in some cases are considerable, it is remarkable that the number of rainy days in the month has been almost equal to the normal in most instances. The only distinct exceptions are South Behar, which has had an average of 12·7 rainy days instead of 16·2, and Orissa, which has had an excess of 2 8 rainy days, notwithstanding that its rainfall was about 8 per cent. in defect. These facts clearly show then that, though the rainfall in the Province in August has been generally in defect, the diminished fall is due actually to the lightness of the rain showers, and not to any want of rainy days, clouded skies, and rain showers.

Notwithstanding the weakness of the monsoon current during a considerable portion of the month, there have not been any very prolonged breaks in the rains. The rainfall over the whole Province was undoubtedly heaviest up to about the 10th or 12th of the month, though on the 9th and 10th in South-West Bengal there was a slight break, which was accompanied by a more complete break in the rains in Behar on the 9th, 10th, and 11th. On the 2 st, 22nd, and 23rd there was again a slight break during the formation of the barometric depression of South Orissa, and at this time the break clearly affected all parts of the Province, and more particularly North and South Behar.

Taking up the rainfall for the month, and considering it simply with reference to the normal fall, and not to the actual amounts received, it may be said that the whole of the district from Motihari and Mozufferpore in the west, running along the foot of the Nepal Hills, to Dinagepore and Rungpore in the east, and including the Julpigori, Darjeeling, and Cooch Behar districts on the north, have received a fall in excess of the normal. Another area of excess fall is to be found in the greater part of Orissa and southern parts of Chutia Nagpur, which have of course been subject to the heavy rainfall accompanying the barometric depressions. Again certain districts of South-West and Southern Bengal, such as Burdwan, Beerbhoom, Jehanabad, Satkhira, and Bagirhat, have received rainfalls above the average, and local excess falls have occurred in the Bhagulpore district and at Kissorigunge. It is such abnormal results as these which prove the truth of the statement above made, that with a weak monsoon considerable local irregularities of rainfall always occur. On the other hand the greater part of Chutia Nagpur and of East and South Bengal is very considerably in defect by amounts varying between 5 and 10 inches, and a rather wide area of similar defect runs up along the valley of the Ganges until it almost reaches Patna. On either side of this area of large defect there are areas of rather smaller defect (up to five inches,) so that the greater part of the Province is included in the area of deficient rainfall.

Taking the districts of the Province more in detail than given above, in Orissa there do not appear to be any cases of defect or excess calling for any special mention. In South-West Bengal the Nuddea district continues to show a very large defect; Jessore and parts of Moorshedabad district and the Calcutta district are also largely in defect, while on the other hand Jehanabad shows a large excess, and the Burdwan and Bankoora districts a somewhat smaller excess of rain. In East Bengal here is a large deficiency in the Furreedpore and Dacca districts, and also at Fenny in the Noakhally district In Northern Bengal the heaviest rainfall has occurred in and along the line of the hills, thus while the Cooch Behar and Julpigori districts show a very large excess indeed, and the Darjeeling district a smaller excess, Bogra and Pubna and the Rajshaye districts show a considerable defect. The northern parts of North Behar have been during this month receiving an excess of rain to such an extent indeed that floods were reported from the Mozufferpore district at the latter end of the month (about the 21st and 22nd instant). The reports from the rain-recording stations in this district, however, do not give indication of excess of rain, the heaviest fall about this period being only 2·25 inches at Mozufferpore on the 20th, and it is almost certain that the heavy rain must have occurred to the north of the district, possibly in the Nepal Hills. South Behar is the district which is most in defect for this month, and the defect is very strongly marked in the Shahabad, Gya, and Patna districts In Chutia Nagpur the southern districts, such as Singbhoom and Manbhoom, have received rainfalls above the average, while the Hazaribagh district is in defect.

During the past month there have also been some exceptionally heavy falls of rain in certain districts. This was particularly the case on the 10th instant in the Julpigori, Cooch Behar, and Darjeeling districts. On this date Mathabhanga reported 10·41 inches, Cooch Behar 9 04 inches, and Mickligunge 4·97 inches; while Kissengunge and Arrareah also each reported about five inches on this date. Again on the 27th this area was subject

to heavy rainfall, when Mathabhanga reported 8·14 inches, Julpigori 5·38 inches, and Mickligunge 5·18 inches. On the first of the month there were also heavy falls in the South Behar and Chutia Nagpur districts, for Barrh reported 5·13 inches, Purulia 5·47 inches, and Chyebassa 4·50 inches.

The following table gives a summary of the rainfall and temperature data for the seven meteorological divisions of the Province :—

Meteorological District	Temperature.						Rainfall.

Explanation of Summary.—The normal means of air pressure and temperature are the arithmetical averages or means of the readings during the same. The *Humidity* of the atmosphere is expressed as a percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky vations, rainfall," the normal means are the numerical means or averages of the rainfall in that district determined from the returns sent in by the sub-divi from that district, (i.e.) the total rainfall at the sub-divisional stations in the district sending in returns divided by the number of stations. A rainy

for the week ending 7th September 1883.

Explanation—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If some of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 7TH SEPTEMBER 1883.

UP till nearly the close of the previous month ordinary monsoon winds were blowing over the whole Province with a velocity which, on the average was nearly, though not quite, equal to their normal force for the end of August or commencement of September. On August 31st, however, and on the first day of the present week, wind directions at the head of the Bay showed distinct indraught towards a small area of low pressure which was forming to the south of the Sundarbans, and while these winds of indraught were blowing, rainfall in Bengal was particularly light and scanty. On the 2nd the depression continued to develop and to advance towards the Orissa coast, which it reached during that evening or night, and passed inland. The depression was a feeble one, and was accompanied by comparatively light winds of cyclonic circulation only. With the advance of the depression rather strong southerly winds set in and gave general rain over the western and southern divisions of the Province. These monsoon winds quickly extended the area of rainfall, and on the 3rd and 4th instants rainfall was very general in all districts, and in many cases it was very heavy. On the 5th instant, however, wind directions in South-West Bengal and Orissa again showed clearly the existence of a second barometric depression in the north-west angle of the Bay. This small cyclonic whirl continued to develop, and to advance in a westerly direction on the 6th and the 7th instant, until on the evening or night of the latter day it passed inland between Balasore and False Point. This second depression developed to a greater extent than the former one did, and was accompanied by decidedly stronger winds, so that at most stations at the head of the Bay on the 7th instant winds were at times rather strong and of unequal force, some of the gusts being of considerable strength. The barometer also fell rather low, and at False Point at 10 A.M of the 7th it was between 24·4 and 29·5 inches. This depression also, during its formation and advance, gave rather unsettled weather, and in its immediate neighbourhood brought heavy rain, though the northern and eastern districts were to a great extent rainless.

At the close of the previous week pressure was considerably in defect over the whole Province, the defect ranging from 0·1″ in South-West Bengal to 0·05″ in North Bengal. Throughout the whole week pressure has been below the normal by varying amounts, and with the existence of the barometric depression at the head of the Bay at the close of the week, it was still further in defect. Thus on the 7th pressure was 0·27″ below the normal at False Point, while over the whole Province the defect averaged 0·15″. The average defect for the week has varied from 0·149″ at False Point to about 0·05″ in South Behar. Owing to the prevalence of rain and of clouded skies in the southern and western divisions during the week, temperature in these areas has been below the normal, while in Behar, on the other hand, temperature has been above the normal. The greatest defect is 1·7° at False Point, and the largest excess 2·5° at Durbhunga. As the amount of rainfall over the Province depends mainly on the strength and depth of the Bay of Bengal monsoon current, the actual amount of air motion for the week, as compared with the normal amount, is a very important guide as to the prospects of our present and future supply of rain. In the following table is given, first, the actual daily air motion at 14 stations in the Province during the past week; second, the actual average daily air motion during the previous week ending August 31st; and last, the normal daily air motion for the week calculated by taking the mean of the August and September normal velocities.

STATION.	Actual daily motion for week ending September 7th.	Actual daily motion for week ending August 31st.	Normal wind motion for same period.
	Miles.	Miles.	Miles.
False Point	199	247	195
Cuttack	58	55	67
Saugor Island	172	178	249
Calcutta	151	123	126
Burdwan	96	86	85
Berhampore	135·9	88	92
Jessore	137	127	89
Chittagong	86	120	127
Dacca	89	103	133

Purneah	41	40	65
Gya	62	48	56
Patna	158	158	68
Hazaribagh	202	139	174

It would therefore appear that the monsoon, which has been blowing during the past week, is quite up to the normal strength, except perhaps at Saugor Island and in Eastern Bengal. The excess strength of the winds which have been blowing at the inland stations, such as Patna, Durbhanga and Hazaribagh, during the past week, or perhaps even the past two weeks, is very striking; and it may perhaps be accounted for in connection with the heavy

rainfall which has recently prevailed over North-Western India. With the fairly strong monsoon winds which are now blowing over the whole Province, and which have every appearance of lasting, a nearly normal rainfall ought to be received.

The following table gives the usual summary of the temperature and rainfall data for each of the seven meteorological divisions of the Province :—

Meteorological District.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Average for week			Average mean of week above or below normal mean week.	Of week.			Rainy days.			Since 1st of month.		Since May 15th.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number.	Variation.	Average.	Normal average.	Average.	Normal average.
Orissa	90·2	72·0	86·4	77·2	82·2	—1·5	4·76	2·32	+2·44	5·2	3·5	+1·7	4·76	2·32	48·28	37·39
South-West Bengal	91·7	73·8	88·2	78·0	83·1	—1·3	1·37	2·58	—1·21	4·3	4·3	0	1·37	2·58	40·64	39·97
East Bengal	92·8	74·9	86·7	77·6	82·2	+0·2	1·51	3·59	—2·08	3·9	4·5	—0·7	1·51	3·59	31·81	61·78
North Bengal	93·6	75·1	89·7	77·9	83·8	—	0·54	3·72	—3·18	1·8	3·9	—2·1	0·54	3·72	47·94	60·01
North Behar	99·4	74·8	90·4	79·3	84·8	+1·3	0·21	2·73	—2·52	0·9	3·3	—2·4	0·21	2·73	38·42	34·05
South Behar	95·9	74·3	90·5	78·1	84·3	+0·8	0·75	2·09	—1·34	2·6	3·3	—0·9	0·75	2·09	31·11	35·41
Chutia Nagpur	85·9	70·3	83·1	72·1	77·6	—0·1	2·51	2·15	+0·36	4·6	4·1	+0·5	2·51	2·15	37·69	40·05

Notwithstanding that the wind velocities, as shown in the table given previously, have been during the week about equal to the normal for the period, rainfall has again been deficient over the greater part of the reporting area, while in two divisions excess falls are recorded. The reason for this is fairly readily explained by a consideration of the meteorological features of the week. As was previously stated, two small barometric depressions have formed during the week at the head of the Bay, and have advanced in a westerly direction into Orissa and the neighbouring districts of Chutia Nagpur. During the formation of such depressions, winds of indraught prevail in their immediate neighbourhood, and in many cases the wind directions of the whole Province are to a certain extent affected by them, the moisture-laden sea winds being deflected towards the area of disturbance, while comparatively dry winds prevail over the land area. The rainfall, which is brought up by these depressions, is of course heaviest in the districts through which they pass. As may, therefore, be expected, while Orissa shows a large excess rainfall for the week, and Chutia Nagpur a smaller excess, all the other districts are largely in defect. Thus Orissa has received a fall more than twice as large as usual for the period, or more accurately 105 per cent. in *excess* of the normal fall, and Chutia Nagpur reports an excess of nearly 20 per cent. above the normal. On the other hand, South-West Bengal received only about 50 per cent. of the normal fall, East Bengal and South Behar only received about 40 per cent. of the usual quantity, while there was an extraordinarily large defect in North Bengal and North Behar; for North Bengal only received 15 per cent. of its normal fall, and North Behar only 8 per cent. of the average amount. On reference to the table given above, it will be seen that there is in these same districts a very large defect in the number of rainy days, so it is clear that in these districts during the past week there has been a very distinct break in the rains. The number of rainy days in the other divisions has been more nearly up to the average, while in the case of Orissa the rainy days were largely in excess.

As is usually the case when comparatively light rains are being received, the distribution becomes very abnormal, and thus, when the districts are considered more in detail, it will be found that there have been some very remarkable variations, even from the numbers which are given above. In Orissa, for instance, several of the stations in the Balasore district have received a fall below the normal amount, while in the Cuttack district, some stations (such as Cuttack) have received a fall at least four times the normal. In South-West Bengal the Midnapore, Bankoora and Beerbhoom districts, with part of the Burdwan district, have received a normal fall, while the 24-Pergunnahs, Hooghly, Jessore, Moorshedabad and parts of the Nuddea districts have been very largely in defect. In East Bengal perhaps the defect was rather more evenly distributed, though the Dacca and Mymensingh districts were more largely in defect than the others. In North Bengal the hill districts were not so largely in defect as the others, for in the case of the Rajshahye, Dinagepur and Rungpur districts, the amounts received during the week did not average more than about two-tenths of an inch of rain, or about one-fifteenth of the normal fall. The same statement is almost true with reference to all the districts in North Behar, and nearly half the reporting stations have received no rain at all during the week. In South Behar the condition of matters is a little better, though even here the Patna district is in large defect. In Chutia Nagpur in all districts the rainfall has been good, and fully up to the average.

Saturday, 1st September.—Pressure commenced to fall over the whole Province, though by small amounts. The diminution of pressure was least in North Bengal, but in no district did it average more than five-hundredths of an inch. Pressure continued below the

normal over the whole reporting area by amounts which varied from 0 1″ at Calcutta to 0 05″ at Purneah. Temperature rose generally by small amounts over the whole Province, but it remained below the normal in Orissa and in South-West Bengal. Durbhanga reported the high maximum temperature of 99·4°. South-easterly winds generally prevailed in all districts except Orissa, and at the stations in the north-west angle of the Bay. In Orissa winds were westerly, while at Balasore and Saugor Island wind directions appeared to indicate the existence of a small area of disturbance over the sea area in the north-west angle of the Bay. Wind velocities had not changed much since the 31st; but, if anything, they were slightly decreasing Humidity decreased slightly, and was moderate in amount. Cloud proportion also decreased slightly. The rainfall reported to-day was extremely light in Orissa and South-West Bengal; a number of local showers fell, but in all other districts rainfall was practically absent. This was particularly the case in Behar and in Chutia Nagpur. The only falls in excess of one inch reported to-day were from Pooree Jellasore, and Saugor Island.

Sunday, 2nd September.—The changes of pressure were small and irregular. In South-West Bengal and Orissa there was a distinct fall, while in other parts of the Province the tendency was towards a rise. The fall was greatest at False Point, Cuttack, and Balasore, and was connected with the development of a small barometric depression over the sea area in their neighbourhood Pressure continued below the normal by amounts which varied from 0·16″ at False Point to 0·06″ at Patna. Temperature generally increased, especially in Behar. It was above the normal in most districts by small amounts. Winds were irregular in Orissa and in South-West Bengal. They showed clearly marked cyclonic circulation round the barometric depression before alluded to, while the wind velocities appeared to be increasing. In other districts the wind directions were strongly easterly, but the velocities were moderate only Except in Orissa, in East and in North Bengal humidity and the amount of cloud decreased. In these districts little or no change took place in these elements. Rainfall to-day became more general, especially in Orissa, and in the western parts of South-West Bengal, and in East Bengal In most other districts light showers were falling, though South Behar was practically rainless. The heaviest rainfall was in Orissa Thus Pooree reported 2·9 inches, Banpur 2·4 inches, Cuttack 1·84 inches, and Banki 1·0 inch. Also in the Commillah district, Brahmanbaria reported 3 7 inches, while Bagirhât (Khoolna) received 1 61 inches.

Monday, 3rd September.—Pressure was rising generally over the whole Province, except at some stations in Orissa and in South-West Bengal The stations in these areas, which reported a decreased pressure, were clearly influenced by the small barometric depression which was on the 2nd in the north-west angle of the Bay, but which had advanced inland during the night of that day. Pressure was still below the normal of the day by amounts which varied from 0·146″ at Cuttack to 0·01″ at Chittagong. With the heavy rainfall brought by the advance of the depression, temperature was much below the average in Orissa. Elsewhere temperature was generally a little above the normal, though the tendency was towards a falling temperature. Rather strong monsoon winds now set in over the Province, though at some of the inland stations in South-West Bengal the directions were still affected by the depression. In almost all cases wind velocities increased, even up to the limits of Behar. With an extension of the area of rainfall, humidity had somewhat increased since the previous day. The amount of cloud was rather high over the whole Province The area of rainfall again extended, and general rain, moderate and in many cases heavy in amount, fell in every district except in parts of North Behar. Rainfall was heavy in Chutia Nagpur, in Orissa, and in some parts of East and North Bengal and South Behar. The following stations have received amounts in excess of two inches:—Cuttack, Banki, Bhudruck, Julpigori, Darjeeling, Kalimpong; and the following amounts between one or two inches of rain:—Kendrapara, Agartola, Noakhally, Madaripore, Buxa, Godda, Pakour, Mahoudi Hills, Ranchi, and Chyebassa.

Tuesday, 4th September.—Pressure increased generally over the whole reporting area, except in East Bengal and at a few stations in North Bengal and South Behar The increase was large at the Orissa stations, amounting in the case of False Point to more than a tenth of an inch, and was connected with the advance further inland of the barometric depression which entered Orissa on the night of the 2nd Pressure was still below the normal by small amounts, ranging from about 0 06″ in South-West Bengal, to about 0·01″ in North Behar. Temperature continued to fall, and was in almost all cases below the normal This was particularly the case in South-West Bengal and in Chutia Nagpur. Winds had changed in direction only slightly, and velocities remained comparativ ly high, especially at the inland stations. Humidity was fairly high in most districts, though it had decreased somewhat in Orissa. Cloud proportion was also moderate in all districts. Rainfall again continued very general, though, as a rule, the quantities were not quite so large as those which fell on the previous day. Chutia Nagpur again reported heavy rainfall, while some heavy local showers occurred in South Behar and East Bengal. The following were the heaviest falls reported to day:—Mahoudi Hills 2·25 inches, Bhubooah 1 62 inches, Ranchi 1·53 inches, Hazaribagh 1 23 inches, and Perozopore 1 02 inches.

Wednesday, 5th September.—Pressure began to fall rapidly over the whole Province. The fall was particularly large in East and North Bengal, and at some stations in Orissa. Pressure was below the normal by considerable amounts at all stations; the average defect amounting to about 0·12″. Temperature rose at most stations, though in Orissa, Chutia Nagpur, and East Bengal it was below the normal Elsewhere temperature was nearly

normal. Winds at most stations had not changed much. At the southern stations of South-West Bengal, and at some stations in Orissa, wind directions, however, clearly indicated a tendency to slight cyclonic circulation, which was due to the formation of another small cyclonic whirl or barometric depression in the north-west angle of the Bay. Wind velocities in South-West Bengal were affected by this whirl, and light winds prevailed. In Behar and North Bengal fairly strong winds were still blowing. Humidity remained fairly high over the whole reporting area. It had increased considerably in South Behar Cloud proportion also increased over the same area, and was comparatively large everywhere.

Very general rain fell in South-West Bengal and in Chutia Nagpur, while in Orissa, in East Bengal and in South Behar it was less general, though showers prevailed at most stations North Bengal and North Behar were practically rainless The heaviest rain fell in South-West Bengal—thus Saugor Island reported 2 51 inches, Khatra 2 inches Bankoorah 1 95 inches; while the following stations received a little more than an inch of rain:—Midnapur, Mohesrika, Banpur and Balasore.

Thursday, 6th September.—Pressure continued to decrease The fall was large in Orissa and at some stations in South-West and East Bengal, but it was comparatively small in Behar and Chutia Nagpur. The large fall in Orissa was connected with the further development of the small barometric depression in the north west angle of the Bay, which was noticed in the report of the 5th. Pressure was below the average over the whole reporting area by amounts which varied from 0 215″ at False Point to 0 079″ at Durbhanga. Temperature rose generally, except in Orissa. It was above the average in Behar, in East North and South-West Bengal, but below it in Orissa and Chutia Nagpur. Winds in Orissa and South-West Bengal continued to be influenced by the barometric depression in the north-west angle of the Bay. Wind velocities in these districts increased during the past 24 hours, but the velocities were irregular. Over the remainder of the Province south easterly winds prevailed, though their velocity had diminished. Humidity generally decreased slightly. Cloud proportion was also decidedly smaller.

Rainfall was less general to-day. North and South Behar and North Bengal, with the exception of the Cooch Behar and Darjeeling districts, were practically rainless, while local showers only fell in the other divisions. Rain was most general in Orissa. The following stations reported amounts in excess of one inch:—Purulia, Buxa, Cooch Behar, Dinhatta, Ranigunge and Hetampore.

Friday, 7th September.—Pressure continued to fall rapidly in South-West Bengal and Orissa. The fall was greatest at Balasore and False Point, and was clearly brought about by the approach and further development of the barometric depression which had existed at the head of the Bay for the past two days. In other districts the changes of pressure were rather variable, though on the whole it was falling. Pressure was very much below the normal, the defect ranging from 0 27″ at False Point to 0·08″ at Durbhanga. Temperature was below the normal in South-West Bengal and in Orissa, where heavy rain was falling. In other districts it was rather above the average, especially in Behar Winds in South-West Bengal and in Orissa indicated that the barometric depression had approached nearer to the coast of Orissa, and that its centre was this morning between Balasore and False Point, though a little distance from the coast. Wind velocities in these districts continued, however, moderate. In other districts fairly strong south-east winds continued to blow; this was the case even up to the limits of Behar. Humidity increased considerably in Orissa and at some stations in South-West Bengal. It was, however somewhat decreasing in the other districts. Cloud proportion was high in Orissa, in South West Bengal, and in Chutia Nagpur, but elsewhere the sky had cleared slightly.

North Bengal and the whole of Behar were again practically rainless, though general rain was received in Chutia Nagpur and Orissa, and at most stations in South-West and East Bengal. Rainfall was very heavy in Orissa, where Cuttack reported 4 49 inches, Khurdah 4 35 inches, Kendrapara 3·4 inches, Tajpore and Chandbali 2·53 inches, False Point 1·70 inches, Bhuddruck 1·33 inches. In East Bengal Agurtolah also reported 2·34 inches, and Brahmunberia 2·57 inches.

METEOROLOGICAL OFFICE, BENGAL,
The 11th September 1883.

ALEXANDER PEDLER, F C S,
Offg. Meteorological Reporter to the Govt. of Bengal.

MEMORANDA.

1. Births and deaths were registered in the first class Municipalities in Bengal during the week ending 25th August 1883, at the rates, respectively, of 24·7 and 32·8 per 1,000 of their population, against 21·9 and 30·9 per 1,000, respectively, during the preceding week ending 18th August, indicating a further improvement in the record of both events.

2. In the following Municipalities births and deaths are reported to have occurred at the highest rates :—

Births.	Ratio per mille.	*Deaths.*	Ratio per mille.
Arrah	47·8	Gya	63·5
Chuprah	40·0	Arrah	52·7
Bhagulpore	39·8	Monghyr	49·7
Gya	39·6	Serampore	49·1
Darjiling	37·0	Patna	48·3
Serampore	33·4	Chuprah	43·9
Comillah	30·8	Burdwan	41·2
Chittagong	30·5	Bhagulpore	38·9
Patna	29·2	Poori	32·1
Burdwan	29·0	Krishnaghur	28·8
		Suburbs of Calcutta ..	28·7
		Uterparah	28·3
		Santipore	28·0

3. Of the principal death-causes, cholera is stated to have carried off 2·8 per 1,000 of the population of the Municipalities under notice, against 3·7 per 1,000 in the preceding week ending 18th August; small-pox 2 per 1,000 against the same rate; fever 16·0 against 13·7 per 1,000; bowel-complaints 5·5 against 5·8 per 1,000; injury ·6 per 1,000 against a similar ratio; and "other causes" 7·7 against 6·9 per 1,000;—the noticeable features being that, with a great increase of mortality from fever, there was a sensible decline in the death-rate from cholera.

4. Cholera, fever and bowel-complaints are stated to have proved most fatal in the following Municipalities :—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Bowel-complaints.*	Ratio per mille.
Monghyr ..	15·4	Arrah ..	32·3	Patna ..	13·6
Chuprah ..	10·7	Gya ..	32·1	Monghyr ..	10·8
Gya ..	10·2	Uterparah ..	28·3	Chuprah ..	10·7
Serampore ..	7·9	Santipore ..	28·0		
		Burdwan ..	25·9		
		Patna ..	21·4		

5. The mortality of the week classified under the heads of *Sex*, *Class* and *Age* stands as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males ..	32·5	Christians ..	23·6	Under 1 year ..	295·8
Females ..	33·1	Hindus ..	34·8	1 and under 5 years ..	51·5
		Mahomedans ..	28·5	5 and under 10 years ..	23·7
		Budhists ..	24·2	10 and under 15 „ ..	18·5
				15 and under 20 „ ..	21·4
				20 and under 30 „ ..	23·7
				30 and under 40 „ ..	19·6
				40 and under 50 „ ..	21·5
				50 and under 60 „ ..	24·8
				60 years and upwards ..	58·2

F. W. A. DEFABECK,

The 10th September 1883. *Officiating Sanitary Commissioner for Bengal.*

N. 8, NE. 4, E. 33, SE. 144, S. 180, SW. 177, W. 112, NW. 41, Calm 45.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park-street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6° greater; and finally, the thermometer, which has furnished the record of temperature at the Surveyor-General's Office during the last 20 years and upwards, is found to read 0·6° higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

ALEXANDER PEDLER,

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o Overcast, *g* gloomy, *d* drizzling rain, *t* thunder, *p* passing temporary showers, *lr* lightning reflection.

The mean temperature and humidity are obtained by applying to the mean of the 10h, 16h, and minimum readings a correction dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

METEOROLOGICAL OFFICE, INDIA,
The 10th September 1883.

ALEXANDER PEDLER,
For Meteorological Reporter to the Govt. of India.

Report on Traffic of the East Indian Railway during four weeks ending 28th July 1883.

THE approximate figures for the period are as follow :—

	Coaching.		Goods.		Total.	Materials carried on Revenue account, including maintenance.	
	No.	Rs.	Mds.	Rs.	Rs.	Mds.	Rs.
1883	807,666	8,14,295	67,50,495	25,85,593	33,99,888	25,72,000	1,74 453
1882	702,976	7,83,155	69,35,896	24,85,066	32,68,221	23,85,234	94,598
Increase	104,690	31,140	.....	1,00,527	1,31,667	1,86,766	20,965
Decrease	.....	.....	1,85,201	... .	.....	.....	.....

Increases—
15 per cent. in Passengers.
4 „ Coaching earnings.
4 „ Goods „

Decrease—
3 per cent. weight of goods.

COACHING.

The increase in 3rd class passengers is chiefly due to the large number of passengers travelling short distances at the Howrah end of the line owing to the festival of "Ruthjatra," when we carried 25,000 passengers to and from Serampore station, and to labourers journeying to Calcutta for employment.

GOODS.

The variation in the result of the goods traffic for the period, *i.e.* an increase in receipts with a decrease in weight carried, is attributable to the falling off in construction materials, seeds, and pulses, of which we carried large quantities last year for comparatively low freights.

The following were the principal staples affected during the month :—

INCREASES.

Coal, upwards.
„ downwards.
Wheat.
Gunny.
Foreign railway materials.
Salt
Tobacco.

DECREASES.

Cotton.
Commissariat and Ordnance stores.
Pulses.
Iron.
Seeds.

REMARKS.

Coal, upwards ... ... Mds. 31,460 Rs. 12,870
„ downwards ... ... „ 91,520 „ 14,240

The demands for up-country stations and foreign railways were on a more favourable scale.
The demand in the Calcutta market continues.

Wheat ... ... Mds. 3,30,300 Rs. 1,38,520

The advices from home of the harvest prospects having been favourable, the demand which we had experienced in the previous months moderated considerably, so that the average weight carried per week, as compared with June, declined from 20,000 to 11,500 tons.

Gunny ... ... Mds. 14,100 Rs. 15,500

Consequent upon the increase in the grain traffic.

Foreign Railway materials ... ... Mds. 1,28,220 Rs. 1,11,460

The extensions of the O. and R. and the C. and F. Railways, and the construction of the Bengal and North-Western and Rohilkund and Kumaon Railways, are furnishing us with material for carriage in large quantities, which will probably last for some time longer.

Salt ... ... Mds. 2,17,490 Rs. 62,010

For some months past the salt traffic has been normal, and this increase must be attributed to stocks having become exhausted.

Tobacco ... ... Mds. 17,060 Rs. 13,620

This appears to be a fluctuation only, due to increased demands.

DECREASES.

Cotton ... ... Mds 16,470 Rs. 22,610

Quoting from the Calcutta market report :—"Cotton is dull and the season may be considered as over."

Commissariat Stores ... ... Mds. 6,620 Rs. 10,470
Ordnance „ ... ... „ 5,390 „ 14,380

This falling off may be ascribed to the operations going on last year in connection with the Egyptian expedition.

Pulses ... ... Mds. 1,18,770 Rs 32,130

This decrease is shown at stations between Mokameh and Patna Ghât, and is owing, it is said, to the absence of demand in Calcutta.

Iron ... ... Mds. 21,050 Rs. 21,020

There appears to be an absence of demand.

Seeds ... ... Mds. 3,76,160 Rs. 1,41,560

A falling off in demand for export will account for this decrease.

The train mileage for the period has been, excluding maintenance and locomotive coal train mileage—

	Coaching.	Goods.	Total.
	Rs.	Rs.	Rs.
1883	2,49,132	5,25,153	7,74,285
1882	2,12,423	4,54,229	6,66,652
Increase	36,709	70,924	1,07,633
Decrease	...	...	...

Earnings per train mile, excluding materials carried on Maintenance and Revenue account—

	Coaching	Goods.	Total.
	Rs. A. P.	Rs. A. P.	Rs. A. P.
1883	3 4 4	4 14 9	4 6 3
1882	3 11 0	5 7 6	4 14 5
Increase	.....	.....	.....
Decrease	0 6 8	0 8 9	0 8 2

Shunting mileage increase—hours 67.

No. 64.—*The 5th September* 1883.—Under the provisions of the Assam Frontier Police Regulation, 1882, the Chief Commissioner is pleased to appoint Mr. C. P. Crouch, District Superintendent of Police, Sibsagar, to be a Commandant of Frontier Police in command of the Sibsagar Division of the Assam Frontier Police Force and to invest him with the powers of a Magistrate of the first class within the Sibsagar district, for the purpose of enquiring into or trying any offence committed by a Frontier Police Officer and punishable under Act V of 1861, or under the Assam Frontier Police Regulation, 1882. The Chief Commissioner is further pleased, under section 191 of the Code of Criminal Procedure, to empower Mr. C. P. Crouch, Commandant of Frontier Police, to take cognizance of offences committed by Frontier Police Officers, which he is empowered to try—

(*a*) upon receiving a complaint of facts which constitute such offences;
(*b*) upon a police report of such facts;
(*c*) upon information received from any person other than a police officer, or upon his own knowledge or suspicion that any such offence has been committed.

No. 65.—Under the provisions of the Assam Frontier Police Regulation, 1882, the Chief Commissioner is pleased to appoint Mr. W. B. Savi, District Superintendent of Police, Darrang, to be a Commandant of Frontier Police in command of the Darrang district of the Assam Frontier Police Force, and to invest him with the powers of a Magistrate of the first class within the Darrang district for the purpose of enquiring into or trying any offence committed by a Frontier Police Officer and punishable under Act V of 1861, or under the Assam Frontier Police Regulation, 1882. The Chief Commissioner is further pleased, under section 191 of the Code of Criminal Procedure, to empower Mr. W. B. Savi, Commandant of Frontier Police, to take cognisance of offences committed by Frontier Police Officers, which he is empowered to try—

(*a*) upon receiving a complaint of facts which constitute such offences;
(*b*) upon a police report of such facts;
(*c*) upon information received from any person other than a police officer, or upon his own knowledge or suspicion that any such offence has been committed

No. 55.—*The 6th August* 1883.—Mr. J. F. Needham made over charge of the office of Assistant Political Officer, Sadiya, to Mr. L. E. Tonnerre, and availed himself of privilege leave in the forenoon of the 15th August 1883.

No. 56.—Baboo Rabi Chandra Gangooly, on transfer from Bengal, assumed charge of office as First Munsif of Habiganj in the afternoon of the 24th August 1883.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 8th September 1883.—Whereas a notice was published at page 494, Part I of the *Calcutta Gazette* of the 20th June 1883, declaring the intention of the Lieutenant-Governor to confirm the bye-laws therein referred to, which have been framed by the District Road Cess Committee of Dinagepore under section 180 of the Cess Act, IX (B.C.) of 1880, and whereas no objections have been raised to those bye-laws, it is now notified for general information that they are confirmed.

COLMAN MACAULAY,
Secretary to the Govt of Bengal.

NOTICE.

The 8th September 1883.—It is hereby notified for general information that the Lieutenant-Governor intends to confirm, after one month from this date, the following bye-law framed by the District Road Cess Committee of Mozufferpore, under clause 2 of section 180 of the Cess Act, IX (B.C.) of 1880:—

Whoever being in possession of, or having control over, any plants, trees, or hedges obstructing, overhanging, or overshadowing any road, and being required by a notice in writing signed by the Chairman or Vice-Chairman of the District Road Committee, or of any branch committee, to cut down, prune, or trim such plants, trees, or hedges, shall neglect or omit to comply with such requisition within the period therein prescribed, shall be liable to a fine not exceeding Rs. 10, and to a further fine not exceeding Rs. 2 for each day after the imposition of a fine under this bye-law, until the requisition is complied with.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

ROAD CESS NOTIFICATION.

DISTRICT OF CUTTACK.

The 12th September 1883.—It is hereby notified that the Road Cess Committee of the district of Cuttack have determined to levy road cess for the cess year commencing from the 1st October 1883 at the maximum rate of six pies, or two pice, on each rupee of the annual value of lands, and the said rate having been approved by the Commissioner of the Division, is hereby published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

ROAD CESS NOTIFICATION.

DISTRICT OF BACKERGUNGE.

The 14th September 1883.—It is hereby notified that the Road Cess Committee of the district of Backergunge have determined to levy road cess for the cess year commencing from the 1st October 1883 at half the maximum rate, being three pies, or one pice, on each rupee of the annual value of lands, and the said rate, having been approved by the Commissioner of the Division, is hereby published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

ROAD CESS NOTIFICATION.

DISTRICT OF MOORSHEDABAD.

The 14th September 1883.—It is hereby notified that the Road Cess Committee of the district of Moorshedabad have determined to levy road cess for the cess year commencing from the 1st October 1883 at the maximum rate of six pies, or two pice, on each rupee of the annual value of lands, and the said rate having been approved by the Commissioner of the Division, is hereby published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

ROAD CESS NOTIFICATION.

DISTRICT OF DINAGEPORE.

The 15th September 1883.—It is hereby notified that the Road Cess Committee of the district of Dinagepore have determined to levy road cess for the cess year commencing from the 1st October 1883 at the maximum rate of six pies, or two pice, on each rupee of the annual value of lands, and the said rate having been approved by the Commissioner of the Division, is hereby published for general information.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 8th September 1883.—It is hereby notified for general information that, at the recommendation of the Commissioners of the Kishnaghur Municipality, the Lieutenant-Governor extends the provisions of Act VI (B.C.), of 1878 (an Act to provide for the cleansing and construction of latrines) to ward No. V of the said municipality with effect from the 1st October 1883.

COLMAN MACAULAY,
Secretary to the Govt of Bengal.

NOTIFICATION.

The 10th September 1883.—It is hereby notified for general information that the Lieutenant-Governor intends, in accordance with the recommendation of the Commissioners of the municipality of Jamalpore, in the district of Monghyr, made at a meeting, and in the exercise of the powers conferred on him by section 234, Act V (B.C.) of 1876, to extend the provisions of Part VII of the Act to the above municipality, unless good reasons to the contrary be shown within one month from the date of the publication of this notification within the municipality.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

The 11th September 1883.—It is hereby notified for general information that Baboo Raj Krishna Roy has been elected a Commissioner for ward No. V of the Krishnaghur Municipality, in the district of Nuddea, *vice* Pandit Loharam Shiroratna, resigned.

COLMAN MACAULAY,
Secretary to the Govt. of Bengal.

NOTIFICATION.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 44).

AUSTRALIA—SOUTH COAST.

GULF OF ST. VINCENT—PORT ADELAIDE RIVER.

Change in the Channel to the Port.

THE President, Marine Board, Port Adelaide, has given notice that deepening operations had so far progressed in the channel leading from the sea to Port Adelaide that, after the 1st August 1883, a depth of not less than 18 feet at low water spring tides was found.

The first cutting through what is known as the Inner bar commences nearly opposite No. 10 light beacon. It is 100 feet wide until reaching No 9 light beacon, where a Dredger is now at work widening it to 150 feet: thence to the Powder Magazine the width is 150 feet. At the approach to, and round, the curve at Snapper Point the width is nearly 250 feet.

A mid-channel course from the Magazine leads into the newly-formed cutting commencing nearly opposite No. 2 light beacon. It is 150 feet wide until reaching what is known as the Red Buoy Creek. The cuttings to this point are marked in the usual manner, viz., *red* buoys on the starboard hand and *black* buoys on the port hand coming in. From the Red Buoy Creek to the South Australian Company's dock entrance the channel is nearly 300 feet wide, having a depth of not less than 21 feet at low water spring tides.

Note.—It is recommended that large or heavy draught ships should not enter until the Tidal signals, exhibited from the Semaphore station, showed at least one foot above the vessel's draught.

By direction of the Government of Bengal,

J. MENTEITH BARBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 13th September* 1883.

NOTIFICATION.

The 17th September 1883.—A plan and estimate, amounting to Rs. 1,25,503-2-0 for providing double lines of rails for their tramway having been submitted by the Commissioners for making Improvements in the Port of Calcutta with their Vice-Chairman's letter No. 1501, dated the 20th July 1883, and been approved by the Public Works Department of this Government, the Lieutenant-Governor sanctions the work under section 35 of Act V (B.C.) of 1870.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 17th September 1883.—It is hereby notified for general information that the Lieutenant-Governor proposes to issue the following rules for the licensing and registration of passenger and cargo-boats at the port of Chittagong:—

UNDER section 7 (*k*) of Act XII of 1875 (the Indian Ports Act), the Lieutenant-Governor prescribes the following rules for the licensing and regulation of passenger boats plying for hire within the port of Chittagong. They shall take effect from the

Rules.

1. No passenger boat shall ply for hire within the limits of the Port unless licensed and registered by the Port Officer, and under the direction of a person licensed by the same officer.

2. Every application for the licensing and registration of a passenger boat must be made in writing to the Port Officer, and contain particulars of the owner's name and residence, a description of the boat, and the number of passengers which it is intended to carry.

3. Every license granted under these rules shall continue in force for one year from the date on which such license was issued, unless it is revoked under the provisions of these rules.

4. No license shall be granted to any passenger boat unless the Port Officer is satisfied that it is in good order and suited for the accommodation of passengers; and the number of persons to be kept in charge of the boat, and of the passengers which may be carried therein at one time, shall be stated in the license.

5. The number of every licensed and registered boat shall be painted by the Port Officer on the bow thereof in letters of not less than four inches in length.

6. No fees shall be charged for the licensing and registration of passenger boats under these rules.

7. The owner or the person in charge of any licensed passenger boat shall not permit any number of persons more than that for which such boat has been licensed to be carried therein at one time, and shall not permit such boat to ply for hire unless provided with the number of crew stated in the license. The boat must be kept thoroughly clean.

8. In the computation of the number of persons, in addition to the crew carried in any vessel, two children below the age of 12 years shall be counted as one person, and every two maunds weight or luggage shall be counted as equivalent to one person.

9. The license granted for any passenger boat may be revoked by the Port Officer whenever such boat is, in his opinion, unfitted for the conveyance of passengers, or when any breach of the conditions of the license or the Port rules, or the Sea Customs Act, has been committed by the owner or the person in charge.

10. No passenger boat shall obstruct the free navigation of the port or the approaches to any wharf, jetty, or landing stage.

11. Every passenger boat moving in the port after dark shall carry a light in a lantern in the forepart of the vessel where it can be distinctly seen.

12. Whenever any accident shall occur to a registered passenger boat, the person in charge or the owner shall at once proceed to the nearest police station and report the circumstances connected with the accident to the officer in charge.

13. When any property belonging to passengers or others is left in a passenger boat unclaimed, the property so left shall be at once sent by the person in charge to the nearest police station.

14. Any person in charge of a licensed passenger boat plying for hire in the port, who shall without good reason refuse to carry a passenger in such vessel shall, for every such refusal, be liable to the penalty prescribed by law for breach of these rules, and shall in addition be liable to have his own license, and that of the vessel of which he is in charge, revoked.

15. Every licensed passenger boat, when plying, shall have its license on board, which shall be produced when required.

16. An owner of a passenger boat who may withdraw it from plying, except for the purpose of repairs or other sufficient cause, without giving 48 hours' notice to the Port Officer, shall, in addition to the penalty prescribed by Act XII of 1875 for a breach of these rules, be liable to have the license revoked.

17. Every person registered under rule 1 shall be provided with a metal license ticket upon which shall be legibly painted the number of his license, and every such person when in charge of a licensed vessel shall wear his ticket exposed to view. No person without such ticket shall be in charge of any passenger boat.

18. Whenever the number on any license ticket shall become obliterated or defaced, so that the same shall not be distinctly legible, and also when any license ticket shall have been lost or mislaid, an application shall be made to the Port Officer for a renewal thereof, and the Port Officer shall supply a new license ticket

19. On the expiration or other determination of any license, the ticket shall be returned to the Port Officer.

20. No license ticket shall be lent or transferred to any other person, and no such ticket shall be used by any unlicensed person.

21. No person in charge of any registered passenger boat plying within the limits of the port shall use, or wear, or have any ticket resembling, or intended to resemble, the metal ticket granted under the authority of these rules.

22. Any person committing an infringement of any of the foregoing port rules is liable to a fine not exceeding one hundred rupees, under the provisions of Act XII of 1875.

UNDER section 79 of Act VIII of 1878 (the Sea Customs Act), the Lieutenant-Governor appoints the Port Officer of Chittagong to issue licenses for, and register, cargo-boats plying within the limits of that port, and under the same section and section 7 (*k*) of Act XII of 1875 (the Indian Ports Act), the following rules are prescribed for the licensing and registration of such boats, in supersession of the rules published at page 54, Part I of the *Calcutta Gazette* of the 24th July 1872. These rules shall take effect from the

Rules.

1. Each application for the licensing and registration of a cargo-boat must contain particulars of the owner's name and residence, and the tonnage of the boat.

2. The applications will be made to the Port Officer, who shall survey the boats and satisfy himself that they are safe.

3. The licenses will then be issued, and will be current for one year only, from the date of registration. A fee at the following rates will be charged on the issue of each license, and the same fee on its renewal every year :—

			Rs.	A.	P.
"Open or decked" boat up to 3 tons burthen	...	...	1	0	0
Ditto	ditto	*above* 3 and *not above* 5 tons burthen	... 1	8	0
Ditto	ditto	*above* 5 and *not above* 10 tons burthen	... 2	0	0
Ditto	ditto	all above 10 tons burthen ..	... 3	0	0

4. The number of the license must be branded or cut and painted in conspicuous white figures on both bows of the boat: the figures not to be less than six inches in length. The tonnage must also be cut into boat's stern.

5. The license must be produced whenever demanded, and should therefore be in the custody of the manjee of the boat for the time being.

6. Cargo-boats, the manjees of which shall not produce their licenses when called upon, will be treated as unlicensed boats, unless good cause be shown to the contrary.

7. Any goods found within the limits of the port on board of any boat not duly licensed and registered shall, unless such goods be covered by a special permit from the customs officer, be liable to confiscation, and the owner or the person in charge of the boat shall be liable to a penalty not exceeding one hundred rupees.

8. No cargo-boats shall be licensed unless provided with a crew according to the following scale:—

Class I.—"Square built open or decked."

For a boat not above 10 tons burthen, 3 men, including manjee.

,,	,,	above	10	and not above	15	tons,	4	men,	including	manjee.
,,	,,	,,	15	,,	20	,,	5	,,	,,	,,
,,	,,	,,	20	,,	25	,,	6	,,	,,	,,
,,	,,	,,	25	,,	30	,,	7	,,	,,	,,
,,	,,	,,	30	,,	35	,,	8	,,	,,	,,
,,	,,	,,	35	,,	40	,,	9	,,	,,	,,
,,	,,	,,	40 tons, 10 men, including manjee.							

Class II.—"Dinghy built Bhurs."

For a boat not above 10 tons burthen, 3 men, including manjee.

,,	,,	above	10	and not above	20	tons,	4	men,	including	manjee.
,,	,,	,,	20	,,	30	,,	5	,,	,,	,,
,,	,,	,,	30	,,	40	,,	6	,,	,,	,,
,,	,,	,,	40 tons, 7 men, including manjee.							

9. The license of a cargo-boat found plying contrary to the conditions of the license, with a crew fewer in number than is prescribed in such license, shall be liable to cancelment

10. If any cargo-boat becomes unsafe during the term of its license, the Port Officer may withdraw the license until it is properly repaired.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

The 18th September 1883.—In exercise of the powers conferred on him by section 8 of Act XII of 1875 (the Indian Ports Act), the Lieutenant-Governor appoints the Commissioners for Making Improvements in the Port of Calcutta to be Conservators of the navigable channels of the Mutlah leading to Port Canning.

INDIA—EAST COAST.

BAY OF BENGAL—GODAVERY DISTRICT.

COCANADA.

Beacon on Point Gordeware or Godavery.

THE Port Officer, Madras, has given notice that, as a guide to vessels approaching the harbour of Cocanada, and in order to distinguish the foul ground extending off Point Gordeware, a *beacon* with a *pole* and *basket* is erected on the point.

The *beacon* stands on a tripod beam 28 feet above the northern extremity of the Sandy Point, and bears from the Hope Island lighthouse N. E. by N. ½ N.; the Old Cocanada lighthouse S. E. by E. ½ E.; and the *red* buoy moored off Point Gordeware S. by W. ½ W., nearly, distant 3¾ nautic miles.

Note.—Vessels should not pass between the *beacon* and the *red* buoy, between which a long dangerous sand bank extends, in some parts nearly dry at low water ordinary springs, and on which the sea breaks very heavily at times.

NOTICE TO MARINERS—(No. 42).

INDIA—WEST COAST.

BOMBAY HARBOUR.

Occulting Light on Sunk Rock.

NOTICE has been received from the Government of Bombay that, on and after the 1st April 1884, an *occulting* light will be exhibited from a lighthouse recently erected on Sunk Rock, Bombay Harbour, and that the Inner lightship will be withdrawn.

The Occultations last for periods of *five seconds*, the duration of the light in each period being from *three* to *four seconds*, and the eclipse from *one* to *two seconds*.

The light will show through an arc of 244°, or from S. 7° W. round Eastward to N. 69° E, and is a red light with two white direction beams, one showing between S. 7° W. and S. 30° W, and the other between N. 15° E. and N. 31° E, and will be visible from a distance of 14 sea miles.

The lighthouse, which is a circular masonry tower of a dark gray colour, approaching to black, is elevated 71 feet above the mean level of lowest ordinary spring tides.

The illuminating apparatus is *dioptric*, or by lenses, of the 3rd order.

Note.—The proposed interchange of lights between the Prongs Reef and the Kundari island will not be made.

The bearings are magnetic and from seaward.

By direction of the Government of Bengal,
J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

LAND SALE NOTICES

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of the Sonthal Pergunnahs will be put up to sale at the Dumka Collectorate on Friday, the 28th September 1883, corresponding with 13th Assin 1290 B.S.

The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold revenue-free to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3*rd*.—If the amount of the purchase-money do *not* exceed Rs 100, the whole amount to be paid down at once.

4*th*.—If the amount of purchase-money exceed Rs 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

JAS. TAYLOR,
Asst. Comptr.-Genl., in charge, Paper Currency.
PAPER CURRENCY DEPARTMENT, the 18th Sept. 1883.

Notice.

THE Public are hereby informed that the well-known Kartick Barun Mela, which is held every year on the banks of the Dhaleshwari, near Munshigunge, in the district of Dacca, will commence on the 14th November 1883 A.D., corresponding to the 29th Kartick 1290 B.S., and continue up to the 25th December 1883. Tradesmen, dealers, and others may buy and sell there during these six weeks.

A. W. PAUL, Magistrate of Dacca.

Government Cinchona Febrifuge.

THIS preparation is an efficient substitute for Quinine and can be purchased by Government officers for public and charitable purposes, and by any one taking *twenty pounds* at a time, from the Superintendent, Botanical Garden, Calcutta, *for cash only*, at the following rates:—per four ounce tin, *Rs.* 4 *ans.* 8; per eight ounce tin, *Rs.* 8 *ans.* 8; per pound tin, *Rs.* 16 *ans.* 8. The general public can be supplied by the Superintendent, Botanical Garden, *for cash only*, at the undernoted rates:—per four ounce tin, *Rs.* 5 *ans* 8, per eight ounce tin, *Rs.* 10 *ans.* 8; per pound tin, *Rs.* 20 This medicine is also sold by the principal European and Native druggists in Calcutta. Postage eight annas per 4 and 8 oz tins, and twelve annas per pound tin, in addition to the foregoing rates.

Forest Department, Bengal.

SUNDERBUNS DIVISION.

Notice

ONE hundred and sixty-six pieces of teak are now lying at the Government Timber Depôt of Saterhog Forest Toll Station.

Any person having claim upon the same is requested to come forward and prove his claim within two months from this date to the Officer in charge of the Depôt, or at the office of the undersigned, and after paying salvage, &c., upon the pieces, to remove the same.

No claims will be admitted after two months from this date, when the timber will be sold for the benefit of Government.

G. W. STRETTELL, Deputy Conservator of Forests,
Sunderbuns Division.

Dated Calcutta, the 28th July 1883;
No. 3, Hungerford Street.

Notification.

NOTICE is hereby given that, on and after the 1st September 1883, the following will be the rates for the removal of forest produce from the Sunderbans Reserve Forests in supersession of those published in the *Calcutta Gazette* of 29th September 1880, Part II, page 1541:—

(1) Sundri, Pussur, and Amoor timber in pieces measuring 10 feet and upwards in length, *or* 3′ 9″ and upwards in girth at the thick end, for every maund, one anna.

(2) Sundri, Pussur, and Amoor timber in pieces measuring 6 feet and under 10 feet in length, *or* 2′ 3′ and under 3 9″ in girth at the thick end, for every maund, one half anna.

(3) Keora timber in pieces measuring 6 feet and upwards in length *and* 2′ 3″ and over in girth at the thick end, for every maund, one quarter anna.

(4) Any other forest produce except honey and wax, for every maund, one quarter anna.

(5) The right to collect honey and wax for each man, per month, one rupee eight annas.

A. L HOME, Consvr. of Forests, Bengal.
Darjeeling, the 11th August 1883.

Notice.

Oudh Forest Department.

BYRAMGHAT DEPOT

ON THE OUDH AND ROHILKHUND RAILWAY

FROM this date the prices of all beams and scantlings supplied from this depôt will be as follows:—

BEAMS.—21 feet in length, at Rs 2-10 per cubic foot.
22 ,, ,, 2-12 ,,
23 ,, ,, 2-14 ,,
24 ,, ,, 3 ,,

Above the lengths given two annas per foot run will be charged

Any inches over the foot will be charged as a foot

SCANTLINGS.—From 12 to 20 feet, at Rs. 2-8 per c ft.
Under 12 and over 7, at ,, 2-4 ,,
Under 7 feet, at ,, 2 ,,

The above prices are for ordinary building purposes

For *Planking, Sleepers*, &c., special rates will be fixed by agreement

The Department will still take orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion

Second and Third Class Timber will be sold and price fixed by agreement

Auction Sales will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, Oudh Circle.

KANHYA LAL, in charge Byramghat Depôt.

The 22nd May 1879.

Notice.

TO PROFESSIONAL SURVEYORS.

All persons claiming the said treasure, or any part thereof, are hereby required to appear personally, or by agent, before the Collector of Tinnevelly at his office on 15th January 1884 at Tinnevelly in order that the matter may be enquired into and determined in accordance with the provision of the Act.

A. J. B. ATKINSON, Acting Collector

Tinnevelly Collector's Office, 1st September 1883.

Notification.

IT is hereby notified for information of the public that a duplicate receipt for an amount exceeding Rs. 20 is liable to a stamp duty of one anna under Article 23 (*a*), Schedule I of Act I of 1879, and should, under section 16 of the Act, be stamped before or at the time of execution. If the duty payable on the duplicate receipt is denoted by an adhesive stamp, such stamp should be cancelled *so that it cannot be used again*. Any person signing a duplicate receipt when the amount exceeds Rs. 20 without the same being duly stamped, is liable to be criminally prosecuted under section 61, Act I of 1879, and punished with a fine which may extend to Rs. 500; and any person neglecting or omitting *to effectually cancel the adhesive stamp* and in payment of stamp duty renders himself liable to a fine which may extend to Rs. 100

The attention of banking, mercantile, and trading community is especially drawn to the requirements of the law on this point

G. M. GOODRICKE, Collector of Calcutta.

Calcutta Collectorate, the 13th September 1883.

Bengal Tea Company, "Limited"

THE Forty-sixth Half-yearly General Meeting of Shareholders will be held at the registered office of the Company, No. 4, Clive Row, at noon, on Friday, the 28th instant, for the purpose of passing the Managing Agents' Report and the accounts to 30th June last, and electing an Auditor.

(1529—1) JARDINE, SKINNER & Co., Managing Agents'

Baree Tea Company, "Limited."

THE Half-yearly General Meeting of the Shareholders will be held at the registered office of the Company, No. 81, Clive Street, on Tuesday, the 25th September, at 1 P. M., to pass the accounts and transact such other business as may be brought before the meeting.

MITCHELL, REID & Co., Agents.

Calcutta, 11th September 1883 (1526—1)

The Sonai Tea Company, "Limited."

NOTICE is hereby given that an Extraordinary General Meeting of the Sonai Tea Company, Limited, will be held at the registered office of the Company, No. 12, Mission Row, Calcutta, on Tuesday, the 2nd day of October 1883, at 12 o'clock, when the sub-joined special Resolution will be proposed—

1. That the Company be wound-up voluntarily and that Mr. W. A. Browne be, and he is hereby, appointed liquidator (at such remuneration as the Company may fix) for the purposes of such winding-up, with power to do such of the several acts and things specified in the Indian Company's Act, 1882 (and especially sections 144 and 177 of such Act), as shall be found necessary or proper for winding-up the affairs of the Company and distributing its assets.

BEGG, DUNLOP & Co., Managing Agents.

Calcutta, the 20th July 1883. (1506—3)

India General Steam Navigation Company, "Limited."

AN Extraordinary General Meeting of Shareholders of the above Company will be held at the registered office of the Company, No. 4, Fairlie Place, Calcutta, on Friday, the 28th day of September 1883, at noon, to confirm the following resolution passed at the Extraordinary General Meeting of Shareholders held this day, the 14th day of September 1883—

"That the Articles of Association of the Company be amended by inserting between Articles 35 and 36 of the Articles of Association of the Company, the following Article, namely:—

Subdivision of Shares.

"35*a*. The Company may from time to time by consolidation and subdivision divide the capital of the Company or any part thereof into shares of larger or smaller nominal amount."

By order of the Directors,

J GILLMAN, Offg. Secretary.

4, Fairlie Place, Calcutta, 14th September 1883.

(1527—2)

W. Newman & Co., "Limited."

NOTICE is hereby given that the Ordinary General Meeting of the Shareholders of the above Company will be held at the registered office, 4, Dalhousie Square, Calcutta, on Friday, the 5th October 1883, at 4 P.M., to pass the accounts for the year ending 30th June 1883, and to transact such further business as may be brought before the meeting.

By order of the Directors,
E. A. DUKES, Secretary and Manager.
Calcutta, 18th September 1883 (1570—1)

Bishnauth Tea Company, "Limited."

NOTICE is hereby given that the Fortieth Half-yearly Ordinary General Meeting of Shareholders of the above Company will be held at the registered office, No. 4, Mangoe Lane, Calcutta, on Saturday, the 29th instant, at 12 o'clock noon, for the purpose of receiving the Directors' report, passing the accounts to 30th June 1883, and transacting such other business as may be brought before the meeting.

By order of the Board,
WILLIAMSON, MAGOR & Co., Secretaries.
Calcutta, 18th September 1883. (1568—2)

Tukvar Company, "Limited."

NOTICE it hereby given that the Ordinary Half-yearly General Meeting of Shareholders of this Company will be held at the registered office, No. 4, Mangoe Lane, on Saturday, the 29th instant, at 12-30 P.M., for the purpose of receiving the Directors' report, passing the accounts for the half-year ended 30th June 1883, considering the advisability of giving the Directors power to declare an *ad interim* dividend, and transacting such other business as may be brought before the meeting.

By order of the Board,
WILLIAMSON, MAGOR & Co., Secretaries.
Calcutta, 18th September 1883. (1569—2)

Notification.

TO be peremptorily sold by the Registrar of the High Court in its Ordinary Original Civil Jurisdiction in his sale-room in the Court-house on Saturday, the twenty-second day of September next, at the hour of twelve o'clock at noon, pursuant to an order of the said Court made in suits Nos. 6½ of 1868, 658 of 1869, and 614 of 1873, and dated the eighth of May one thousand eight hundred and seventy-nine the undivided half share of the defendant Monmotho Nauth Dey in the following properties, viz.—

1. The piece of tenanted land, No. 302, Chitpore Road, in Calcutta, measuring about two cottahs, and bounded on the north by the land of Nobin Chunder Shaha; on the east by the tenanted house of Ram Narain Mookerjee; on the south by the land of Bisso Nauth Mitter; and on the west by Government drain.

2 The piece of tenanted land No. 37, Bonomally Sircar's Street, in Calcutta, measuring about one biggah, and bounded on the north by Bonomally Sircar's Lane; on the east by the land and tank of Grish Chunder Bose; on the south by the tank of Krishto Mohun Chuckerbutty; and on the west partly by the dwelling-house of Modoosoodun Biswas, partly by the dwelling-house of Gopaul Chunder Dutt, partly by the land of Rutton Chunder Chatterjee, and partly by the land of Kheroomoney Dassee.

3. The piece of tenanted land, No. 9, Nilmoney Mitter's Street, in Calcutta, measuring about one biggah and four cottahs, and bounded on the north by Nilmoney Mitter's Street; on the east partly by the tenanted house of Nundi Lall Bysack and partly by the land of Mr. A. B. Mackintosh; on the south by Government drain; and on the west by the land of Kassy Nath Chuckerbutty.

4. The tenanted land, No. 17, Nilmoney Mitter's Street, in Calcutta, measuring about thirteen cottahs, and bounded on the north by Nilmoney Mitter's Street; on the east by the land of Rutton Chand Bose, deceased; on the south by the dwelling-house of Anshootosh Deb; and on the west by the dwelling-house of Khetter Nauth Bose.

5. The tenanted land, No. 13, Upper Circular Road, in Calcutta, measuring about fifteen cottahs, and bounded on the north partly by the house of Mozoom Moonshi and partly by the tenanted house of Issen Chunder Chuckerbutty; on the east by the Circular Road; on the south by the land of Issen Chunder Chatterjee; and on the west by the land of Luckhynarain Saha.

The abstract of title and conditions of sale may be seen at the office of the said Registrar or at the office of Messrs. Ghose and Ghose, No. 12, Old Post Office Street, Calcutta, on any day before the sale and will be produced at the time of sale.

R BELCHAMBERS, Registrar.

Lost.

THE Government Promissory Notes Nos. B161053 and 161054 of the 4 per cent. loan of 1865 for Rs. 1,000 each, originally standing in the name of the Comptroller-General and last endorsed to the proprietor, by whom it was never endorsed to any other person. Payment of the above notes and the interest thereupon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue for the duplicates in favour of the proprietor.

PANNA LALL, late Command Gomasta,
(1462—3) Koonchа Sunjogee Ram, Delhi.

Notice.

THE Public are hereby informed that Sreemutty Coomaree Dossee hath contracted with Kunjoobehary Bose of No. 6, Radha Nath Bose's Lane, Goabagan, in the town of Calcutta, for the absolute purchase of his undivided moiety of, in, and to, certain immoveable properties situate in Calcutta and Suburbs, and which he has inherited on the death of his father Radha Nath Bose, deceased, late Deputy Collector and Government pensioner.

Persons having any objection to the above contract being carried, are requested to make the same known to her attorney, the undersigned, within three days from date hereof.

BISSONATH DUTT, Attorney-at-Law.
No. 3, Hastings Street. (1567—1)

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE BURDWAN DIVISION FOR THE YEAR 1882-83.

GENERAL DEPARTMENT,—MISCELLANEOUS.

Calcutta, the 15th August 1883.

RESOLUTION.

READ—

The General Administration Report of the Commissioner of the Burdwan Division for the year 1882 83

MR BEAMES, by whom the report is submitted, held charge of the division for the whole year, with the exception of a period of ten days near its close.

2. *Tours.*—The Commissioner has given a full and interesting account of his tours, in the course of which he visited nearly the whole of the division, inspected all the district and most of the sub-divisional offices, and gave his personal attention to all matters of importance. Such of these as are noticed in the report, and call for special remark, will be considered in connection with those chapters of the report in which they are mentioned. The tours of the district officers were, except in Howrah, of sufficient length, and those of Messrs. Larminie and Wilson, in Burdwan and Midnapore, are specially commended for the good work done in the course of them. The Lieutenant-Governor is glad to notice the importance which the Commissioner attaches to well-planned and exhaustive tours by his subordinates, and to the submission

of full and intelligent diaries, and trusts that he will indicate to the Collector of Bankoora and other officers the points in which their tours fell short of a satisfactory standard Mr. Rivers Thompson also agrees with the Commissioner as to the great value of spreading tours over all seasons of the year, and not restricting them to the cold-weather only. The officers in charge of Howrah during the year, Messrs. Armstrong and Buckland, spent between them only 39 days in camp. There is probably less cause for the detention of the District Officer at Howrah than there is in the case of other districts. The Commissioner should call on Mr. Buckland for an explanation of the small amount of inspection duty performed by him as soon as he returns to the district, and a similar explanation should be submitted to Government by Mr. Armstrong through the Board of Revenue. The tours of the Sub-Divisional Officers were on the whole satisfactory, though that of the Joint Magistrate of Serampore fell somewhat short of the standard laid down by Government.

3 *Weather and Crops.*—The rainfall, which was below the average of ordinary years in all districts except Hooghly, was intermittent and unequally distributed. On the low lands the rice crop was generally good, owing to the absence of floods ; but it failed to a considerable extent on the high lands owing to the want of water. The general yield for the whole division is estimated at about 10 annas. Some 20,000 bigahs of land, on which the rice would otherwise have been very poor, were successfully irrigated from the Eden Canal in Burdwan. The winter crops were good, and the yield of sugarcane was especially fine in Hooghly, Burdwan, Beerbhoom, and Bankoora, in which districts the Beheea sugar-mills are being everywhere profitably introduced. The garden crops of Serampore and Jehanabad were good.

4. *Public Health.*—In Burdwan, Bankoora, and Beerbhoom fever was still prevalent, though it is believed to have been of a milder type than in the previous year The fact that the mortality from this cause was greater than in 1881-82 is accounted for by the supposition that in Burdwan the registration of deaths has become more perfect, and that in the other districts the people were so debilitated by previous fever that a milder type of disease produced more fatal effects than a severer type at the commencement of the epidemic. The latter explanation does not appear altogether satisfactory, but there is some ground for believing with the Commissioner that the fever is abating. In Midnapore the recorded mortality from fever was practically unchanged ; and it is noticeable that throughout the division the disease has been more prevalent on the high laterite soil than in the low-lying alluvial tracts. There was a certain amount of cholera in all districts. In Serampore the prompt measures taken by the Sub-Divisional Officer in burning the latrines at the Champdani Jute Mills, and erecting others on an improved plan in their stead, effectively checked a small epidemic in which 70 fatal cases had occurred. In the same sub-division the Magistrate successfully combated an outbreak of cattle-disease by segregating affected animals ; but the Commissioner observes, apparently with much reason, that the almost universal conversion of pasturage into arable land has materially injured the stamina of cattle throughout the suburban districts. Vaccination has made satisfactory progress throughout the division, and the opposition to it is said to have died out almost everywhere. Tact, however, is needed on the part of the operators to render this state of things lasting, and such instances as those mentioned by the Commissioner, where efforts were made to vaccinate children suffering from fever, and where extra fees were levied on pretence of the necessity for conciliating Sitala, the goddess of small-pox, are eminently calculated to render the department unpopular, and should be sternly repressed. The Lieutenant-Governor would wish for further particulars regarding the levy of fees for the worship of Sitala, which the Superintendent of Vaccination is said to have justified, and desires that the Surgeon-General will favour him with a full report on the subject. It is possible that the progress of vaccination in other divisions may be hampered by similar obstacles. The progress made by drainage during the year has not been very satisfactory, and the subject will be further considered in the Public Works Department

The material condition of the lower classes seems to be steadily improving throughout the division. Labour commands high prices, and there is a good

market for produce. The Commissioner is, however, probably right in considering that the struggle for existence among the middle classes is becoming more severe. This is the natural result of the rapid development of education, unaccompanied as it is by a tendency among the middle classes to betake themselves to any modes of earning their living, other than the necessarily limited resource of employment under the Government.

5. *Emigration and Immigration*.—The increase noticed last year in the number of emigrants registered in the Burdwan Division was maintained during that under review, 3,803 persons having been registered, against 3,650 in 1881-82. The increase, however, was confined to the districts of Bankoora, Beerbhoom, and Midnapore, which together supply much less than half of the total number recruited From Hooghly and Howrah no emigration takes place in consequence of the large local demand for labour. The number recruited in Burdwan shewed a falling off from 2,499 to 2,123. The emigrants recruited in the Burdwan district are nearly all foreigners, who have come into it in the search for employment, and the decline in their numbers is ascribed to the fact that these men found employment ready to hand on the Burdwan water-works. It is probable also that much emigration of foreigners takes place from Burdwan without the intervention of the Act. The Commissioner is probably right in supposing that the increase of emigration from Bankoora and Beerbhoom is due mainly to the favourable reports brought back by returned emigrants and garden sardars, rather than to the poor outturn of the rice crop. Complaints against recruiters were rare during the year, and the Commissioner believes that the class from which emigrants are recruited is now quite able to take care of itself, and is not likely to be deceived into emigration. One proof of this may perhaps be found in the fact that the great majority of labourers decline to be placed on contract for more than three years, but there are not wanting indications which point to an opposite state of things.

The only immigration into the district is that of the Bauris, Sonthals, and Bhuniyas into the Raniganje sub-division for employment in the mines The town of Ranigunge also lies on the pilgrim routes to Gya, Baidyanath, and Puri, and has therefore a large floating population. The Lodging-house Act has recently been introduced.

6. *Prices of Food and Labour*.—From the following table it will be seen that a slight increase took place in every district in the price of rice, as compared with the previous year :—

Districts.	1880-81		1881-82.		1882-83.	
	Rice per rupee	Wheat per rupee	Rice per rupee.	Wheat per rupee.	Rice per rupee.	Wheat per rupee.
	S. c.	S. c.	S. c.	S. c.	S. c.	S. c.
Burdwan ...	22 9	16 15	28 3½	15 14½	24 6½	15 9
Bankoora ...	25 9	15 6	31 8¾	15 7	29 12	14 14
Beerbhoom ...	22 15	16 14½	28 10½	15 6	25 7	15 13
Midnapore ...	24 15¾	11 6¾	30 14¾	14 10	28 12	13 8
Hooghly ...	19 7	14 14	36 11	14 11¾	22 12	14 5
Howrah ...	19 13	15 2	22 10½	15 1¾	21 1	13 5¾

The fact that the prices of rice did not rise beyond the rate of 20 seers to the rupee, notwithstanding the bad crops of the year, is due to the large stocks which remained unsold from 1880-81. With the exception of a slight rise during the prevalence of fever in the Bishenpur sub-division of Bankoora, the price of labour remained unchanged.

7. *Manufactures and Mines*.—The account given in the Commissioner's report of the manufactures of the division is very interesting, and will be communicated to the Executive Committee of the Calcutta Exhibition, to whom it will probably be of use in enabling a collection of articles for exhibition to be made for Bengal. The tusser industry, though said to be in a declining state, and though

China silks are no doubt competing successfully with those of Indian manufacture, would appear to be capable of revival. The manufacture of cotton cloths is declining everywhere owing to the competition of European piece-goods, and the business of the cotton mills of Howrah is reported to be falling off owing to the rivalry of Bombay, which is more favourably situated in respect of the cotton-producing districts. The jute mills and presses of Howrah are, however, thriving. The demand for shell-lac and stick lac continues brisk in Bankoora and Beerbhoom. Messrs. Burn and Co's potteries at Ranigunge are annually increasing in importance, and the cement works in the neighbourhood are said to promise well. The Barakhar iron works at Khendua, which have been purchased by the Government, and are under the management of Ritter Von Schwartz, are said to be briskly employed in producing cast-iron. The Commissioner's report contains an interesting extract from a report by the Sub-Divisional Officer of Ranigunge regarding the coal mines of that district, which will be further considered in the Public Works Department. The low price of coal is a general complaint among the owners of mines; but the consumption of Indian coal has to some extent revived, and it may fairly be presumed that the enhanced demand will, if it lasts, lead to the realization of higher prices.

8. *Trade and Commerce.*—The chief export from the division is rice, which is exported from all districts. In spite of the less abundant crop, the large stocks over from the previous year kept prices down within the division, and lessened the demand from other parts of India. The exports of coal from the Ranigunge sub-division is said to have amounted to 1,010,571 tons against 616,920 tons in the previous year. From the Bankoora district Rs 2 72.000 worth of brass and bell-metal wares is believed to have been exported, against Rs. 2,50,000 worth in the previous year. The exports of stick-lac and shell-lac from the same district are estimated at 10,000 and 20,000 maunds respectively, against 6,000 and 13,000 maunds in the previous year. The Commissioner is of opinion that an improvement in the roads between the Chota Nagpur Division and Ghattal, through Bankoora and Midnapore, would do much to develop the trade of Southern Bankoora, which lies with Calcutta *viâ* Ghattal rather than with the upper provinces *viâ* Ranigunge. The view taken by the Commissioner would appear to be opposed to the ideas of the Road Cess Committees of Bankoora and Midnapore, but there can be very little doubt that the Commissioner is right. The matter is one, however, of some importance and should be investigated The completion of the railway to Tarkessur, and the contemplated line from Howrah to Ampta, will probably influence the action of Road Committees. For some unexplained reason the export of silk from Beerbhoom rose during the year from 2,710 maunds to 6,462 maunds. Much of the silk exported from this district is, however, imported from Moorshedabad. The value of the export trade in potatoes from the Hooghly district is estimated at Rs. 24,19,556. The export trade in country cloth from this district is also much more extensive than in most other districts, being estimated at nearly thirty-one lakhs of rupees. The total exports of the Hooghly district are believed to exceed 134 lakhs of rupees; and the imports, consisting chiefly of piece-goods, rice, ghee, and twist, are put down at nearly 89 lakhs. The figures, however, more indicate than measure the trade

The following statement shews the quantity and value of the goods which have passed through the Midnapore canals during the last three years :—

Year.	Quantity. Mds	Value Rs
Exports.		
1880-81	28 29,825	70,19,127
1881-82	32,07,069	74,29,964
1882-83	37,17,836	94,99,173
Imports.		
1880-81	15,06,810	95,09,639
1881-82	14,78,544	94,79,707
1882-83	16,05,419	98,19,821

Rice formed more than half of the exports. The large increase is not explained, but is believed by the Commissioner to be solely due to the

increased facilities of transport and communication offered by the canals. This view is probably correct; and it serves as a further illustration, if any were needed, of the profitable nature of expenditure on carefully selected public works.

9. *State of Public feeling.*—The Commissioner's remarks on this subject, being the opinion of an experienced and observant officer, are reproduced in full:—

Public feeling is confined to a comparatively small class of persons who have been educated at Government schools and colleges, and who have imbibed an interest in politics along with the English language and literature which they studied there.

Of this class there are two branches—the older, wiser, and more far-seeing, who appreciate the benefits conferred on their country by British rule, and the younger, more ambitious, and less experienced, who think themselves fit for the highest power, and have learnt to look upon us as enemies, who are keeping them out of the independence and universal prosperity which they would enjoy if we left the country

The two subjects that have attracted the attention of this class are the Local Self-Government scheme, and the Criminal Jurisdiction Bill. The former has been much discussed in all the large towns, but has failed to arouse any interest in the minds of the rural population. Generally speaking, this measure, when at first announced, gave rise to the most extravagant anticipations among the educated classes. As time has gone on, and the moderate scope of the proposals has become apparent, the interest in it has very much died out. A partial and guarded admission to a share in the minor branches of the administration, with no pay, much hard work, and very little glory, is not a prospect which has much attractions for the light-headed vapouring youths who aspire to govern Bengal; while the older and wiser men openly say that things are much better managed at present than they are likely to be under the new law, which, consequently, whenever and in whatever shape it may eventually issue, will probably fall very flat, and effect very little real change in the position of affairs.

As regards the Criminal Jurisdiction Bill, all the Collectors of the Division report that it is regarded with great dislike and regret by the majority of the educated natives; but so active a propaganda has been organised in favour of it by emissaries from Calcutta, that the younger and less experienced are carried away by it. They are sedulously taught to regard it as a battle for supremacy between the European and the Bengali, in which, if they only stand firm, they are certain, seeing how strongly the Viceroy and his Council lean to their side, to gain the victory.

Meetings have been got in the chief towns of the Division by emissaries from Calcutta, at which, failing to induce the older and more experienced to attend, they have collected crowds of school-boys. Of these meetings it may be said, as of a certain meeting at Ephesus many centuries ago, that "the more part knew not wherefore they were come together." These meetings are described in the native papers as "crowded and influential." The Collector of Hooghly writes:—"Mr. B. De, the Joint-Magistrate, tells me that since the large meeting at Calcutta there has been a strong feeling *raised* in favour of the amendment of the Criminal Procedure Bill extending the jurisdiction of Native Magistrates over European British subjects, and that *before that meeting there was not much feeling on the matter.*" I call attention to the words italicised. With so active a propaganda being carried on in such a place as Hooghly, I am not surpised to learn that at a meeting at Chinsurah, attended, the Collector says (and I can confirm this, for I saw them going), chiefly by school-boys, Mr. Justice Norris was burnt in effigy.

From every part of the Division comes painful evidence of the intense mutual aversion raised by this Bill between Europeans and Natives. I could give many illustrations of this, but it is better, perhaps, to say as little as possible. Only high officials have escaped this feeling. Their position guarantees them to a certain extent against molestation; and if I may judge from my own sentiments, they cannot forget the many ties of good service and kindly relations that have united them with courteous and intelligent Bengali gentlemen through many years; nor can they forget that the real leaders of native opinion do not sympathise with the party of agitation. It is to be regretted that they do not speak out and tell the world what is the real opinion of the Bengalis on this subject. Perhaps we can hardly blame them for persisting in their habitual reticence, and we at least are not likely to desert our old friends for that reason; still there is no doubt that a terribly bitter spirit has been aroused, and no man can see what the end may be.

10. *Public Press.*—On this subject the Commissioner makes the following remarks, quoting partially from Mr. Wilson, Collector of Midnapore:—

Among Calcutta papers the *Statesman*, the *Hindu Patriot*, and the *Bengalee* are the favourites. The *Bengalee* has occasionally noticed the affairs of this district, and has once or twice been of use by putting me on the track of something going wrong; but the want of care in testing facts, and the generally exaggerated style in which it is written, greatly interfere with its usefulness in this way. Among the vernacular papers the *Shomeprokash* and the *Bangobashee* are in good circulation, and exercise some influence.

The *Shadharani* and the *Education Gazette* are the only papers published in the town of Hooghly. The Collector reports that they are well written, moderate in tone, and have a fair, though limited, circulation But in these suburban districts those who read the newspapers at all take in Calcutta papers, some of which are unobjectionable in tone, while others are decidedly the reverse.

At a time of such general excitement as the present, it is perhaps hardly fair to make any remarks as to the attitude of these papers, which must be recognized as entirely exceptional, even the most moderate having been to a great extent carried away by the intensity of popular feeling—an intensity which we must earnestly hope is only temporary.

11. *Statistical Enquiries.*—The Commissioner believes that about one-half of the total number of deaths occurring in the division is now reported to the police, and attributes the reluctance of the people to report deaths to a feeling that the delay and inconvenience caused to families in which deaths supposed to be suspicious occur will be caused in all cases, suspicious or not, in which deaths come to the knowledge of the police, and urges the importance of strictly limiting enquiries to cases in which suspicion exists. The Commissioner's remarks on this head will be communicated to the Inspector-General of Police.

12. *Police and Crime.*—The account given of the condition of the Division in respect of criminal cases is not very full, the Commissioner having no doubt reserved the bulk of his remarks for the Police Report. The facts noticed are, however, satisfactory. The number of cognizable cases fell from 18,077 in 1881 to 16,459 in 1882, and being common to all classes except that of serious offences against property, in which no change took place. In all districts, except Howrah, the number of cases declared false rose; but the result of prosecutions in false cases is described as far from satisfactory. In Burdwan the increase of seven took place in the number of dacoities, believed by the Magistrate to be due to a temporary outbreak of crime, and not to any increase in the number of professional dacoits in the district. A decline is also apparent in the number of non-cognizable cases, and is ascribed to the low prices realised for food-grains, which rendered the provision of money for the prosecution of petty cases a matter of difficulty. The conduct of the police, except in the Burdwan district, is favourably described.

13. *Civil Justice.*—The number of civil suits of every class rose considerably during the year under review; but the amount in dispute, both in suits for money and moveables, and in rent suits, fell considerably. In title and other suits the increase in number was accompanied by a large increase in value, thus:—

	Suits for money and moveables.			Rent suits.			Title and other suits.		
	Number.	Value in dispute	Average value.	Number.	Value in dispute.	Average value.	Number.	Value in dispute.	Average value.
		Rs.	Rs.		Rs.	Rs.		Rs	Rs.
1881	21,513	22,14,486	103·3	29,996	14,27,870	52 8	6,615	16,28,600	246·2
1882	24,536	19,88,849	81·0	29,791	13,49,518	45 2	7,139	46,49,519	637·1
	+3 220	—2,25,623	—22·3	+2,795	—78,352	—7 6	+524	+29,20,919	+390·9

With the exception of a decline in the number of title and other suits instituted in Bankoora, the increase was common to all the districts of the division. In the opinion of the District Officers, the increase in suits for money and moveables, and in rent suits, was due to the low prices of agricultural produce, which rendered the payment of debts and of money rents difficult. The Commissioner is disposed to explain it by the growing popularity of the civil courts, to which people now resort gladly to settle disputes instead of keeping up local feuds. Both causes have probably been at work to a considerable extent. Of the total number of suits settled during the year, which includes those pending from the previous year, 29,590 were withdrawn or compromised, 21,811 were decided *ex parte*, and 13,603 only contested. The number of cases pending at the close of the year was 6,106. The Lieutenant-Governor regrets that the Commissioner should have to complain of the meagreness of the information supplied to him under this head by the Collectors of Hooghly, Midnapore, and Beerbhoom, and the Deputy Collector of Howrah, and trusts that more complete reports may be furnished in future

14. *Land and Land Revenue*—The collections of land revenue, which amounted to Rs. 78,09,905, out of a current demand of Rs. 81,62,527, and to Rs. 5,73,523 out of an arrear demand of Rs. 7,09,725, though still falling short of a satisfactory standard, shew a marked improvement over those of the previous year. The balance, as on previous occasions, is mainly due from temporarily-settled

and Government estates in the district of Midnapore. The collections on the large Government estates of Jellamutha and Majnamutha, which last year amounted to only 29·5 per cent. of the demand, have, under the arrangements initiated by Mr. Finucane and carried out by Mr. Slack, risen to 61·1 per cent. of the demand.. Considerable remissions have been made, and it is believed by the Commissioner that the balance at the close of the current year will be very small. The balance from the Government estates of the Midnapore district is said to be in course of realization. The work done by the Midnapore surveying party under Baboo Bisweswar Bannerji consisted chiefly of copying maps, &c., and testing measurements. Certain errors have been found in the measurements of two pergunnahs, of which the rectification will, it is feared, take time. The progress made by the Bankoora survey party have not been very satisfactory, a state of things due, in the Commissioner's opinion, to the unmethodical habits of the Deputy Collector in charge. Mr. Beames has, however, taken steps to remedy the irregularities which have come to light. The only district in which a considerable amount of land registration work remains to be done is Midnapore, in which 750 cases are still pending out of those for which applications have been received, and some 1,200 estates are believed to exist, for which no applications have been made.

15. *Excise.*—A further increase of Rs. 71,434, or 7·8 per cent., took place in the excise revenue of the division, which amounted to Rs. 9,79,912. As compared with the average collections of the previous five years, the excise revenue of the year under review shewed an increase of Rs. 1,93,120, or 24·5 per cent. The increase is common to all exciseable articles except rum and charas, and is most remarkable in the case of country spirits, opium, ganja, pachwai, and tari, owing to a more favourable settlement of the spirit shops, the establishment of a more effectual check on opium-smuggling, the increase in the duty on ganja, and a growing taste for pachwai and tari, which—these being the most wholesome liquors consumed—is not to be regretted. The Commissioner does not believe that any real increase in drunkenness has taken place; for though the facilities for obtaining licit liquor are greater than formerly, the class of liquor sold is more wholesome and not very strong. The arrest and conviction of two of the principal opium-smugglers of Chandernagore has put a great stop to smuggling, the effect of which is already perceptible in a considerable rise in the opium revenue of Hooghly, especially in those parts lying near Chandernagore.

16. *Stamps.*—The stamp revenue of the division, which amounted in 1881-82 to Rs. 12,64,407, rose in the year under review to Rs. 13,78,103, the increase being marked in the sales both of judicial and non-judicial stamps. The Commissioner reports that increased attention is now paid both by judicial and revenue officers to the duty of enforcing compliance with the Stamp law and Rules, and that, as a consequence, the number of cases in which duty and penalties were levied during the year shews an increase. In Midnapore some irregularity has taken place in the levy of stamp duty, but the Commissioner has issued orders which will prevent its recurrence.

17. *License Tax.*—A decline from Rs. 1,18,635 to Rs. 1,14,159 took place in the collections on account of license-tax and penalties, owing, it is believed, to the general depression of trade and the failure of several rich merchants of the Hooghly district, coupled with the more accurate knowledge now possessed by license-tax officials of the incomes of assessees.

18. *Monetary arrangements.*—The table given on the margin shews the transactions of the district Savings Banks in the division for the last three years. The large falling off in the year previous to that under review was due mainly to the change in the rules, which was made with the object of confining the use of the Banks to the poorer class, for whom they were originally intended. The Commissioner and District Officers are not, however, sanguine that the desired result has been obtained. Mr. Beames writes as follows:—

	Deposits.	With-drawals.
	Rs.	Rs.
1880-81	2,62,669	1,86,812
1881-82	1,88,622	1,57,402
1882-83	1,98,454	1,75,043

There has been a considerable falling off in deposits during the year as compared with 1880-81, though as compared with 1881-82 there is an increase. This is most probably due to the fact that the establishment of Savings Banks in Post Offices near their homes has

induced many people to close their transactions with the distant district treasuries. But the extent to which the transactions were carried on during the year is not such as to lead to any anticipation of the eventual success of the system. The principal object of opening these Banks was to provide a safe place of deposit for the savings of the agricultural classes. This they have failed to do, apparently for the reason that the interest obtainable for loans on small sums in the bazár is much higher than that offered by the Savings Banks. The Collector of Midnapore reports that the principal constituents of the Bank in his district are the subordinate officials, by many of whom small sums of money are deposited by way of security for the due performance of their duties. The experience of Mr. Westmacott leads him virtually to the same conclusion. He writes—"An analysis of the accounts would probably shew that most of them are on account of official deposits of security or trust funds, and not really accounts of people who wish to save."

The Post Office Savings Banks have now, I believe, obtained a sound footing, and I think it is time to consider whether the district Savings Banks should not be closed entirely.

No statistics are given of the sales of stock notes elsewhere than in the Howrah district, where Rs. 37,587 worth have been sold. The Deputy Collector and the Commissioner believe that they are unlikely to become popular, and state that at present they are not held to any extent by the agricultural classes. The popularity of the money-order system continues to increase since its management has been transferred to the Post Office. The transactions in currency notes at the Government treasuries shew a large increase.

19. *Railways and other Public Works.*—The management of the East Indian Railway continued satisfactory, and the accidents which occurred were due either to suicide or carelessness. Two cases are mentioned of obstructions being placed on the line, in both of which the offenders were punished. The railway from Seoraphuli to Tarakeswar has been commenced, and that from Burdwan to Cutwa has received the sanction of Government. The Eden Canal is reported to be highly appreciated as a means of supplying good drinking water, and to have effected a notable diminution in fever and cholera. The Midnapore canal remained in good order, and steps are being taken for the drainage of the tract of country between the Hooghly and Rupnarain rivers. The Government steamer service running between Calcutta and Midnapore was taken over during the year by Messrs. Hoare, Miller and Company, and the same firm are now contemplating opening regular steam communication with Ghattal.

20. *Communications*—The total amount expended on district roads during the year was Rs. 2,87,463, of which almost the whole was devoted to the maintenance and repairs of existing roads. The chief new works undertaken were the establishment of a road from Satgachia to Manteswar in the east central part of the Burdwan district, and the extension of the Bankoora roads to the portions of that district recently transferred from Manbhoom. The Commissioner hopes to see these roads connected shortly with those of Northern Midnapore. The amount spent on planting and maintaining trees along roadsides were satisfactory in all districts except Beerbhoom. The sum of Rs. 46,380, which was expended on village roads throughout the district, was, the Commissioner considers, adequate, though he doubts whether it has been profitably employed in all cases.

21. *Education.*—The number both of schools and pupils shewed a further advance of 768 and 14,291 respectively, there being now 11,166 of the former and 244,775 of the latter in the division. The average number of children at school in each thousand of the population is now 33, against 31·1 in the previous year. The average number of pupils attending each school is now 21 against 22·16 in 1881-82, and 23·69 in 1880-81. Two madrasas were established during the year in Burdwan. In Bankoora the prevalence of malarious fever caused a falling off in the number both of schools and pupils, but certain improvements were introduced in the system of primary education, which will be more properly considered in connection with the general report of the Director of Public Instruction. Attempts have been made in this district to encourage shop-keepers, by the offer of rewards, to teach the elements of knowledge to the children in their villages, and to introduce into pathsalas the elements of music and calisthenics. The latter of these objects is considered by the Commissioner, apparently with reason, to be fanciful and unpractical, and the

Lieutenant-Governor is disposed to think he might include the former under the same description. In Beerbhoom fever has also caused some falling off in the primary schools, but the higher schools are said to be in a satisfactory state. The fifteen Sonthal schools in the district are reported to be doing well In Hooghly and Midnapore the number of schools has increased, and in the former district the chief guru system is doing good. The Magistrate of Midnapore considers that the present system of payment by results requires change in some of its details, and in this view the Commissioner agrees. His remarks and those of Mr. Wilson will be forwarded to the Director of Public Instruction for consideration. The total number of girls' schools in the division is 95 with 2,704 pupils, besides which a large number of girls are studying in boys' schools. The most advanced district in the division, and probably in all Bengal in respect of female education, is Hooghly, where much instruction is imparted privately.

22. *Committees.*—The Commissioner again notices favourably the efficiency of the municipal and other committees of the division, especially those of the Hooghly and Burdwan districts, which have been stimulated to some extent by the discussions which have taken place about local self-government. Howrah, where the contrary would have been expected, is the only district which is unfavourably mentioned in this respect, the average attendance out of a body of 27 Commissioners being only eleven. Mr. Beames believes that the consultative element is somewhat overshadowed by the executive—a defect which should be remedied as opportunity arises.

23. *Wards' Estates.*—Four small estates in the Midnapore district were brought under the management of the Court of Wards during the year, raising the total number of estates under the management to 17. The collections were unsatisfactory, amounting to only Rs. 7,90,079 or 42·6 per cent., out of a total demand of Rs. 18,54,474. The Maisadul estate in Midnapore, which is the most important in the division, having a net annual income of about two lakhs of rupees, is free from encumbrances and will be released early next year. The eldest ward is consulted in all important matters, and resides on the estate with one of his brothers to learn zemindari affairs. The same system is followed to some extent with the Sultangatcha wards. The remaining wards, with the exception of one, who is a lunatic, are at school. The estates are said to be all well managed.

24. *Conduct of Zemindars.*—With the exception of two disputes between zemindars and their ryots in the Midnapore district, and some trifling disagreements in the Burdwan district, the relations between landlords and tenants in the division appear to be satisfactory. The disputes between Messrs. Watson and their ryots in pergunnah Bogri are at an end. The zemindars most favourably mentioned are Baboos Radha Ballab Roy, Rai Bahadur, and Raghunath Panja of Bankoora, the Maharaja of Burdwan, Baboos Lalit Mohan Ray and Chakan Lal Ray of Chakdighi, and the Maharani of Searsole in the Burdwan district.

25. *Character of Officers.*—The Commissioner's remarks on the subject will be considered in the Appointment Department. The Commissioner singles out for special praise Messrs. Wilson and Carstairs, and Baboos Biswes war Bannerjee, Bankim Chunder Chatterjee, and Bimola Charan Bhattacharjee.

By order of the Lieutenant-Governor of Bengal,

A. P. MacDONNELL,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE CHARITABLE DISPENSARIES IN BENGAL FOR THE YEAR 1882.

MUNICIPAL DEPARTMENT—MEDICAL.

Darjeeling, the 3rd September 1883.

RESOLUTION.

READ—

The Report on the Charitable Dispensaries in Bengal for the year 1882.

Read again—

The Report for 1881, and the Resolution recorded upon it.

In submitting the report, the Surgeon-General observes that the reforms in the management and constitution of dispensaries in Bengal, which were begun some years back, and which made considerable progress in 1881, were not continued in 1882 in consequence of the important changes foreshadowed by the scheme of Local Self-Government and the Resolution of the Government of Bengal dated the 20th February 1882. Dr. Simpson anticipates that, if the principles which underlie the policy of that scheme are applied in their fulness to the management of the dispensaries of this province, the work of improvement and reformation will receive a serious check; and that the control exercised by Government will be largely withdrawn, and will pass into the hands of inexperienced and irresponsible local bodies. For this reason no attempt was made during the year under review to continue the work of administrative reform. "It was manifestly useless to continue the laborious application of particular measures, however necessary they may have been, when the entire system of dispensary government was about to be changed in a manner that should probably subvert altogether the policy which had been inaugurated." The Lieutenant-Governor does not share the apprehensions that have been expressed by the Surgeon-General as to the future of medical charity in Bengal. There are still many acknowledged defects in the management of these institutions, but it is altogether premature to anticipate that these defects will not be remedied, much more to assert that they are sure to become much graver, because a system of purely State administration is to be abandoned. Dr. Simpson has not fully appreciated the intentions of Government in the matter. It is the desire of the Government of Bengal to allow to the representatives of the people a voice in the settlement of all questions which affect merely local wants and local interests, and which do not involve considerations of general policy. With this object it is proposed to invest Local Government bodies with a certain degree of discretion in administering such funds as may be locally available for expenditure upon medical charity. It is no part of the intention of Government to surrender any powers of supervision and control which the interests of the local public or of the State make it desirable to retain. Ample precautions will be taken to ensure that in administering medical funds, local bodies shall conform to the general policy of the Government; and though the precise measures by which this is to be carried into effect cannot be formulated till the results of legislation are known, it is the Lieutenant-Governor's intention that they shall be such as to provide a substantial guarantee against inefficiency or abuse in the future.

2. The number of dispensaries of all kinds open at the beginning of the year was 231; eight were abolished during the year, leaving 223 in existence at its close. These were classified as follows:—

	1882.	1881.
Class I	107	81
„ II	111	145
„ III	5	5
Total ...	223	231

During the year under review, therefore, 26 dispensaries were transferred from Class II to Class I, and were rendered independent of Government aid.

Of the 111 dispensaries, however, still shown under Class II as being partly supported by the State, no less than 70 have, in virtue of the Resolution of the 20th February 1882, been transferred to the charge of the municipalities within which they are situated, and are now supported by funds made available by the assumption by Government of the charges for police. Since the close of the year under review, a new system of classification has been prescribed by the Government of India, which distinguishes clearly between dispensaries which receive aid from General Revenues and those which are supported by municipalities and other Local Government bodies from public money.

3. The following table shows the amount of work done by the dispensaries in Bengal during the last two years:—

		In-door.										Out-door.									
		Under 25.	25 to 50.	50 to 75	75 to 100.	100 to 250.	250 to 500.	500 to 750.	750 to 1,000.	Upwards of 1,000.	Total.	Under 250.	250 to 500.	500 to 750.	750 to 1,000.	1,000 to 2,500.	2,500 to 5,000.	5,000 to 7,500.	7,500 to 10,000	Upwards of 10,000.	Total.
1882	...	21	13	8	9	53	20	7	...	2	133	1	1	4	11	78	72	32	10	16	225
Percentage	...	15 79	9 77	6·01	6 77	39 85	15 04	5 26	...	1 5		·44	·44	1·78	4 89	34 67	32	11 22	4 44	7 11	
1881	...	25	19	10	15	46	23	6	1	1	149	1	3	3	10	86	70	27	10	17	336
Percentage	...	16·79	12 75	6·71	10·07	30 87	15 44	4 03	·67	·67		·42	1 27	1 27	4 21	36 44	33 48	11 44	4 21	7 2	

The Surgeon-General makes the following observations:—"Having regard to the numbers of police cases and pilgrims which these figures include, it cannot be said that the public derives much benefit from the house practice of dispensaries. Few examples, such as the Dacca, Durbhunga, Patna, and Cuttack hospitals, represent nearly all the good that is done to the sick-poor in this respect." The popularity of the European methods of treatment is of slow growth, and develops less rapidly than could be wished. It is at present confined almost exclusively to the educated and semi-educated classes, and has made but little progress among the masses of the people. There was little change in the classes and grades of medical officers in charge of dispensaries during the year. There are now 57 Assistant Surgeons and 157 Civil Hospital Assistants of all ranks so employed, against 60 and 160 in the previous year. The reduction corresponds very nearly with the total reduction in the number of dispensaries during the year. The Surgeon-General notices that attempts were made in several instances by municipalities to retain the service of medical officers of a higher grade than the work required, and he observes that, "if the power of appointment be left to governing bodies, there is little doubt that hereafter the number of Assistant Surgeons in charge of dispensaries will be largely increased, whatever the requirements of the institutions may be." For the present, the Lieutenant-Governor has ordered, in the Municipal Department Circular No. 14T—M, dated 27th October 1882, that all appointments to the charge of municipal dispensaries will be made by the Surgeon-General. The general question of the right of making appointments to dispensaries maintained by local bodies is still under the consideration of Government in connection with the general scheme of Local Self-Government.

4. Some improvement is apparent in the record of inspections performed by Civil Surgeons during the past year. The number of dispensaries which were not visited during the year was only 11; 51 were visited every day or "frequently," and 23 three times, 11 four times, and 7 more than four times during the year. The inspection reports were, on the whole, carefully prepared, and showed close criticism on all points ascertainable in this manner. At the same time the local reports too frequently confirm what has come under the Lieutenant-Governor's personal observation in many places, that the duties of inspection are seldom performed by Sub-Committees or members of the municipalities where dispensaries are under municipal control. The Magistrate and Collector, the Sub-Divisional Officer, and the Civil Surgeon are punctual in the discharge of their duty. Native members of the municipality

ignore it. There can be no doubt, as one Civil Surgeon has pointed out, that the dispensaries in which the supporters take an interest are best appreciated and frequented by the people; and in now bringing the matter forward, the Lieutenant-Governor would wish the Chairmen of all Municipalities to establish a system of weekly or monthly visitings in rotation by those who have accepted the responsibility of supervising these local hospitals.

5. The total number of patients, both in-door and out-door, treated at the charitable dispensaries throughout Bengal during 1882 was—

	1881.		1882	
	Number.	Patients.	Number.	Patients.
Calcutta hospitals and dispensaries ...	6	275,714	6	253,083
Provincial ditto ditto ...	236	970,978	225	957,623
Total ...	242	1,246,692	231	1,210,706

Of these, 23,468 were in-door and 934,155 were out-door patients, the corresponding numbers in 1881 being 23,444 and 947,534. The Surgeon-General considers that the inspecting officers have given much attention to records of attendance, and that some improvement in the trustworthiness of the returns has taken place. This, added to the reduction in the number of dispensaries open during the year, is sufficient to account for the apparent falling off in the numbers of patients treated. The Lieutenant-Governor is not disposed to think that there has been any real diminution in the benefits afforded to the public by the dispensaries of the province. According to recorded figures, the proportion borne by the number of patients treated to total population in each civil division was—

	1881. Percentage.	1882. Percentage.
Burdwan	2·21	2·26
Presidency	1·94	1·89
Rajshahye	1 98	2 05
Orissa	1·33	1 41
Dacca	1·18	1·005
Chittagong	·5	·5
Patna	1·94	1·92
Bhagulpore	·9	·84
Chota Nagpore	·48	·49

The percentage for the entire province was 1·38 against 1·78 in the previous year. These figures show the insignificant proportion of the population resorting to dispensaries.

6. Of the total number of patients treated during the year, 60·39 per cent. were adult males, 16·84 per cent. were adult females, and 22·76 children of both sexes. Out of every 100 patients ·08 were Europeans, ·29 Eurasians, 31·44 Mahomedans, 66·32 Hindus, and 1·86 Others. These figures do not differ materially from those of previous years. The relative proportions of Hindu and Mahomedan patients accord closely with those of the total populations of those religions as ascertained at the Census of 1881. The mortality among in-patients, as usual, varied enormously in different dispensaries, being 93·15 per cent. at Goalundo and 45·45 per cent. at Ranaghat, against 1·96 at Madaripore and 2·72 at Palamow. The general death-rate was almost the same as in the two preceding years. As was stated in the Resolution recorded last year, no inferences of any value are to be deduced from these figures as to the management or healthiness of any particular institution.

7. The use of cinchona febrifuge continues to make rapid progress, the quantity sold during 1882-83 being 423lbs. against 323lbs. in 1881-82 and 163lbs. in the year before. The Surgeon-General points out that the increase was less marked than in the previous year, in consequence of the diminution in the prevalence of epidemic fever in 1882.

8. The total income and expenditure of the dispensaries of the province during the year are shown in the following table:—

	Rs.	A.	P.
Income.			
Cash balance on 1st January 1882	64,412	6	8
From Government—			
As salaries	33,351	0	6
„ registers and forms	1,219	9	3
„ European medicines	582	5	1
For diet of police cases	1,392	15	3
Sale of medicines	.....		
Special allowance from Government	4,723	4	6
Total ...	41,269	2	7
From local or other funds	49,211	12	5
„ municipal funds	89,189	4	5
Interest on investments	29,035	8	2
Sale of securities or withdrawal of deposits ...	24,127	5	0
European subscriptions	18,856	7	4
Native subscriptions	1,18,544	12	0
Total Income ...	4,34,646	10	7
Expenditure.			
On establishment	2,17,396	8	4
„ bazar medicines	9,437	1	6
„ Europe medicines, whether from Government store or purchased otherwise	31,128	10	7
„ diet	30,957	0	4
„ miscellaneous charges	26 299	12	7
„ buildings and repairs	27,540	5	0
Invested during the year	19,758	0	4
Total Expenditure ...	3,65,517	6	8
Cash balance on 31st December 1882 ...	69,129	3	11

A comparison of these figures with those of the previous year illustrates the effect of the orders of Government transferring the charges on account of dispensaries and hospitals to the municipalities within which they are situated. In 1882 the total sum paid by Government in various forms towards the support of dispensaries, including the salaries of medical officers, was Rs. 41,269. In the previous year the sum contributed by Government had been Rs. 1,06,384, so that the new policy has resulted in a reduction of the charge hitherto borne by Government of Rs. 65,115. It is stated also that the charge for special allowances from Government, which amounted to Rs. 4,723, will almost entirely disappear from the accounts of 1883. The total amount of the annual charges which will thus have been thrown upon municipalities will therefore come to a little more than Rs. 70,000. The same Resolution which transferred to municipalities the expenditure incurred on dispensaries, also relieved those bodies of charges on account of police, which aggregate upwards of Rs. 4,40,000 per annum. The effect of the double transfer has, therefore, been to place at the disposal of municipalities a net sum of Rs. 3,70,000 per annum for expenditure on other public objects.

9. The invested capital of the dispensaries of Bengal on the 1st January 1882 amounted to Rs. 8,41,775 A sum of Rs. 19.758 was invested during the year, while securities were sold to the amount of Rs. 38,000, and deposits withdrawn to the extent of Rs. 22,127 The closing balance of the invested capital, therefore, amounted to Rs 8,01,405. The cash balance, on the other hand, increased from Rs 64,412 to Rs. 69,129. The payments by Government on account of salaries of medical subordinates fell from Rs. 87,477 in 1881 to Rs. 33,351 in 1882, and the special allowances from Rs. 15,038 to Rs. 4,723.

These reductions were due to the interchange of medical and police charges already referred to. The receipts from local sources, other than municipalities, were Rs. 49,211 against Rs. 45,695 in the previous year; while the receipts from municipalities rose from Rs. 36,152 to Rs. 89,189. The interest on investments amounted to Rs. 29,035, being a reduction of Rs. 4,395 from the receipts of the previous year. This was due to the large amount of securities sold or withdrawn during the year. Among other sums, the endowment of the dispensary at Natuda, which amounted to Rs. 36,000, was refunded to the proprietor on the closure of the institution. The subscriptions from Europeans and Natives amounted to Rs. 18,856 and Rs. 1,18,544 respectively, against Rs. 20,022 and Rs. 1,27,786 in 1881. In some dispensaries it is reported that subscriptions have fallen largely into arrears, and that subscribers have made the transfer of the institutions to municipalities a pretext for refusing to pay. The Lieutenant-Governor hopes that it will not be long before a truer view prevails of the claims of dispensaries under local management, and that the transfer which has been made will ultimately prove, not a drawback, but a stimulus to local liberality.

10. The gross expenditure on dispensaries reported by the Surgeon-General during 1882 was Rs. 3,45,759 against Rs. 3,74,283 in the previous year. The reduction was shared by all items of expenditure, except cost of diet, which shows a small increase. The cost of establishment was reduced by Rs. 23,147, which was chiefly due to the closure of dispensaries, the dismissal of superfluous servants, and the adjustment of salaries of medical officers. Bazar medicines cost Rs. 9,437 against Rs. 9,956, and Europe medicines Rs. 34,128 against Rs 36,114. Of the 223 dispensaries remaining open at the close of the year, no less than 104 elected to obtain their medicines independently of the Medical Store Department. The cost of diet was Rs. 30,957 against Rs. 29,104, the average cost of each diet varying from 3 annas 6 pies to 6 pies.

11. The report, which is supplemented by a number of abstracts from the Civil Surgeons' reports, showing the details of working of each dispensary, is submitted by Dr. Simpson, who took over charge of the Surgeon-General's office after the close of the year under review. The Department was in charge of Dr. Payne throughout the year.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

EXAMINATION OF CANDIDATES FOR APPOINTMENT IN THE SUBORDINATE EXECUTIVE SERVICE.

APPOINTMENT DEPARTMENT.

Darjeeling, the 6th September 1883.

RESOLUTION.

READ—

The Resolution of this Government, dated the 23rd February 1883, prescribing the conditions upon which appointments will in future be made to the Subordinate Executive Service in these Provinces.

In paragraph 6 of the Resolution cited above, on the system of the recruitment of the Subordinate Executive Service, it was laid down that, at the examination to be held in January 1884, only those now on the list of candidates for appointments in that Service, and Sub-Deputy Collectors of the first and second grades, would be allowed to appear. It has since been brought to the notice of the Lieutenant-Governor that under this ruling certain Sub-Deputy Collectors (not in either of the two first grades) who had passed the examination for the Native Subordinate Civil Service when Sir George Campbell was Lieutenant-Governor, and who entered the service in the expectation of promotion, would lose all chance of becoming Deputy Collectors. Other persons may, since these examinations ceased to be held, have accepted appointments as Sub-Deputy Collectors under a similar impression. Mr. Rivers Thompson has decided therefore in admitting to the examination in January 1884—

(1) All Sub-Deputy Collectors of whatever grade, who have passed the Native Civil Service Examination.

(2) All Sub-Deputy Collectors of whatever grade, who have passed the Entrance Examination of the Calcutta University.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Commissioners of Divisions for information, and for communication to all District Officers in their Divisions.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE ROYAL BOTANICAL GARDENS, CALCUTTA, FOR THE YEAR 1882-83.

FINANCIAL DEPARTMENT, AGRICULTURE.

Darjeeling, the 11th September 1883.

RESOLUTION.

READ—

The annual Report on the Royal Botanic Gardens, Calcutta, for the year 1882-83.

Dr. King has prefixed to his report a sketch of the scheme of improvements in the garden grounds, which was submitted by him for the approval of Government in 1874, and which was finally completed in the past year. He writes:—

"The whole extent of the grounds has been raised in level, the necessary soil having been obtained from large sheets of ornamental water which have been cut out. These artificial lakes have been connected with each other by underground pipes, and a steam pump has been supplied, by which the water in the whole system can be kept at a high level by means of water pumped up from the river. Numerous wide roads have been made—all through the garden—so that carriages may now be driven through every part of it. This is an improvement which is much appreciated, as the old restriction to driving acted to a great extent as a deterrent to visitors. Numerous foot-paths have also been made. The bamboo and mat erections, which used to do duty as conservatories, have been replaced by three large, handsome, and efficient structures of iron, on which a thin thatch of grass is spread, and under shelter of which tropical plants thrive admirably. The valuable collection of dried plants has been suitably housed in a handsome building designed by Mr. E J Martin, the Government Architect, the internal arrangements of which are to a considerable extent adapted from those of the new Herbarium building at Kew. New propagating houses, tool, and potting-sheds have been erected, and good dwelling-houses have been built for the members of the garden establishment, both European and native. A boundary wall and ditch have been partly built round the garden; and, finally, attempts at landscape effects have been made in the gardens, and the collections have been increased by considerable accessions of plants, both indigenous and exotic."

The change in the whole aspect of the gardens since the scheme was undertaken is scarcely to be understood except by those who have seen them under both conditions. The public of Calcutta, no less than the Government, are indebted to Dr. King for the exertions to which these great improvements are due.

2. Considerable attention was given to the cultivation of various economic plants. The Ceara rubber tree, which thrives well, and has a quick growth, was propagated to a considerable extent, and the Zanzibar rubber plant (*Landolphia*) has, it is said, found a congenial home in Lower Bengal. There has also been a steady demand for mahogany seedlings. Dr. King has been trying to obtain from Europe in large quantity the seed of the paper mulberry (*Broussonetia papyrifera*), which grows wonderfully well, with the view of spreading its cultivation in India. He has also arranged for a supply from Japan of the food-plant known as the "Soy bean" for experimental cultivation in this country, although he entertains serious doubts as to the success of the trial. A few plants of *Cinnamon*, which yields the Cassia bark of commerce, were received from Hong-Kong, but they do not promise to thrive well.

3. The subject of the utilization of various fibrous plants engaged much of the Superintendent's attention in the past year. A French mechanic was, with the consent of the Superintendent, sent out by Monsieur A. Berthet of Rouen, to erect in the garden his patent machine for cleaning Rhea and other fibres. It was driven by the garden-engine and tried on various fibre-yielding plants. It cleaned the Rhea and Agave fibres admirably, though it was not equally successful with plantain and other fibres. The machine is, in Dr. King's words, "beautifully simple," and he has little doubt that if the inventor were to give his mind to the subject, he would have no difficulty in contriving simple and cheap machines adapted to any native fibre suitable as a raw material for paper, cloth, or rope. Should such a machine be successfully constructed, it cannot fail to prove of the utmost value in a country which, like Bengal, abounds with fibrous plants. The Lieutenant-Governor will be glad to receive any further information on the subject which Dr. King may be able to procure. In his present report, Dr. King points out that the *bhabur* used by natives for

rope-making is not the produce of *Eriophorum comosum*, as he had formerly supposed, but is derived from *Andropogon involutus*—a grass said to abound in the hill parts of Behar and Chota Nagpore, where it is known as *sabai*.

4. One of the garden tanks has been stocked with Chinese fish, obtained through the kindness of the Hon'ble H. S. Thomas, of the Madras Civil Service. Dr. King's proposal to make use of the various ornamental lakes in the garden as breeding ground for the fry, which might afterwards be distributed to all parts of the country, commends itself to the approval of the Lieutenant-Governor.

5. The new building for the Herbarium, which was completed during the year under report, is well adapted in every way for its purpose. There have been considerable additions to the collection of dried plants, the chief contributors being Herr Kunstler, Dr. George Watt, Mr. J. S. Gamble, Mr. W. A. Talbot, Mr. Marshall Woodrow, Dr. Schlich, Dr. Treub, and Dr. Anderson. A considerable number of specimens of dried plants was also obtained through native collectors, whom Dr. King had despatched to the higher Sikkim-Himalaya. The interchange of seeds and plants went on actively during the year, the issues being 29,483 of living plants and 5,224 of seeds, against 23,939 and 3,303, respectively in the previous year. The plants and seeds were chiefly issued to Magistrates for planting in stations and along district roads; to Superintendents of Jails, Hospitals, and educational institutions, and to municipalities. The receipts numbered 9,796 living plants and 883 packets of seed, against 9,766 and 883 in 1881-82, the principal contributors being Sir J. D. Hooker, the Directors of the Botanic Gardens in Ceylon, Demerara, Jamaica, Hong-Kong, Natal, and Singapore, Mr. Kunstler, and Mr. Man. The whole of the budget allotment of Rs. 70,350 was spent, while the receipts from the sale of surplus plants amounted to Rs. 1,494-10-6.

6. *The Lloyd Botanical Garden, Darjeeling*, continued to suffer severely from the depredations of cockchaffer grubs. "This grub," Dr. King writes, "feeds on the fine rootlets by which plants absorb their nourishment from the soil, and only such plants escape as send their rootlets deeper into the soil than it cares to penetrate. The whole of the grass in the garden and all herbaceous plants rapidly succumbed to its ravages, as did many of the flowering shrubs, only the deeper rooting shrubs and trees being spared. Even the plants in the conservatories did not altogether escape; eggs of the insect having got in considerable numbers into the soil of the pots. This grub is not new to the district. It is often found in soil near the sites of old grazing stations in the forest, and it not unfrequently does damage to native crops in the neighbourhood of these. The cockchaffer, of which it is the grub, appears thus to affect manure." By vigorous efforts Mr. Jaffrey, the Curator of the garden, succeeded in collecting and destroying some six millions of the grubs, and the plague has since shown signs of disappearing. The garden also suffered owing to alterations on the top of the hill which were necessary for the preparation of the site for the Eden Sanitarium. Heaps of loose débris were shot over the side of the hill from the hospital side, but steps are being taken to prevent further slips. Dr. King gives Mr. Jaffrey well-deserved credit for the energy and determination which he has displayed under disheartening circumstances. It is believed that the quality of potatoes in the district has improved to some extent by the distribution of acclimatized English potatoes produced in the garden. The whole of the budget allotment of Rs. 8,830 was spent, while the receipts amounted to Rs. 355-4-3.

7. The thanks of the Lieutenant-Governor are again due to Dr. King and his subordinates for the excellent work done during the year.

ORDER—Ordered that a copy of the Report and of the Resolution be submitted to the Government of India, in the Revenue and Agricultural Department, for information.

Ordered also that a copy of the Resolution be forwarded to the Superintendent of the Botanical Gardens for information.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

REPORT ON THE WORKING OF THE SCHEME FOR THE RECLAMATION OF THE MUGHYA DOMES IN THE CHUMPARUN DISTRICT.

No. 2238J—D, dated Darjeeling, the 4th September 1883.

From—F. B. Peacock Esq., Secretary to the Government of Bengal, Judicial, Political and Appointment Departments,

To—The Commissioner of the Patna Division.

I am directed to acknowledge the receipt of your letter No. 511G, dated the 9th July last, submitting with your remarks a copy of a report from Mr. Henry, Magistrate of Chumparun, on the working of the scheme sanctioned by Government in August 1882 for the reclamation of the Mughya Domes.

2. In reply, I am to say that the subject is one in which the Lieutenant-Governor takes the greatest interest. It appears that two settlements of these Domes have been formed—one at Burgaon, and the other at Futtehpore—in the Chumparun district. At the former place there are about 250 Domes, and at the latter 90. The Domes have been divided into several work-gangs, each under an overseer of their own clan, who takes the men out to work in the fields, and is responsible for their conduct. Land to the extent of 50 acres has been secured for the settlements and allotted to the various gangs, the headman of each being responsible that the necessary cultivation work is attended to. The crop is considered the property of the gang collectively, and, when reaped, is divided amongst the members. Fifty-five houses on a standard plan have been built for the Domes. Bullocks, farm-stock, ploughs and agricultural implements have been purchased, and a reserve of food-grain kept. The Domes so far have shown that they thoroughly appreciate the efforts made on their behalf; the inhabitants of the adjacent villages are pleased with the settlement of the colony, and interested in the success of the measure; crime has decreased, and property is quite secure. Some of the Domes, picked men, have been appointed chowkidars; others are employed under the Road Cess Department, and others again have obtained employment under neighbouring zemindars. The accounts received of the orderly and industrious habits of all these Domes are satisfactory. Altogether the scheme has so far proved a complete success, and the result is due, in the first place, to the efforts of Mr. Henry himself, and in the next, to the co-operation and assistance of Mr. Cameron, the Sub-Divisional Officer of Bettiah, Mr. Showers, the District Superintendent of Police, Baboo Nokhey Lall Misser, the Inspector of Bettiah, and the three head-constables named. Its success also has in no slight degree been promoted by the aid given by the zemindars and other gentlemen noticed in Mr. Henry's report.

3. The Lieutenant-Governor considers that all these officers and gentlemen deserve great credit for so satisfactory a commencement of a scheme which, if it fulfil its promise, will be a most beneficial work. There are now at the settlements nearly 350 members of a tribe which has hitherto been a cause of difficulty and anxiety to the officers of Government, and of much injury and annoyance to the people in whose vicinity they took up their temporary abode. These persons have not only been reclaimed from predatory habits, but have had provided for them the means of gaining an honest living; and the success of the experiment encourages the hope that the whole tribe of Mughya Domes, scattered throughout the country, may eventually be withdrawn from a life of crime and brought under civilizing influences. The Lieutenant-Governor is, however, of opinion that the Chumparun settlements should not exceed 500 in number. If more Domes have to be provided for, it will be for you to report what steps you would propose to take for a second similar experiment at Chupra or elsewhere in the Patna Division. It is better, however, that the site for a new settlement should be selected on waste lands, and not in very populous tracts.

4. The Lieutenant-Governor need not impress upon you, and the officers interested in the working of the scheme, that the measure should be self-supporting. The end will be worse than the beginning if these Domes begin to think that they can live at Government expense, and refrain from robbery only so long as this privilege is continued to them. When the full number at the settlement is reached, and the means are supplied for gaining an honest livelihood, the grants-in-aid should be yearly reduced, till they can be withdrawn altogether. Meanwhile, however, as the funds are exhausted, the

Lieutenant-Governor sanctions the application of the District Magistrate for a capitation grant of Rs. 3 per head, or a sum of Rs. 1,050 in all, for the current year. The money will be well spent if the arrangements now in hand are fully established.

5. The services of the district officers have already been referred to. Mr. Rivers Thompson requests that you will be so good as to convey to Mr. Henry his special thanks for the great tact and energy he has displayed in introducing and developing this important work; and to Messrs. Cameron and Showers for the assistance rendered by them throughout to the Magistrate of the district. The services of Baboo Nokhey Lall Misser, the Inspector of Police, and of the three head-constables, Ramdhani Singh, Lalji Sahay and Ambica Pershad, will be brought to the notice of the Inspector-General of Police. The acknowledgments of Government are due to the landed proprietors and gentlemen named by Mr. Henry for their liberal grants of land and general co-operation in furtherance of the project.

6. I am to request that a further report of progress may be submitted for the information of Government at the end of the current year.

7. This correspondence will be published in the *Calcutta Gazette*.

No. 2242J—D.

COPY of the correspondence forwarded to the Inspector-General of Police for information, in continuation of the letter from this office, No. 2356RT—J, dated the 26th August 1882.

No. 2243J—D.

COPY of the correspondence forwarded for the information of the Government of the North-Western Provinces and Oudh.

No. 11583, dated Fort William, the 7th August 1882.

From—D. R. LYALL, ESQ., Officiating Inspector-General of Police, L.P.,
To—The Secretary to the Government of Bengal, Judicial Department.

I HAVE the honour to submit herewith a copy of a letter No. 589, dated the 11th ultimo, from the District Superintendent of Police, Chumparun, on the subject of checking the thieving propensities of the Domes, and beg to state that the experiment is well worth a trial, and that it appears to me that the officers concerned will merit the approbation of Government if they succeed.

2. I strongly support Mr. Shower's application for a grant of Rs. 500, and solicit that sanction may be speedily given. Meanwhile, I have in anticipation of sanction authorised him to incur any expenditure which he finds absolutely necessary.

3. It is clearly necessary to give these Domes some help at first, and it is cheaper to do so than to send them to jail.

Copy of a letter from the District Superintendent of Police, Chumparun, to the Personal Assistant to the Inspector-General of Police, Lower Provinces, No. 589, dated 11th July 1882.

THE method of dealing with the Mughya Domes has long been a subject of anxious consideration. Various means have from time to time been suggested for their efficient supervision with a view to checking their thieving propensities, and but little success has attended any of them.

The Domes remain inhabitants of the jungle; they are never seen except when engaged in some criminal act, and for some time past their presence in any habited region has been invariably followed by a hue-and-cry, a pursuit, and sometimes the capture and ill-treatment of the flying man.

No supervision over these men has been possible owing to their having no fixed residence; the jungles are their only shelter, and they possess no impediments to an immediate change of residence. Their want of fixed residence is the principal reason why an efficient surveillance cannot be maintained, and I think that, if the Domes can be induced to settle, a great deal of the difficulty that has been experienced will have been overcome. It must be apparent to every one that no check can be exercised over the movements of the Domes as long as they live hidden away in unknown places. Sometimes in Nepal, sometimes in Goruckpore, and sometimes in this and adjoining districts; and the evil character which is universally attributed to them by the villagers in all parts render it impossible for them to obtain their livelihood except by theft: under present circumstances they cannot be anything but thieves.

In April last the Inspector of Bettiah reported that he had come across a gang of Dome women in the Bagaha station jurisdiction of this district. These women, whose husbands were in jail, complained that they were hunted about from one village to another, and were unable to find any encamping ground. An opportunity thus offered itself for finding these persons a place of abode. Through the services of these women the Inspector

succeeded in procuring, after a great deal of hesitation, a meeting with one of the chief Domes in the neighbourhood, Atithwa by name, in some jungle to the north west of Bagaha police-station. The Inspector so well managed the negotiations that Atithwa's hesitation and fear were overcome, and he agreed to collect the Domes—men, women, and children—who in any way acknowledged him as chief and to live in any place that might be selected.

A site has since been selected near the Burgaon village, three or four miles distant from Bagaha station. The acquiescence of the owner of Burgaon has been secured, and the appointment of Atithwa as one of the chowkidars of Burgaon has been sanctioned. The last step has given the Domes great confidence, and even when some evily-disposed persons succeeded in frightening away some of the males congregated, by telling them that they were being collected simply to be sent across the seas, Atithwa's influence did not fail in making them return to Burgaon.

At the present time 27 males, 68 females, and 57 children are living in Burgaon. Several huts have, with the assistance of the zemindars of the place, been erected

I may say that all these steps have been taken with the most cordial sanction and assistance of the Magistrate.

I have lately twice visited Burgaon and seen the Domes: I also saw the zemindars. These latter have agreed to give some land to the Domes and to cultivate with rice some few beegahs for their subsistence. The Joint-Magistrate of Bettiah has also seen and conversed with the Domes at Burgaon, and they have been made to believe that it is entirely for their benefit that trouble is being taken, and that they will be allowed to remain unmolested as long as they live honestly, and that they will most assuredly be hunted and worried as they have been for years should they take to their former habits again.

The Domes have been living in Burgaon for over a month, and they say they have an earnest desire to live peaceably and honestly. So far things have been successful. These Domes, who for years have not been openly seen, except when caught in some act of theft, are living unmolested and in public without fear of themselves and without causing fear to others. Whether the scheme will prove ultimately successful remains to be seen. I myself have but little hope of its success unless the people can be induced to take to agriculture, so that they may have some interest in remaining quiet and become possessed of valuables that they cannot carry away.

Of agriculture they are entirely ignorant; they have not the means of procuring cattle or agricultural implements, and for the present they have no better mode of obtaining their living than mat and basket-making, which at best provide but an uncertain and scanty means of subsistence.

I would beg the Inspector-General's consideration of this scheme. If he is pleased to agree with the Magistrate, the Sub-Divisional Officer of Bettiah, and myself, that a fair and a good trial should be given to the proposed means of bringing these dreaded thieves under control, some assistance is required to provide a sufficiency of food for the Domes now residing in Burgaon, and to supply them with pigs, agricultural implements, and such like, with a view of furnishing them with an inducement to remain. I think Rs 500 would be sufficient for all present wants, most probably till the produce of the land cultivated by the zemindaries is gathered and available for good food, and to give them a start for next year's crop.

Besides Atithwa Dome, three other leading Domes have also been selected for appointment as chowkidars in villages where they can be well watched. It is necessary to the success of the experiment that they should be appointed chowkidars, for it gives them an object in remaining quietly in one place. I am fully aware that it is not well to make these men chowkidars in any number, and in places where they cannot be watched or restrained.

There are two Domes and some 10 or 12 women, the wives of persons in jail, now in Bettiah, who also wish to live in some selected spot A spot has been selected near the Jagaputty outpost, but nothing further has been done. Without some assistance I have no hope of being able to keep these people together.

No. 2356RT—J, dated Yacht *Rhotas*, the 26th August 1882.

From—F. B. PEACOCK, Esq., Offg Secretary to the Government of Bengal, Judicial, Political, and Appointment Departments,

To—The Inspector-General of Police.

I AM directed to acknowledge the receipt of your letter No. 11543 dated the 7th instant, submitting a copy of a report from the District Superintendent of Police, Chumparun, on the subject of an attempt which is being made to reclaim the Mughya Domes.

2. It appears that a number of these persons has been induced to settle down near the Burgaon village in the Bettiah sub-division; huts have been erected for them with the assistance of the zemindars of the place, who have also agreed to give some land to the Domes and to cultivate a few bighas with rice for their subsistence. The chief of the party has been appointed chowkidar, and three other leading men have been selected for similar appointments. The Domes, it seems, have expressed a desire to live honestly and peaceably, and the district officers and you are of opinion that the scheme is well worth a trial. Some assistance, however, is required to provide the Domes with food for the present, to supply them with agricultural implements, pigs, &c., and for this purpose a grant of Rs. 500 is applied for.

3 The Lieutenant-Governor has read the papers with interest, and is of opinion that the arrangements now proposed are much more likely to succeed in reclaiming these Mughya Domes than any system of deportation or imprisonment. The scheme should be allowed a

fair trial; and in order to allow of this being done, Mr Rivers Thompson sanctions the grant of Rs 500 applied for: the amount will be met from general savings in the Police Budget for the current financial year.

4 The Lieutenant-Governor also approves of the employment of the headmen of the Domes as chowkidars within reasonable limitations. Great care should be exercised in choosing the villages for which any of these men is to be appointed chowkidar. The effect of the appointment on the crime of the village should be carefully noted; and the men should only be appointed in places where they can be watched, and where the inhabitants do not object to their employment in this way If they do object, no attempt should be made to force the Domes upon them. It will, Mr Rivers Thompson considers, be all the better if the headmen of the Domes are made responsible for the good conduct of the tribe, who should be made to learn the lesson of working for their livelihood and of not depending always upon Government for assistance, as this of course cannot be continued indefinitely.

5 I am to say further that the scheme, a trial of which is now sanctioned, should be worked patiently and watchfully, and a special report upon the subject should be submitted to Government after the expiry of six months

6. In conclusion, I am to add that the Inspector of Bettiah is entitled to credit for the tact he has displayed in bringing about the present arrangement with the Domes.

No. 2357RT—J.

Copy of the correspondence forwarded to the Commissioner of Patna for information, in continuation of Government order No. 3771J, dated the 12th September 1881.

No. 511G, dated Bankipore, the 9th July 1883.

From—F. M. Halliday, Esq., Commissioner of the Patna Division,

To—The Secretary to the Government of Bengal, Judicial Department.

Adverting to your memorandum No. 2357RT—J, dated 26th August 1882, forwarding to me a copy of your No. 2356RT—J, dated 26th August 1882, to the address of the Inspector-General of Police, on the subject of the attempt made in Chumparun to reclaim the Mughya Domes, I have the honour to submit now the accompanying copy of a very interesting report by Mr. Henry, the Magistrate of Chumparun, on the further progress made in the scheme, and the success which has attended the efforts of the local officers in establishing a settlement for this tribe.

2 I beg to support Mr. Henry's application for further funds in connection with the necessary enlarging of these settlements, and I would solicit the sanction of Government to a capitation grant of Rs. 3 per head for the year 1883. This would place a sum of Rs. 1,050 at our disposal, and arrangements could then be made for enlarging the area of arable land attached to the two settlements in Chumparun, and for building more houses.

3. I think it justifiable to make such application, for, as Mr. Henry points out in his report, a sum from the public revenue may with fairness be contributed towards this scheme, for most of these new settlers would, under other conditions, necessarily have found their way into jail, there to be maintained at the public cost.

4. I would draw the attention of His Honor the Lieutenant-Governor to the names of the zemindars so favourably mentioned by Mr. Henry, as having from the first interested themselves in the promotion of the scheme, and having substantially aided in the establishment of the settlements; and I would submit that some recognition might properly be made in the Government Gazette of their liberality and public spirit in this matter.

5. The Sub Divisional Officer of Bettiah, Mr. Cameron, has been conspicuous in the assistance he has given to Mr. Henry in this project, and Mr. Showers, the District Superintendent of Police, has also been most active in his support.

Special credit is due to the Inspector of Police, Baboo Nokhey Lal Misser, and to the head-constables, Ramdhani Singh, Lalji Sahay, and Ambica Pershad.

6. The present success of the undertaking is mainly due to the patient and watchful care with which it has been worked by Mr. Henry himself, and the energy and interest with which he has to my knowledge personally supervised all the arrangements.

No. 895, dated Motihari, the 21st June 1883.

From—E. R. Henry, Esq., Officiating Magistrate of Chumparun,

To—The Commissioner of the Patna Division.

I have the honour to submit the following report on the settlement of Domes in this district called for in Bengal Government No. 2356RT—J, dated 26th August last.

2. In the end of April last year a gang of Mughya Dome women, whose husbands were in jail, represented to the Bagaha Police that they were being hunted from village to village and were unable to secure either employment or even any resting place owing to the extreme dread and dislike which all the villagers entertained against them.

3. The Bettiah Inspector of Police saw these women, and profiting by the experience gained from previous occasions when attempts were made to settle people of this tribe, very prudently made arrangements which enabled him to have a meeting with the acknowledged leader of these Mughya Domes, a man by name Atithwa. After some hesitation Atithwa, who stated that his tribesmen were worn out by the never-ending crusade which the police waged against them, agreed to bring together a number of the men and women over whom he exercised authority, and to settle them in any locality that might be allotted to him.

A site near a village named Burgaon, within four miles of the Bagaha thana, was selected, and to this place Atithwa, with the two men and some dozen women whom he had got together, were taken. Rough huts were given them, and with the co-operation of the Burgaon zemindars, work was found for them in the fields. After a short time other Domes joined them; by the end of June the number settled had increased to 132, and by the end of October to 147. The number has since greatly increased, and is now about 250 persons. Another settlement was also made at a village named Futtehpore, within a short distance of the Jagaputty police-station. At first 11 Domes were settled, but this number has since increased to about 90.

4. At the present time there are about 350 persons in the two settlements of Burgaon and Futtehpore. The following details, which I abbreviate as much as possible, will explain the system upon which the settlements are administered

5. From the first the Mughya Domes have been made to understand that the position taken up by the authorities is not that of favouring them (unduly with the object of inducing them to abstain from theft and crime generally, but that of removing to some extent the disabilities under which, with regard to the rest of the people, they have hitherto laboured in the struggle for life. Until these settlements were made, the Domes were looked upon by the police, and, indeed, by the villagers generally, as a species of *ferœ naturæ*, whom it was the duty of all well-behaved people to drive away from their neighbourhood. A police officer who allowed Domes to live within his jurisdiction was liable to severe censure; and gradually it became an understood rule for the guidance of the police that Mughya Domes were to be induced by such means as proved most efficacious to remove themselves from within the boundaries of this district. Wherever seen they were hunted down; they were liable to be arrested on the charge of having been concerned in any theft that had occurred within twenty miles; and their very existence in the district was in itself proof positive that the police had been lax in not having sent them up for trial under the bad livelihood sections of the Criminal Procedure Code—for were they not by repute professional robbers and thieves?

6. Numbers of them were imprisoned, and, finally, the tribe consisted almost solely of females, whose husbands were serving out shorter or longer sentences in the various jails of the province. When released from prison the Domes came out to find that the law under which they had lived before they went into jail had not been removed, and that they were practically proscribed felons, against whom all men's hands were raised, and that if they wished to live they would have to rob and steal, since employment was denied to them.

7. The main object, I may say the sole object, kept in view in making and maintaining these settlements has been to afford a resting place to the Mughya Domes, and to provide them with employment, and thereby enable them to live honestly on the proceeds of their own earnings. From the first they have learnt that our assistance goes no further than this, and that those among them who decline to work will have to starve in the settlement or take themselves back to the jungles and be again liable to those harassments which had hitherto made life of so little account to them. With this object always kept prominently in view for the purposes of internal administration, they have been divided into work-gangs under the leadership of particular Domes, who exercise influence over the persons composing the gang; who are responsible for their conduct; take them out to work in the fields; bring them back; and are, in fact, the units with which we deal. These gangs vary in strength according to the position and influence of their leaders. In Burgaon there are ten work-gangs, the numbers comprising which range from 57, in the gang of which Atithwa is leader, to 6 in the smallest gang. This arrangement is one which the Domes themselves approve, and as it constitutes a system of internal and self-working police, which has answered extremely well, care has been taken not to interfere unnecessarily with it.

8. Up to the present time no difficulty has been experienced in providing the Domes with field labour; though not skilful or able to show any large outturn of work, they are submissive and willing, and their labour is now in request

9. It might have been possible to maintain the settlement for a time on this basis as a colony of day-labourers, but such an attempt would in all probability have in the end resulted in failure For the last few years there has been a steady demand for labour the agricultural population having in reserve the means of paying for it; but in years of deficient harvests, when the people have barely enough for their own requirements, the landless labourer may have to travel far in search of employment.

10. Such a condition of affairs would prove ruinous to the prospects of a Dome settlement having to depend for employment, and, consequently, for their livelihood, solely upon a local labour-market liable to serious depressions. In order to meet this difficulty, arrangements are being made which will gradually alter the status of the settlement from that of being a colony of landless day-labourers into a self-contained agricultural community.

11. Both at Burgaon and Futtehpore, owing principally to the cordial co-operation of Mr. Gibbon, C. I. E., land has been secured for the settlement—at Burgaon about 35 acres, and at Futtehpore about 15 acres. This will be as large an area as can be conveniently taken up this year. In the beginning we were somewhat exercised as to the disposition to be made of this land. The first suggestion was that it should be treated as the property of the "commune," to be cultivated by all the Domes equally, and the produce divided amongst the different houses according to the numbers of their inmates; but finally it has been decided to still keep up the work-gang as the unit. The land has been allotted

to the various gangs according to their strength. The gangsman is responsible that all necessary cultivation work is carried out, and that the seed is sown at the right time; and when the crop is ripe it will be the property of the work-gang collectively, and will be divided amongst the members according to such arrangement as may be come to.

If the season proves at all favourable the produce from this land ought to prove sufficient to fully supplement the earnings from daily labour of these Dome settlers, and afford them over and above a residue from which to purchase clothes and such other luxuries and necessaries as they require. Already some of the settlers have managed to save sufficient money to enable them to add to their stock of poultry and goats, and one or two of their headmen have on their own account rented small patches of land from neighbouring zemindars. This is a most satisfactory proof that they look upon the present state of things as likely to last; while at the same time it is an indication that they are capable of exercising both discretion and forethought in disposing of their available resources.

12. Seven time-expired convicts have joined the settlement with their families. One of these men had learnt bamboo-work in jail, and while at the settlement he made some chairs, *moras*, &c.. which found a ready sale in the local markets. An arrangement has been come to by which he is compelled to spend his mornings in teaching cane-work to all the unemployed boys and girls in the settlement in return for a small monthly salary.

13. Gradually, as their sentences expire, the men whose families are now in this district may be expected to join the settlements, and the only practical difficulty likely to present itself is that of providing labour. I have had some correspondence with the Inspector-General of Jails on the subject. Dr. Lethbridge, who has done everything in his power to promote the success of this experiment, has issued instructions on all Jail Superintendents to send me lists of the Mughya Domes serving in their jails. These lists have been carefully examined here, and the names of all those who may be expected to join the settlements have been noted, and they will now be taught in jail some special handicrafts—such as durree-weaving, bamboo-work, carpentry—so that when they are released they may be able to maintain themselves even if there is no land to give them. The importance of this may be gathered from the fact that there are at present over 120 male Mughya Domes in the Buxar Central Jail alone, most of whom will be at large again within the next few years.

14. The Domes rear pigs and poultry. Some of the stock was supplied to them from the funds placed at our disposal by Government, but now they are beginning to purchase on their own account from their savings.

15. *House accommodation.*—Excellent sites have been secured both at Burgaon and Futtehpore for the settlements, the ground plans of which have been carefully laid out.

16. The houses are of a standard plan, and placed in three rows facing each other at a distance of 100 feet. The lines of houses run north and south; so that, in the event of fire, the prevailing wind, which during the dry months is westerly, cannot prove a source of danger to the other houses The houses are of well-built mud-walls, and have excellent thatched roofs, the materials of which were supplied free of cost by neighbouring zemindars. Arrangements are being made for digging two good wells, and the settlements present the appearance of being the best laid-out homesteads in the district. The Domes are much pleased with their new houses; and the fact that they have been built with an appearance of solidity is to them a satisfactory indication that, so long as they behave themselves, the protection they now receive will not be withdrawn from them.

Altogether 55 houses of the standard plan have been constructed. More are required, but cannot be built this year, as there are no funds available. Some of the old grass huts are still standing, and must serve as accommodation for those to whom the new houses have not been allotted. Next year we hope to be able to run up some more houses.

17. A ditch is being dug round the Burgaon homestead land, the spoil bank of which will be planted with bamboos, the arrangement being that a clump is to be allotted to each house. These bamboos will be required for the yearly repairs of the roofs

18. *Internal description.*—As I have before noted, the headmen are held generally responsible for the good conduct of the men of their gangs when they are at field work at a distance from the settlement. Those headmen constitute the sole check exercised during the daytime; and up to the present time there has not been one complaint from the villagers of the neighbourhood where the gangs go to work.

Atithwa, who is the head of the caste as well as the head of the tribe, draws pay as a chowkidar and assists a constable to take the roll-call of the Domes every night. All the settlers are required to be back within bounds by a certain time, and during the night the constable and chowkidar go from house to house to ascertain that all the men are present. On one occasion and one only—three men absented themselves: the action taken then has produced an excellent effect, and no more trouble has since been experienced in this respect. In the settlement both men and women are well behaved, and drunkenness is unknown. Any disputes they have are settled amongst themselves according to caste customs; and the great influence which their headmen exercise, and which is now enlisted on the side of order and good conduct, has proved of immense assistance in maintaining discipline.

19. *Attitude of the people and effect on crime.*—At first it was thought that neighbouring villagers would view with distrust the settlement near their homes of men who were admittedly skilful thieves and had been trained up to depend for their livelihood upon their success in crime. But the feeling which at first existed has now been entirely overcome, and no

persons are more interested in the success of the experiment or better satisfied with the results attained than the people of the north-western part of the district, who were formerly so much harassed by these Domes. This is more especially the case in the Tharwat, a large tract of country inhabited by the people of semi-aboriginal descent, who, though industrious and money-making, were unable to guard themselves against the depredations of these skilful thieves The agent of the zemindar, who owns nearly the whole of this tract, expressed himself so well pleased with the greater security to property that has been brought about, that he offered on behalf of his principal to contribute a sum monthly towards the expenses of the settlement ; but his proffered aid was declined on the ground that, if the settlement is to be a success, it must be so worked as to become self-supporting. At the time when bamboos, thatching-grass, and at first when some grain for the food of the settlers was required, all the zemindars of the neighbourhood cheerfully contributed what they could spare, and all the persons having a knowledge of the circumstances of the people in the neighbourhood of the settlement whom I have consulted assure me that they are prepared, in view of the good done, to assist to the full extent of their ability to keep the settlements up. At first I had a suspicion that their aid was offered more from a view of falling in with the wishes of the promoters of the scheme than from any real belief in its utility ; but I have since satisfied myself that this is not the case, and that they take an interest in its success, because, so long as it is maintained under existing conditions, the people generally live in greater security. There can be no doubt that since the settlement has been started crime has greatly decreased in that tract of country, and both the people and the administration are gainers in consequence. Formerly no one in villages within a certain radius of the Mudunpore jungles, and other places where the Domes habitually resided, could venture to leave unwatched the smallest articles of property : thallees, lotas, clothes, goats, &c., were spirited away, and at night raids were made into the houses, and ornaments and other property forcibly carried off. This state of lawlessness has entirely ceased, and property is now as secure in those tracts as in the best ordered parts of the district

20. *Effect on the Police.*—Domes had acquired such an evil reputation that every theft which the police through inability or negligence were unable to trace out was attributed to them. There was an invariable formula for all police criminal cases, which was supposed to fully exonerate the investigating officers from the charge of not having successfully dealt with them. A reference to those records shows that the use of this formula *Mughya Dome layon ka kam beshak hoga* was supposed to fully account for the fact that the case had been properly returned in criminal form.

21 Mr. Showers the present District Superintendent, had done a good deal to put a stop to this abuse ; but full success was not achieved until the Domes were settled. Police officers now know that they must give some better explanation of their inability to trace out a case, and there can be no doubt that in consequence they are compelled to be more thorough in their work and are less likely to be taken off on wrong scents.

Since the Domes have been settled the police have been able to obtain through them information regarding receivers of stolen property, and some cases have in consequence been successfully prosecuted. This had done good both directly and indirectly—directly in bringing to justice men who for years had lived with impunity upon the losses inflicted on their neighbours, and indirectly by causing such apprehension amongst those receivers still at large that even if these settlements were to break up, they would be cautious in reverting to old practices which they have now discovered to be fraught with danger of a kind hitherto little feared by them.

22. The Domes from the first have, by their conduct, evinced their thorough and cordial appreciation of the benefits conferred upon them. With a view of giving them more remunerative employment and of encouraging them, three picked men were appointed village chowkidars, and favourable accounts of their diligence and good conduct have been received from the villagers These appointments were made with some hesitation, but up to the present time the men selected have justified the confidence placed in them.

A few are employed under the road-cess in looking after trees, and the District Engineer finds them well-behaved and willing to work. As an indication of the better repute into which Domes have of late grown, I may mention that ten of them are at present in the private employment of zemindars, European and native, at fixed wages of Rs. 3 monthly. The men sent out for this service were all carefully selected, and the reports we have received from their employers regarding them are quite satisfactory. The experiment of allowing men of such antecedents to be withdrawn from the direct supervision exercised over them at the settlement, and employed at places where opportunities for reverting to old practices might present themselves, appeared one of doubtful prudence.

23 The good conduct of those on whom confidence had been placed, and the fact that the men sent out would leave their wives, children, and such property as they possessed behind them at the settlement, decided us in favour of the attempt ; and up to the present time there is no reason to think that it has not proved successful

For many years past the existence of these Domes proved the greatest difficulty of police administration in this district. In 1877 the Nepalese Government decided to take organised measures against this tribe, with a view of driving them out of Nepal ; and in consequence a special police force had to be entertained in this district, as it was feared that if all Domes were expelled from Nepal, they would assemble in such numbers as to be a source of danger and anxiety.

The opportunity was taken of recommending to Government that this tribe should be brought under the operation of the Criminal Tribes Act, or, as an alternative, that steps should be taken to confine them within the four walls of a reformatory. These proposals, which involved heavy expenditure, did not commend themselves to Government, and from that time the Domes were kept in such check as the strength of the police force of the district admitted.

24. The annual crime reports of successive years—particularly the reports for 1877 and 1878—describe vividly the state of lawlessness which these Domes had brought about, and the inability of the administration to deal adequately with them.

In October 1880 a special report was submitted to you, giving the particulars of what is known as the Akta case, which resulted in the conviction of 60 Domes at one trial. I need not enter into details, which are already on record in your office; but this case gives an idea of the extreme boldness of these Domes when assembled together in numbers.

25. From 1880 to June 1882 the depredations of the Domes were on a less extensive scale, but they still caused extreme annoyance and injury to the people inhabiting whole tracts of country, and the problem of dealing with them was still unsolved.

26. The success already achieved by the Chumparun settlements warrants the belief that it is possible to reclaim these people without recourse to the stringent measures which have from time to time been advocated. There appears to be no reason why, in the course of a few years, Mughya Domes should not become industrious and law-abiding members of the community. As the number of Domes at large is not only considerable, but increases daily as time-expired convicts come out of jail, it is necessary to make arrangements beforehand for the admission into these refuges of all those who are anxious to live honestly in future.

The Chumparun settlements will admit of 500 persons being taken in; and I am anxious that this number should not be exceeded, for it will not be possible for the local officers, with due regard to the calls made on their time and attention by other duties, to undertake the responsibility of looking after a larger number of settlers than this. It is, besides, on other grounds, not desirable that the whole tribe should be collected within a circumscribed area

27. I understand that a settlement is to be made in the Chupra district, which ought to absorb most of the Domes now at large.

Before long, owing to these settlements, the number of Domes who live by crime will have become so small that the police will have no difficulty in dealing with them effectively. Detection will follow on crime, and those who refuse to follow honest occupation will find that they can no longer with impunity follow their old criminal practices. That the Domes are anxious to escape from the conditions under which they have hitherto lived is, I think, proved by the existence of these settlements. Mr Donaldson, the Superintendent of the Buxar Central Jail, in a letter to Dr. Lethbridge, which has been forwarded to me, writes that his Dome convicts have expressed the greatest satisfaction in learning that it might be possible for them to live in peace on being released from jail; and several of them petitioned him to have their names forwarded here, so that, when their sentences expire, they may be allowed to be at Burgaon or Futtehpore.

28. In proof that the money contributed by Government in aid of the scheme has been economically spent, I may point out that an average of 300 people have been maintained for a year; that 55 substantial houses have been built; bullocks, farm-stock, ploughs, and agricultural implements purchased; and a reserve of food-grain kept in hand. Funds are now exhausted; and as expenses will have to be incurred in connection with enlarging these settlements, I am compelled to apply for further aid from Government. I would ask that a capitation grant of Rs. 3 per head be sanctioned for the year 1883.

This would place a sum of Rs. 1,050 at our disposal, and arrangements could then be made for enlarging the area of arable land attached to both settlements, and for building more houses. There are over and above incidental expenses in connection with the scheme which I have no means of meeting.

That a sum from the public revenue may with fairness be contributed towards this scheme will, I think, be granted, for most of these new settlers would under other conditions necessarily have found their way into jail, there to be maintained at the public cost; and to the credit of these settlements must be placed the greater security to property which the working of the scheme has brought about. No special pleading is, I know, required to recommend the scheme to the consideration of Government, and I trust therefore that this application for funds will be favourably received.

29. This account, which I have made as brief as possible (my object being to put before you the results of the year's working and the prospects of success in future), gives all main details of interest. I have not thought it necessary to attempt any account of the early history, customs or dialect of this peculiar people.

30. The task of starting these settlements was attended with petty difficulties of daily occurrence, which I need not discuss here; and for a long time it was doubtful whether it would not in the end remain unaccomplished. That success has been attained is due partly to the cordial co-operation of certain zemindars and gentlemen, but mainly to the energy and interest which the local officers threw into the undertaking.

31. I desire to bring to your favourable notice the following zemindars and respectable persons, who from the first have interested themselves in the promotion of this scheme, and have voluntarily and liberally responded to all calls made upon them for assistance :—

The Maharajah Bahadoor of Bettiah,
The Rani of Ramnaggur,
Issm Gir Mohunt of Baklahar,
Ram Charn Singh, Kariman Singh, Dipan Singh, Sant Singh. } Puttidars of mouzah Burgaon.
Buldeo Pande of Futtehpore.

I shall be glad if you will bring these names before Government for such recognition as you think necessary. Several other zemindars, notably—

Narsingh Sahay of Bagaha,
Gajadhar Misser of Ratanmala,
Tapsi Narain Singh of Dhanhe,
Baboo Harangi Misser, Agent of the Dulhin Saheb of Bettiah,
Lachmi Narain Singh of Bagaha.
Matook Dhari Misser,

and other puttidars of Madhubani have rendered assistance which deserves acknowledgment.

32. Both the settlements are in the Bettiah sub-division, and have received Mr. Cameron's special attention. He has identified himself from the first with this scheme, and has been able to give assistance, without which it would not have succeeded. Mr. Showers, who has been District Superintendent throughout the year under report, has taken up the promotion of this scheme with the ability and thoroughness he puts into the performance of all the duties of his office.

33. The officer whose name deserves special mention is Baboo Nokhey Lal Misser, Inspector of Police. This officer was the means, in the first instance, of inducing the Domes to settle; and he has throughout the year displayed both tact and firmness in dealing with them. The general management of the settlements has been his special charge, and he has worked admirably. I desire to bring him prominently to your notice. Head-constable Ramdhani Singh, next to Inspector Nokhey Lal Misser, deserves credit for his successful work in connection with the settlements. I also desire to bring his name to your notice.

Head-constables Lalji Sahay and Ambica Pershad have also done excellent work.

Rainfall, Weather, and State and Prospects of the Crops

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 15th September 1883.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
	BENGAL.		
	Western Districts		
	Burdwan Divn.		
1	Burdwan, Sept. 15 '83	0·58	Weather—very close. *Amun* growing well. Rain required for some of the high lands in Cutwa. *Aus* is being reaped with a fair outturn. Prospects of all crops fair.
	Culna	1·24	
	Cutwa	1·27	
	Kuneegunge	3 23	
2	Bankoora, „ 15 „	0 63	Weather—cloudy and clear by turns, with drizzling rain at intervals. Crops in the field are doing very well; but more rain is necessary for realizing the promise they now give. Public health fair.
	Bishenpore	0 79	
	Mahara	0·72	
	Khatra	2 84	
3	Beerbhoom, „ 15 „	0 89	Weather—hot; occasional showers *Aus* and *amun* crops doing well. Prospects good. Prices somewhat lower. Public health good.
	Rampore Haut	4·49	
4	Midnapore „ 15 „	0 98	Weather—seasonable. Prospects of crops favourable. Public health good.
5	Hooghly, „ 15 „	2 35	Weather—seasonable. All crops doing well. Harvesting of *aus* has begun; outturn good. General health good.
	Howrah „ 17 „	1·40	Weather—sultry with occasional showers. *Aus* rice and jute nearly all reaped. *Amun* rice and sugarcane doing well.
	Oolooberia	0·79	
	Central Districts		
	Presidency Divn		
6	24-Pergunnahs. Sept. 17 '83	1·46	Weather—hot and clear. Harvesting of early paddy going on: outturn very good Transplanting of late rice finished. Prospects good. Public health generally good, though cases of fever reported from Barasat and Bussirhat sub-divisions
7	Nuddea, „ 15 „	1 14	Weather—cloudy, with occasional showers. Sultry. Harvesting of *aus* nearly completed More rain wanted for *amun*. Fever stationary.
	Kooshtea	1 43	
	Meherpore	1·56	
	Choondanga	0·48	
	Ranaghat	2·13	
8	Khoolna, „ 15 „	2 45	Weather—warm. p Prospects of both *aus* and *amun* crops good. Fever prevalent in several places.
9	Jessore, „ 15 „	0·27	Weather—hot and dry for the season of the year. Prospects of *amun* crop not so good as they were. This is owing to want of rain and to absence of inundation. If no more rain falls soon, *amun* crop will suffer. Public health generally good; cases of fever reported from Bongong.
	Jhenida	0·46	
	Magura	0·47	
	Narail	0 11	
	Bongong	0·65	
10	Moorshedabad, „ 15 „	0·40	Weather—sultry Rain is much wanted for the late rice. The other crops are doing well. Public health good.
	Rajshahye and Cooch Behar Divs.		
11	Dinagepore Sept 14 '83	0·86	Weather—cloudy with occasional showers. More rain is wanted for *amun* in parts of the district. *Bhadoi* and jute being cut with a fair outturn.
12	Rajshahye, „ 15 „	2 53	Weather—cooler, with fairly strong east wind, and occasional heavy but local showers. *Aus* crop is being harvested. The *amun* suffering in places from want of rain. *Ganja* transplanting delayed for the same reason
	Nattore	0 66	
	Nowgong	0·17	
13	Rungpore „ 14 „	0·26	Weather—very hot. Prospects of *amun* rice and sugarcane good. Cutting of jute going on, and a few being steeped. Fever prevalent Cholera still reported from outpost Fulkumar in the Kurigram sub-division.
	Kurigram	0·13	
	Gaibanda	0 20	
	Nilphamari	Nil	
14	Bogra „ 15 „	0·38	Weather—extremely hot, dry, and unhealthy. Rain is now very urgently wanted. The want of rain combined with a scorching sun has been extremely injurious to the *amun* crop on the high lands. Fever is very prevalent
15	Pubna, „ 15 „	0·62	Weather—very hot and dry. Rain much needed. Rivers falling Prospects of crops discouraging.
16	Darjeeling, „ 15 „	3 03	Weather—gloomy a rain, but rain light. Rain badly wanted for standing crops in Terai. In the hills harvesting of Indian-corn and millets progressing.
17	Julpigoree, „ 15 „	3 62	Weather—seasonable. Rice crop promising. Jute backward. Sugarcane in part of district backward. Public health fair.
	Cooch Behar „ 14 „	1·47	Weather—very close and hot. Prospects of late rice continue fair. Tobacco fields are being prepared. Cutting of jute going on. Reports vary regarding this crop. Public health good.
	Dinhatta up to 9th	1·46	
	Mathabhanga up to 8th.	0 22	
	Meckligunge up to 8th.	1 76	
	Eastern Districts		
	Dacca Divn		
18	Dacca Sept. 15 '83	0 89	Weather—hot. *Aus* paddy and jute being cut. Sowing of *roachia* paddy and *maskalai* continues. Prospects of crops good.
	Manickgunge	0·63	
	Munshigunge	0·73	
	Narainguage	1 17	
19	Furreedpore, „ 15 „	0 79	Weather—very hot. The want of rain is rather serious. Prospects of crops still fair generally, but the *amun* in some places is getting much too dry. Rivers low. Public health generally very fair.
	Goalundo	0·41	
	Madaripore	0 88	
20	Backergunge, „ 13 „	1·54	Weather—seasonable. Outturn of *aus* crop satisfactory. Transplanting of *amun* not yet completed. General health good. Cattle-disease in the sub-division of Patuakhali still continues
21	Mymensingh, „ 14 „	4·06	Weather—hot. Cloudy sky and less rain generally than is wanted. Winter rice promises well. Rivers have fallen five feet during the last 14 days. Health fair.
	Kishoregunge	0 22	
	Attea	0·84	
	Netrokonah	1·24	

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
	BENGAL—*concld.*		
	Eastern Districts.—concld.		
Chittagong Divn. 22	Chittagong, Sept. 15 '83	3·49	Weather—seasonable. Transplanting of *aman* nearly finished. Prospects good. Prices stationary. Cattle-disease still reported.
23	Noakholly, „ 13 „	4·75	Weather—variable, days sultry, early mornings fairly cool. Transplanting of *aman* paddy nearly completed. Prospects of crops not unfavourable.
24	Tipperah, „ 13 „	0·38	Weather—very sultry. Wind easterly. Rain wanted. Crops in high lands
	Brahmunbaria ..	2·86	burning up for want of water. Crops in low lands very good.
	Chandpore ..	1·35	
25	Chittagong Hill Tracts. „ 11 „	1·57	Occasional showers. Strong southerly winds varying round to north. General outturn of *jum* paddy is proving lighter than was expected. Cotton will hardly reach 4 annas of an average crop. Plough lands doing well. Sugarcane weak.
	Hill Tipperah „ 12 „	2·83	Weather—cloudy and hot. Transplanting of *aman* rice still going on. Sugarcane doing well. Public health good.
	BEHAR		
Patna Divn. 26	Patna, Sept. 15 '83	1·39	Weather—hot. *Bhadoi* crops promising. *Kaosi* and *makai* are being cut.
	Barh ..	0·77	Transplanting of paddy still continues. More rain wanted. Cholera reported
	Behar ..	0·50	from Chundi, Hilsa, and Behar thanas.
	Dinapore ...	1·05	
27	Gya „ 15 „	3·19	Weather—sudden change on 11th. West wind, heavy clouds, and good rain all
	Aurungabad ...	0·07	the way from Jahanabad to Gya; probably wide-spread. Rice was fast drying up. Irrigation was going on vigorously, with much fighting for water. The late rain will have done immense good. Cholera still reported, but abating steadily. Prices high, but not running up fast.
28	Shahabad, „ 15 „	0·9	Weather—hot and cloudy. Prospects of winter rice uncertain. More rain
	Buxar ..	0·8	needed. Average outturn of *bhadoi* crop estimated at 5 annas.
	Sasseram ...	2·57	
	Bhabooah ..	0·4	
29	Durbhunga, „ 15 „	1·18	Weather—hot almost the entire week for want of rain. Rain is generally wanted. It is said that the crops on high grounds are suffering. Heavy rain, however, fell in the sudder station this morning (15th.) Fever and a few cholera cases reported.
30	Muzufferpore, „ 15 „	0·53	Weather—cloudy and close, with but little rain, which is much required for all
	Hajeepore ..	0·47	crops. Rice is still being transplanted for the second time, except in the worst
	Seetamarhi ..	0·02	portions of the inundated tract.
31	Sarun, „ 15 „	1·88	Weather—close and sultry with occasional showers. *Bhadoi* being harvested
	Sewan ...	0·21	with average results. Rain on 12th and 13th, if general throughout district,
	Gopalgunge ..	Nil	has been very beneficial, but more wanted for paddy. Cases of fever reported; public health otherwise good.
32	Chumparun „ 15 „	Nil	Weather—hot and cloudy. Rain, which has not fallen now for nearly three weeks, is much wanted. The *bhadoi* crops have suffered in consequence, and if the drought continues serious injury to the *aghani* crop must result. Clouds are massed up in every direction, and there is every probability that some heavy showers will fall before long. General health on the whole good. Some cases of cholera and fever reported from interior.
Bhagulpore Divn. 33	Monghyr Sept. 15 '83	2·23	Weather—hot and cloudy. Harvesting of *bhadoi* crops being made. Recent rain
	Jamui ..	0·71	very beneficial for *aghani* crop, but more wanted in the south of district.
34	Bhagulpore, „ 15 „	0·44	Autumn harvest has commenced; outturn 8 to 12 annas. Rain most urgently
	Sanka ...	1·27	required for transplanted paddy. Rice in the lower lands promises well, but
	Muddehpoorah ...	0·76	the higher land paddy has suffered much for want of rain.
	Sboopoie ...	Nil	
35	Purneah, „ 15 „	0·50	Weather—normal. Prospects of crops generally good, but more rain is now much
	Kissengunge ..	0·20	required in the Sudder sub-division where the rainfall is much below the
	Arrareah ..	3·11	average. Public health fair.
36	Maldah, „ 15 „	0·88	Weather—still and oppressive. Rainfall scanty. Rain is much wanted to improve the condition of the transplanted winter rice crop. Prices of food-grains have fallen a little. General health good.
37	Sonthal Pergha. „ 15 „	0·69	Weather—close and cloudy, with passing showers. More rain wanted at Deoghur,
	Deoghur ..	0·14	Rajmehal, and Jamtara. The Indian corn crop in Rajmehal is a good one,
	Rajmehal ...	1·37	elsewhere poor.
	Jamtara ...	1·02	
	Pakour ...	3·03	
	Godda ..	3·22	
	ORISSA		
Orissa Divn. 38	Cuttack Sept. 14 '83	5·23	Weather—seasonable with occasional showers of rain. *Beali* being harvested, with prospect of a fair outturn. *Sarad* being weeded and thriving well. Common rice selling at from 20 to 28 seers per rupee. Public health good. A few cases of cholera in the town.
39	Pooree, „ 13 „	3·39	Weather—hot and cloudy, with showers occasionally. Prospects of crops continue
	Khoorda	4·87	good. Some damage done to *sarad* paddy in thana Banpur. Small-pox is still reported from Banpur. Cattle-disease reported from thana Gope. Common rice selling at from 25 to 30 seers per rupee.
40	Balasore, „ 14 „	0·92	Weather—seasonable with occasional rain. Weeding going on vigorously. *Beali* is being harvested at places. Standing crops doing well. Public health good.
	CHOTA NAGPORE.		
	South-West Frontier Agency.		
41	Hazaribagh. Sept. 14 '83	2·25	Weather—warm and close. Harvesting of *bhadoi* crops continues. Prospects of rice crop favourable. General health good.
42	Lohardugga „ 15 „	2·94	Weather—seasonable. Recent rain has done much good in Palamow. *Bhadoi*
	Daltongunge ...	2·05	crops in that sub-division not expected to be more than 10 annas. Outturn in head-quarters sub-division also under an average. With the exception of cholera in Hussanabad and slight fever in Lohardugga, public health good.
43	Singbhoom, „ 14 „	2·85	Weather—wet during the first part of the week; latterly fine, with a strong sun. Prospects of crops continue very favourable. Upland rice is being reaped with good outturn. Fever prevalent. Public health otherwise good.
44	Manbhoom, Sept. 15 ...	1·54	Weather—rainy and close. All crops doing very well. Small-pox at Topchanchi;
	Govindpore ...	2·76	with this exception public health good.

Published for general information.

The total fall from 1st January to 15th September 1883	...	45·71
The average fall of the corresponding period for 24 years, S. G.'s Office ..	...	54·14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, *g* gloomy, *d* drizzling rain, *t* thunder, *p* passing temporary showers, *lr* lightning reflection.

Explanation—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If some of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 14TH SEPTEMBER 1883.

It was noticed in the report for the week ending the 7th of September, that on the morning of that date a small barometric depression or cyclonic vortex, which had been forming for some days in the north-west angle of the Bay, was approaching the coast of Orissa. Its centre was on that morning between Balasore and False Point, and not far distant from the coast, and during the same night the small depression passed inland into Orissa, where it afterwards apparently filled up and disappeared. With the advance of the depression inland, the barometer rose rapidly at the head of the Bay, and moderately strong monsoon winds began to blow in all districts bringing with them light to moderate rain. The rainfall on Saturday, the 8th instant, was general in Orissa, South-West Bengal and Chutia Nagpur; on the 9th instant it had extended to South Behar, and on the 10th instant rain was general over the whole Province. During this period pressure, which had been for some period considerably below the normal, was gradually increasing in all districts, and the increase continued until the close of the week, when pressure was about equal to the normal. With the gradually increasing pressure, the monsoon winds began to slacken somewhat, and at the close of the week a more or less pronounced break in the rains had commenced in Orissa, South-West Bengal and East Bengal, though rain had continued to fall, and in many cases in considerable amounts, in Behar and North Bengal. With the gradually increasing pressure, and with, in some cases, the rather variable nature of the barometric changes, wind directions have not been so steady as they were in previous weeks, and especially towards the close of the week wind directions in Behar and Northern Bengal had become very variable. Notwithstanding this want of steadiness of direction, wind velocities are keeping quite equal to the normal for the period, and in some cases they even are above normal velocity. This will be clearly seen from the following tabular statement :—

Station.	Daily wind velocity in week ending 14th September 1883.	Normal daily wind velocity in September.	Station.	Daily wind velocity in week ending 14th September 1883.	Normal daily wind velocity in September.
	Miles.	Miles.		Miles.	Miles.
False Point	240	174·6	Chittagong ...	158	108·0
Cuttack	62	56·9	Dacca	113	114·1
Saugor Island	250	22·8	Gya	48	54·5
Calcutta	106	116·9	Patna	141	65 8
Burdwan	86	76·8	Purneah	34	60·0
Berhampore	83	85·4	Durbhanga ...	117	88·0
Jessore	117	79 0	Hazaribagh ...	171	167 8

As pointed out before, pressure in all districts was at the commencement of the week considerably below the normal, and there has since been a gradual recovery till at its close pressure was nearly normal. It therefore of course follows that the average pressore for the week will be below the normal in almost all instances The numbers given in the meteorological table show that the only station which has had an average pressure for the week above the normal is Durbhanga, which registers 0·012″ in excess In all other cases pressure has been below the normal by amounts which equal in the average ·04″ in Orissa and South-West Bengal, ·015″ in East Bengal, ·05″ in Chutia Nagpur, and ·06″ in South Behar. The largest defect is at Gya, which reports a pressure below the normal by ·073″. Temperature has varied considerably during the week, and the variations have to a great extent followed the course of the rainfall. It was thus at the commencement of the week below the normal in Orissa and South-West Bengal, and above it in Behar, which was not then receiving any rain, but at the close of the week the reverse condition of things held, and temperature was below the normal in Behar, where rain was falling, and above the average in Orissa and South-West Bengal, which were then comparatively rainless. The variations of the averages for the week from the normal have not therefore been very large, and the only case when a variation of more than one degree occurs is at Chittagong, which shows a defect of 2°. The variations of the temperatures of different stations in the same district are also in many cases of opposite character, so that it may be said that in the whole there has been a nearly normal temperature on the whole province during the past week.

The following table gives the usual summary of the temperature and rainfall data for each of the seven meteorological divisions of the Province.

Meteorological District.	Temperature.						Rainfall.									
			Average for week				Of week.			Rainy days			Since 1st of month.		Since May 1st	
	Highest observed during week.	Lowest observed during week.	Of highest of each day	Of lowest of each day.	Of mean for each day	Average mean of week above or below normal mean week.	Average.	Normal average	Variation.	Average number in week.	Normal average number	Variation.	Average.	Normal average	Average.	Normal average
Orissa	92·4	76 0	86 7	78·8	82·8	—1·0	1·06	2 88	—1 82	3 8	3 9	—0·6	6 30	40 37	49 80	5·20

It has been shown previously that the velocity of the winds blowing over the province has been quite up to the normal during the past week, and yet this has been again a period of deficient rainfall in all divisions except one. The deficiency of rainfall has not, however, been quite so extreme as that registered in some divisions during the previous week, though speaking with reference to the whole province, it may be said to have received a rainfall only equal to about two-thirds of the normal. The one meteorological division, which has received an excess fall during the past week has been Chutia Nagpur, which reports an amount equal to 13 per cent above the normal fall. South Behar stands next, having received about nine-tenths of its usual fall; while East Bengal reports a rainfall equal to 70 per cent. of the average, and South-West Bengal an amount equal to 56 per cent. of the normal fall. Orissa, North Behar, and North Bengal are very considerably in defect, having only received about one-third of the normal fall, the exact amounts being 37,39, and 42 per cent., respectively of the normal fall. Of these three, North Bengal and North Behar are very largely in defect in the previous week, though Orissa during that period had received excessive rain. It is, however, very remarkable that notwithstanding the marked defect of rain in nearly all divisions, the number of rainy days has been in excess of the normal in all cases except two, where slight defects only are shown. North Bengal is a prominent instance of this; the average rainfall at all the stations in this division for the week is 1·46 inches, while the normal fall for the same period is 3 47 inches, giving a defect during the week of 58 per cent; the actual average number of rainy days at the stations in this division during the week has been 3·8, as against the normal number 3·1, giving an excess number of 0·7 rainy days in a year when the rainfall has been so largely in defect, South-West Bengal, East Bengal, and South Behar are instances of similar nature during this week, but not of so prominent a character. The conclusion from this seems unavoidable, that though the rain showers have been quite as numerous as usual, they have been wanting in intensity or in the amount of rain which they were able to yield. This taken in connection with the fact that the wind velocity for the period is fully up to the normal, naturally suggests that the monsoon current may be rather wanting in depth or volume during the present season.

In the various divisions, as may be expected, there are individual cases of districts receiving comparatively large excess falls or large defects which are deserving of notice. In the Orissa division the Pooree district is more largely in defect than the remaining districts In South-West Bengal the Midnapore district has received a fall only about one-fifth of the normal, while Tumlook in this district has received actually no rain at all, and Ghatal less than a tenth of an inch of rain during the week. In Eastern Bengal the Chittagong district has received a large excess, in fact almost twice its normal amount, while the Furreedpore district and most stations in the Mymensingh district are in large defect. In North Bengal the districts of Bogra and Pubna, Rajshahye, Dinajepur, and Rungpur were in very considerable defect, while the Darjiling district received an excess fall. In North Bengal, North Bhagulpore, Champaran, and some stations in Darbhanga are in very large defect. In connection with this district, it may be remarked that a report from Mozufferpore was telegraphed to Simla to the effect that 9 inches of rain had fallen there on the 9th instant, but it has been since found that the actual amount of rain which was received on that day was only 0 3 inch. In South Behar and in Chutia Nagpur rainfall has been fairly evenly distributed, and there are no exceptional cases which call for special remark.

Saturday, 8th September.—Pressure increased in all districts, except South Behar and Chutia Nagpur. The increase of pressure was especially large in Orissa, and at False Point and Balasore it amounted to more than a tenth of an inch. This was clearly due to the inland advance of the barometric depression which had existed in the North-West angle of the Bay for the previous three days. Pressure, however, continued very much below the normal, the defect varying from 0·16 inches at Cuttack to 0·06 inches at Chittagong

Temperature fell considerably in Orissa, and to a smaller extent in South-West and East Bengal and in Chutia Nagpur, but in Behar it continued to rise. It averaged nearly 4° below the normal in Orissa, while in Behar it was 3° above the normal. With the advance of the barometric depression inland, wind directions became south-westerly in Orissa and at Saugor Island. In all other parts of the Province south-easterly or easterly winds of moderate strength were blowing In Orissa, Chutia Nagpur, and South-West Bengal, wind velocities had increased since the 7th instant. Humidity was fairly high in all districts. The amount of cloud was also high in all districts, except Behar and North Bengal. General rain light to moderate in amount fell in Orissa, South-West Bengal, East Bengal and Chutia Nagpur. A few showers fell in North Bengal and North Behar, and in the Sonthal Pergunnahs district of South Behar; but the remaining districts of this division were rainless. The heaviest rain fell in East and South-West Bengal and Orissa. Thus Cox's Bazar reported 3 8 inches, Noakhally 2·29 inches, Ranaghat 1 60 inches, Berhampore 1 27 inches, Satkhira 1·21 inches, Banki 1·22 inches, Tajpore 1 10 inches, and Sarah 1 01 inches.

Sunday, 9th September.—Pressure increased at almost all the reporting stations The increase was largest in Behar and in North Bengal, where pressure was relatively high. Notwithstanding the increase of pressure, the barometer was lower than the normal by amounts which averaged nearly a tenth of an inch in South-West Bengal and Orissa, but which were only equal to a few hundredths of an inch in East Bengal. The changes of temperature were small and variable. It was generally increasing in Orissa and South-West Bengal, and decreasing in Behar and North Bengal. It was, however, distinctly below the normal in Orissa, South-West and East Bengal, and above the normal in Behar Fairly strong south-westerly winds were blowing in Orissa. In other districts the wind directions were generally south-easterly and easterly, and winds were of full average strength. Humidity increased at most stations, the increase being rather marked in Behar Cloud proportion was high, except at some stations in Behar and North Bengal. Rainfall was rather more general to-day, though the amounts reported were usually small. Rain had extended to most stations in South Behar, though in North Bengal and North Behar rainfall was rather scanty. The heaviest rain fell in East Bengal, where Cox's Bazar received 3 70 inches, Perozepore 1·75 inches, Bhola 1 55 inches, Patuakhally 1 82 inches, and Noakhally 1·30 inches; Bagirhat also recorded 2·38 inches, Hooghly 1 47 inches, Semtaghur (Hazaribagh) 1·38 inches, and Rampore Haut 1·19 inches.

Monday, 10th September.—Pressure continued to increase by small amounts over the whole Province With this further increase, pressure was above the normal in East Bengal and North Behar, though in the western and southern districts it was still below the normal. In Orissa, South Behar, and Chutia Nagpur pressure was relatively low to the other parts of the Province. The temperature changes were decidedly variable, even when neighbouring stations were considered. Temperature continued generally below the average in East and South-West Bengal, and in Orissa, but was above the normal in Behar. Winds had not changed much in direction during the past 24 hours, but velocities in most instances decreased slightly. Moderately strong south-easterly winds still continued to prevail over the greater part of the reporting area. Humidity increased in South-West Bengal and in Orissa, but in North Bengal and Behar it was rather smaller. Cloud proportion was distinctly smaller in Orissa and at some stations in North Behar, but elsewhere the changes were not marked. General rain, light to moderate in amount, again fell in all divisions, though a few stations in Behar were rainless. Rain was comparatively heavy in Chutia Nagpur and at some stations in South-West, East and North Bengal, but it was not so heavy as in the previous two days. The following stations reported amounts in excess of one inch:—Chyebassa Hazaribagh, Kalimpong, Rampore Beauleah, Cox's Bazar, Alipore and Diamond Harbour

Tuesday, 11th September.—The changes of pressure were a little irregular, though the amounts were small. The barometer was on the whole falling, especially in South Behar and Chutia Nagpur. These two areas still showed a low pressure in comparison with the remaining districts. Pressure was, however, below the normal by small amounts in all districts, except in East Bengal and North Behar. Temperature had increased in Orissa, but elsewhere the changes were not very marked. Temperature was below the normal in Orissa, Chutia Nagpur and in East and South-West Bengal, though it was above it in Behar. Winds became decidedly more southerly during the past 24 hours in almost all districts. Wind velocities, however, were diminishing slightly, especially at the southern stations. Humidity decreased decidedly in Orissa, but in other districts the changes were small. The amount of cloud was distinctly smaller in Orissa and at some stations in South-West Bengal, while in Behar it appeared to be increasing. Rain was less general to-day, and in most districts it was lighter than on the 10th. Very light showers only fell in Orissa, in South-West Bengal, and in most districts of North Bengal and of Behar though comparatively heavy rain fell in some districts of Chutia Nagpur, East Bengal and North Bengal. Thus Mahadebpore (Dinagepore) reported 2·38 inches, Ranchi, 1·80 inches, Govindpore 1·62 inches, Chittagong 1·19 inches, Cox's Bazar 1 1 inches and Larjeeling 1 01 inches

Wednesday, 12th September—The changes of pressure were again a little irregular, though the amounts were small Pressure continued to fall in most districts, except in Orissa, and it was below the normal generally by small amounts. Behar and Chutia Nagpur still showed a relatively low pressure. Temperature continued to increase at almost all stations.

It was above the normal at nearly all the reporting stations, the excess temperature averaging about 1°. Winds became decidedly more irregular, and northerly winds, and in some cases calms were reported from some of the stations in Behar. In the majority of cases wind velocities had very materially diminished, and light winds now prevailed over the Province Humidity decreased in almost all districts except Behar, but in South Behar specially humidity increased Cloud proportion, though high in South-West Bengal, was in other districts moderate only. Rain was now comparatively scarce in the southern divisions, while it was general and fairly heavy in North Bengal and in South Behar, and in some parts of Chutia Nagpur and East Bengal. Mymensing reported the largest amount of 2·76 inches, while the following stations received amounts in excess of one inch:—Nowadah, Gya, Pakoor, Darjeeling, and Bhowanigunge.

Rainfall was scanty in Orissa, South-West, East, and North Bengal, though in one or two instances stations in these divisions received heavy rain. Rainfall was, however, fairly general in North and South Behar, and in Chutia Nagpur, and from many stations very heavy rain was reported. The following stations received more than three inches of rain, Buxar and Buxa; the following amounts between two and three inches, Godda, Sasseram Arrareah, and Chandpore, and the following more than one inch, Mahudi Hills, Hazaribagh, Barrh, Jehanabad, Gya, Bhubooah, Tajpore, Fenny, Rampore Haut, and Kooshtea.

Thursday, 13th September.—Pressure commenced to increase at all stations. The increase was largest in North Bengal and Behar, while it was comparatively small in Orissa and at most stations in South-West Bengal. Pressure was generally above the normal, except in Behar and at a few stations in South-West Bengal. Temperature again increased considerably in Orissa and in South-West and East Bengal. It was stationary in North Bengal and in Chutia Nagpur, and it fell at most stations in Behar. Temperature was generally above the average in all districts except in Behar Winds continued rather irregular in most districts this morning. In Behar calms were reported from four stations, while at the other stations the wind directions were very variable. Wind velocities again became smaller at most stations, and very light winds prevailed everywhere, except at the sea-coast stations Humidity decreased still further in South-West Bengal and Orissa, but it increased in Behar. Cloud proportion was small in the southern districts, but had increased considerably in Behar

Most districts of South-West Bengal and Orissa continued practically rainless; in East Bengal, North Behar, and Chuta Nagpur a few light local showers are reported, while in South Behar and over the greater part of North Bengal rainfall was more general, and in many cases considerable amounts were reported Bagdogra received 3 05 inches, Julpigori 2·86 inches, Matabhanga 2 72 inches. Buxa 2·32 inches, Kandi (Moorshedabad) 2 21 inches, Monghyr 1·73 inches, Midnapore 1·52 inches, Arrareah 1·12 inches, and Pachamba 1 inch.

Friday, 14th September.—The changes of pressure were decidedly irregular, though small in most instances. Generally pressure was increasing at the eastern reporting stations, and decreasing at the western stations. Pressure was below the normal by small amounts at nearly all stations. Temperature increased rapidly in Orissa and in South-West Bengal, but in other districts the changes were not so marked. Temperature was considerably above the average by amounts varying from two to three degrees in South-West Bengal and Orissa, but was distinctly below the normal in South Behar and Chutia Nagpur. Winds were again rather more southerly. Wind velocities continued moderate in all districts, but in Behar they appeared again to be slightly increasing. Humidity continued high in Chutia Nagpur, in Behar and in North Bengal, but in Orissa and South-West Bengal it was comparatively small for the season. The amount of cloud remained rather high in Chutia Nagpur and Behar, though in the southern divisions it was moderate only.

METEOROLOGICAL OFFICE, BENGAL,
The 18th September 1883.

ALEXANDER PEDLER, F.C.S.,
Offg. Meteorological Reporter to the Govt. of Bengal.

MEMORANDA ON THE MORTUARY STATISTICS OF THE *DISTRICTS* IN BENGAL FOR THE MONTH OF JULY 1883.

1. The returns from the districts in Bengal disclose that during the month of July 1883 there were registered in them 91,145 deaths, representing an annual ratio per 1,000 of their population amounting to 66,162,926, of 16·44 against 15·00 per 1,000 in the preceding month, and 19·44 per 1,000 in the corresponding month of 1882.

2. From the same returns it is seen that the highest casualty rates were returned from the under-mentioned districts:—

	Ratio per mille.		Ratio per mille.
Gya ...	... 38·52	Rajshahye ...	... 24·24
Shahabad ...	... 29·88	Poori ...	... 23·52
Patna ...	... 28·08	Bogra ...	... 22·80
Julpaiguri ...	.. 24·96	Burdwan ...	... 20·52
Darjiling ...	... 24·72		

3. A review of the figures representing the mortality from the principal death-causes denotes that, cholera caused the deaths of 1·56 per 1,000 of the population of the districts, as opposed to 2·04 per 1,000 during the preceding month, indicating a diminution in the ravages of this scourge; that fever removed 11·04 per 1,000 against 9·84 per 1,000, showing a rise in mortality from this general cause of death; and that small-pox, bowel-complaints, injury and "Other Causes" resulted in loss of life to the following extent:—

Small-pox ...	...	...	...	·12	against	·12
Bowel-complaints ...	...	...	...	·72	,,	·60
Injury ...	...	...	..	·60	,,	·48
Other causes ...	...	...	...	2·04	,,	1·68

4. Referring to the local distribution of the above-mentioned diseases, it is observed that their severest activity was displayed in the following districts:—

Cholera.

		°
The mean temperature of the seven days		82·4
The extreme variation of temperature during the seven days		14·5
The maximum temperature during the seven days		91·3
		%
The mean relative humidity during the seven days		88
		Inches
The total fall of rain from 9th to 15th September 1883		1·49

The mean temperature and humidity are obtained by applying to the mean of the 10h. 16h, and minimum readings a correct on dependent on the range, and derived from the hourly observations at the Surveyor-General's Office, Chowringhee, in past years.

Meteorological Office, India,
The 17th September 1883.

Alexander Pedler,
Offg. Meteorological Reporter to the Govt. of India

PUBLIC WORKS DEPARTMENT, IRRIGATION BRANCH, BENGAL.

Statements shewing the total amount of Traffic and Tolls on the Canals for the month of July 1883.

INCREASE.

	Tons.
Coal	46
This increase is due to larger quantity of coal being required for the working of the mills.	
Rice	216
This increase is due to working of the rice-mills at Canning this season.	
Railway materials	20
This increase is due to materials required for the extension.	
Sundries	55
This increase is due to works on the extension being pushed on	

DECREASE.

Paddy	79
This decrease is due to unfavourable market.	
Firewood	562
This decrease is due to wood wagons not being available sufficiently in consequence of stock condemned.	
Railway materials	90
This decrease is due to working on the extension coming to a close.	
Hay	41
This decrease is due to low rate in the market.	
Straw	17
This decrease is due to unfavourable market.	

Calcutta, the 17th September 1883

R. G. MOOKERJEE, *Manager.*

Nalhati State Railway.

Statement showing Increases and Decreases in tonnage of Staples carried over the line during the month of August 1883, *as compared with the corresponding period of August* 1882.

Total ...	749	93	1,251	138	840	1,384	636	93

INCREASE.

	Tons.
Coal	622
This increase is due to some silk merchants having arranged to bring their coal by rail instead of by boat.	

DECREASE.

Edible grain	47
This decrease is due to low rate.	
Seeds of all sorts	12
This decrease is due probably to seeds for the Nuddea district passing viâ Howrah and Bhudeshur in consequence of East Indian Railway reduced monsoon rate from Canpore to Howrah	
Revenue stores	23
No ballast is carried by ordinary train	

R. G. MOOKERJEE, *Manager.*

PART I.

Orders and Notifications by the Lieut.-Governor of Bengal, the High Court, Government Treasury, &c.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

No. 2045A.

GENERAL.—*The 11th September* 1883.—The following officers have been granted by the Right Hon'ble the Secretary of State for India extensions of furlough for the periods mentioned opposite their names:—

Mr. A. J. R. Bainbridge	...	...	...	11 months.
,, L. C. Abbott	...	...	...	2 ,,
,, R. Cornish	...	...	...	2 days.

The 17th September 1883.—Mr. R. M. Towers, District and Sessions Judge, Tipperah, returned to duty on the afternoon of the 22nd ultimo.

Baboo Hem Chunder Mookerjee, Temporary Sub-Deputy Collector, on special duty under the Public Works Department of this Government, is vested with the powers of a Collector under Act X of 1870 in the district of Midnapore.

In modification of the order of the 20th ultimo, Baboo Shoshi Mohun Talukdar, Temporary Sub-Deputy Collector on land registration work, Chittagong, is allowed leave for one month and twenty-one days, under section 71, chapter V of the Civil Leave Code, with effect from such date as he may be relieved.

Baboo Ram Brahmo Chatterjee, Sub-Deputy Collector, on Khoorda settlement work, Pooree, is allowed leave for three months, under section 71, chapter V of the Civil Leave Code, with effect from the 15th proximo, or such subsequent date as he may avail himself of it.

Baboo Nobin Chunder Sen, Deputy Magistrate and Deputy Collector, Behar, Patna, is transferred to Bhagulpore, and is posted to the sudder station of that district.

Mr. C. N. Bannerjee, *Barrister-at-Law*, Deputy Magistrate and Deputy Collector, Howrah, is appointed to have charge of the Behar sub-division of the Patna district

The 20th September 1883.—Baboo Khetter Mohun Mookerjee, Deputy Magistrate and Deputy Collector, Hooghly, is allowed leave for two months, under section 71, chapter V of the Civil Leave Code, in extension of the leave granted to him under the order of the 17th July last.

This cancels the order of the 23rd ultimo, appointing Baboo Khetter Mohun Mookerjee to have temporary charge of the Attia sub-division of the Mymensing district.

Baboo Kasi Kinker Sen, Deputy Magistrate and Deputy Collector, Kissoregunge, Mymensing, is appointed to have charge of the Attia sub-division of that district, during the absence, on leave, of Baboo Otool Chunder Chatterjee, or until further orders.

Baboo Jogendra Nath Bandapadhya, Officiating Deputy Magistrate and Deputy Collector, Jessore, on leave, is transferred to Mymensing, and is posted to the sudder station of that district.

Baboo Mohendro Chunder Mozoomdar, Temporary Deputy Magistrate and Deputy Collector, Mymensing, is appointed to have charge of the Kissoregunge sub-division of that district, during the absence, on deputation, of Baboo Kasi Kinker Sen, or until further orders.

The order of the 12th March last, transferring Baboo Kali Podo Mookerjee, Deputy Magistrate and Deputy Collector, Rajshahye, to the sudder station of the Pubna district, is cancelled.

Baboo Kali Podo Mookerjee, Deputy Magistrate and Deputy Collector, Rajshahye, is vested with the powers of a Collector under Act X of 1870 in that district.

The 21st September 1883.—Mr. E. F. Growse, Assistant Magistrate and Collector, Burdwan, is allowed leave for 21 days, under section 71, chapter V of the Civil Leave Code, with effect from the 6th October next.

Mr. C. A. S. Bedford, Assistant Commissioner, in charge of the Giridi sub-division of the Hazaribagh district, is transferred to the sudder station of that district.

Mr. A. H. Collins, Officiating Joint Magistrate and Deputy Collector, Hazaribagh, is appointed to have charge of the Giridi sub-division of that district.

Mr. F. B. Taylor, Officiating Joint Magistrate and Deputy Collector, Darjeeling, is allowed leave for one month, under section 71, chapter V of the Civil Leave Code, with effect from the 1st October next.

The 25th September 1883.—The services of the Hon'ble H. J. Reynolds are placed temporarily at the disposal of the Government of India in the Department of Revenue and Agriculture.

MEDICAL.—*The 15th September* 1883.—The following gentlemen are appointed to be members of the Committee for the management of the charitable dispensary at Rajmehal:—

Baboo Umesh Chunder Banerjee, Deputy Magistrate and Deputy Collector.
„ Dina Nath Chatterjee, Station Master, East Indian Railway.

The 17th September 1883.—Assistant Surgeon Umrito Lall Deb, House Surgeon, Howrah General Hospital, is allowed leave for one month, under section 127, chapter X of the Civil Leave Code, with effect from such date as he may be relieved.

Assistant Surgeon Nilratun Adhicari, a Supernumerary at Howrah, is appointed to act as House Surgeon, Howrah General Hospital, during the absence, on leave, of Assistant Surgeon Umrito Lall Deb, or until further orders.

OPIUM.—*The 17th September* 1883.—Surgeon P. A. Weir, Principal Assistant to the Opium Agent, Benares, is allowed leave for one month and twenty-four days, under section 71, chapter V of the Civil Leave Code, with effect from the 15th instant

Mr. G. M. Gregory is appointed temporarily to act as Principal Assistant to the Opium Agent, Benares, during the absence, on leave, of Surgeon P. A. Weir, or until further orders.

The 20th September 1883.—Mr. C. M. Jerdon, Officiating Sub-Deputy Opium Agent of Cawnpore, is promoted to the third grade of Sub-Deputy Opium Agents, with effect from the 26th June 1883, *vice* Mr. T. A. M. Gennoe, deceased.

Mr N. T Ryves, Officiating Sub-Deputy Opium Agent of Hajeepore, is promoted to the fourth grade of Sub-Deputy Opium Agents, with effect from the 26th June 1883, *vice* Mr. C. M. Jerdon.

Mr. A. F. Mackenzie Officiating Sub-Deputy Opium Agent of Bareilly, is appointed to be a Sub-Deputy Opium Agent of the fifth grade, with effect from the 26th June 1883, *vice* Mr. N. T. Ryves.

Mr. G. DeC. Hobson, Assistant Sub-Deputy Opium Agent of the second grade, is promoted to the first grade of Assistant Sub-Deputy Opium Agents, with effect from the 26th June 1883, *vice* Mr. A. F. Mackenzie.

Mr. Hobson will continue to act, until further orders, as Sub-Deputy Opium Agent of Goruckpore.

Mr. J. E. Hand, Temporary Assistant Sub-Deputy Opium Agent of the second grade, is confirmed in that grade, with effect from the 26th June 1883, *vice* Mr. G DeC. Hobson.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 24th September 1883.—The following additional rules for the examination of Masters and Mates having been adopted by the Board of Trade, are hereby introduced into the Port of Calcutta.

SERVICE AS THIRD AND FOURTH MATE.

Service in the ships of the Peninsular and Oriental or other large Companies as Third and Fourth Mates shall be accepted to the same extent as Second Mate's service is accepted to qualify candidates for examination for certificates of competency as First Mate. Before, however, a candidate can be allowed to be examined, he must produce satisfactory proofs that he has had charge of a watch for not less than twelve months while serving as such Third or Fourth Mate, and that during the whole of that time he has been in possession of a Second Mate's certificate of competency.

Service as Third and Fourth Mate may, under the same conditions, be accepted to qualify a candidate to be examined for a Master's certificate of competency, provided the candidate has also served at sea for at least 12 months in a position not lower than that of a Second Mate while in possession of a First Mate's certificate of competency. If a candidate has had no service as First Mate, he must have been 6½ years at sea, of which 2½ must have been as Mate of a lower grade under the above-named conditions. Occasional service in charge of a watch in the daytime will not be accepted as Mate's service.

RIVER AND SMOOTH-WATER SERVICE.

Service performed on rivers, no matter of what size, or within smooth-water or partially smooth-water limits, cannot be accepted as sea service under the regulations.

COLOUR BLINDNESS.

In case of candidates failing in the colour test, they may be examined again in colours at any time, as in the case of persons not applying for certificates, on payment of a fresh fee of 8 annas. When, however, they go up for certificates of competency, they will have to fill up form Exn. 2, and be again examined in colours, and in case of failure to pass the colour test will be put back three months as specified in the regulations.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 21st September 1883.—It is hereby notified, under the provisions of section 4, Act IX of 1847, that the revenue survey of the undermentioned pergunnahs and parts of pergunnahs of district Balasore has been completed, and has been approved by Government, viz:—Bhelorachor, Jellasore, Napuchor, Kismut Napuchor, Fatehabad, Birkul (part of), Kankrachor (part of), Chak Ismailpur (part of), Mirgoda (part of), Bhograi (part of), and Langaleshar (part of).

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

The 24th September 1883.—Under the authority vested in him by section 63 of the Bengal Embankment Act, II of 1882, the Lieutenant-Governor hereby directs that an estimate be made of the expenses to be incurred during the next 20 years in respect of the repairs and maintenance of the Toorkee embankment, in the district of Mozufferpore, and the works connected therewith.

A. P. MACDONNELL,
Offg. Secretary to the Govt of Bengal.

[Second Publication.]

NOTIFICATION.

The 8th September 1883.—The Lieutenant-Governor is pleased to notify, under section 19 of the Indian Forest Act (VII of 1878), that the undermentioned tract of land, which, in a notification dated the 15th January 1883, published at page 69 of the *Calcutta Gazette* of the 17th idem, it was proposed to constitute a reserved forest, shall from the 1st October 1883, be a reserved forest under the said Act.

DISTRICT.	Pergunnah or other sub-division.	Name of forest.	Description of boundaries.
Lohardugga ...	Sudder sub-division...	Horhap ...	*North.*—The Raru river and village lands of Horhap. *East.*—Village lands of Lalli. *South.*—Ditto of Lalli and Ulatoo *West.*—Ditto of Ulatoo and the Raru river.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 17th September 1883.—The following notification is substituted for that dated the 30th July 1883, published at page 653, Part I of the *Calcutta Gazette* of the 1st August 1883. The Lieutenant-Governor is pleased to order that, on and after the 1st September 1883, the following shall be the rates for forest produce in the Sunderbuns protected forests, in supersession of those published in Rule I of the Rules of the 17th August 1880, and of the notification dated the 12th September 1880:—

(1) Sundri, Pussur, and Amoor timber in pieces measuring 10 feet and upwards in length *or* 3′ 9″ and upwards in girth at the thick end, for every maund, one anna.

(2) Sundri, Pussur, and Amoor timber in pieces measuring 6 feet and under 10 feet in length *or* 2′ 3″ and under 3′ 9″ in girth at the thick end, for every maund, one-half anna.

(3) Keora timber in pieces measuring 6 feet and upwards in length *and* 2′ 3″ and over in girth at the thick end, for every maund, one-quarter anna.

(4) Any other forest produce, except honey and wax, for every maund, one-quarteranna.

(5) The right to collect honey and wax, for each man per month, one rupee eight annas.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

[Second Publication.]

NOTIFICATION.

The 13th September 1883.—The following notice is published for general information.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 43).

BAY OF BENGAL—CHITTAGONG COAST.

KUTUBDEA BANKS.

Replacement of a Buoy on the Western edge of Dolphin Shoal.

WITH reference to Notice to Mariners, No 33 of the 27th July 1883, issued by this Department, information has been received from the Port Officer of Chittagong, that a 3rd class *black iron spiral* buoy, marked *D (in white)*, with *staff* and *white ball*, has been placed on the western edge of the Dolphin Shoal in 5 fathoms, with Kutubdea lighthouse bearing E ¼ S.

Note.—The bearing is magnetic.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 12th September* 1883.

[Second Publication.]

NOTIFICATION.

The 18th September 1883.—The following Notice to Mariners is published for general information.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No 44).

AUSTRALIA—SOUTH COAST.

GULF OF ST. VINCENT—PORT ADELAIDE RIVER.

Change in the Channel to the Port.

THE President, Marine Board, Port Adelaide, has given notice that deepening operations had so far progressed in the channel leading from the sea to Port Adelaide that, after the 1st August 1883, a depth of not less than 18 feet at low water spring tides was found.

The first cutting through what is known as the Inner bar commences nearly opposite No. 10 light beacon. It is 100 feet wide until reaching No 9 light beacon, where a Dredger is now at work widening it to 150 feet: thence to the Powder Magazine the width is 150 feet. At the approach to, and round, the curve at Snapper Point the width is nearly 250 feet.

A mid-channel course from the Magazine leads into the newly-formed cutting commencing nearly opposite No. 2 light beacon. It is 150 feet wide until reaching what is known as the Red Buoy Creek. The cuttings to this point are marked in the usual manner, viz., *red* buoys on the starboard hand and *black* buoys on the port hand coming in. From the Red Buoy Creek to the South Australian Company's dock entrance the channel is nearly 300 feet wide, having a depth of not less than 21 feet at low water spring tides.

Note.—It is recommended that large or heavy draught ships should not enter until the Tidal signals, exhibited from the Semaphore station, showed at least one foot above the vessel's draught.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,

Offg. Port Officer of Calcutta

PORT OFFICE, *Calcutta, the 13th September* 1883.

[Second Publication.]

NOTIFICATION.

The 17th September 1883.—It is hereby notified for general information that the Lieutenant-Governor proposes to issue the following rules for the licensing and registration of passenger and cargo-boats at the port of Chittagong :—

UNDER section 7 (*k*) of Act XII of 1875 (the Indian Ports Act), the Lieutenant-Governor prescribes the following rules for the licensing and regulation of passenger boats plying for hire within the port of Chittagong. They shall take effect from the

Rules.

1. No passenger boat shall ply for hire within the limits of the Port unless licensed and registered by the Port Officer, and under the direction of a person licensed by the same officer.

2. Every application for the licensing and registration of a passenger boat must be made in writing to the Port Officer, and contain particulars of the owner's name and residence, a description of the boat, and the number of passengers which it is intended to carry.

3. Every license granted under these rules shall continue in force for one year from the date on which such license was issued, unless it is revoked under the provisions of these rules.

4. No license shall be granted to any passenger boat unless the Port Officer is satisfied that it is in good order and suited for the accommodation of passengers; and the number of persons to be kept in charge of the boat, and of the passengers which may be carried therein at one time, shall be stated in the license.

5. The number of every licensed and registered boat shall be painted by the Port Officer on the bow thereof in letters of not less than four inches in length.

6. No fees shall be charged for the licensing and registration of passenger boats under these rules.

7. The owner or the person in charge of any licensed passenger boat shall not permit any number of persons more than that for which such boat has been licensed to be carried therein at one time, and shall not permit such boat to ply for hire unless provided with the number of crew stated in the license. The boat must be kept thoroughly clean.

8. In the computation of the number of persons, in addition to the crew carried in any vessel, two children below the age of 12 years shall be counted as one person, and every two maunds weight or luggage shall be counted as equivalent to one person.

9. The license granted for any passenger boat may be revoked by the Port Officer whenever such boat is, in his opinion, unfitted for the conveyance of passengers, or when any breach of the conditions of the license or the Port rules, or the Sea Customs Act, has been committed by the owner or the person in charge.

10. No passenger boat shall obstruct the free navigation of the port or the approaches to any wharf, jetty, or landing stage.

11. Every passenger boat moving in the port after dark shall carry a light in a lantern in the forepart of the vessel where it can be distinctly seen.

12. Whenever any accident shall occur to a registered passenger boat, the person in charge or the owner shall at once proceed to the nearest police station and report the circumstances connected with the accident to the officer in charge.

13. When any property belonging to passengers or others is left in a passenger boat unclaimed, the property so left shall be at once sent by the person in charge to the nearest police station.

14. Any person in charge of a licensed passenger boat plying for hire in the port, who shall without good reason refuse to carry a passenger in such vessel shall, for every such refusal, be liable to the penalty prescribed by law for breach of these rules, and shall in addition be liable to have his own license, and that of the vessel of which he is in charge, revoked.

15. Every licensed passenger boat, when plying, shall have its license on board, which shall be produced when required.

16. An owner of a passenger boat who may withdraw it from plying, except for the purpose of repairs or other sufficient cause, without giving 48 hours' notice to the Port

Officer, shall, in addition to the penalty prescribed by Act XII of 1875 for a breach of these rules, be liable to have the license revoked.

17. Every person registered under rule 1 shall be provided with a metal license ticket upon which shall be legibly painted the number of his license, and every such person when in charge of a licensed vessel shall wear his ticket exposed to view. No person without such ticket shall be in charge of any passenger boat.

18. Whenever the number on any license ticket shall become obliterated or defaced, so that the same shall not be distinctly legible, and also when any license ticket shall have been lost or mislaid, an application shall be made to the Port Officer for a renewal thereof, and the Port Officer shall supply a new license ticket

19 On the expiration or other determination of any license, the ticket shall be returned to the Port Officer.

20. No license ticket shall be lent or transferred to any other person, and no such ticket shall be used by any unlicensed person.

21. No person in charge of any registered passenger boat plying within the limits of the port shall use, or wear, or have any ticket resembling, or intended to resemble, the metal ticket granted under the authority of these rules.

22 Any person committing an infringement of any of the foregoing port rules is liable to a fine not exceeding one hundred rupees, under the provisions of Act XII of 1875.

UNDER section 79 of Act VIII of 1878 (the Sea Customs Act), the Lieutenant-Governor appoints the Port Officer of Chittagong to issue licenses for, and register, cargo-boats plying within the limits of that port, and under the same section and section 7 (*k*) of Act XII of 1875 (the Indian Ports Act), the following rules are prescribed for the licensing and registration of such boats, in supersession of the rules published at page 54, Part I of the *Calcutta Gazette* of the 24th July 1872. These rules shall take effect from the

Rules.

1 Each application for the licensing and registration of a cargo-boat must contain particulars of the owner's name and residence, and the tonnage of the boat.

2. The applica ions will be made to the Port Officer, who shall survey the boats and satisfy himself that they are safe.

3. The licenses will then be issued, and will be current for one year only, from the date of registration. A fee at the following rates will be charged on the issue of each license, and the same fee on its renewal every year :—

			Rs.	A.	P.
"Open or decked" boat up to 3 tons burthen			... 1	0	0
Ditto	ditto	*above* 3 and *not above* 5 tons burthen	... 1	8	0
Ditto	ditto	*above* 5 and *not above* 10 tons burthen	... 2	0	0
Ditto	ditto	all above 10 tons burthen ...	... 3	0	0

4. The number of the license must be branded or cut and painted in conspicuous white figures on both bows of the boat : the figures not to be less than six inches in length. The tonnage must also be cut into boat's stern.

5. The license must be produced whenever demanded, and should therefore be in the custody of the manjee of the boat for the time being.

6. Cargo-boats, the manjees of which shall not produce their licenses when called upon, will be treated as unlicensed boats, unless good cause be shown to the contrary.

7 Any goods found within the limits of the port on board of any boat not duly licensed and registered shall, unless such goods be covered by a special permit from the customs officer, be liable to confiscation, and the owner or the person in charge of the boat shall be liable to a penalty not exceeding one hundred rupees.

8. No cargo-boats shall be licensed unless provided with a crew according to the following scale :—

Class I.—"Square built open or decked"

For a boat not above 10 tons burthen, 3 men, including manjee.
" " above 10 and not above 15 tons, 4 men, including manjee.
" " " 15 " " 20 " 5 " " "
" " " 20 " " 25 " 6 " " "
" " " 25 " " 30 " 7 " " "
" " " 30 " " 35 " 8 " " "
" " " 35 " " 40 " 9 " " "
" " " 40 tons, 10 men, including manjee.

Class II.—"Dingky built Bhurs."

For a boat not above 10 tons burthen, 3 men, including manjee.
" " above 10 and not above 20 tons, 4 men, including manjee.
" " " 20 " " 30 " 5 " " "
" " " 30 " " 40 " 6 " " "
" " " 40 tons, 7 men, including manjee.

9. The license of a cargo-boat found plying contrary to the conditions of the license, with a crew fewer in number than is prescribed in such license, shall be liable to cancelment

10. If any cargo-boat becomes unsafe during the term of its license, the Port Officer may withdraw the license until it is properly repaired.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

The 4th September 1883.—The following Notice to Mariners is published for general information.

A. P. MACDONNELL,
Offg. Secy. to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 41).

INDIA—EAST COAST.

BAY OF BENGAL—GODAVERY DISTRICT.

COCANADA.

Beacon on Point Gordeware or Godavery.

THE Port Officer, Madras, has given notice that, as a guide to vessels approaching the harbour of Cocanada, and in order to distinguish the foul ground extending off Point Gordeware, a *beacon* with a *pole* and *basket* is erected on the point.

The *beacon* stands on a tripod beam 28 feet above the northern extremity of the Sandy Point, and bears from the Hope Island lighthouse N. E. by N. ½ N.; the Old Cocanada lighthouse S. E. by E. ¾ E.; and the *red* buoy moored off Point Gordeware S. by W. ½ W., nearly, distant 3¾ nautic miles.

Note.—Vessels should not pass between the *beacon* and the *red* buoy, between which a long dangerous sand bank extends, in some parts nearly dry at low water ordinary springs, and on which the sea breaks very heavily at times.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 1st September* 1883.

NOTIFICATION.

The 5th September 1883.—The following Notice to Mariners is published for general information.

A. P. MACDONNELL,
Offg. Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, GENERAL (MARINE) DEPARTMENT.

NOTICE TO MARINERS.—(No. 42).

INDIA—WEST COAST.

BOMBAY HARBOUR.

Occulting Light on Sunk Rock.

NOTICE has been received from the Government of Bombay that, on and after the 1st April 1884, an *occulting* light will be exhibited from a lighthouse recently erected on Sunk Rock, Bombay Harbour, and that the Inner lightship will be withdrawn.

The Occultations last for periods of *five seconds*, the duration of the light in each period being from *three* to *four seconds*, and the eclipse from *one* to *two seconds*.

The light will show through an arc of 244°, or from S. 7° W. round Eastward to N. 69° E, and is a red light with two white direction beams, one showing between S. 7° W. and S. 30° W, and the other between N. 15° E. and N. 31° E, and will be visible from a distance of 14 sea miles.

The lighthouse, which is a circular masonry tower of a dark gray colour, approaching to black, is elevated 71 feet above the mean level of lowest ordinary spring tides.

The illuminating apparatus is *dioptric*, or by lenses, of the 3rd order.

Note.—The proposed interchange of lights between the Prongs Reef and the Kundari island will not be made.

The bearings are magnetic and from seaward.

By direction of the Government of Bengal,

J. MENTEITH BREBNER,
Offg. Port Officer of Calcutta.

PORT OFFICE, *Calcutta, the 4th September* 1883.

JUDICIAL DEPARTMENT.

No. 2046A.

The 12th September 1883.—Baboo Ram Chunder Dhur, Second Munsif of Manickgunge, in the district of Dacca, is vested with the powers of a Judge of a Court of Small Causes within the local limits of his jurisdiction for the trial of suits cognizable by such a Court up to the amount of Rs. 25.

The 17th September 1883.—Baboo Rajnarain Mookerjee, B.L., is appointed to act as a Munsif in the district of Bhagulpore, and to be ordinarily stationed at Begooserai, during the absence, on leave, of Baboo Grish Chunder Chatterjee, or until further orders, with effect from the date on which he joined his appointment.

Moulvie Najmal Huq is appointed to be an Honorary Magistrate for the Arrareah Bench, in the district of Purneah, and is vested with the powers of a Magistrate of the third class.

Moulvie Mahomed Zahia, an Honorary Magistrate of the Sadikpore Bench, is appointed to be also an Honorary Magistrate of the Jhaogunge Bench, in the district of Patna, and is vested with the powers of a Magistrate of the second class.

Roy Joy Kishen, an Honorary Magistrate of the Sadikpore Bench, in the district of Patna, who exercises the powers of a Magistrate of the second class, is empowered to try cases singly, or on the Benches, without the presence of a Stipendiary Magistrate

Baboo Radha Krishna Sen, Second Subordinate Judge, Burdwan, is appointed temporarily to be Additional Subordinate Judge of Pubna, with effect from the date on which he joined his appointment.

This cancels the order of the 22nd ultimo, appointing Baboo Menu Lall Chatterjea, Subordinate Judge of Beerbhoom, to be temporarily Additional Subordinate Judge of Pubna.

The 20th September 1883.—Baboo Poorna Chunder Mitter, B.L., is appointed to act as a Munsif in the district of Chittagong, and to be ordinarily stationed at the sudder station of that district, during the absence, on leave, of Baboo Durga Churn Sen, or until further orders.

The 21st September 1883.—Baboo Dwarka Nath Mookerjee, Temporary Deputy Magistrate and Deputy Collector, Mozufferpore, is vested with the powers of a Magistrate of the second class.

Mr. C. A. S. Bedford, Assistant Commissioner, Hazaribagh, is vested with the powers of a Subordinate Judge.

LEAVE OF ABSENCE TO MUNSIFS.—*The 17th September* 1883.—The leave for two months, viz. one month under rule 2, section 72, chapter V, and one month under rule 1(*a*), section 72 of the Civil Leave Code, granted to Baboo Grish Chunder Chatterjee, Munsif of Begooserai, in the district of Bhagulpore, and notified in the *Calcutta Gazette* of the 5th September 1883, Part I, page 745, is commuted to leave for two months under rule 2, section 72 of the Civil Leave Code.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 17th September 1883.—Under section 2 of Act II (B.C.) of 1867 (an Act to provide for the punishment of public gambling and the keeping of common gaming-houses), the Lieutenant-Governor extends all the sections of the said Act to the town of Mozufferpore, as comprised within the limits of the Mozufferpore Municipality, in the district of Mozufferpore.

F. B. PEACOCK,
Secretary to the Govt. of Bengal.

[First Publication.]

NOTIFICATION.

The 10th September 1883.—It is hereby notified, under the provisions of section 15, Act V of 1861, that whereas the villages of Ghagra, Chak Nazoo, Pan Ghagra, and Churkhai, within the jurisdiction of the Kotwali police station, in the district of Mymensingh, are still in a disturbed and dangerous state owing to the existence of disputes regarding the measurement of lands and collection of rents, the Lieutenant-Governor has sanctioned the retention, for a further period of six months, commencing from 17th May 1883, of a special police force of one head-constable and eight constables, to be quartered in the above-mentioned villages.

The cost of the force, as noted below, will be assessed on and levied from the proprietor and the inhabitants of the above-named villages by the Magistrate of the district in proportion to their respective means :—

	Rs.	A.	P.
One head-constable, third grade	15	0	0
Four constables, third grade, at Rs. 7 each per month ...	28	0	0
Four ditto, fourth grade, at Rs. 6 each per month ...	24	0	0
Pensionary charges at 2 annas per rupee	8	6	0
Contingent charges at 10 per cent.	7	9	0
Stationery	1	0	0
Oil for lighting	1	0	0
House-rent at 10 per cent. per month	10	0	0
Total monthly cost ...	94	15	0×6
Total ...	569	10	0
Cost of clothing at Rs. 4 per man per annum for six months	18	0	0
Total cost for six months ...	587	10	0

F. B. PEACOCK,
Secretary to the Govt. of Bengal

PUBLIC WORKS DEPARTMENT,—BENGAL.

The 22nd September 1883.

No. 316.—*Leave.*—Mr. O. Hœrnle, Executive Engineer, fourth grade (temporary rank), and Under-Secretary to this Government in the Public Works Department, is granted twelve months' furlough, under section 131 of the Civil Leave Code, with effect from the 23rd October 1883, together with subsidiary leave for ten days under section 64.

R. BEADON, *Lieut.-Col., Deputy Inspector-Genl. of Jails, Bengal.*

HIGH COURT NOTICES.

High Court, Original Side.

NOTIFICATION.

Dated 14th September 1883.

THE Hon'ble the Chief Justice has granted Mr. C. T Davis, Chief Clerk of the High Court, extension of leave on furlough in India, under section 131, chapter 10 of the Civil Leave Code, for 12 months, from the 23rd instant.

R. BELCHAMBERS, *Registrar.*

High Court Mukhtyars.

NOTIFICATION.

IN supersession of the notification dated the 10th August 1883, published in the *Calcutta Gazettes* of the 15th, 22nd, and 29th August 1883, the High Court are pleased to order that the security required by Rule 1 of the Rules made by the High Court on the 17th May 1882, under section 16, clauses (*a*), (*b*), and (*c*), Act XVIII of 1879, shall be deposited with the Registrar of the Court, on its Appellate Side, on or before the 17th November 1883.

Failure to deposit such security by the prescribed date will result in the defaulter's name being struck off the list of selected applicants

By order of the High Court,

C. A. WILKINS, *Offg. Registrar.*

FORT WILLIAM, *the 31st August* 1883.

TREASURY NOTICE.

UNCOVENANTED Deputy Collector Baboo Khogendranath Mittra has been temporarily placed in charge of the Khulna Treasury and authorized to draw bills on other treasuries.

J. MONRO, *Commissioner.*

COMMR'S. OFFICE, PRESIDENCY DIVISION, *Calcutta, the 21st September* 1883.

EDUCATIONAL NOTICES.

Subordinate Educational Service.

The 12th September 1883.—Baboo Thakur Das Rakhit, Second Master, Pooree Zillah School (class VI), is allowed leave of absence for a month and eleven days, under section 133, chapter X of the Civil Leave Code, in extension of the leave granted to him under the orders of the 26th August 1882.

The 13th September 1883.—Baboo Mati Lal Mitra, Head Master, Julpiguri Zillah School (class VI), is allowed leave of absence for six months, under sections 127 and 128, chapter X of the Civil Leave Code, with effect from the 4th August 1883.

Baboo Mohini Mohan Bose, B A., Second Master, Furreedpore Zillah School (class VII), is appointed to officiate as Head Master, Julpiguri Zillah School, and to act in class VI, *vice* Baboo Mati Lal Mitra, on leave.

The 18th September 1883.—In supersession of the orders of the 8th August 1883, Mr. E. Cleghorn, Head Master, Colinga Branch School (class VI), is appointed to officiate in class V, *vice* Baboo Khiroda Chandra Roy Chaudhuri, M.A.

G. BELLETT, *Offg. Director of Public Instruction*

Orders by the Vice-Chancellor and Syndicate of the Calcutta University.

IN consequence of unforeseen delay in printing examination papers the University Examinations in Arts of 1883 will be held on the undermentioned dates, instead of the dates notified in the *Indian Gazette* of August 11th, 18th, and *Calcutta Gazette* of August 15th.

Entrance Examination and First Examination in Arts on Monday, the 17th December, and following days.

Applications from candidates for admission to the Entrance and First Arts Examinations must be lodged with the Registrar on or before the 17th November.

G. BELLETT, *Registrar.*

SENATE HOUSE, *the 18th September* 1883.

NOTIFICATION.

IT is hereby notified that for the ensuing half-yearly departmental examination of Junior Civilians, Deputy Magistrates, and others, commencing on the 5th November 1883, two local committees will be formed in the Burdwan Division, viz. one at Midnapore for examinees employed in the district of Midnapore, and another at Burdwan for those employed in the districts of Burdwan, Bankoora, and Beerbhoom. Officers employed in the districts of Hooghly and Howrah, who have to appear at the examination, will be examined by the local committee at the Presidency, and must appear in the office of the Commissioner, Presidency Division, at Calcutta.

J. BEAMES, *Commissioner.*

BURDWAN COMMR's. OFFICE, *Chinsurah, the 22nd September* 1883.

NOTICE is hereby given that the next departmental examination of Assistant and Deputy Magistrates, and of officers in the Police, Jail, Medical, and Forest Departments in the Chota Nagpore Division will be held at Ranchi, and will begin on Monday, the 5th November 1883.

J. F. K. HEWITT, *Commissioner of Chota Nagpore.*

RANCHI, *the 18th September* 1883.

NOTICE is hereby given that the ensuing half-yearly departmental examination of Assistant Magistrates, Deputy Magistrates, and others serving in this Division will be held at Bankipore in the Commissioner's Office on Monday, the 5th November, and following days.

F. M. HALLIDAY, *Commissioner.*

PATNA COMMR's. OFFICE, *Bankipore, the 22nd September* 1883.

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 1019B.*

REVISED OPIUM NOTIFICATION.

NOTICE is hereby given that the Tenth Sale of Opium, the provision of 1881-82 will be held at the Government Opium Sale-room, No. 2, Bankshall-street, on Wednesday, the 26th September 1883, at 11 A.M., and will comprise 4,450 chests, viz :—

	Chests.
Opium manufactured at the Patna Factory, consisting of 272 chests of 76° consistence, and 1,953 chests of 77° consistence	2,225
Do. do. at the Ghazipore Factory, consisting of 72° consistence ...	2,225
Total ...	4,450

2. The general conditions of the sale now advertised will be the same as usual. They may be ascertained by reference to the Notification issued on the 28th November 1882, and published in the *Government* and *Exchange Gazettes*, or on personal application at the office of the Board of Revenue.

3. The latest dates for deposit and clearance will be the 1st and 19th October 1883, respectively—that is to say, no Bank of Bengal Receipts, Government Promissory Notes, or other public securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the sale-room will be received after 3-30 P.M. of Monday, the 1st October 1883, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Friday, the 19th October 1883.

4. In addition to the quantity above advertised for sale, the following quantities, more or less, of the Opium manufactured at the Patna and Ghazipore Factories will be brought to sale in the present year about the dates specified below. PART IA.

Orders and Notifications by the Government of India, &c.

[*Reprinted from the Gazette of India.*]

The following orders, issued by the Government of India, in the Department of Finance and Commerce, are republished for general information.

F. B. PEACOCK,

Secretary to the Govt. of Bengal.

NOTIFICATIONS.

Simla, the 14th September 1883.

No. 3273.—In accordance with the Resolution of the Government of India in the Department of Finance and Commerce, No. 112, dated 6th April 1883, notice is hereby given that the original Promissory Notes mentioned on the subjoined list (of which duplicates have been applied for on the allegation that the originals have been lost) and that mentioned in the last case, of which renewal is applied for, will be discharged at the General Treasury of Fort William on 31st December 1883, with all interest due upon them, and that upon that date all further interest upon such Notes shall cease :—

Advertisements.

[N.B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette, cannot be received after Noon on Monday.]

LAND SALE NOTICES.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of the Sonthal Pergunnahs will be put up to sale at the Dumka Collectorate on Friday, the 28th September 1883, corresponding with 13th Assin 1290 B.S.

The purchaser will be subject to the following conditions of sale :—

Conditions of Sale.

1*st*.—The estate to be sold revenue-free to the highest bidder above the upset price. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him.

2*nd*.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3*rd*.—If the amount of the purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4*th*.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Notification.

IT is hereby notified for information of the public that a duplicate receipt for an amount exceeding Rs 20 is liable to a stamp duty of one anna under Article 23 (*a*). Schedule I of Act I of 1879, and should, under section 16 of the Act, be stamped before or at the time of execution If the duty payable on the duplicate receipt is denoted by an adhesive stamp, such stamp should be cancelled *so that it cannot be used again* Any person signing a duplicate receipt when the amount exceeds Rs 20 without the same being duly stamped, is liable to be criminally prosecuted under section 61, Act I of 1879, and punished with a fine which may extend to Rs. 500; and any person neglecting or omitting *to effectually cancel the adhesive stamp* and in payment of stamp duty renders himself liable to a fine which may extend to Rs. 10).

The attention of banking, mercantile, and trading community is especially drawn to the requirements of the law on this point

G. M. GOODRICKE, Collector of Calcutta

RESOLUTION ON THE ANNUAL REPORT ON THE ADMINISTRATION OF THE TRIBUTARY STATES OF ORISSA FOR THE YEAR 1882-83

POLITICAL.

Dated Darjeeling, the 12th September 1883.

RESOLUTION.

READ—

The Annual Report on the Administration of the Tributary States of Orissa for the year 1882-83.

Read also—

The Reports for 1880-81 and 1881-82, and the orders of Government recorded thereon.

A most important question in connection with these Mehals, and their position with reference to the British Government, came under the consideration of Government during the past year. They have hitherto been regarded as forming a part of British India, to which, owing to its backwardness, it was not thought desirable to extend the laws in force in other parts of the Empire. In a case referred to the High Court, however, a Full Bench decided, just before the commencement of the year, that the Mehals are not a part of British India. This decision, though not a unanimous one, raised the question of the actual status of the Mehals, and the Lieutenant-Governor considered it advisable to address the Government of India on the subject, and to suggest

that it is desirable to affirm by an authoritative declaration the fact of the inclusion of the States in British territory.

2. In consequence of the death of the Maharajah of Mohurbhunj, that State, the largest in the Tributary Mehals, has been brought directly under Government management. The relations of the deceased Maharajah were desirous of having the management of the State placed jointly in the hands of the two surviving brothers of the late Maharajah; but for various reasons it did not appear to the Lieutenant-Governor that the arrangement would be a desirable one. The appointment was first offered to the Native Assistant Superintendent of the Tributary Mehals, and on his declining it, a European officer has been appointed to be Manager.

3. Banki having been annexed to Cuttack from the 1st January 1882, there was one State less under the Superintendent's charge than during the preceding year. In the past year he had under direct management five States, two of which—Angul and the Khondmals—are Government estates, and the other three—Baramba, Dhenkenal and Mohurbhunj—Ward estates; the remaining 14 States were under the management of their respective Chiefs subordinate to the Superintendent.

4. Excluding the two Government estates, the annual tribute due from the remaining 17 is Rs. 33,249. During 1881-82 Rs. 10,167 was collected in advance on account of the tribute for the past year, and during 1882-83 all the balance was collected, and Rs. 10,620 was paid in, in addition, on account of the tribute for the current year.

5. Excluding the figures for Keonjhur, which are evidently incorrect, the statistics show that there was an average rainfall of 61·8 inches in the six Mehals for which this information is given. Owing to an ample rainfall in October and November, and the fine weather in December and January, the rice crop was a good one, and the season was generally an extremely prosperous one. As regards health, the year was not so favourable. Epidemics of cholera and small-pox broke out in various parts. There was a very severe epidemic of the latter disease in the Mohurbhunj State, which lasted three months and carried off the Maharajah of that State and his Rani.

6. There was a slight decrease in the number of civil, revenue and miscellaneous cases instituted in the Mehals during the past year as compared with the year which preceded it; the number, however, was still large, being 6 131 as compared with 6,367 in 1881-82 Of these, 3,924 cases, as compared with 2,661 cases in the preceding year, belonged to Dhenkenal. Had not Banki been annexed to Cuttack, the total for the Tributary Mehals would, no doubt, have exceeded that of the preceding year. Including 1,647 cases pending at the commencement of the year, there were in all 7,778 cases for disposal during it. Of these, 181 were disposed of by the Superintendent, 464 by the Assistant Superintendent, and 6,006 by tehsildars and managers. The remaining 1,127 were pending at the close of the year. Civil cases tried by the Rajahs of the different States are not entered in the statement, as the Superintendent is not supplied with statistics regarding them.

7. During the year 2,040 offences were reported. Some of the cases were abandoned, and some were declared false, the number of true cases being 1,543. Including cases pending from the preceding year, the total number of cases which came before the criminal courts during the past year was 1,794. In connection with these cases, 2,585 persons were put upon their trial. Of these, 1,074 were convicted, 1,186 were acquitted, 79 died, escaped or were transferred, and the cases against 246 were pending at the close of the year. Of the persons who escaped, 46 escaped from the Mohurbhunj Jail about the time of the Maharajah's death. As this was the time when the epidemic of small-pox was raging in that State, the escapes were, no doubt, facilitated by relaxation in the vigilance of the guard There had been a large increase in the number of criminal cases during the year 1881-82; the number of cases during that year was 2,165, while the number of cases reported and brought to trial during the past year only amounted to 1,484. This decrease is satisfactory, though it is in part attributable, no doubt, to the exclusion of Banki, in which Mehal 349 criminal cases occurred during 1881-82.

8. The results of the appeals, both civil and criminal, were satisfactory. In civil and revenue cases there were 70 appeals; of these the original orders

were confirmed in 36 cases, in 3 the appeals were rejected summarily, in 8 dismissed for default, in 1 case the order was modified and in 1 it was reversed; 9 cases were remanded and 12 were pending at the close of the year. Out of 31 criminal appeals, the original orders were upheld in 23, modified in 1, and reversed in 5 cases; 1 appeal was rejected and only 1 was pending at the end of the year.

9. No orders have yet been passed on the representations made by the Maharajahs of Mohurbhunj and Keonjhur, during the year preceding that under report, regarding the rules on the subject of catching wild elephants, as the settlement of this question will depend on the ultimate decision which may be arrived at regarding the status of the Tributary Mehals. During the past year accordingly several of the Chiefs took out licenses under the rules, and paid the prescribed royalty on the animals caught.

10. Some progress has been made in the arrangements for introducing a system of forest conservancy into such parts of the Tributary Mehals as are under direct management. Mr. Davis, Deputy Conservator of Forests, was engaged in examining and marking out the tracts in Angul which are to be formed into forest reserves. The examination has shown that it is worth while to preserve the forests, and the Superintendent considers that the blocks selected are suitable for the purpose. There is some difficulty about determining the boundaries between Angul and the bordering States which will eventually have to be removed. The Superintendent proposes to consider this question in connection with the resettlement of Angul, as the present settlements come to an end in 1887, and the Lieutenant-Governor will await the seperate report which the Superintendent promises to submit on the subject. Mr. Davis had not leisure to visit the Khondmal forests, and these, as well as the forests in Mohurbhunj and Dhenkenal, remain to be examined. It may be possible to depute an officer from the Forest Department to undertake the work during the ensuing cold season.

11. But little was done during the year to improve the internal communications in the Mehals. A new road was, however, constructed in Dhenkenal, and a portion of another road which runs through that State was also completed. The completion of the portion of this latter road which runs through Atgur has been delayed by the obstructiveness of the Rajah of that State, who objects to allow a road to run through his State which will benefit the Dhenkenal State, against which he has the alleged grievance that it, in the times of the Maharattas, absorbed a portion of Atgur. The Lieutenant-Governor is surprised at such meaningless opposition, especially as the road must also benefit Atgur; he trusts, however, that the correspondence which the Superintendent states is going on between himself and the Rajah, and the interview which he was about to have with that Chief, may have the effect of convincing the latter of the shortsightedness of his policy, and may be followed by the speedy construction of the road. The opening of the Kumarkhole Pass, in the Khondmals, during the year, will, it is stated, facilitate communication between the South and the Central Provinces. The Superintendent notices the unsatisfactory state of the two principal roads in the Mehals which run from Cuttack to Sumbulpore; they are below flood-level, and are not metalled or bridged; they have no side drains and are impassable during the greater part of the rains. Bridging and metalling these roads would, no doubt, be very costly; but something might be done towards raising them sufficiently to keep them open for traffic throughout the year.

12. There was a very satisfactory increase in the number of schools during the past year. Excluding the figures for Banki, the number of schools was 920 in 1881-82 as compared with 1,004 in 1882-83, the number of pupils being 11,878 and 12,576 in these years respectively. Middle English secondary schools increased from 3 to 4, and vernacular schools of the same class from 7 to 8. Upper primary schools increased from 46 to 52, and lower primary schools from 853 to 928. There is only one girls' school in the Mehals, established by the Cuttack Baptist Mission at Chhagan in Atgur. Female education is not, however, limited to this school, as girls read in some of the boys' schools. The Mehals are divided into four educational circles, each of which is in charge of a Sub-Inspector, and under some of them inspecting

pundits are employed. The total cost of the schools in the Mehals was Rs. 59,331, of which Rs. 7,724 was contributed by Government.

13. The postal arrangements continue to work satisfactorily. Every State is now in communication with Cuttack. The Mohurbhunj line has been taken up, and is now carried on at the expense of Government. The Chiefs are required to contribute only to the cost of the post-office establishments and contingencies, as the offices are able to pay for the runners; and the monthly sum paid by them has accordingly been reduced from Rs. 250 in 1880-81 and Rs. 159 in 1881-82 to Rs. 145 during the past year.

14. During the year preceding that to which the report relates, the collections in Angul did not amount to the demand. The results, however, during the past year were much better. Not only was the whole demand on account of land revenue, which, including arrears, amounted to Rs. 36,072, realized, but Rs. 781 on account of the current year's demand were also collected. The Superintendent alludes to the report called for in the Resolution on the Report for 1881-82 on a change in the form of accounts in Angul. Some alteration was necessitated by the difficulty in preparing the statement of expenditure on account of payments being partly made from the Cuttack Treasury. The report has been under the consideration of Government, and since the close of the year a change in the form of accounts and the introduction of the sub-divisional treasury system into Angul has been sanctioned. The Lieutenant-Governor trusts that with these changes all difficulties will disappear. Life tenures, amounting in area to 30,073 acres, were at the last settlement granted to their holders either rent-free or at half rent. The death of some of the grantees has rendered the re-assessment of their holdings necessary, and out of 22,126 acres, which have already been re assessed, or have become liable to re-assessment, the holders of 14,000 acres have died within the last three years. This materially increased the amount of work to be done; and there being at the end of the past year 34 cases relating to lands comprising 13,240 acres to be disposed of, the Superintendent submitted a proposal for an increase of establishment which has since been sanctioned. In Angul are found the Pans, a class, as a rule, of habitual thieves and burglars. The Pans, notwithstanding their habitually criminal propensities, furnish many of the village watchmen, as the Dosadhs do in Behar; and in order to bring them under control, Mr. Ravenshaw, when Superintendent, appointed a sirdar and ten beharas, to whom grants of land were made, and to whom he assigned the duty "of inducing their brethren to settle down as peaceful subjects, and to aid and assist the police in the detection of crime." Although occasionally suspicion attaches to some of the Pan beharas of receiving from thieves a portion of the booty as the price of their silence, there does not appear to have been a single instance in which this offence has been brought home to any of these men, and the arrangements made by Mr. Ravenshaw are stated to have worked favourably on the whole, and to have been the means, not only of preventing, but of detecting crime, which would otherwise never have been found out. Every effort is now being made to induce the Pans to settle down as cultivators, and there "appears to be an increasing desire amongst them to take to agriculture, and applications from them for the lease of waste lands are more numerous than before, and are freely granted." The Lieutenant-Governor wishes that every encouragement should be given to this desire. The success of recent endeavours to induce the Mughya Domes in Chumparun to abandon their former predatory habits leads Mr. Rivers Thompson to hope that a similar result may be obtained amongst the Pans.

15. Shortly before the commencement of the year, a serious rising among the Khonds of Kalahandi, a State in the Central Provinces adjoining Boad, was reported to this Government, and the District Superintendent of the Gurjhat Police was ordered to the frontier, so as to be in readiness in the event of any attempt on the part of the Khonds of the Gurjhats, or of the Khondmals, to join those of Kalahandi. The original cause of the outbreak was shortly this:—The Rajah of Kalahandi, who had oppressed and endeavoured to break up the Khond clans, having died, an adopted son was chosen to succeed him. A son previously adopted, but whose adoption had been annulled, was a rival claimant, and on being superseded, a leading man of his faction, by persuading the Khonds that they should try to recover

their ancient rights, successfully incited those in the north-east part of the State, which borders on the Tributary Mehal of Boad, to rise. They rose and plundered a number of villages, but subsequently were induced to restore the property plundered from some of the villages, and it was hoped that matters would settle down. While, however, enquiries were being made by the authorities of the Central Provinces into the claims of the Khonds, a more serious outbreak took place, in which the Khonds murdered a large number of Kultias. Mr. Sandilands, Assistant Superintendent of Police, Bengal, who, before the second outbreak, had been sent to the frontier with additional men, crossed the frontier with a police force, entered Kalahandi, and lent the authorities assistance in quelling the outbreak and arresting a number of the ringleaders in the murders which had been committed. He remained in Kalahandi till July, when the necessary arrangements having been completed by the authorities in the Central Provinces, his presence was no longer required, and he and the police were withdrawn. No attempt was made by the Khonds within the frontier to join the insurgents in Kalahandi.

16. The minor Chief of Dhenkenal was, during the past year, a resident of Cuttack, at which town he is being educated in the Ravenshaw College, his private tuition being in the hands of Baboo Piari Mohun Sen, Deputy Inspector of Schools, of whose services the Superintendent speaks highly. Mr. Smith thinks, however, that the Chief is attaining a position in which it is desirable to obtain the services of a more qualified tutor, and he has recently submitted proposals for the appointment of a European tutor to supervise the education of this Chief, as well as that of the minor Chief of Mohurbhunj. The Lieutenant-Governor has not, however, considered it necessary at present to appoint such an officer. The total demands on account of land revenue and other demands in the Dhenkenal State was Rs. 2,11,000. Of this amount, excluding Rs. 2,020 collected in advance, Rs. 2,02,683 was collected and Rs. 1,435 remitted, the balance at the close of the year being Rs. 6,882 The smallness of the balance uncollected at the close of the year reflects credit on the management. There were 64 prisoners in the Dhenkenal Jail at the commencement of the year, and during it 198 were admitted and 162 were released, 40 remaining in confinement at its close. The total expenditure on the jail was Rs. 2,227. The State will remain under direct management for only three years longer, as, on the expiration of that period, the minor Chief will attain his majority. It is to be hoped that, when he assumes the administration of his State, he will adopt the same enlightened policy as his father—a policy which, continued as it has been since his death, has made Dhenkenal the most advanced of all the Tributary Mehals.

17. Satisfactory progress has been made in the new settlement in Baramba; the measurements have been completed and the work of assessment is now going on. In consequence of the state of affairs in Duspulla, and the want of cordial relations between the Chief of that State and his Dewan, the Dewan of Baramba was transferred to that State, his place being taken by the Dewan of Duspulla. The Lieutenant-Governor trusts that the arrangement may prove satisfactory. The total demand for the year was Rs. 28,773; of this Rs 18,109 were collected and Rs. 384 were remitted, leaving an outstanding balance of Rs. 10,280. The largeness of this amount is, the Superintendent states, due to the fact that the State accounts had not been properly kept, and the people had not been accustomed to pay with regularity, and hence some indulgence had to be shown to them. There is much room for improvement here. It is satisfactory that not only have all the old debts which existed when the State came under direct management been paid off, but Rs. 5,000, or half of the sum of Rs. 10,000, which was borrowed at a moderate rate of interest for their liquidation in addition.

18. The death of the Maharajah of Mohurbhunj during the year from small-pox has been already noticed. Almost every member of his family was attacked by the disease; but they all recovered, with the exception of the Maharani and her sister. Besides Mohurbhunj Proper, the State possesses zemindaries in Balasore and Midnapore; those in the former district are small and are under the General Manager of the State. The zemindari of Nyabasan in Midnapore, is, however, an extensive and important one, and it has been

decided to leave it under the Collector of Midnapore, at least until settlements have been concluded and a rent-roll prepared. The Superintendent remarks—

"I cannot close this short review of the Mohurbhunj State without expressing my sincere regret at the untimely death of Maharajah Krishna Chunder Bhunj Deo. By building roads and founding schools, he did much to improve his State. His princely donation of Rs 20 000 for the perpetuation of the Ravenshaw College, his donation of Rs 5,000 to the Balasore Pilgrim Hospital, and his liberal gifts for scholarships, will cause his memory to be held in respect throughout the Province"

In these remarks the Lieutenant-Governor entirely concurs. The Maharajah was a liberal and enlightened Chief, and his death is much to be deplored.

19. The Lieutenant-Governor has perused with great satisfaction the remarks made by the Superintendent on the administration of the Atmullick State. This is one of the poorest and most sparsely populated of the Tributary Mehals; but notwithstanding the smallness of the means at his disposal, the Rajah manages to carry on the administration of it successfully. He is described as being active, intelligent and industrious; and as he personally supervises every department, his people are happy and contented. Considering how small his income is, it is no slight praise that the Superintendent bestows, when he speaks of the Rajah as one of the best in the Tributary Mehals. Mr. Rivers Thompson desires that an expression of his great satisfaction may be conveyed to the Rajah at his maintaining the high character as an administrator which he has all along borne

20. The unsatisfactory state of affairs in the Mehal of Boad was noticed in the Report for 1881-82. In the Resolution on that Report, the Lieutenant-Governor hoped that the Chief had, by the time the remarks were recorded, acted upon the Superintendent's advice and appointed an efficient Dewan in place of the officer who was holding that appointment when the report was written. It now appears that he had not done so. He subsequently, however, applied to the Superintendent for a Dewan, and a suitable officer has been nominated. Now that all possible compunctions on the part of the Rajah to the appointment of a new man have been removed by the death of the old Dewan, the Lieutenant-Governor trusts that the Chief will accept the Superintendent's nomination and appoint the officer whom he has suggested. It is satisfactory to learn that, although a new Dewan was not appointed, there has been an improvement in the administration; the Rajah took more interest in the work; there were fewer complaints against the administration; and work was disposed of with less delay. The Lieutenant-Governor trusts that the improvement may continue, and that the Rajah will also gradually pay off the debts in which he is still involved.

21. The change of managers in Duspulla has already been alluded to; since the interchange of managers the administration in this State has worked smoothly. The Rajah is still involved in debt to the amount of above Rs. 11,000. The Superintendent states, however, that he has agreed to set aside the income from a part of the killah, amounting to Rs. 2,542 per annum, for the purpose of clearing himself; and if this arrangement is persevered in, and no fresh debts are contracted, the State should be free from encumbrances in less than five years.

22 Out of a demand of Rs. 23,119 in Hindole, Rs. 22,935 were collected during the year, only the small balance of Rs. 184 being unrealized at its close. This speaks well for the management, when it is found at the same time that the people appear to be contented, and that complaints are much less frequent than formerly. The Rajah, though said to be well disposed, is not well educated, and much advantage has been gained from the assistance and advice of his sheristadar, who is, it is stated, a man of probity, and is apparently, judging from results, a good man of business.

23. The report concerning Keonjhur is again most satisfactory, and the Lieutenant-Governor learns with much pleasure that the Maharajah still continues to administer his State in a just and liberal manner. The relations which exist between him and his people are all that could be desired. Important criminal and civil cases are heard by the Maharajah personally, the criminal cases being disposed of by him, unless it is necessary to commit them, in which case they are finally disposed of by the Superintendent. The postal line kept up by the Maharajah between Keonjhur and Bhuddruck is said to be very slow, and

the runners under little or no control. The Superintendent has suggested to the Maharajah the desirability of either making over the line to the Imperial Postal Department, paying any deficit till the line can pay itself, or of making it over to be included in the Gurjhat post. The Lieutenant-Governor will await a further report on the subject after the Superintendent has received a reply from the Maharajah. The Maharajah should not postpone his intention of establishing a dispensary. The value of such an institution would be great.

24. The report regarding the state of affairs in Nilgiri is far from satisfactory. It is stated that the Rajah, though intelligent, is an unscrupulous and exacting landlord, and hence complaints of oppression are by no means of rare occurrence. The services of Baboo Bholanath Das, a Sub-Inspector of Schools, have recently been lent to the Rajah. His services as Dewan will, it may be hoped, tend to the establishment of a more effective administration, and of a more cordial relationship between the Rajah and his people. A disturbance has recently arisen in the State, owing to the Rajah having adopted a son of the late Chief of Mohurbhunj, to the exclusion of a son of his own brother, whom he, it is alleged, had previously adopted. The necessary orders regarding the course to be adopted for the restoration of tranquillity have been issued by the Superintendent to the Collector of Pooree as *ex-officio* Assistant Superintendent of the Tributary Mehals. The Lieutenant-Governor will await a further report regarding these disturbances; he will also be glad to know whether there is any improvement in disposing of cases without the delay which the Superintendent thinks has hitherto taken place in the administration of justice.

25. The report is very full of information, and the thanks of Government are due to Mr. Smith for the care and completeness with which it has been prepared. The Assistant Superintendent, Baboo Nunda Kishore Das, who, during the year, was offered, but declined, the managership of the Mohurbhunj State, has continued to maintain his former high character, and the Lieutenant-Governor has perused with satisfaction the Superintendent's remarks in paragraphs 456 to 470 of his report, on the other officers employed under him in the administration of the Tributary Mehals.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Superintendent of the Tributary States of Orissa for information and guidance.

Ordered also that a copy of the Report, together with a copy of the Resolution, be forwarded to the Government of India in the Foreign Department, for information.

Ordered also that a copy of the remarks regarding the conduct of the officers engaged in the administration of the States during the year be forwarded to the Appointment Department of this Office for information.

Ordered also that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

F. B. PEACOCK,

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF THE STAMP DEPARTMENT FOR THE YEAR 1882-83.

STAMPS.

Darjeeling, the 20th September 1883.

RESOLUTION.

READ—

The Report on the Administration of the Stamp Department for the year 1882-83.

Read also—

The Report for the year 1881-82, and the Resolution recorded upon it.

The Acts under which the stamp revenue of the year was levied were, as in 1881-82, the Indian Stamp Act I of 1879 and the Court Fees Act VII of 1870. No change was introduced into either of these during the year, but the rules under both the Acts were modified in certain important points, and effect has been given in several particulars to the wishes of the mercantile community and the general public. The year under review witnessed the introduction of a new arrangement for impressing, by a coloured impression, with one anna duty, the skeleton forms of a variety of important documents, including promissory notes payable on demand, brokers' notes, delivery orders, shipping orders, proxies, receipts, cheques, and other documents requiring a stamp duty of one anna. The new scheme has proved highly popular with the public of Calcutta, where it is in force, and the establishment and machinery originally provided for the purpose have proved inadequate to the demands upon them. The Collector of Calcutta reports that, during the months of January and February 1883, no less than 157,055 document forms were presented to be stamped; while on one occasion the numbers reached the enormous figure of 27,500 in a single day. Arrangements have been made to enable the Collector to keep pace with the demands of the public, and to improve the quality of the die now in use, concerning which complaints have been received. The proposal to which reference was made in the Resolution recorded last year, for introducing the Madras system of defacing impressed labels by a coloured date impression, was developed during the year under review, and a scheme has been proposed by the Superintendent of Stamps for stamping and defacing, by a single process, the instruments on which adhesive labels have to be affixed and defaced by the Collector under the rules of the Stamp Act. This plan has not been fully explained, and, when it is to be considered, it must be separately submitted. Meanwhile, no change can be made during the currency of the contract with Messrs. De la Rue and Co., which will only expire with the close of 1891.

2. Various changes and improvements in minor points of detail were also introduced in the working of the Department during the year under review. The Head Assistant to the Collector of Stamp Revenue, Calcutta, has been empowered to perform the duty, hitherto imposed upon the Collector himself, of initialing and countersigning documents stamped by him under Rule 10 of the Stamp Rules. Provision has been made for the writing on impressed sheets bearing the word "hundi" of promissory notes drawn or made in British India and chargeable with a duty of six, ten, or twelve annas. The rule which relates to the use of foreign bill stamps has been modified so as to make it applicable to bills-of-exchange, cheques, and promissory notes, drawn or made out of British India and chargeable with a duty of more than one anna. A new rule has also been issued legalising the combined use of an impressed sheet and an adhesive share-transfer stamp, when any instrument of transfer of shares in a company or association is written on an impressed sheet, and the value impressed upon it is subsequently, in consequence of a rise in the market value of such shares, found to fall short of the amount of duty chargeable under the Act. The change which is embodied in this rule was introduced at the instance of Messrs. Schœne, Kilburn and Co., and will remove a serious source of inconvenience to the mercantile public.

3. An important change was introduced by Government order No. 1733, dated 16th June 1882, by which foreign bills-of-lading, *i.e.* bills-of-lading executed out of British India and relating to property to be delivered in British India, were exempted from payment of stamp duty. This modification in the law has occasioned a considerable falling off in the stamp revenue under the head of impressed labels, but has afforded a large measure of relief to foreign shippers. Copies and extracts from baptismal marriage and burial registers have also, in certain cases, been exempted from stamp duty.

4. In addition to those mentioned above, certain other proposals for modifications in the rules under the stamp laws engaged the attention of the Government during the year. Among these was the proposal made by the Famine Commissioners to reduce the rates of stamp duty on awards by arbitrators. An examination of the records of the civil and revenue courts, however, showed that the higher rates levied under the Stamp Act I of 1879 on these awards, when the property involved was of higher value than Rs. 100, have had no apparent effect in discouraging recourse to arbitration. Arbitration is not popular in Bengal, and there are no signs that it is likely to become so. The Lieutenant-Governor accordingly declined to recommend any change in the law in this respect. Another proposal, which originally emanated from the Government of the Punjab, had for its object the reduction of the rates of duty leviable in cases of partition of revenue-paying estates. On enquiry by the Board of Revenue, it was found that so far were such partitions from being discouraged by the present state of the law, that it had been found necessary to consider whether specific restrictions should not be imposed on the right to demand partition, where the Government revenue on the whole estate was below a certain amount. The particular measures also which the Punjab Revenue authorities proposed to adopt had reference only to temporarily-settled provinces, and were inapplicable to Bengal. The Government of India were informed accordingly. A suggestion was made to Government by the Board of Revenue, and also independently by the District Judge of Sarun, that the opportunity of amending the Court Fees Act should be taken to render stamps necessary on written statements filed by defendants in civil suits under section 110 of the Code of Civil Procedure. It appeared that, on the strength of a ruling of the Bombay High Court, the practice which had formerly prevailed of stamping such statements was being discontinued, and danger was apprehended to the revenue from judicial stamps. The Lieutenant-Governor, however, was of opinion that the provisions of the law, which permitted the filing of such documents on plain paper, were intentional, and were based on the analogy of those clauses which allowed a defendant to make a verbal defence instead of filing a written statement. Mr. Rivers Thompson considered it undesirable to increase the cost of litigation in this direction, and he therefore declined to submit any proposals for a change in the law to the Government of India.

5. A ruling has been given, based on an opinion expressed by the Advocate-General, who was consulted for the purpose, to the effect that a power-of-attorney executed jointly by a number of persons, which empowers the agent to perform on behalf of the executants certain acts in respect of which their interests are separate and distinct, is an instrument comprising or relating to several distinct matters under section 7 of the Indian Stamp Act, and requires as many stamps as there are separate and distinct powers given under it. This ruling is of considerable importance from a revenue point of view, and is clearly in accordance with equity. On the application of Messrs. Reinhold and Co., a relaxation has been permitted of the rule as to the allowance for stamps used for a bill-of-exchange, &c., which has been spoiled or rendered useless. Previously it had been necessary to produce before the Collector another completed or duly stamped bill-of-exchange identical with the spoiled bill in every particular, except in the correction of the error or omission by which it had been spoiled or rendered useless. Under the new rule, however, it will henceforth be sufficient to satisfy the Collector by evidence that a fresh set of bills-of-exchange has been executed in each case, provided that application for renewal is made within ten working days from the date of the bill-of-exchange in respect of which the renewal of the stamp is required.

6. The financial results of the administration of the Stamp Department during the year, so far as the figures available to the Board would show, are given in the following table:—

Years.	Stamps under Act I of 1879.			Court-fees under Act VII of 1870.			Total.		
	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Refunds and other charges.	Net revenue.	Receipts.	Charges.	Net revenue.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1878-79	28,03,053	1,45,554	26,57,498	79,81,638	2,36,471	77,45,167	1,07,84,690	3,82,025	1,04,02,665
1879-80	33,37,000	1,87,371	31,49,629	81,62,316	3,07,515	78,54,701	1,14,99,316	4,04,886	1,10,94,330
1880-81	32,36,173	1,93,053	30,43,119	81,53,466	3,77,141	77,76,321	1,13,91,637	5,20,197	1,08,71,440
1881-82	33,32,209	1,93,279	31,39,930	87,01,713	3,46,823	83,54,890	1,20,33,923	5,39,103	1,14,93,820
1882-83	33,56,840	1,46,730	32,10,120	88,54,670	3,63,998	86,10,672	1,22,13,510	3,93,719	1,18,20,792

The gross revenue collected under the two Acts, I of 1879 and VII of 1870, during the year under review, was Rs. 1,22,13,510 against Rs. 1,20,23,922 in the previous year, giving an increase of Rs. 1,89,588. The increase was contributed by both classes of stamps—Rs. 36,631 by general stamps, and Rs. 1,52,957 by court-fee stamps. In both cases the receipts exceeded those of any previous year. The decrease in charges shown in the figures given by the Board is only nominal, as the charges on account of stamp paper supplied from the central stores has still to be adjusted. This charge amounted to Rs. 1,36,294 in 1880-81, and to Rs. 1,52,959 in 1881-82, and it is not probable that the final figures will show any reduction at all. The Comptroller-General will be asked to arrange that the amount to be debited on account of stamp paper supplied from the central stores may in future be communicated in time for incorporation in the Board's report.

7. The following table shows the gross collections during the past two years from the sales of the different descriptions of stamps under the heads of judicial and non-judicial respectively:—

Years.	Sales of non-judicial stamps or stamps used under the Indian Stamp Act.										Sales of judicial stamps or stamps used under the Court Fees Act.			Total of both kinds of stamps.
	Impressed labels, including certificate stamps, customs bond forms, and salt and Public Works Department contract and tender forms.	Impressed labels.	Receipt or revenue stamps.	Share-transfer stamps.	Foreign bill stamps.	Hundi or bills-of-exchange stamps.	Notarial stamps.	Advocate, vakeel, and attorney stamps.	Impressed one anna stamps for cheques, bills, &c.	Total of non-judicial stamps.	Adhesive court-fee stamps.	Stamps for copies.	Total of court-fee stamps.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1881-82	22,65,333	7,45,909	2,10,440	5,170	24,080	92,018	1,200	6,200	.....	32,53,350	81,80,710	3,07,875	85,48,615	1,18,06,615
1882-83	22,64,080	6,37,105	1,77,940	44,072	26,570	93,219	2,534	9,225	35,579	34,89,941	83,07 993	3,86,456	86,93,451	1,19,93,392
Increase	90,855	.....	.....	38,902	1,544	1,201	1,334	3,025	35,579	41,730	1,27,283	17,783	1,45,066	1,86,774
Decrease	.....	88,200	32,500	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....
Increase per cent ...	2·7	.....	.....	7·4	4·5	1·3	111·1	48·7	.....	1·3	1·5	4·8	1·6	1·5
Decrease ,, ...	.....	9·7	15·4	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....	.....

There was an increase in 30 districts, and a decrease in the remainder. The most marked improvement occurred in Backergunge, Rs. 50,568, or 11·5 per cent.; Hooghly, Rs. 45,529, or 17·5 per cent.; Midnapore, Rs. 43,375, or 12·4 per cent.; 24-Pergunnahs, Rs. 39,398, or 7·4 per cent.; and Tipperah, Rs. 35,934, or 9·2 per cent. The most considerable decrease was in Calcutta, where it amounted to Rs. 3,07,658, or 14·5 per cent. In Jessore also there was a large apparent decrease of Rs. 81,936, or 16·9 per cent. This, however, was merely nominal, being due to the loss of two sub-divisions which, with another sub-division from the 24-Pergunnahs, were formed into the new district

of Khulna. The following districts each yielded a revenue exceeding three lakhs of rupees:—

Districts.	Non-judicial stamps	Court-fees.	Total.
	Rs	Rs.	Rs.
Calcutta	9,88 305	8,22,229	18,10 534
Mymensingh	1,53,304	4,23,322	5,76,626
Dacca	1,50,677	4,19,445	5 70,122
24-Pergunnahs	86,589	4,80,917	5,67,506
Backergunge	85,214	4,03,823	4,89,037
Tipperah	84,725	3,39,454	4,24 179
Jessore	63,681	3,38,238	4,01,919
Midnapore	73,306	3,19,733	3,93,039
Mozufferpore	96,226	2,59 000	3,55,226
Chittagong	76,420	2,71,534	3,47,954
Nuddea	54,832	2,90,857	3,45,689
Patna	94,264	2,15,977	3,10,241
Hooghly	44,774	2,60,523	3,05,297

Mymensingh, Dacca, and the 24-Pergunnahs, as in former years, come next to Calcutta, each with a revenue exceeding five lakhs. Ten districts yielded more than two lakhs, and ten more than one lakh each. In 12 districts the receipts fell below a lakh of rupees, the lowest on the list, as in former years, being Singbhoom. The incidence of the stamp revenue outside Calcutta, where it amounts to Rs. 4·17 per head of the population, is everywhere small, ranging from Re. ·01 per head in Singbhoom to Re. ·3 in the 24-Pergunnahs, Hooghly, and Noakholly. The general incidence is ony 2 annas 11 pies per head, or at the rate of Rs 1⁸-3-8 per 100 of the population.

8. Of non-judicial stamps, by far the most important description is impressed sheets, which yield more than two-thirds of the total revenue collected under the Indian Stamp Act. The gross receipts under this head during 1882-83 amounted to Rs. 22,64,088, against Rs. 22,03,233 in the previous year. The increase amounted to Rs. 60,855, or 2·7 per cent. In 1881-82 there had been a decrease of Rs. 71,849, and the improvement during the year under review has not yet brought the revenue up to that collected in 1880-81, the first year during which the present Act was in force. The increase is small compared with the total amount of the receipts, and the Board do not consider that it can be attributed to any single predominating cause. Various causes operating in different districts have produced fluctuations of a strictly local character, the general tendency being upwards. There was an increase in 26 districts, and a decrease in 18 The increase was absolutely most considerable in Chumparun (Rs. 17,558), Mozufferpore (Rs. 15,685), Sarun (Rs. 10,167), and Rungpore (Rs. 9,658), and relatively in Chumparun, (70·6 per cent.), Hooghly (24 8 per cent.), Mozufferpore (20·8 per cent.), and Sarun (20 4 per cent). In three districts only did the decrease exceed Rs. 10,000. These were Calcutta, with a fall of Rs. 28,916, or 17 4 per cent., Jessore, with Rs 14,578, or 19 per cent., and Dacca, with Rs. 13,477, or 9·4 per cent. The decrease in Jessore, which is shared in a less degree by the 24-Pergunnahs, is more than covered by the receipts of Khulna. The improvement in Chumparun is due to the sale of a large number of 8-anna stamps to the managers of the Motihari, Farkolia, Pipra, and Rajpore factories for the renewal of indigo agreements. In Mozufferpore the receipts were enhanced by the sale of some stamps of high values. In the previous year a large decrease had been reported from Sarun, which was very imperfectly explained. The district has now recovered from the depression of 1881-82, and the rebound is ascribed to improvement in business, especially in the latter part of the year, and to an increased number of mortgages of lands and bonds. In Rungpore the increase was due to the settlement of the estate of a Mahomedan gentleman named Enayatullah Chowdhry, for which a number of stamps of high value were required. In Patna, where the increase amounted to Rs. 8,707, or 12 per cent., it is stated that "the petty shareholders, in order to avoid the risk and trouble which they are often put to for non-payment of Government revenue and cesses by their co-sharers, have adopted the course of disposing of their shares either by sale or mortgage." The Lieutenant-

Governor finds it difficult to believe that this cause can have operated so extensively as to produce an appreciable effect on the stamp revenue of the district.

9. The decrease in Calcutta is attributed by the Collector to the orders of the Government of India, referred to in paragraph 2 above, by which the use of adhesive labels was permitted for all transfers of shares, whether made by endorsement or otherwise. The loss is said to be only apparent, and to have been more than compensated for by a corresponding increase under the head of "adhesive share transfer stamps." In Dacca, it is explained that the receipts in 1881-82 were abnormally high, owing to the existence of disputes among the families of two large landholders, which necessitated the drawing up of documents requiring stamps of high values. The absence of any such cause in the year under review reduced the stamp receipts to their normal level. In Nuddea, where there has been a decrease for three years in succession, the fall is attributed partly to the low prevailing prices of agricultural produce consequent on a continued recurrence of good harvests, and partly to the stagnation of business of all kinds due to the wide prevalence of epidemic fever. The Commissioner of Orissa is of opinion that the explanation of the decrease in Cuttack is to be found in the fact that the import trade, which is mostly carried on with borrowed capital, is in a languishing condition. According to the Customs returns, the value of the imports has fallen from Rs. 8,47,160 to Rs. 1,73,961, and these figures certainly seem to bear out the Commissioner's opinion. The fluctuations in the other districts were nowhere considerable in themselves, and were due to local and accidental causes which are of no general interest.

10. The receipts from impressed labels fell during 1882-83 from Rs. 7,05,909 to Rs. 6,37,109, or by Rs. 68,800. The causes of decrease assigned by the Collector of Calcutta, where alone this kind of stamps is in use, are (1) the unusually large receipts in the preceding year; (2) the exemption of foreign bills-of-lading from stamp duty; and (3) the reduced duty which, in consequence of an opinion expressed by the Advocate-General, is now levied on conveyances of tea estates formed on leasehold lands. The falling off occasioned by the last-named cause, which only operated from the 17th to the 31st March 1883, amounted to upwards of Rs. 10,000, and the Board have recommended an amendment of the law. The matter will receive the attention of Government.

11. From 1878-79 to 1881-82, inclusive, there was a steady increase of revenue from one-anna revenue stamps, commonly known as receipt stamps; but in the year under review there has been an apparent decrease of Rs. 32,500, or 15·4 per cent., the realizations being Rs. 1,77,940 against Rs. 2,10,440 in the previous year. The decrease occurred in 11 districts, viz. Calcutta, Hazaribagh, Bogra, Jessore, Rungpore, Patna, Gya, Bhagulpore, Burdwan, Darjeeling, and Lohardugga. By far the greater part, however, occurred in Calcutta, where it amounted to Rs. 37,832. In only two other districts did it exceed Rs. 500. It is explained that the falling off in Calcutta is for the most part only nominal, the place of the adhesive receipt stamps being taken by the impressed one-anna duty referred to in paragraph 1 above. A sum of Rs. 35,578 must be set-off on this account against the diminished direct receipts, and if this be done, there will be a real increase of Rs. 3,078, or 1·4 per cent. on the whole. The Board "are not satisfied with the results obtained under this head, as the instructions issued from time to time to the local officers on this subject, and the steps taken by the Board to acquaint the public with the provisions of the law requiring the use of one-anna receipt stamps, and to afford greater facilities for obtaining them, have not been attended with the increase that might have been expected." There can be little doubt that the law is still systematically evaded in the mofussil; and the practice appears to be common to nearly all the districts in Eastern Bengal. The Commissioner of Dacca, in whose division the receipts are out of proportion to the well known prosperity of the people, observes: "I believe these persons (traders and mahajans) systematically evade the law. A stamp is put on only when the document is to be used in court. There is a tacit agreement among such traders and bankers not to use stamped receipts. Zemindars, also, when they give receipts to talukdars and other tenure-holders, do not use receipt stamps."

These remarks explain the chief reason of the inadequate revenue collected from this source, and the direction in which the remedy is to be sought. The rules which have been drawn up by the Collector of the 24-Pergunnahs for the guidance of his subordinates appear to be simple and well-considered, and the Lieutenant-Governor will be glad if the Board will consider the advisability of issuing instructions of a similar kind for the guidance of all district officers. The suggestion of the Commissioner to create a detective establishment under the direction of a Sub-Deputy Collector, or even of a special Deputy Collector, to overhaul and examine the books of all mercantile firms and traders, does not commend itself to the Lieutenant-Governor. The proceedings would be inquisitorial, and the evils to be remedied are less than would result from the exercise of such powers by a subordinate department. The proposal to adopt a unified stamp for both postal and revenue purposes, and to allow two half-anna stamps to be used to make up the duty of one-anna, to which reference was made last year, is still under the consideration of the Government of India. Since the close of the year under review, however, arrangements have been made for the sale of receipt stamps at all post-offices in the interior, on commission, by sub and branch post-masters, and it is hoped that the increased facilities thus afforded to the public for obtaining them will do much to reduce the temptation to defraud the revenue.

12. The other descriptions of non-judicial stamps are of relatively minor importance. Under foreign bill stamps there was an increase of Rs. 1,540, and under "advocate, vakeel, and attorney stamps" of Rs. 3,025. The sales of share-transfer stamps increased from Rs. 5,170 to Rs 44,672, or by 765 per cent. This was, as already mentioned, due to the orders of the Government of India by which the use of this description of stamps was extended to transfers of shares of all public companies and associations. Notarial stamps, the use of which was extended to 13 districts where they had not hitherto been employed, yielded a revenue of Rs. 2,534, being Rs. 1,834 in excess of that of the previous year. The sale proceeds of hundi stamps amounted to Rs. 93,219 against Rs. 92,015 in the previous year. The Board consider that the increase that has been obtained under this head, though small, is satisfactory. It is anticipated that, while the money-order system will increase in popularity for the transmission of small sums, hundis will continue to be used for larger transactions, more especially by those who seek the advantage of paying the money after a fixed date.

13. The sales of the four kinds of judicial stamps during the last two years are shown in the following table:—

Description of Stamps.	Sales in		Increase.	Decrease.
	1881-82.	1882-83.		
	Rs.	Rs.	Rs.	Rs.
Court-fee stamps	78,88,194	80,33,986	1,45,792	.....
High Court service stamps	6,000	7,000	1,000	...
Calcutta Small Cause Court stamps .	2,86,546	2,67,007	.....	19,539
Total ...	81,80,740	83,07,993	1,46,792	19,539
Stamps for copies	3,67,675	3,85,458	17,783	. ..
Total of all kinds ...	85,48,415	86,93,451	1,64,575	19,539

The gross receipts have increased from Rs. 85,48,415 to Rs. 86,93,451. There was a net increase in 31 districts, ranging from 18 per cent. in Singbhoom to 4 per cent in the Sonthal Pergunnahs, and a decrease in 14 districts. The general causes of the increase are said to be increased litigation, and the institution of suits of high value, to which must be added the collection of process fees in the Road Cess Department by means of court-fees, instead of in cash, and the levy of 8 annas searching-fees in civil and criminal courts under orders of the High Court. A variety of other causes are assigned in different districts, but, with the exception of the above-named, none appear to be of general application. The aggregate amount of increase was highest

in the 24-Pergunnahs (Rs. 44,704), Backergunge (Rs. 43,437), Mymensingh (Rs. 40,417), Hooghly (Rs. 36,680), Tipperah (Rs. 35,535), and Midnapore (Rs. 34,991). The greater part of the decrease of Rs. 3,95,212 occurred in Calcutta, where it was as high as Rs. 2,15,907, or 20·8 per cent. The Collector is unable to account satisfactorily for this large falling off, but he considers that the probable causes are the non-payment of large sums of probate duty, such as occurred in 1881-82, the transfer from the High Court to the Small Cause Court of cases of the values ranging from Rs. 1,000 to Rs. 2,000, and the decline in the number of suits instituted in the latter court consequent on the introduction of the new procedure. There was a large nominal decrease in Jessore of Rs. 66,804, due to the transfer of two sub-divisions to Khulna. In Patna also there was a decrease of Rs. 27,540, of which no special explanation has been given.

14. The following statement shows the number of cases in which deficient stamp duty and penalty were levied during each of the past five years by civil and revenue courts, with the amount realised in each case:—

Years.	Number of cases.		Amount of duty and penalty realised.		Total.	
	Civil courts.	Revenue officers.	By civil courts.	By revenue officers.	Cases.	Amount.
			Rs.	Rs.		Rs.
1878-79	776	1,183	9,446	9 471	1,959	18,917
1879-80	910	1,768	7,783	12,269	2,178	20,052
1880-81	1,043	1,598	10,945	19,841	2,660	30,786
1881-82	1,283	2,315	10,711	38,930	3,497	49,643
1882-83	1,769	2,314	13,615	26,966	4,083	40,381
Increase in 1882-83, as compared with 1881-82.	487	999	2,704	.....	586	.....
Decrease in 1882-83, as compared with 1881-82.	.....	.....	.....	11,864	.....	9,181

The Lieutenant-Governor is glad to observe that the observations made in the Resolution recorded last year on this subject appear to have resulted in greater attention being paid both by Revenue and Judicial Officers to the duty of enforcing compliance with the stamp laws. In most of the divisions the results, both in the civil and revenue courts, were decidedly in advance of those of previous years. The total amount of duty and penalty realized during the year was, it is true, less than that realized in 1881-82 by Rs. 11,864, but this is due chiefly to the extraordinarily heavy penalty and duty levied in one case in the Dacca district during the previous year. In the Patna, Rajshahye, and Chittagong Divisions, however, sufficient attention does not seem to be paid to the subject, although in Pubna and Julpigoree there was some improvement over the figures for the previous year. In Tipperah and Noakholly the apparent negligence of the civil courts is in strong contrast to the high degree of success obtained by the revenue officers. In Chittagong the number of cases in which duty and penalty were realized by revenue courts fell from 366 to 141, and of this no explanation has been given by the Collector. The falling off of 128 cases in the 24-Pergunnahs was due to the fact that in 1881-82 a large number of loan transactions recorded in a khatta-book of a money-lender which bore no stamp were discovered by the Joint-Magistrate of the district, and subsequently impounded. The Sub-Registrars of Soopool and Muddehpura, in the district of Bhagulpore, it is said, did not impound a single document during the year under review; and the Board have properly brought the matter to the notice of the Inspector-General of Registration.

15. The number of prosecutions for infringement of the provisions of the Indian Stamp Act amounted to only 625 against 927 in the previous year; 774 persons were brought to trial, of whom 516 were convicted and 95 acquitted. Fines, aggregating Rs. 5,849, were realized, and Rs. 70-8 were disbursed as rewards to informers. In addition to this, a sum of Rs. 783 was paid as rewards by the Collector of Calcutta in a single series of cases. In Bankoora no less than 119 prosecutions were instituted against one individual for unstamped receipts for amounts exceeding Rs. 20. The heavy falling off in Calcutta is said to be nominal, as the offences committed by 151 persons in respect of 498 documents were by permission compounded on payment of Rs. 4,349-2

as fines. Taking together the cases in which stamp duty and penalty were realized by courts, and those in which prosecutions were instituted, the Board are of opinion that improvement has been manifested in Bankoora, Midnapore, Dinagepore, Pubna, Julpigoree, Balasore, Furreedpore, Tipperah, Patna, Sonthal Pergunnahs, Purneah, and Maldah, while unfavourable results were obtained in Beerbhoom, Nuddea, Jessore, Manbhoom, Shahabad, Dacca, Chittagong, Sarun, and Chumparun. The proposal submitted by the Board for the grant to ministerial officers of rewards for bringing to light cases in which documents had not been stamped in accordance with the law was not approved by the Government of India. Departmental rules to enforce this duty upon the ministerial officers of civil and revenue courts are now under the consideration of the Government.

16. The thanks of the Lieutenant-Governor are due to the Board for their careful administration of the Stamp Department throughout the year. The names of the officers who have been specially mentioned as deserving of credit for their work in this Department will be communicated to the Appointment Department of this Government.

ORDER.—Ordered that a copy of the above Resolution, with a copy of the Report, be submitted to the Government of India, in the Department of Finance and Commerce, for information.

Ordered also that a copy of the Resolution be forwarded to the Board of Revenue for information.

By order of the Lieutenant-Governor of Bengal,

COLMAN MACAULAY,

Secretary to the Government of Bengal.

RESOLUTION ON THE GENERAL ADMINISTRATION REPORT OF THE RAJSHAHYE AND COOCH BEHAR DIVISION FOR THE YEAR 1882-83.

GENERAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 22nd September 1883.

RESOLUTION.

READ—

The General Administration Report of the Commissioner of the Rajshahye and Cooch Behar Division for the year 1882-83.

The report under consideration has been submitted with punctuality by Lord Ulick Browne, who, with the exception of a short period in the cold season, during which Mr. Metcalfe officiated for him, held charge of the Rajshahye and Cooch Behar Division throughout the year. The Commissioner brings to notice the incomplete state in which the report of the Collector of Rungpore was furnished to him, whole sections being in some instances omitted. Punctuality cannot be accepted as an excuse for incompleteness, and no credit attaches to the early despatch of an imperfect report.

2. *Tours.*—The tours made by the Commissioner and by all district officers subordinate to him were of sufficient length, and the time spent on tour appears to have been well employed. It is to be regretted that, with the exception of Mr. Hare, who spent over a month in the interior of the Rajshahye district, and of the Joint-Magistrate of Darjeeling, the circumstances of which district are to some extent exceptional, none of the Joint-Magistrates employed at head-quarter stations were enabled to see anything of the interior of their districts. The Lieutenant-Governor is aware that difficulty is found in arranging for the tours of Joint-Magistrates; districts cannot well be left without a covenanted officer at head-quarters, and it is generally inexpedient to curtail the tours of district officers in order that their assistants may travel in the interior. It is believed, however, that something more could be done than is done at present. The object of Joint-Magistrates' tours is the acquisition of mofussil experience by those officers, and a more complete inspection of districts than is possible if the whole duty of inspection falls on one officer. It too often happens that the portions of districts lying nearest to head-quarters, *i.e.* the sudder sub-divisions, at present receive least inspection, and it is in these portions, which, for the purpose of experience, are as valuable as more remote regions, that Joint-Magistrates on tour could apparently be best employed. The distances to be travelled are seldom long, and would rarely necessitate a protracted absence. Arrangements should be made for Joint-Magistrates to inspect sudder sub-divisions, and if such inspections cannot be made in the cold weather months, they should be spread over the seasons of the year at which district officers are ordinarily at head-quarters.

The time spent in the interior of their districts by sub-divisional officers was sufficient in all cases, except that of the Deputy Collector of Alipur, in the Julpigoree district. The shortness of this officer's tour, which lasted only 56 days, needs explanation, for which the Commissioner should call. This sub-division is situated in a part of the country where personal intercourse with the people is especially necessary. The Deputy Collector in charge of the Nowgong sub-division was absent from his head-quarters for 56 days only; but, as the sub-division was only opened on the 21st November, the tour made was, under the circumstances, not inadequate. The sub-division should, however, be carefully inspected during the present year.

3. *Weather and crops.*—In the Dinagepore, Rajshahye, Pubna, and Bogra districts the rainfall was considerably below the average, and in Rungpore, where the deficiency was less marked, the rain was unseasonable. The result appeared in inferior crops. In Rajshahye, and in the Panchbibi thana of Bogra, rice failed to some extent; in Dinagepore the water-supply was insufficient for the steeping of jute; and in Pubna, where jute was sufficiently steeped, the result was only obtained by using, and thereby contaminating, the drinking supply. In Rungpore the drought from July to September, followed by excessive rain in October, injured the *aman* rice crop in the south of the district. In Julpigoree, though tobacco and mustard were injured by the

heavy rain in October, the year was not unfavourable. In Darjeeling, where the year was remarkable for the excessive cold and heavy snow which fell in January, the crops were satisfactory. The most noticeable feature in the agricultural history of the division during the year is the increase in the cultivation of jute, which was largely extended both in Rajshahye and Pubna. The abundance of jute led to a fall in price, but the crop was so large that the Commissioner finds it difficult to believe that the cultivators suffered from low prices. The increase of sugarcane cultivation too in many parts of the division is remarkable. It is reported now to be in places eight times larger than it was a few years ago. The use of the improved sugarcane mills throughout the Rajshahye and Pubna districts is noticeable. The introduction of Messrs. Thomson and Mylne's mills on the estate of the Tahirpur ward in Rajshahye is said to have reduced by one-third the cost of the manufacture of sugar, and to have given a great impetus to the industry on that and the neighbouring estates. In Julpigoree alone, of the districts of the division, is the primitive native system adhered to.

The low price of ganja and the high price of jute in 1881-82 led to an increased cultivation of the latter and to a contracted cultivation of the former crop in Rajshahye, Dinagepore, and Bogra, the result being a decline from 2,862 to 1,992 in the number of bigahs under ganja and from 2,301 to 1,739 in the number of cultivators. The gross outturn, however, was proportionately greater than in the preceding year.

4. *Public health and material condition of the people.*—The Commissioner has omitted from his report the statistics of mortality given by the district officers, owing to his conviction of their untrustworthiness. The figures hitherto given may have been very inadequate, but as they afford some basis of comparison, with reference either to the actual mortality or to the energy of the reporting agency, the Lieutenant-Governor would prefer that they should be given in future, care being taken to indicate the extent of their inaccuracy, as far as this is possible. The effect of special efforts made in the Pubna district to improve the mortuary statistics is said to have been good and lasting; and what has been done in Pubna can be done elsewhere. With the exception of the districts of Dinagepore, parts of Rungpore, and of the Darjeeling Terai, the year under review was more unhealthy than its predecessor. In the southern portion of Rungpore the condition of the people was somewhat depressed; but in Dinagepore a decrease took place in the mortality from fever, which is attributed by the Civil Medical Officer and Collector to the improvements in drainage effected by the District Road Cess Committee. Fevers were more fatal than usual in Rajshahye, Pubna, and Bogra, and in the two former districts considerable mortality took place from cholera, in consequence mainly of the deficiency of good drinking water, due in Pubna to the employment of almost all the available water for the steeping of jute. In the presence of such a fact, the question of a proper water-supply in seasons of scanty rainfall deserves the consideration of the district officers. In Julpigoree the year is reported to have been as healthy as the normal climate of the district and the unsanitary habits of the population permitted. The health of the Darjeeling Terai shewed some improvement, which is attributed, with apparent correctness by the Commissioner, to the clearances in progress in the tract; and in the hills themselves the condition of the people was satisfactory. With regard to the hills the Commissioner writes:—

> In the hills there was a good deal of small-pox, but generally of a mild type. The Deputy Commissioner has been told that in Sikkim and Thibet this mild form was so rife that people went out of their way to catch it in order to protect themselves from a severe form in the future. The Deputy Commissioner observes that it would be well if we could induce the Sikkim Maharajah to send into Darjeeling a few persons to be trained in vaccination. He agreed to do this in his interview with Sir George Campbell in the year 1873, but no pupil has yet come in. The unprotected state of the population on our north and east borders, and their liability to severe outbreaks of small-pox, is a standing danger to this district. Mr. Waco thinks it would be worth while to offer to pay the pupils liberally; for, if we once got vaccination well established in Sikkim, it would soon get across into Thibet if not into Bhootan. With the exception of this general, but mild outbreak of small-pox, the health of the Hill Tracts was satisfactory. The lines in which the coolies on tea-gardens live are well situated; most planters enforce the primary rules of sanitation and see to the water-supply, and when their coolies do fall ill, their liberality in medicines might well be taken as an example in some of the Government dispensaries.

The fact stated at the commencement of this extract would appear to indicate that the people of Sikkim and its neighbourhood are disposed to avail themselves of such means of protection as are at their disposal; and if this is the case, it is probable that vaccination would not encounter any serious obstacles among them. The Commissioner's remarks will be referred to the Surgeon-General, who should consider, in communication with the local officers, the best means of protecting the Darjeeling hills against small-pox. In all other districts of the division vaccination has made considerable progress without any serious objection from the people.

The material condition of the people, with few exceptions, was satisfactory. If the rice failed in places, the price of labour was high, and the railway and other works gave plenty of employment to the labouring classes.

5. *Emigration and immigration.*—As noticed in previous years, no emigration, calling for remark, takes place from the division, but the immigration of persons seeking temporary employment is considerable. The clearances by a colony of Garos effected in the Rungpore district were continued, and one of the *sardars* succeeded in inducing some more of his countrymen to settle in the district. In many other parts of the division, where waste lands are available, similar settlements appear to have been effected, and systematic efforts in the same direction might be advantageously made in the Government and Wards estates where land is abundant and cultivators scarce. Notably the Jeypore estate in Bogra is fit for such an experiment.

6. *Nekmurd Fair.*—This fair took place as usual in April, but appears to have been less numerously attended than in previous years. The business done also was less brisk, so far as can be ascertained from the statistics which are reproduced below—

Description of animals and articles sold.	Number sold.		Total prices realized.		Average prices per head.		Remarks.
	1881.	1882.	1881.	1882.	1881.	1882.	
			Rs.	Rs.	Rs.	Rs.	
Elephants	169	147	1,69,000	1,47,000	1,000	1,000	
Camels	243	187	12,150	9,350	50	50	
Oxen and cows	.....	8,950	.....	1,71,290	.....	19	The figures originally given for the sale of local cattle are believed to be untrustworthy and have been omitted by the Commissioner.
Buffaloes	450	363	8,250	7,230	18	19	
Local cattle	23,700	.....	4,69,000	...	16	.....	
Horses	40	3	... 00	300	75	100	
Ponies (superior)	150	39	4,000	1,650	26	55	
Do. (small)	2,000	1,184	40,000	29,600	20	25	
Sheep	80*	439†	720	4,926	18	10	* Only big-tailed. † Includes country sheep.
Piece-goods	.....	.....	21,000	18,726	.....	.....	
Miscellaneous goods	.....	.....	1,90,000	1,08,994	.....	.....	
Salt	.....	.....	495	.....‡	.....	.....	‡ Information was not furnished by the police.

The sanitary and police arrangements appear from the result to have been satisfactory.

7. *Prices of food and labour.*—Notwithstanding the inferior harvest, the selling price of rice, though higher than in 1881-82, remained below the average of the last five years, the lowest mean price for the whole year being 28 seers 2 chittacks per rupee, which obtained in Bogra, and the highest, exclusive of the hills, 21 seers 1 chittack in Julpigoree. The prices of pulses and Indian-corn remained virtually unchanged. The Lieutenant-Governor is glad to observe that the remarks recorded by him last year, regarding the preparation of statistical tables, have been followed by an improvement in the statement given of the prices of labour. The division is one which employs much foreign labour, and wages are consequently high in almost all districts, and especially in the Darjeeling hills, where labour is inferior in quality and generally difficult to obtain. It is satisfactory to find that the labourers in the hill tea-gardens are "excellently treated." To control the coolies and dandiwalas of Darjeeling, a special Act was passed during the year. The Commissioner expects that it will operate towards ensuring orderly conduct on the part of

the classes to which it extends, and not towards a reduction of their legitimate earnings. The subject should be specially noticed in next year's report.

8. *Manufactures.*—As in previous years, jute bags and cloth, sugar and molasses and tea were the principal industries of the division. All districts manufacture jute bags and cloth for local consumption; and from Pubna, Dinagepore, and Julpigoree there is a large export trade in these articles. The cheapness of bags in Calcutta caused a falling off in December in the demand for gunny-bags from Dinagepore. The principal place of manufacture is Serajgunge, where no less than 2,000 adult workpeople and 250 children are employed in the mills, which are well managed. Molasses is exported from Dinagepore, Bogra, and Rungpore, and is manufactured for home consumption in Rajshahye. In the latter district the annual manufacture of raw sugar is estimated at 3,00,000 maunds. From statistics recently collected, it appears that about 11 lakhs of maunds of raw sugar are manufactured in the division as a whole.

The following table shews the progress of the tea industry during the last three years in Julpigoree and Darjeeling:—

Districts.	Number of Gardens.			Area under cultivation in acres.						Gross yield in pounds.			Average yield per acre from mature plants in pounds		
				Mature plant.			Immature plant.								
	1880.	1881.	1882.	1880.	1881.	1882.	1880.	1881.	1882	1880.	1881.	1882.	1880.	1881.	1882.
Julpigoree ...	47	53	60	3,383	3,632	4,670	2,253	3,071	3,598	617,765	1,017,116	1,865,801	241	278	399
Darjeeling ...	155	154	165	21,661	25,105	26,716	6,706	5,410	5,854	5,160,314	6,596,445	8,080,293	238	262	302
Total ...	202	207	225	25,043	28,737	31,386	8,961	8,481	9,452	5,978,079	7,613,561	9,946,094	239 5	270	350 5

Unfortunately, however, the profits were not in proportion to the increased outturn, and it appears probable that the falling off was due to the same cause that has more than once led to similar results in Assam—over-production of inferior tea. On this head the Commissioner writes—

Mr. Wace believes that the good prices of the season of 1881 tempted agents and managers to go in for a large outturn. The season was all in favour of such a policy, flushes being very rapid. The result was coarse leaf The supply met in the home market a very large import of cheap China tea and large stocks in hand. The result was naturally a heavy fall in prices, which were 30 to 50 per cent. below those of 1881. Shipments to America were very unsuccessful, and the Australian market got more than it wanted, with the result of a fall in price.

The outturn of cinchona from the Government factory again shewed an increase, the crop yielding 396,980lbs of bark against 341,570lbs in the previous year, and the manufacture of febrifuge being 10,363lbs. The issues were smaller than in 1881-82, owing, it is believed, to the greater healthiness of the year under review. The following extract from the Deputy Commissioner's report shews the progress made by private plantations:—

The success of the Government plantations has given an impetus to private enterprise in cinchona cultivation, although no advantage has been taken of the offer made by Government last year to sell the yellow bark plantation on condition of the purchaser manufacturing sulphate of quinine. The tract of land taken up by Messrs. Schoene, Kilburn and Co. east of the Teesta has been opened out, 15 miles of road have been made, 350 acres have been cleared for cultivation, and 32 acres planted. The outturn of the Darjeeling Tea and Cinchona Association was again rather below that of the previous year, being 24,000lbs. The Land Mortgage Bank is opening out small plantations on three of its gardens, the total area planted out being a little over 100 acres.

9. *Trade and commerce.*—The report this year gives tables shewing the principal exports and imports of the various districts of the division. Rice is grown and exported from all districts except Darjeeling—Dinagepore, Rajshahye, and Bogra supplying the largest quantities. All districts export jute in an unmanufactured state, and gunny-bags and jute cloth are also largely exported. The most important exports remaining are tea from Darjeeling, tobacco from Rungpore, ganja and silk from Rajshahye, and molasses from Pubna. The estimated export of tea from the Darjeeling district was about 8,080,293lbs. and from the Julpigoree district 1,865,801lbs. The chief imports are piece-goods

and salt into all districts, and twist and sugar mainly into Pubna. The import of jute for manufacture into Serajgunge is estimated at 38,00,000 maunds against 25,00,000 maunds in the previous year. The supply appears, however, to have been in excess of the demand, as the price fell from about Rs. 4 in 1881-82 to Rs. 2-2 in March 1883. The principal articles of export to Bhutan from Julpigoree are European piece-goods, betel-nuts, tobacco, and rice; fuel, oranges, blankets, musk, and ponies are the chief imports. The import of piece-goods, salt, and twist into Darjeeling has considerably increased, as has that of live-stock and farm produce from Nepal, and of Indian-corn from Sikkim. The figures given for imports from Sikkim are, however, believed to be untrustworthy.

10. *State of public feeling.*—As in previous years, the mass of the people took little or no interest in public affairs or public measures. The license tax, the chaukidari tax, and the Arms Act are accepted facts, which have ceased to cause remark, and of which the inconvenience has been reduced to a minimum. With the educated classes and the Europeans, however, the year has been one of considerable excitement. The scheme of local self-government was much discussed in the earlier part of the year, but it is said that with the novelty the interest displayed in the subject has to a great extent died out. The bulk of the people are agriculturists and entirely indifferent to the measure, whose principal advocates were the pleaders, mooktears, and clerks, resident at the sudder stations of districts. The zemindars as a whole were lukewarm. The other question on which public opinion has been excited in a manner which cannot be sufficiently deplored has been the Criminal Procedure Code Amendment Bill, which has, in the opinion of the district officers, brought about a distinct separation and a very lamentable soreness between Europeans and natives. In Darjeeling, where the Bengali element is absent, where the interests of the hill races are largely bound up with those of the Europeans, and where the Bill, if passed, is never likely to have any effect, the feeling of irritation is entirely onesided, and is believed by the Deputy Commissioner to be due solely to sympathy with Europeans in other parts of India, and to a conviction that the principle of the measure will affect the security of English capital in the country.

11. *Public press.*—Two new vernacular papers were started during the year at Pubna, and one by the Scotch Mission at Darjeeling. The *Hindu Ranjika* and the *Rajshahi Patrika*, published at Rajshahye, and the *Dik Prakas*, of Rungpore, are favourably mentioned for the loyalty of their tone. The last-named publication is issued under the supervision of Baboo Mahima Rajan Ray Chaudhuri of Kakina, to whom it does credit. Regarding the remaining papers, the Commissioner reports that they "have of course contained such articles as were to be expected on the extension of Local Self-Government and the Criminal Procedure Bill."

12. *Administrative changes.*—The effect of the changes made in the administration of the division during the year is not mentioned in the report, though the changes themselves are enumerated They were the amalgamation of the municipal and regular police in all districts; the establishment of a sub-division at Nowgong in Rajshahye; the transfer of the head-quarters of the Bagdogra sub-division to Nilphamari on the Northern Bengal Railway, and certain alterations in the powers exercised in civil cases by the Small Cause Court of Darjeeling and by the Sub-Divisional Officer of Kurseong. A report should be submitted on the proposal to alter the boundaries of the Nowgong sub-division, so as to bring the tract in which ganja is grown wholly within it.

13. *Police and crime.*—With the exception of Julpigoree and Rungpore, an increase in the number of cognizable cases reported took place in every district, and the total for the division rose from 10,480 to 11,681. The increase, however, was mainly due to nuisance cases, of which 859 more were instituted than in the preceding year. The percentage of cases declared false fell in all districts except Dinagepore and Rungpore. The figures given in the margin would seem to indicate an absence of uniformity in the procedure under which cases are declared false. The matter is one which is receiving the attention of the Inspector-General of Police. Rungpore

Rungpore	12·4 per cent
Pubna	10·6 „
Dinagepore	6·5 „
Julpigoree	5·3 „
Rajshahye	5·2 „
Bogra	3·5 „
Darjeeling	3·7 „

has taken the place of Pubna as the least criminal district in the division, the proportion of true cases to population being only 1 in 1,267. Pubna and Dinagepore, where the proportion is 1 to 952 and 1 to 869 respectively, shew a creditable freedom from crime. In Darjeeling the proportion, which was last year 1 to 107 persons, is now 1 to 78. This ratio is very high, and calls for explanation. In respect of the proportion of convictions to persons placed on trial, Darjeeling stands best, with 82·5 per cent., while Rungpore and Pubna, with 54·6 per cent. and 48·8 per cent, give the worse results. The low ratio of true cases to population, the large proportion of cases declared false, and the small percentage of convictions in these two districts, would seem to indicate laxity on the part of the police. Taking the division as a whole, the percentage of convictions has risen from 60 5 in 1881 to 62·3 in 1882, the improvement being apparently the result rather of increased activity in nuisance cases than of growing success in the detection of crime.

The only two serious cases of riot which took place during the year occurred in the Pubna district, and the parties in both were brought to justice. A very slight increase is reported in serious offences against the person; and serious offences against property fell off considerably. Generally, the greater activity and vigilance of the chowkeydars is commended throughout the division. The following description of the state of crime in the Pubna district deserves record:—

Mr. Barrow left the following remarks on crime in Pubna:—"Under this head, no doubt, should be discussed the general question of the safety of property and person, and to discuss them for an agricultural area might embrace some consideration of the relation of landlord and tenant. Of crime proper against property, the police can give a favourable account The figures detailed show that offences of this class are by no means serious, and consequently that the criminal classes are held in check; but when crime to do with agrarian matters is considered, the exact opposite is the case. Here the police are literally nowhere; it may be said that they have no footing, or, as the natives would say, no *dukhul* to withstand this kind of crime. Coming from Behar the difference struck me very much There the agrarian problem is fairly simple. The ryots are usually on one side and the zemindar on the other. Two bodies of ryots may fight for land; but then again the combination is simple and the quarrel easily understood and the law generally easily applied. The offence may be compared to that between a strong stream and a rushing current with eddies and whirlpools Here the interests are manifold and complicated. Putnidars, jotedars, durjotedars, and ryots combine, dissolve, and recombine like the objects in a kaleidoscope The result is violence, deceit and fraud."

Referring to the riots that occasionally occur in the district, Mr. Barrow says—"I myself in the sudder heard all the police reports, and was so able to direct what is so important—the first action of the police. Mr. Farrer at Serajgunge vigorously, and on the whole successfully, dealt with this spirit of turbulence; still, however, the spirit of violence pervades the district and manifests itself in various forms in the police administration. For instance, a ryot cannot leave the estate of one zemindar for that of another without fear of aggression. In consequence he usually puts in a petition to the Magistrate to be protected.

One great cause of disturbance during this year, as during last, has been the breaking up and transfer of the large zemindary of Azim Chowdry. Many preventive measures had to be taken, and in spite of them occurred the very serious riot with loss of life when his house had to be taken possession of under the Civil Court's decree."

A decrease from 8,036 to 7,729 took place in the number of non-cognizable cases. The Benches of Honorary Magistrates continued, as in previous years, to do good work, and no less than 2,622 cases were decided by this agency.

14. *Civil justice.*—The total number of civil suits instituted in the division during the year was 41,910 against 40,144 in 1881, the value of the property in dispute rising in the same period from Rs. 40,29,574 to Rs. 45,38,188. With the exception of a decline in the value of suits for money and moveables, which was for the most part confined to Dinagepore, there was an increase alike in the number and value of all classes of suits, and, speaking generally, the increase was common to all districts of the division. The explanation is probably the same in all cases, namely that the partial failure of the rice crop caused creditors to press for the recovery of their dues. The marked falling off in the value of suits for money and moveables in Dinagepore is explained by the large amount in litigation in that district in 1881 in consequence of the failure of two banking firms. Including suits pending at the close of

1881, the total number of civil cases determined during the year was 42,405 of which 15,095, or 35·6, were withdrawn, compromised or confessed, and 18,260, or 43·06 per cent., were decided *ex parte*, only 9,050, or 21·3 per cent., being contested.

15. *Land and land revenue.*—Owing to corrections made in the *taujih* of the Rajshahye district, an apparent decrease, from 5,473 to 5,433 estates, on the divisional rent-roll took place during the year. In reality 10 estates were added by alluvion to the divisional revenue-roll, and thus the revenue demand rose from Rs. 51,82,423 to Rs. 52,08,984. The collections were generally satisfactory, being especially good in Rajshahye, where they amounted to 99·39 per cent. of the demand. In Bogra and Julpigoree the collections were least successful, being only 94 91 per cent. and 88·8 per cent. of the demand respectively. The arrear demand in these districts is due almost exclusively from estates under direct management. In Darjeeling a marked improvement has taken place, the percentage realized being 96·8 against 77·9 in 1881. The advance is no doubt due to the settlement of the dispute between the Government and the *jotdars*, to which allusion was made last year. The Commissioner has submitted a careful report regarding the land revenue administration of his division, but the subject is one which will be more appropriately dealt with by the Government when the Land Revenue Administration Report of the Board of Revenue is under consideration.

16. *Relations between landlords and tenants.*—On the whole the year has been characterized by a satisfactory absence of overt quarrels between landlords and tenants in all districts, but it is to be feared that the report given by the Collector of Pubna "that there is an utter want of sympathy between the landlords and their tenants" is true for the most part of the whole division. The following remarks made by the Sub-Divisional Officer of Serajgunge on this head are worthy of consideration, and give what is probably an accurate account of the state of affairs in a large portion of the province:—

The attitude of zemindars and ryots towards each other is very much the same as in previous years. This is nevertheless a difficult question to comprehend, as there seems to be such a remarkable mixture of hostility and sympathy in their dealing with each other Generally, however, the zemindars insist upon having their pound of flesh, and it is the ryots who shew generosity. It is not at all unusual to find the ryots voluntarily contributing a cess of so much in each rupee of their rent to enable the zemindar to pay off debts which extravagance or mismanagement have led him to contract. A remarkable case of this kind came to my notice during the year, where the ryots made an attempt, quite voluntarily, to save their zemindar, although they must have known that he was hopelessly involved and that their contributions would be lost. This zemindar had been engaged with the Sandyals of Salop in litigation over a certain question since the year 1827. The final order was given by the Judicial Committee of the Privy Council in the year 1881, when the Sandyals obtained a decree for about five lakhs, with a set-off of about one and a half lakh of rupees, leaving a balance of three lakhs or thereabouts in their favour. In this case I had an enquiry made as to whether any coercion was being used towards the ryots, but found that their help was voluntarily given. On the other hand, the ryots know perfectly well how completely they can resist, by combining together, any claim made by the zemindar which they are not disposed to admit, and attempts to enhance their rent are frequently met in this way. In such cases the zemindar is generally compelled to retreat from his position in the end, as he cannot afford the expense of enhancement suits, and cannot live when his rents are stopped. This course, however, is taken by the ryot with some reluctance, as, since the time of the Pubna riots, it has been associated in their minds with defeat and loss in the end, and is often the cause of their being involved in criminal cases and sent to jail During the years which followed those disturbances, the zemindars made large enhancements of the rent, as the ryots were cowed by their defeat, and therefore submitted more easily Latterly they have become more independent again, and find that they can effect their object by quiet and passive resistance. There can be no doubt that the spirit of independence among them is becoming stronger each year, and that they are becoming more disposed to insist upon their rights. Generally speaking, they distrust their zemindars and the feeling between the two is full of hostility. The Tagore zemindars manage their estate very well, and I think that the feelings of their ryots towards them are much less full of hostility; but this is perhaps the only exception

The cost of management of an estate seems to fall almost entirely on the ryots, as the ostensible pay of the amla is ridiculously low, and the latter make it up by extorting contributions from the ryots on every possible ground and pretext. The zemindars thus cannot be held to have performed their part of the contract in which they entered when the permanent settlement was made, as far as the interests and welfare of their ryots are considered. The prosperity which the latter do enjoy is entirely due to their own industry, intelligence, and independence of spirit, and their zemindars spend all their income—sometimes

a good deal more—on idle display or senseless litigation. There are some exceptions among them, but this is the rule.

It is noticeable that in the Rungpore district, where it is said "land is plentiful, but ryots few," the relations between the landlord and the tenant are entirely peaceable.

17. *Excise*—Notwithstanding a decrease from 2,469 to 2,305 in the number of licenses issued for the vend of intoxicating liquors and drugs, the revenue derived from excise has increased from Rs. 5,90,291 to Rs. 6,04,211, the increase being most marked in the Darjeeling district. In the district of Rungpore a considerable decline took place in the amount of revenue realized. The articles of which the consumption rose to the greatest extent were country spirits and ganja, while the revenue from opium fell largely. Minor fluctuations took place in respect of other articles. The increase in the sale of country spirits was most marked in the districts of Julpigoree and Darjeeling, and was due, especially in the case of Darjeeling, to the opening out of the district by the railway, and to the large number of foreign residents and visitors. The Commissioner, in reviewing the result of the three years in which the outstill system has been in force, has arrived at the conclusion that it has done much to check illicit distillation, and has had little, if any, effect in increasing drinking. Whether drinking has increased in the division seems doubtful; but if it has so increased, the fact, in the Commissioner's opinion, is due to the increased prosperity of the working classes, and to the presence of large numbers of low caste Hindus from other parts of India who come to work for hire, and among whom drinking has always been prevalent. It is satisfactory that, with a considerable increase in the revenue, the consumption of ganja is much less than it used to be.

18. *Stamps.*—The high sales of stamps which took place in the year 1881-82 were slightly exceeded in that under review, the net revenue from this source (Rs. 10,31,544) shewing an increase of Rs. 1,775. Sales rose in Bogra, Rungpore, Julpigoree, and Darjeeling, and fell off in the remaining districts. In Dinagepore, Rajshahye, Rungpore, and Darjeeling an increase took place in the sales of impressed stamps, in consequence, in the two first districts, of the settlement of large estates. In Rajshahye the bad harvest is said to have led to an increased number of bonds on loan transactions, and in Darjeeling the increase is attributed to the general development of the district. The decline in the sales of court-fee stamps was confined to Dinagepore and Rajshahye, and was due, in both cases, to exceptionally high sales in the previous year.

19. *Railway and other public works.*—Regarding the extension of the Northern Bengal State Railway to Dinagepore, and the survey which is now in progress for its extension to the Ganges, *viâ* Purneah, the Collector of Dinagepore writes as follows:—

"My predecessor has remarked in his last year's report" (quoted in paragraph 58 of my report of 1881-82) "upon the effect of the Northern Bengal Railway on the district. I consider that the Ganges extension will be no less important in its beneficial effects. Hitherto in this district a bumper crop was looked upon by the tenants as only a lesser evil than the total failure, as prices were entirely ruled by the mahajans and there was no means of getting rid of the surplus produce. The new extension will tap a rich and prosperous country, and will enable the jute sown in that area to find a ready market. At present the only mode of exit this produce has is by boat down the Mahananda river; but this river has of late years been completely closed to traffic to boats of even the smallest tonnage after the month of January, and it often happens that large quantities of jute remain locked up in the hands of the growers and the small traders until the next rise of the river. A large quantity was so locked up last year."

Statistics given in the report shew an increase from 152,714 tons to 190,117 tons in the amount of goods carried by the Northern Bengal State Railway, and from 630 tons to 3,004 in those carried by the Kaunia and Dharla Tramway. Figures are not given for the Darjeeling-Himalayan Railway, but the receipts have increased from Rs. 2,60,649 in 1881 to Rs. 3,60,679 in 1882. The improvement in the working of the hill line have been very marked. The amount spent by the various Road Cess Committees on original works and repairs during the year was Rs. 4,17,700 out of an estimated expenditure of Rs. 4,44,022. In all districts except Dinagepore a sufficient proportion of the available funds was devoted to village roads, and all the Committees apparently did their best with the means at their disposal.

20. *Education.*—The number of schools open at the beginning of the year under review was 2,121, attended by 63,172 pupils, had risen at its close to 2,757, attended by 76,556 pupils, giving an increase of 29·9 per cent. in the number of schools and of 21·2 per cent. in the number of pupils. The proportion of pupils who succeeded in satisfying the standards prescribed by the Educational Department was low, except in the case of the normal schools and schools for special instruction, amounting in the aggregate to only 37·3 per cent. The Commissioner considers this result less unsatisfactory than it would at first sight appear, because the number of pupils presenting themselves for examination was higher than in previous years, and is taken by him as indicating an increased desire on the part of the inhabitants for the education of their children. This view is probably correct; but the initial difficulty of getting the children to come to school having been overcome, careful supervision ought to lead to a more satisfactory state of things as regards the knowledge imparted. The percentage of boys of school-going age to the supposed total number of boys in each district varied from 16·7 in Rajshahye to 10·5 in Julpigoree. The total number of girls receiving education rose from 1,352 to 1,937. The details of the educational development of the division during the year will be considered in connection with the annual education report.

21. *Working of Committees.*—A satisfactory account is given by the Commissioner of the working of the various Committees of the division, with the exception of those at Pubna, where the members are said to be ready and independent enough in respect of discussion, but to evince an inclination to shirk work when possible. The Lieutenant-Governor trusts that this tendency may become less strong as the responsibility of the individual members increases, under an extended scheme of local self-government. The energy and good work of the Committees of Serajgunge, Julpigoree, and Darjeeling, where the European element is strong, are commended.

22. *Wards.*—The total number of estates under the management of the Court of Wards at the close of the year was 17, against 18 at its commencement—one estate, Hazratpur, having been released during the year. The following are the most important estates in the division, having each a current demand of over half a lakh of rupees:—Churaman (Rs. 1,01,624) and Sankarpur (Rs. 53,238) in Dinagepore, Tahirpur Junior Branch (Rs. 70,051) in Rajshahye, and the Chaklaját (Rs. 3,05,861 in Julpigoree. It is gratifying to observe that the arrear demand, which in the case of all except Sankarpur, was very heavy at the commencement of the year, was reduced in the Churaman and Tahirpur estates and the Chaklaját by 76, 71, and 73 per cent. respectively. In the Chaklaját estate alone was the balance heavy at the close of the year. The progress made by the wards in their education is described as generally satisfactory.

23. *Conduct of zemindars.*—On the whole, the conduct of the zemindars of the division was satisfactory. Only one serious case of misconduct came to light—that of Azim Chaudhuri in the Pubna riot case, with which the Lieutenant-Governor has already dealt. Vigilant arrangements were, however, necessary to prevent a breach of the peace, in consequence of the disputes as to the ownership of the Marcha Diara in Rajshahye. The conduct of the Serajgunge zemindars is, the Lieutenant-Governor is glad to observe, more favourably described than in former years. Raja Pramatha Nath Ray of Dighapatia and Kumar Sasi Shekareswar Ray are commended, and the latter is said to have interested himself in the welfare of his tenants and to have established a sort of agricultural association for the supply of seeds of a superior kind.

24. *Character of officers.*—The Commissioner's remarks on this head will be considered in the Appointment Department. The officers most favourably mentioned are, among the Collectors, Messrs. Wace and Norman; among the Joint-Magistrates, Messrs. Haro and Farrer; and among the Deputy Collectors Baboos Hari Mohan Chandra and Mohendra Nath Bhattacharjya and Tarun Chunder Sircar. The Lieutenant-Governor thanks Lord Ulick Browne for his careful administration of an important charge and for his full report.

By order of the Lieutenant-Governor of Bengal,

A. P. MACDONNELL,

Offg. Secretary to the Govt. of Bengal.

BENGAL NAGPORE RAILWAY.

Dated Calcutta, the 24th September 1883.

THE following is published for general information.

By order of the Lieutenant-Governor of Bengal,

G. F. E. S. NEILL, *Major*, M.S.C.,

Under-Secy to the Govt. of Bengal,
P. W. Dept.

Extract paragraph 2 from a letter No. 735R.C, dated 18th August 1883, from the Secretary to the Government of India, Public Works Department, to the Secretary to the Government of Bengal, Public Works Department.

PARA. 2.—His Honor the Lieutenant-Governor will observe that the cost of the project, according to the final estimates, will be as per margin, including the cost of the open line from Nandgaon to Nagpur and its conversion to the broad gauge, but with due allowance for metre-gauge materials and stock capable of being utilized by Government elsewhere.

	Miles	Estimates. Rs
Sitarampore to Bilaspore	365¼	3,00,00,000
Bilaspore to Nandgaon	114	93,00,000
Nandgaon to Nagpur	148	1,36,32,000
Total	627¼	5,29,32,000

No. 2948R, dated Calcutta, the 28th July 1883.

From—The Secretary to the Govt. of Bengal, Public Works Dept., Railway,
To—The Secretary to the Government of India, Public Works Department.

I AM directed to forward copy of a report by Mr. Spring, Executive Engineer, Nagpore Railway Surveys, with a map and estimates of the probable cost of the direct line of railway, 162 miles, from Howrah to Dugni—a point near Chyebassa on the line from Sitarampore to Bilaspore—which was surveyed and located last season by the officers under Mr. Parker's orders

2. The estimates framed by Mr. Spring have been examined by the Chief Engineer, who has an intimate knowledge of the country between Howrah and Midnapore, traversed by the three great rivers Damoodah, Roopnarain, and Cossye. His note and a revised abstract estimate is herewith sent. The cost of bridging these rivers and the spill therefrom will be Rs. 65,10,000, instead of Rs. 87,46,000, as estimated by Mr. Spring. The Chief Engineer has included a sum of ten lakhs of rupees for terminal buildings at Howrah, for which a quite insufficient allowance had been made: other differences are due to alterations in establishment and contingent charges.

3. The estimate for the line from Howrah to Dugni, 162 miles *vid* Midnapore, as revised by the Chief Engineer, is Rs. 2,18,16,187 (A); while the cost of the line from Sitarampore to Dugni, 95 miles, is Rs. 80,14,942 (B), shewing an excess of capital required for construction, if the direct line be adopted, of Rs. 1,38,01,245.

4. There would, however, be a saving of distance by the direct line of 71 miles as follows:—

	Miles.
Howrah to Sitarampore, East Indian Railway .. .. =	138
Sitarampore to Dugni .. .. =	95
	233
Howrah to Dugni *vid* Midnapore .. .. .. =	162
Difference .. =	71

The longer line would, on the other hand, have the advantage of cheap coal procurable at Sitarampore and elsewhere, which would materially assist in keeping down working expenses. Time would also be saved in the construction of 95 miles through easy country, as against 162 miles through the heavily flooded lands of the direct line, in which also two exceptionally large tidal rivers have to be crossed by bridges with very deep foundations in bad soil.

5. Mr. Parker's estimate of the line from Sitarampore to Bilaspore is also forwarded herewith. It has been prepared in detail from the sections and surveys of the finally located line, and may be relied on. The total cost is Rs. 2,98,96,970 for 365¼ miles. It is from this estimate that the cost of the 95 miles from Sitarampore to Dugni has been taken in abstract estimate which accompanies the Chief Engineer's note.

6. Apart from the considerations above alluded to—(1) less outlay of capital, and (2) more rapid completion of the railway—the Lieutenant-Governor has already, on other grounds,* advocated the construction of the line from Sitarampore *vid* Purulia, in preference to that direct from Howrah *vid* Midnapore. The former has no tidal rivers to cross; would have about 67 miles less of railway to construct, and will open up a tract of country at present but ill-provided with means of cheap carriage, and, as a protective measure, will be of great importance. The Midnapore district, on the other hand, is well-protected by the Midnapore canal, which last year carried 329,000 passengers and 138,000 tons of goods by steamers and boats, besides irrigating 100,000 acres of land. Beyond Midnapore to Chyebassa the country is mountainous and difficult, very sparsely populated at present, and with none of the advantages for traffic which the route *vid* Sitarampore to Bilaspore promises to develop. In this, too, the supply of coal and of iron and steel from the Bengal Iron Works, now temporarily under Government management, gives large prospective advantages, and it may be accepted that, with the cheapness of coal and labour, the working expenses of this line would be much less than the 50 per cent. ordinarily calculated upon the gross earnings. The Government of India has already received a copy of Mr. Risley's report on the trade of Chota Nagpore, as affecting the interests of the proposed railway from Sitarampore to the Central Provinces, and though in dealing with a primitive tract of country, the extent of the existing trade may not be very large, the prospect, and especially from the development of its mineral resources, is full of encouragement. It has been estimated that the line would return a profit of about 4 per cent. upon the capital outlay. The Lieutenant-Governor desires me to express the hope that early orders may now issue for the commencement of this line.

* Letter No. 461T—R, dated 22nd May 1883.

Note by the Chief Engineer on Mr. Spring's report and estimate for the alternative route for the Bengal-Nagpore Railway direct line from Howrah to Dugni (Chyebassa), dated 25th July 1883.

Mr. Spring estimates the cost of this line at Rs. 2,32,38,000, but he has fallen into error regarding the discharges of the rivers Cossye, Roopnarain, and Damoodah, which are as follow:—

	c. ft.		c. ft. per second.
* Darkessar	160,000	Cossye, above Midnapore	180,000
Selye	90,000		
Spill from Cossye	150,000	Roopnarain	390,000*
Total	390,000	Damoodah	350,000

The Cossye at Panchkoorah can only carry 30,000 cubic feet per second, the difference, viz. 150,000 cubic feet per second, is thrown off mostly at the Pilaspai, mile 380.

Mr. Spring allows for the waterway of the Cossye, above Midnapore, only 800 feet of bridging, which is inadequate to carry 180,000 cubic feet per second. at least 1,200 feet must be given.

At Pilaspai he has allowed 300 lineal feet in the estimte for major bridging, and about 400 in the minor bridge estimates; this also is inadequate. In order to pass the 150,000 cubic feet, which spills over the country in the neighbourhood of the Pilaspai khall, at least 3,000 feet of flood opening must be allowed; the estimate must therefore be increased by the cost of 2,600 lineal feet of minor bridging.

At the Roopnarain it will be impossible to obtain a width of 5,500 feet as allowed in Mr. Spring's estimate: not more than 2,000 feet can be got; and the estimate for this bridge will therefore be very greatly reduced.

At the Damoodah I would allow a width of 1,500 feet, which can be obtained. Mr. Spring has taken the width at 1,250 feet. These two bridges will carry 375,000* cubic feet per second, but the flood discharge is 740,000; the difference, 365,000,† must therefore be provided for by constructing additional flood openings. For this purpose 7,300 lineal feet will be necessary, to which must be added 2,100 lineal feet for local drainage, &c., making in all 9,400 feet in place of 14,100 allowed by Mr. Spring from mile 402 to mile 432.

	Length.	Depth.	Velocity.	Discharge
* Roopnarain	2,000	× 20 ×	6 =	240,000
Damoodah	1,500	× 15 ×	6 =	135,000
		Total		375,000
† 7,300 × 10 × 5			=	365,000

Comparison of the estimates will stand as follows :—

Major Bridging.

Locality.	Chief Engineer.			Mr Spring.			Difference.
	Lineal feet of waterway.	Rate.	Cost.	Lineal feet of waterway.	Rate.	Cost.	
		Rs.	Rs.		Rs	Rs.	Rs
Cossye ... ... mile 351	1,200	450	5,40,000	800	440	3,52,000	+ 1,88,000
Roopnarain	2,000	600	12,00,000	5,500	600	33,00,000	—21,00,000
Damoodah	1,500	600	9,00,000	1,250	600	7,50,000	+ 1,50,000
			26,40,000			44,02,000	—17,62,000
Minor Bridging.							
Mile 378—385	2,00	350	10,50,000	400	.....	1,14,000	+ 9,36,000
„ 402—433	9,40	300	28,20,000	14,100	.....	42,30,000	—14,10,000
			38,70,000			43,44,000	—4,74,000

There will therefore be a reduction in the cost of major bridging of Rs. 17,62,000 and of minor bridges of Rs. 4,74,000, making the total difference Rs. 22,36,000. No sufficient allowance has been made in Mr. Spring's estimate for terminal works at Howrah, and even if a portion of the East Indian Railway buildings are utilized for that purpose, they will have to be paid for. I think at least ten lakhs must be added on this account; the estimate will then stand at Rs. 14,21,813 less than Mr. Spring's estimate, or at a total of Rs. 2,18,16,187.

H. C. Levinge,
Chief Engineer, Bengal.

No. 767, dated Hazaribagh, the 3rd July 1883.

From—W. H. Parker, Esq., M.I.C.E., Engineer-in-Chief, Bengal and Nagpore Railway,

To—The Secretary to the Government of Bengal, Public Works Department.

I have the honour to forward abstract estimate of the probable cost of the Bengal and Nagpore Railway from Sitarampore to Bilaspore, as called for in your No. 434T—R of 18th May 1883.

2. The estimate amounts to Rs. 2,98,96,970, for a length of 365¼ miles. The estimate framed from Mr. Ramsay's sections, and submitted with this office No. 848 of 9th September 1882, was for 367 miles Rs. 2,97,03,121, including land, but no "workshops," which, in the estmate now submitted, amounts to Rs. 1,82,625.

3. The total quantities in earthwork exceed the first estimate by 99 lakhs of cubic feet, value Rs. 54,450. A further excess of Rs. 8,12,042 is due to increase of rates owing to there being more rock in cuttings than originally anticipated, and to the quantities in high embankments being also greater than estimated. For ordinary banks Rs 4 per 1,000 cubic feet has been estimated, instead of Rs. 3, which is considered rather a low rate. In the third division a tunnel, which it was hoped might be avoided, has been found indispensable at Derva in the Suranda This tunnel has been estimated for a double line, and is 2,300 feet in length, costing Rs. 4,10,000.

4. As regards actual quantities, there is a decrease of 26,828,422 cubic feet in cuttings, and an increase of 36,749,183 cubic feet in banks. As regards the old estimate, the quantities given are final quantities calculated from the working.

5. In bridge-work the estimate now submitted is Rs. 4,89,917 less than the rough estimate, as some of the larger bridges, such as the Damuda, Cossye, Subarnarikha are found to require less waterway than originally calculated. Each culvert and minor bridge has been estimated, but the important bridges are taken out only at a fixed rate per running foot.

6. There is an increase in the item of ballast, as the former estimate did not provide 10 per cent. for stations. This has been added, and increases the cost per mile from Rs. 3,300 to Rs. 3,790 per mile, and the total cost of this item from Rs. 12,11,100 to Rs. 13,84,298.

7. There is a decrease of Rs. 10,63,228 in permanent-way owing to rate for sleepers being decreased from Rs. 3 to Rs. 1-12, and to more careful calculation of the cost of lead of rails and fastenings to works; the rates for cost of permanent-way at Calcutta are taken as in the rough estimate, but it is calculated that sleepers can be easily obtained at the reduced rate owing to the proximity of the forests.

8. Stations and buildings are increased by Rs. 2,63,099; the number of stations being slightly increased beyond what was originally intended to bring them to a distance of some 12½ miles apart, instead of 15 miles, and rough estimate of cost of each building required is given.

9. Workshops and stores were omitted from original estimate, as it was understood that the line would be worked by East Indian Railway. On reconsideration of the matter, it has been thought best to allow a small sum per mile, Rs. 500, which gives Rs. 1,82,625 as the cost of any district workshops or stores that may be required.

10. The other items of the estimate are affected only by the length of line, rates remaining the same, except in the item preliminary, where the rate has been reduced from Rs. 1,500 per mile to Rs. 1,000, as the estimate for survey and reconnaissance amounts only to Rs. 700 per mile, leaving Rs. 800 per mile available for any future operation that may be found requisite.

11. A comparative statement is attached, shewing in detail the comparative cost of estimate now submitted with the rough estimate, the cost per mile being Rs. 81,583, or 0·8 per cent. more than the rough estimate which amounted to Rs. 80,935 including land.

BENGAL AND NAGPORE RAILWAY SURVEYS.

Statement of comparative cost between Revised Reconnaissance Estimate and Preliminary Abstract Estimate.

Item.	Reconnaissance revised estimate.	Estimate preliminary, based on actual surveys.	Present Estimate.

Report on the Calcutta-Midnapore-Chyebassa alternative of the Bengal-Nagpore Railway.

Dated Hazaribagh, the 17th July 1883.

From—F. J. E. Spring, Esq., Executive Engineer, Hazaribagh,
To—The Engineer-in-Chief, Bengal, Nagpore Railway Surveys.

Submit report.—I have the honour to submit a report upon the Calcutta-Midnapore-Chyebassa alternative of the Bengal-Nagpore Railway.

Route reconnoitered.—In compliance with your instructions, I made a reconnaissance of the route from the junction with the Bilaspore-Sitarampore survey to Midnapore, taking aneroid observations for levels, and measuring waterways. Sufficient information was available from the Canal Department about the remainder of the route between Midnapore and Howrah, for the purpose of this report, to render further reconnaissance unnecessary.

Information hitherto available.—Nothing has hitherto been known of the Chyebassa-Midnapore portion of the route. The Midnapore-Calcutta portion is thoroughly well known, and has been levelled over in every direction. No surveys have, it is believed, hitherto been made for crossings for the Damooda and Roopnarain rivers at this portion of their course; but I have now got sections of these rivers, as well as of the Cossye, from the Executive Engineer, Cossye Division, Midnapore.

General direction.—Leaving the Bilaspore-Sitarampore route at the 270th mile from Bilaspore, the general direction of the route to be now reported on is as follows:—

Running eastward till the 277th mile, the line bends to the south-east till the Korkai river, an important branch of the Subanrika, is crossed at the 284¼ mile near the villages of Dindli and Jagsoli. The general direction of the route is now south-east, and the village of Domjori having been passed on the north side, the Subanrika river is crossed at miles 299¼ near the village Chondorekha. The line then passes close to Moholia, and about a mile north-east of Ghatsilla, whence, turning southward, it passes about a mile north-east of Narsingarh, then north of Pira hill to Chakulia. At the 327th mile the Midnapore district is entered, and the route is tolerably straight, and eastward through Jambandi, where at mile 336 the Dholang nullah, a large branch of the Subanrika, is crossed. From Jambandi the line goes east to Midnapore, crossing the Cossye at mile 351, and reaching Midnapore at mile 365. Passing Midnapore close on the north side, the line bends a few degrees to the northward, so as to avoid a great bend of the Cossye; the Pilaspai khal, a broad spill that runs into the Cossye, is crossed at mile 380; thence running a few degrees south, a large nullah or khall, the Durbachata, is avoided, and passed at the 394th mile. At mile 402 the Roopnarain river is reached, and crossed at a point where it is narrowest, about three miles above Kola Ghât, where the Calcutta-Midnapore road crosses. The Damooda river is crossed at mile 406; at a narrow place about three miles up-stream from Mahishreka ghât, where the road crosses. Thence the line turns a few degrees northward, and crossing round outside Howrah enters the terminus, and ends at the 432nd mile from Bilaspore.

The four-mile-to-the-inch map, shewing the route in a broad red line, accompanies this report. A portion of the Bilaspore-Sitarampore route is also shewn on the same map, in a thick dotted line, and a possible alternative south of Midnapore, which possesses no special advantages beyond communication with the navigable canal, in a thin dotted line.

Detailed description of route.—I now proceed to give a detailed description of the result of the reconnaissance.

From mile 270, the junction with the Bilaspore-Sitarampore survey, to mile 284¼, the Korkai crossing, a large number of nullahs tributary to the Sanjai and Korkai, are crossed; hence, the country being very rough, it is impossible to follow anything like a contour. Owing to the frequency and depth of the nullahs the gradients will probably be rather up-and-down.

The average banks and cuttings on these 14¼ miles will be about 10 feet; the soil is all gravelly clay and easy to work.

There will be the following bridges:—Khori nullah at mile 270¼, 30 feet bridge; Murkum nullah, mile 280, 40 feet bridge, besides 100 feet of minor bridging, and about 50 feet of small culverts.

Korkai N.—At mile 284¼ the Korkai river is crossed; the bridge would require 450 feet of waterway, with piers 50 feet above bed, and 10 feet foundations in sand over rock. Rock sites for two piers to support three 150 feet spans would probably be found at surface on survey. The nullah runs in a deep valley, so that down-and-up grades will be necessary. The actual height of the banks is 40 feet, and they are of sandy clay.

Korkai to Subanrika.—From mile 284¼, the Korkai crossing, to mile 299¼, the Subanrika, fewer nullahs are crossed than on the pervious section, because the line is more or less on a level watershed for the greater portion of the distance. In the first three miles beyond the Korkai, there is an ascent of 150 feet on to the watershed opposite Kalimati village. This involves three miles of 1 in 100. The village of Domjori is passed at the 292nd mile. A considerable branch of the Subanrika, the Gurrha, the valley of which is some 30 miles in length, runs between Domjori and the Subanrika, parallel with the line, and about a mile off to the south. The earthwork on this portion will be eight miles of 8 feet banks and cuttings in clay, three miles of 5-feet bank and cuttings in hard moorum and shales, and four miles of 5-feet bank in ordinary clay. The waterways will consist of about 60 feet of minor bridging and 50 feet of small culverts. There will be no difficulty about gradients; after once the ascent from the Korkai is accomplished the gradients will be very flat.

Subanrika.—The Subanrika river is crossed at mile 299¼. It will require 600 feet of waterway, that is, three spans of 200 feet resting on piers 60 feet high, on foundations sunk 20 feet in sand and resting on rock.

Subanrika N, to Narsingarh.—From the Subanrika crossing to mile 315, Narsingarh, the line runs more or less parallel to the Subanrika, and about two or three miles away from it. A large number of considerable nullahs are consequently crossed, and as the intermediate ridges are generally high, the work on this portion will be heavy, and the gradients will ascend and descend. The existing road between Chyebassa and Midnapore meets the line near the Subanrika crossing, and gets on to a lot of high ground half way between Moholia and Ghatsilla, and then descend some 180 feet into the bed of the Bhatai nullah at Ghatsilla. This fall will be avoided by taking the line about a mile-and-a-half on the north-east of Ghatsilla; but the ground is everywhere very rough. On this section of 15¾ miles the earthwork will consist of—Subanrika to Moholia 2¾ miles, 5 feet banks in clay; Moholia to Ghatsilla seven miles of 12 feet banks and cuttings through hard clay and moorum; Ghatsilla to the Khorsoti N two miles of 10 feet banks and cuttings through quartz ridges shales and laterite; Khorsoti N. to Narsingarh four miles of 8 feet banks and cuttings in hard clay. The bridging on this section will consist of one 100 feet bridge over the Khorsoti, one 80-feet bridge over the Punsa, one 70 feet bridge over the Bhatai, one 60 feet bridge over the Koudor, besides some 65 feet of minor bridges and 100 feet of small culverts.

Narsingarh to Chakulia.—From Narsingarh, mile 315, to Chakulia, mile 325, the ground is considerably disturbed by a local hill called Pira. The line passing on the north of Pira, ascends a local watershed dividing a set of nullahs which flow into the Subanrika from another set flowing east into the Dholang nullahs, a tributary of the Subanrika, to be crossed by the line further on. The general character of the country is high undulations, separated by deep nullahs and ravines. The earthwork of this section will consist of 10 miles of 10 feet banks and cuttings in hard clay. The bridging will be one 60 feet bridge over the Sindiri nullah, and one 40 feet over the Gandrupi nullah, with 60 feet of minor bridging and 50 feet of small culverts. The gradients will, on account of the undulatory character of the ground, be a good deal up-and-down.

Chakulia to Jambandi.—The next 10-mile section, from Chakulia, mile 325, to Jambandi mile 335, is through a country whose formation consists, like the last, of high rolling downs; this is naturally very unfavourable for gradients; but as this section lies principally on a watershed, the waterways required will be trifling. The earthwork will be about 10 miles of 8 feet banks and cuttings in hard clay. The waterways will consist of about 100 feet of culverts. Most of this section is through dense stunted sál jungle.

Jambandi to the Cossye N.—From Jambandi, mile 335, to the Cossye river, mile 351, a distance of 16 miles, the line after crossing the Dholang nullah can be located so as to run more or less on a watershed. For the first eight miles the earthwork will be 8 feet banks and cuttings in hard clay, and for the last eight miles 6 feet banks in ordinary clay. The Dholang nullah will be crossed at mile 335¾ by 200 feet of bridging, 30 feet above bed, with 20 feet foundations in sand resting on clay. The remaining waterways on this section will be one 50 feet bridge over a nullah at the 343th mile, and about 250 feet of minor bridges and culverts.

Cossye N.—At the 351st mile the Cossye river is crossed by 800 feet of bridging, piers 35 feet high, foundations probably 60 feet in sand. A careful survey will be necessary to find the best crossing for the Cossye. I have put it at 4½ miles down-stream from the Chyebassa-Midnapore road-crossing, where 800 feet of waterway will be sufficient. The road-crossing being unbridged was naturally selected for its breadth and consequent shallowness.

It is there about 1,400 feet wide; but that 800 feet of waterway is not insufficient is proved by cross-sections of two sites 50 miles apart—one opposite Midnapore, and the other 50 miles further down-stream, and both on the Bombay-Calcutta road; in the first the breadth at highest flood-level is 750 feet, and the greatest depth 20 feet, and in the latter the highest flood breadth is 800 feet, and greatest depth 30 feet. These and other cross-sections were given me by the Executive Engineer, Cossye Division.

Cossye N to Midnapore.—From the Cossye river, mile 351, to Midnapore, mile 365, a length of 14 miles, the country is easy and level. The first five miles are in the Cossye valley and very level; but a good deal of local drainage into the Cossye is crossed. The latter nine miles are on a tolerably level plateau, and almost on a watershed. As the general level of this high ground is some 60 to 80 feet above the Cossye valley, there will be an ascent at about the 356th mile. It would be possible to avoid this high ground by following generally the course of the Chyebassa-Midnapore road, and remaining down in the Cossye valley, but much more waterway would be required; and at one point, near Midnapore, where the plateau projects into the river, there would be some heavy work. If it were any object to connect the railway with the navigation canal, the preferable site for the Midnapore station would be south of the town and on the river bank; or better still, the alignment from Jambandi should go south of the Cossye river, as shewn by the thin dotted line; but if, as is more probable, the railway and canal would serve for entirely different purposes, the latter continuing to carry grain to the Hooghly from Midnapore, the best site for the station would be close to the north of Midnapore on the high ground. The average work on this section of 14 miles will be five miles of 6-feet banks in ordinary clay, one mile of 10 feet banks and cuttings in hard clay and moorum, and eight miles of 4 feet bank in clay. The bridging would be 200 feet of 10 to 20 feet bridging, and 150 feet of small culverts.

General remarks.—The previous paragraphs give all necessary information for a preliminary rough estimate for the 95 miles from the junction with the Bilaspore-Sitarampore survey to Midnapore. An approximately correct aneroid section of the route can hereafter be given, but the observations have not as yet been worked out. There will, however, be no difficulty about getting over the ground with 1 in 100 as the ruling gradient. The first 70 miles of the country can be very well compared with the portion of the Bilaspore-Sitarampore line between Rangadeh and the Bamni river, except that the gradient will not be so continuously downwards.

Midnapore to Howrah.—With reference to the remaining 67 miles from Midnapore to Howrah, the only information I am able to give is what I could gather from the Collector and Executive Engineer at Midnapore. The gradients over this portion of the route will be practically level; bheels and large areas of flooded country, and spills from large rivers, and the chances of the frequent bursting of any of the very numerous embankments, will be the principal difficulties to be contended with. It will be impossible to calculate, and difficult to estimate, the amount of water to be allowed for in these spills and floods, the flood-opening question will probably be solved by the practical, but expensive, method of throwing up the bank, and waiting to see to what extent and at what places it is breached.

The net-work of bunds which crosses the country in all directions will be a good criterion for the height of the bank.

Roopnarain and Damooda.—The Executive Engineer, Cossye Division, was good enough to get me sections of the Roopnarian and Damooda rivers where crossed by the Trunk Road. The width of flood-level of both these rivers is surprisingly small, but they are only kept from flowing over the whole country by the bunds along both banks, which are kept up by the Public Works Department. The ground-level near both these rivers is only 10 or 12 feet above mean sea-level. In the case of the Roopnarain the bunds which retain the floods are eight feet above the ground surface. In the case of the Damooda the floods rise six feet over the ground surface, and are only retained by the bunds, which are 10 feet above the ground.

Roopnarain.—The width between the embankments of the Roopnarain is 1,700 feet, but judging from other sections and calculations, which see further on, I should say that the river must be crossed by 5 500 feet of bridging. The maximum height from deepest part of stream to top of embankment is 38 feet, allowing 12 feet more for country-boats, the piers of a bridge would be 50 feet high. The foundations may be anything—100 feet will probably not be considered an excessive estimate.

Damooda.—In the section of the Damooda, the width between embankments is 1,250 feet, and the maximum height from deepest part of stream to top of embankment is 20 feet. The height of piers would therefore be 40 feet. Foundations, as in the Roopnarain, probably 100 feet: 1,250 feet of waterway is required for the main channel.

Damooda and Roopnarain.—The cold-weather depth of water in the Roopnarain at deepest is 20 feet, and in the Damooda 14 feet. A very careful survey of both rivers would of course be necessary before the crossing sites could be fixed. The two sections now

available would probably be greatly improved upon, as they were not taken at selected points, but where the Trunk roads happened to cross A site on both rivers, about three miles up-stream from the road, would appear, from the inch-to-the-mile maps, to be the best crossing. The height of tidal or cyclonic wave is an important matter so near the sea, but I presume that the engineers who designed the embankments knew all about that.

Banks between Midnapore and Howrah.—I do not think an average of 12 feet banks for the whole of this 67 miles an excessive estimate, because for many miles at a time over the inundated areas the banks will probably average 15 feet. The soil will be ordinary rice btay.

Waterways.—The estimate I can make for the minor waterways will necessarily be very vague. From mile 365 to mile 375, there will probably be 200 feet of bridging, 20 feet high, over large khalls, and 300 feet of minor culverts. Between miles 375 and 385 there will be 300 feet of bridging, 30 feet high, over the Pilaspai N, and 400 feet of minor openings. From mile 385 to 395, I estimate one 100 feet bridge, 20 feet high, over the Toper khall, and 400 feet of minor openings; from mile 395 to mile 402, say, 200 feet of culverts; between the 402nd and the 406th miles are the Roopnarain and Damooda rivers; from the Damooda into Howrah, mile 432, the bridging would probably be as calculated in the following pages of notes upon the Roopnarain and Damooda spill-waters An elaborate survey for these waterways would of course, be required, but a good idea of them can even now be formed.

Notes on the waterways required for the Roopnarain and the Damooda and their overflows.

Notes on the Roopnarain and Damooda.—The fall of the ground in the alluvial valley, containing these two great rivers, appears to be only some three or four inches per mile. It is therefore only what might have been expected, that, running as they do parallel to each other, and only five to ten miles apart, their flood-waters should get mixed, and that they should overflow through beels and khalls and over the surface of the country into each other and into the Hooghly.

Without an extensive survey it will be impossible to exactly fix the quantity or the location of the bridging required.

We possess, however, sufficient information to enable an engineer to assert that nothing less than a certain number of lineal feet will suffice. We are bound to provide for the passing off, at no extraordinary velocity or depth, of the drainage of 12,350 square miles of country between mile 395, the Cossye-Roopnarain watershed, and Howrah terminus, mile 432. First, to take the case of the Roopnarain, which presents no great difficulties, it drains an area of 3,300 square miles, which, using Colonel Dickens' formula, with so small a coefficient as 705, represents a discharge of 305,000 cubic feet per second. I have a section, kindly procured for me by the Executive Engineer, Cossye Division, at a point about eight miles up-stream from the Trunk road crossing, on which, for a 17 feet flood, there is a flood area of 41,873 square feet. This, with above discharge, would give a velocity of 7·28 feet per second With so small a fall as three or four inches per mile, we can certainly allow of no greater velocity than this through the bridge. The breadth of the river at this site is 5,500 feet, and the mean depth 7·6 feet.

Of above flood area of 41,873 square feet, a large proportion—16,543 square feet—represents water only four feet deep, flowing over the surface of the ground between the edge of the main stream and the embankment. It would be impossible to throw this 16,543 square feet into the main stream without increasing the velocity to an extent quite inconsistent with the fall of the ground. Deducting this 1,136 feet of shallows, if we were to endeavour to throw the whole of the water through the remaining 1,364 lineal feet of main stream, we should get no very much greater depth, but a much greater velocity—some 11 to 12 feet per second—which could not be allowed over the alluvial silt. It therefore seems impossible to avoid a length of some 5,500 feet of bridging, and whether the whole of this, or only half of it, is built on deep well foundations, will depend entirely upon what future borings tell us as to whether the actual river has been always within its present deep channel, or whether it has wandered about anywhere within the 5,500 feet over which its flood now runs.

Meanwhile it is safest to estimate for 5,500 feet of bridging, with 100 feet well founds, and piers 50 feet high for the Roopnarain river.

We have another section of the Roopnarain at Koella Ghat, where the Trunk Road crosses eight miles below the section already considered; but this is not a representative section, because a large proportion of the flood water has made its way over the country before this place is reached

We have now to consider the case of the Damooda. At a point some 140 miles up-stream, just below its junction with its most important feeder—the Barrakhur river—its discharge has been thoroughly gone into for the Bilaspore-Sitarampore survey. The area of country drained above this point is 7,030 square miles. The discharge due to this area, using the low coefficient (705) with Colonel Dickens' formula, comes out 541,120 cubic feet per second. That this is correct is proved by its corresponding very nearly with the discharge calculated from the fall of bed at that point, and the known flood of 31 feet between defined banks. The bridge, as designed at this point for the Bilaspore-Sitarampore survey, gives a waterway for a 31 feet flood of 55,800 square feet. At the site where the Midnapore alternative would cross the area of country drained by the Damooda is 9,050 square miles.

The discharge calculated by the same formula is 654,240 cubic feet per second. In a section of the Damooda, at the Trunk road crossing, the breadth between the embankments is only 1,250 feet, and the area of flood section 12,115 square feet In another section, at a point eight miles farther up-stream, the breadth between embankments is only 1,130 feet, and the flood area 8,954 feet. If we assume a velocity, the same as was found at the Roopnarain, of 7·28 feet, we get a discharge through the main stream of the Damooda of only 88,000 feet, or only about one-eighth of what we know the discharge must be at this point, and only one-sixth of what it is accurately known to be where crossed by the Bilaspore-Sitarampore survey The remainder of the discharge, or 566,000 cubic feet, must find its way through the line somewhere between mile 406 and Howrah. A great portion must find its way through khall and nullahs, which can be seen on the map; but the greatest portion must flow over large areas of country in the form of broad inundations. As the fall of the country is extremly small, we cannot assume a greater velocity for this flood than 5 feet per second; and if we assume that the water runs 12 feet deep in the khalls and 6 feet deep over the country, we find that a length of bridging of some 470 feet is required over the khalls, 9,400 feet of minor bridging, culverts, and flood-openings, and, in addition to this, 1,250 feet of major bridging, with 40 feet piers over 100 feet wells, would be required for the main channel.

Trade.—I am not in a position to express an opinion of any value upon the question of local trade. I can only say that from mile 270 to mile 327 the country may be described as a narrow valley covered with jungle, and having small patches of cultivation around the villages. The portion between mile 270 and 285 may be described as a sort of "divide," or "watershed," between the trade which centres on Puruha and that which centres on Midnapore. This section is then, as might be expected, destitute of roads. The Chyebassa-Midnapore road comes in at mile 285; but as far as the commencement of the Midnapore district, mile 327, it appears to serve no local necessity for traffic, as the villages are small, and scattered through dense jungle. I met nowhere, so far, those dense herds of laden pack-bullocks or sugger-carts to be met with over the Chota Nagpore roads..

After the Midnapore district is entered the country becomes more cultivated, and there is doubtless more grain grown than is consumed locally; still, as far as mile 350, four-fifths of the country is covered with jungle. In his report on his suggested Gewankhali route, Mr. R. H. Wilson, Collector of Midnapore, mentions the traffic to be expected from the rich Bamunhati valley in Mourbhunj. It seems to me that this traffic will continue to find its way, as at present, from its centre, Baripada, *viâ* Sirsa along the Bombay road into Midnapore direct. Bengal producers consign to small local mahajans, who in their turn consign to their correspondents in the great trade centres of the districts; and when once the mahajun's caravans have been loaded up, it matters little to them whether they have to travel five marches or ten. A precisely similar case is that of Raniganje, which has long been a great trade centre and the residence of large mahajans; a great trade from Chota Nagpore, which it might have been expected the railway at Barrakpur, or at all events Sitarampore, would have tapped, is actually carted along the Trunk road past Barrakhur and Sitarampore, and parallel to the East Indian Railway to Raniganje. This is not entirely due to custom, but, as the people have frequently told me, to a dislike to the delay and worry of breaking bulk, and waiting probably, quite as many days at the railway station as they would have spent on the extra road-marches. I can say nothing about the traffic between Midnapore and Calcutta, but it must be thoroughly well known by the Minapore civil authorities.

This district, as well as that of Hooghly, must be very rich, and both appear to be densely populated east of the town of Midnapore.

Stations.—The first place where the probability of traffic would suggest a station is Moholia, at mile 302, where the Chyebassa road comes in; but as this is 30 miles from Sini station, at the 270th mile of the Bilaspore-Sitarampore survey, it will be necessary to have an intermediate station at Susindi, mile 287. It is scarcely probable that minor intermediate stations would pay in this jungle valley. Ghatsilla, at mile 308, is an important town with a thana and post office, and a resident Rajah; but as owing to the low level of the town the line must be taken a mile and-a-half to the north-east, Ghatsilla will be sufficiently served by Moholia station, and the next, at mile 315, at Narsingarh. Although Chakulia, mile 325, is only 10 miles further on, it is the junction of several roads, and a station there would perhaps draw traffic. The next possible site would be Jambandi, mile 337. Then in the Cossye valley, a station at mile 353, opposite Chandra the road stage would be necessary. The country around here is very rich, and much indigo is grown. Midnapore, at mile 365, would require a second class station. From Midnapore into Howrah frequent small stations ought to pay. The following sites would suggest themselves for third class stations:—Kamalpore, mile 381; Jadupur, mile 395; Khanpur, mile 409; Sankrail ferry, mile 423. Probably another station at Mandara, mile 401, between the Roopnarain and the Damooda, would be desirable.

Level-crossing.—From mile 270 to mile 350 the inter-village traffic is so paltry that the bridges would very frequently be sufficient for the herds of cattle. A third class level-crossing in addition every four miles would probably be sufficient. From mile 350 to mile 380, a third class crossing every two miles would be probably enough. From mile 380 to Howrah, mile 432, the high banks with frequent openings would give such facilities to traffic that one third class crossing every mile-and-a-half would suffice, notwithstanding the greater density of the population. In addition to the above 70 third class crossings, it will be

necessary to give second class crossings at the following places for the main district roads:—Mile 275, Chyebassa-Purulia road; mile 325, Chyebassa-Midnapore road; mile 355, Chyebassa-Midnapore road; mile 361½, at Midnapore station, for the Bankoora road; and mile 369 for the Burdwan and Midnapore road; that is, five second class crossings.

Ballast.—There is abundant material for cheap ballast from mile 270 to mile 370 From mile 370 to mile 432 ballast will have to be burnt, and as fuel is scarce it will be expensive.

Building materials.—Brick will probably be the best building material all along the line; there is no good building stone anywhere. Line and fuel are plentiful for 100 miles out of the 162

Sleepers.—Sál timber, suitable for sleepers is plentiful for the first 50 miles; it will be scarcer along the next 50; and whatever has been found the cheapest sleepers on the other railways around Calcutta will probably be used on the remaining 62 miles.

Land.—The price will vary according to the distance from Calcutta: temporary land has been put down in the estimate at half the price of permanent land.

Estimate.—Appended is an estimate founded upon this report; according to this the cost of the 162 miles comes out as Rs. 2,32,38,000, or Rs. 1,43,444 per mile.

The rates generally are the same as on the Bilaspore-Sitarampore survey.

F. J. E. Spring,
Executive Engineer.

No. 409R, dated Purulia, the 7th May 1883.

From—H. H. RISLEY, Esq., Offg. Deputy Commissioner of Manbhoom,
To—The Secy. to the Govt. of Bengal, Public Works Dept. (Railway Branch)

WITH reference to Government order No. 4472A, dated 16th December 1882, deputing me on special duty to enquire into the trade of Chota Nagpore as affecting the prospects of the proposed railway from Sitarampore to the Central Provinces, I have the honour to submit a report on the subject with two maps—one illustrating the general course of trade in Chota Nagpore, and the other shewing the places where limestone has been discovered in the neighbourhood of the Burrakur Iron Works.

2. The submission of the report has been delayed, partly by difficulties in obtaining detailed statistics of the trade of the East Indian Railway, partly by the labour of compiling the statistics of local registration from badly-written vernacular reports, and partly by press of work thrown upon me after taking charge of this district.

3. If the report is deemed worthless for statistical purposes, I would ask that it may be remembered that in a demi-official letter to Mr. Levinge, written in December, I pointed out the extreme difficulty of obtaining any statistics whatever, and generally deprecated my deputation on duty, the results of which were not likely to bear any reasonable proportion to the time spent on fruitless enquiries. I believe the report exhausts all existing sources of information, but it is doubtful whether any one who knows the Chota Nagpore Division well will accept those parts of it which deal with quantities as fairly representing the real trade. At the same time, without going into mere guess-work, it is difficult to see how the quantities can be raised; and there always remains the argument that, if the avowed object of the railway is to create a trade, it is illogical to ask for statistics of that which *ex hypothesi* does not yet exist.

Report on the trade of Chota Nagpore in its bearing on the proposed Railway from Sitarampore to the Central Provinces.

1. *Plan of this Report.*—An attempt will be made in this report to describe the general character of the country included in the Chota Nagpore Division; its mineral and agricultural products; the marts at which the trade of the area is collected, and the routes by which it is conveyed. Having thus indicated roughly the resources of the country as a whole, I shall proceed to discuss in detail the chief articles with which its trade is concerned, and shall endeavour to frame from such data as are available an approximate estimate of the probable trade on the proposed railway from Sitarampore on the East Indian line to Nagpore in the Central Provinces, during the first few years of its existence. With the through traffic which may be looked for between the Central Provinces and Calcutta, I shall not attempt to deal, nor shall I concern myself with *local* trade, properly so called, between places situated within Chota Nagpore.

2. *Character of the country*—The Chota Nagpore Division is a pear-shaped tract of hilly and undulating country, forming three successive steps from the high lands of Central India to the alluvial plains of Bengal. On the extreme west of the division the Tributary States, a confused mass of hills, ravines, and plateau, project like a wedge into Rewa and Central Provinces, sending up streams on the north towards the Sone and the river system of Behar, and on the south towards Orissa and the Bay of Bengal. It is believed that, at a remote geological period, the entire country now included in the Tributary States formed a uniform table-land, elevated about 3,600 feet above the sea. Traces of such a state of things are to be found in the flat-topped hills, locally known as *pats*, several of which mark the descent from the State of Sirgoojah into the British district of Lohardugga. The combined action of rivers, wind, and rain has long since broken up the original plateau into a hill system so complicated as to render it impossible to define the physical features of the Tributary States with minute precision.

3. *Lohardugga District.*—The district of Lohardugga, forming the central and north-western portion of the division, comprises three tracts of country which differ essentially in aspect and physical conformation—Chota Nagpore proper, the five pergunnahs bordering on Manbhoom, and the sub-division of Palamow. Chota Nagpore proper, as distinguished from the Commissioner's Division bearing that name, is an elevated table-land situated about 2,100 feet above the sea, and occupying the central and southern portion of Lohardugga district. The five pergunnahs on the east resemble in most respects the adjoining district of Manbhoom. Their average elevation is about 1,000 feet less than the central plateau. On the north-west the table-land falls away into the sub-division of Palamow, which extends on the north to Behar and the Mirzapore district of the North-West Provinces. On the east and south, Palamow consists of spurs thrown off from the plateau of Hazaribagh and Chota Nagpore proper; while the rest of the sub-division is a tangled mass of isolated peaks and long irregular stretches of broken hills. The average elevation of the country is about 1,200 feet above sea level, but the surface is wilder and more cut up by rock and jungle than in Chota Nagpore proper, and there are no level areas of any extent except the valleys of the North Koel and Amanat, to which rice cultivation is confined.

4. *Hazaribagh District.*—On the north and north-east of Lohardugga the central plateau of Hazaribagh rises to an average height of 2,000 feet above the sea. This plateau, which is connected by a narrow neck of land with the corresponding level in

Lohardugga, occupies only a limited area, while the rest of the district lies at an average elevation of 1,200 or 1,300 feet above sea level. The northern portion of Hazaribagh is divided by a well marked range of hills from the plains of Gya district, which are about 800 feet below the lower level of Hazaribagh.

5. *Manbhoom District.*—Due east of Lohardugga, and south-east of Hazaribagh, the district of Manbhoom forms the last step in the gradual descent from the high land of Central India to the delta of Bengal. Here the undulations of the surface become less pronounced, and follow each other at longer intervals than in Lohardugga and Hazaribagh; while level tracts of considerable extent are of more frequent occurrence. In the central and eastern portions of the district the country is open and consists of rolling downs, dotted here and there with isolated conical hills. The average elevation may be taken at 800 feet above sea level.

6. *Singbhoom District.*—The south-eastern corner of the division is occupied by the district of Singbhoom, an elevated basin shut in on the north, west, and south by the spurs of the Chota Nagpore plateau and the hills of the Orissa Tributary States, and imperfectly open on the east towards the district of Midnapore. Chyebassa, in the centre of the district, is about 700 feet above the sea; but the surrounding ranges of hills are considerably higher.

7. *Geological character.*—The prevailing geological formations of the Chota Nagpore Division belong to the metamorphic or granite and gneiss series, and to the sub-metamorphic or slate and quartzite series. Coal-bearing shales and sandstones occur over the whole area, except in the district of Singbhoom, frequently in conjunction with iron, stone, shales, and hœmatite. The known coal-fields of the division, and some of their more important characteristics, are shewn in the following table:—

Number.	Name of Coal-fields.	Where situated.	Area in square miles of coal bearing strata.	Thickness of coal-bearing strata.	Estimated yield in tons.	Percentage of carbon, ash and volatile matter.	Maximum thickness of seams.	Remarks.
			Sq. m.	Feet.			Feet.

8. *Coal. The Jheria field.*—Of the coal-fields enumerated above only two have any direct bearing upon the prospects of the railway from Sitarampore—the Jheria coal-field (No. 15 on the list), and the Hingir coal-field (No. 4 on the list). The greater portion of the Jheria field lies north of the river Damooda in the sub-division of Govindpore. Its length from east to west is about 18 miles, its greatest breath from north to south being 10 miles. Its south-eastern corner, marked by the village of Tasra on the north bank of the Damooda is about 12 miles from Jhapra, a village between Purulia and Raghunathpore, through which the line will pass. There would be little difficulty in constructing a coal line up to the Damooda through the country traversed by the existing road from Jhapra to Govindpore. The surface undulations are trifling, and hardly any bridging would be required, as the line would run parallel to the small streams draining into the Damooda. During the dry season coal could be transported across the river on a temporary bridge, operations being wholly suspended in the rains. Of that part of the field which is situated to the north of the Damooda, the eastern portion belongs to the zemindar of Jheria and the western to the zemindar of Nowagur, a minor under the charge of the Court of Wards. A narrow strip of coal-bearing strata on the south of the Damooda, lying about 12 miles from the nearest point on the line, belongs to the Rajah of Pachete. If the coal of this southern strip is as good, and the strata dip at as small angles as in the northern area, the southern part of the field should apparently be opened up first, as the Damooda will in any case interfere with the transport of coal from the northern section of the field. The

entire question will doubtless be carefully worked out when the construction of the railway is sanctioned. It may be gathered from the geological reports that the Jheria coal-field presents special facilities for cheap working, in that the coal lies very near the surface and the strata dip at unusually small angle to the horizon.

9. *The Hingir field.*—The line will pass through the southern portion of the Hingir field situated partly in the Chota Nagpore Tributary State of Gangpur, and partly in the state of Raigurh in the Central Provinces. In discussing the probable economic value of this field, Mr. V. Ball, F. R. S., remarks*:—"The seams which are exposed in the portion of the field at present under description are neither very numerous nor individually of promising quality; but it must be remembered that the coal measure rocks are not only as a whole very slightly disturbed from their original horizontal position, but are much covered by superficial deposits, and that there is a complete want of sections which might shew the succession of beds constituting the group. The true or even approximate value of the field therefore can only be ascertained by borings. In the meantime it may safely be asserted that there is a fair prospect of this field proving to be of considerable value."

* Records, Geological Survey of India, Volume VIII, Part 4.

10. *Iron and Limestone.*—An elaborate report on the iron works at Burrakur, which are about to be experimentally worked by Government, has been published in the *Gazette of India*, and I need not attempt to discuss the prospects of the scheme. A copy of a map prepared by Ritter von Schwarz, the Engineer in charge of the works, shewing the places where iron-ore, limestone, and coal occur in the immediate neighbourhood of the iron works, is annexed to this report. The probable demand on the railway for carriage of manufactured iron, limestone, and lime is roughly estimated in paragraph 75 below.

11. *Copper in Singbhoom.*—In 1854 the copper veins and mines of Singbhoom, worked in pre-historic times by a people whom local tradition alleges to have been Jains, were described by Captain J. C. Haughton in the Asiatic Society's Journal. His paper attracted the notice of two Calcutta merchants, who engaged Mr. Emil Stöhr, a skilled mining geologist, to make investigations In 1857 a company was started, and fine raw ore was turned out, at the rate of from 1,200 to 1,300 cwts., a month, and delivered in Calcutta by way of Purulia and Raneegunge. From the first the enterprise was conducted on too expense a scale. A high mining rent was paid, and a foundry with a steam-engine was erected at great cost before their was ore enough to supply it. In 1859 the company was dissolved, and the buildings and machinery sold at a nominal price. In 1862 a second company was formed, only to be dissolved in 1864, without having paid even their mining rent for the two years during which they worked.

12. The copper ores are described by Mr. V. Ball, F.R.S., as occurring in a zone of schists forming the northern flank of a broken spur of hills thrown off from the plateau of Chota Nagpore. Measured along the strike, these copper-bearing rocks extend in an easterly and south-easterly direction for nearly eighty miles. The metal occurs both in lodes and as a desposit disseminated through the materials which compose the schists. There is no reason to believe that the supply of ore has been exhausted either by the ancient miners or by recent workings. The failure of the two European companies is fully accounted for by the unhealthiness of the climate, the bad means of communication, and the scanty supply of fuel and lime. Within the last 20 years the wholesale clearing of jungle has materially improved the climate; while the railway passing through the copper-bearing rocks may be relied on either to supply the means of reducing the ore on the spot, or to convey it to any place selected for the establishment of a foundry.

13. *Copper in Manbhoom.*—Copper is believed to occur also near Dhadka in Manbhoom, about 35 miles to the east of the proposed line; but no scientific account of the deposits has been published, and I have no means of determining their probable value. Lead containing a large proportion of silver is said to have been found in the same neighbourhood.

14. *Minerals in Hazaribagh.*—In Hazaribagh lead of good quality has been found in scattered nodules, but the sources of the metal have not been traced. Tin, copper, and antimony have been worked at various times, both by Europeans and Natives, with very moderate success. A company has recently been started to work copper mines at Baragunda near Giridi in Hazaribagh, and their shares are now quoted at a premium. Mica occurs in many places in the north of Hazaribagh district, where some mines, long managed on a wasteful system by natives, have recently been opened out by European practical miners. As none of the minerals found in Hazaribagh are likely to be carried by the Sitarampore-Nagpore Railway, I need not discuss at length the conditions under which they might be profitably worked. I will merely remark that, in the event of the Patna-Gya State Railway being extended through Palamow along the Damooda valley to Purulia, the iron ores and coal of pergunnah Karanpura, south-west of Hazaribagh, may come to be of considerable value. It is doubtful indeed whether limestone can be found in sufficient quantities to support large iron works, but this point does not seem to have been very fully enquired into.

15. *Potstones.*—The trade in potstone plates is said to have increased greatly of late years. Its chief centre is Patcoom in the south-west corner of the district. The opening of the railway will probably stimulate the demand for these heavy articles. The supply of the stone is said to be unlimited. The following remarks on the subject are extracted from a paper on Manbhoom district by Mr. V. Ball:—"Chloritic schists, passing on the one hand

into talcose, and on the other into serpentinous rocks, occur not uncommonly in the sub-metamorphic, and somewhat less frequently in the metamorphic series. In building, the varieties of this material have only been used on a small scale for ornamental purposes, for which some of them, as being tough and at the same time easily carved, are particularly suited. They are more extensively employed in the manufacture of altars, in idols, plates and bowls. In the southern part of Manbhoom, on the frontiers of Singbhoom, there are numerous workings which generally take the form of narrow mines, but are deserted during the rains. From these mines a considerale quantity of stone is annually extracted ; the blocks are roughly dressed to the shape required, be it for *lingam* plate or bowl. They are then fixed in a rude lathe, cut into form, and finished with a smooth surface. When finished they are carted off to Burdwan, where they are in great demand, and a portion are sent on to Calcutta for sale. One class of the varieties used stands fire well, while the other does not. The former is of course the most esteemed by the natives. The cracking of the latter is probably due to the water in combination in the more chloritic varieties which becomes released on the application of heat. In many of the ancient temples in Chota Nagpore, images made from this material are met with.

16. *Forests.*—The gradual spread of cultivation, the incessant demand for railway sleepers, and the practice of girdling the tree for resin, have combined to denude the districts of Hazaribagh, Lohardugga, and Manbhoom of most of their valuable sâl forests. Extensive jungles still remain uncleared in these districts, but nearly all the trees big enough to make sleepers have been thinned out, and little besides saplings is left. Forest reserves have been formed by Government in the north-west of Hazaribagh, in the south of Palamow, and in the western corner of Singbhoom, and throughout the division the landholders are now beginning to establish small reserves locally known as *rakhwals*. These, however, are not worked on any regular system; their boundaries are usually ill-defined, and the conflicting claims of the landlord and the villagers are a fruitful source of litigation in the criminal courts. A scheme for preserving the private forests of Chota Nagpore has recently been under consideration by Government. Forest officers were deputed to examine the forests, but it is believed that, except in Singbhoom, which has only been resorted to for sleepers within the last two or three years, and in the south of Lohardugga the private forests of the division contain little timber worth preserving. In the Tributary States the original forests are still virtually untouched. Cart-roads do not exist, and the rivers cannot be used for floating timber. Here the proposed railway will open out an enormous area of virgin forest which, if properly worked, ought to meet almost any demand for an indefinite period.

17. *Agriculture Rice cultivation.*—The system of agriculture followed in Chota Nagpore is determined, particularly in the case of rice, by the physical conformation of the country. This consists mostly of long undulating ridges between which the drainage runs off to join the large streams. The lower slopes of these ridges, and the swampy ground between, supply the only land on which a wet rice crop can be raised. The soil is, in the first instance, brought under cultivation by cutting level terraces out of the hill side, a small bank to hold up water being left round the edge of each plot. The hill sides, thus treated, present the appearance of a series of steps, varying from one to five feet in height; and when the slopes are too steep for terracing, or the soil too stony for cultivation, the bed of the stream is banked up and made into one long, narrow rice-field.

18. *Oilseeds and other upland crops.*—Wheat, barley, various kinds of millet, Indian-corn, *marua*, pulses, oilseeds, sugarcane, betel-nut, cotton, tobacco are cultivated on the higher levels of the surface where the rice terraces leave off. In Hazaribagh and Chota Nagpore proper, tea is grown by European planters on lands of this class. In 1880-81 thirty-six tea plantations had been opened in the two districts. The gross yield for that year is reported as 237,866 pounds.

Tea

19. *Agricultural statistics.*—Attempts were made at the time of the revenue survey, about 20 years ago, to record the area actually under cultivation, and to distinguish between cultivable and uncultivable waste. Conjectural estimates of the area under particular crops have been framed at various times by the district officers. Non of these statistics can claim to be even approximately accurate. Within the last 20 years the cultivated area has been continually extended, and it frequently happened that the survey of a particular village was made at a time when there were no crops on the ground. Again, owing to the nature of the country, it is in many cases difficult to say whether a given plot of land is cultivable or not ; and steep slopes which have the most sterile appearance are frequently terraced into rice lands. Although no estimate of the area of cultivable waste would possess the smallest statistical value, there can be little doubt that the opening out of the country by the railway will be followed by an enormous extension of cultivation. It may even be hoped that emigrants from the overcrowded districts of Behar will not only break up fresh land, but also introduce improved methods of agriculture. Recent enquiries into the cultivation of sugarcane in Manbhoom have shewn that the local cultivators are far behind the ryots of Behar both in their system of tillage, and in their treatment of the canes when cut. Almost the only villages where any improvement on the old methods can be traced are those held by Hindoo middlemen from Behar.

20. *Area and population.*—The area and population of the Chota Nagpore Division, as ascertained in the census of 1881, are as follow :—

	Area in square miles.	Population.
Lohardugga	12,045	1,609,244
Hazaribagh	7,021	1,104,712
Manbhoom	4,147	1,058,228
Singbhoom	3,753	453,775
Tributary States	16,054	678,002
Total ..	43,026	4,903,991

21. *Strength of the aboriginal element.*—The details of the census of 1881 have not yet been published, but it may be noted that, of the population recorded in the previous census of 1872, 54 per cent. belonged to aboriginal or semi-aboriginal races. Taking the division as a whole, we may fairly assume that at least 50 per cent. of the population are more or less of aboriginal descent. No difficulty therefore need be anticipated in procuring cheap labour for the earthwork of the new railway, even in the most unhealthy parts of the line. The aborigines of Chota Nagpore are conspicuous for their immunity from malarious fever, and it is mainly by labourers of this class, imported into Assam, that new tea gardens are opened out in that unhealthy province.

22. *Exports and Imports.*—The chief exports of the Chota Nagpore Division are the following :—

Rice ..	Chiefly from Manbhoom and Singbhoom.
Indian-corn ..	Chiefly from Manbhoom.
Wheat ..	From Hazaribagh.
Pulses ..	Mung (*phaseolus mungo*). Urid (*pashcolus roxburghii*) known as biri in Manbhoom Gram (*cicer arietinum*) from Hazaribagh.
Oilseed ..	Sarsua—mustard. Til (*sesamum orientale*). Tisi—linseed. Surguja (*guizotia oleifera.*)
Cotton ..	Only from Palamow.
Timber ..	From South Lohardugga and North Singbhoom.
Bamboos ..	
Chope ..	Or rope made of jungle fibre.
Babui ..	String made of babui grass.
Tasar silk ..	Manbhoom and Hazaribagh.
Tasar cocoons.	
Hides.	
Horns.	
Shellac ..	From Lohardugga and Manbhoom.
Ghee ..	Manbhoom, Hazaribagh, and Palamow.
Tea ..	Hazaribagh and Lohardugga.
Jungle products.	
Petals of the mohua tree.	
Catechu.	
Resin.	
Stick-lac.	
Dye substances of various kinds.	
Wax.	
Gallnuts (haritaki).	
Coal from Manbhoom and Hazaribagh.	
Iron from Hazaribagh and Lohardugga.	
Mica from Hazaribagh.	

The chief imports are—

European piece-goods.
European twist.
Blankets.
Salt.
Spices.
Betel-nut.
Molasses.
Tobacco.
Umbrellas.
Brass utensils.
Paper.
Wines and spirits.
Oilman's stores.
Gunny-bags—to Hazaribagh.

23. *General course of trade.*—It will be clear from paragraphs 2 to 6 above, and from the annexed map, on which the chief lines of hills have been roughly delineated, that on the

west and south Chota Nagpore is shut in by the hills of the Central Provinces and Orissa, while there are but few practicable outlets through the bordering ranges which mark the descent into the plains of Behar. Hence the main currents of export trade, like the main lines of drainage, follow the natural slope of the country from west and north-west towards the east, converging gradually, after entering Manbhoom district, on the railway stations of Burrakur, Ranigunge, Panaghur, Durgapore, Mankur, and Burdwan, and the trade centres of Bankura, Sonamukhi, Rajgram, Mejhia, Bishanpur and Indas. Three main exceptions to this general rule deserve special notice—

(i) Of the surplus produce of Palamow and Sirgoojah, which is collected in the marts of Garwa, Daltongunge, Hosenabad, and Maharajgunge in Palamow, nearly the whole is exported to Gya, Shahabad, and Mirzapore, and it may be expected that the Gya-Patna State Railway will attract a continually increasing proportion of the trade of these marts, as well as of Chatra in the west of Hazaribagh.

(ii) Part of the trade of the north of Hazaribagh, collected in the mart of Mirzagunge, finds its way into Monghyr district; part is exported from Giridi on a branch of the East Indian Railway, while a considerable portion of the export trade of Chatra goes to Gya.

(iii) The export trade of that part of Dhalbhoom, the eastern pergunnah of Singbhoom, which lies to the east of the Kapargadi hills, has its natural outlet towards Midnapore. Ghatsilla, the chief village of Dhalbhcom, is not much more than 60 miles from the mouth of the Midnapore canal, and we may expect that, when the roads in Singbhoom are put in order, a very considerable traffic will pass out of the district by this route.

24. *Export routes.*—The areas of country which either now export, or may ultimately be expected to export, by way of Gya, Giridi, and Midnapore, have been roughly marked on the map in blue. At present a certain proportion of the trade, even of these remote parts, flows towards Ranigunge, but it can hardly be expected that this reversal of natural conditions will continue when communications come to be improved. All the exports from the remaining areas find their way sooner or later through Manbhoom district on one or other of the roads marked by red lines on the map to the districts of Burdwan and Bankoora, and in particular to the great mart of Ranigunge, either for local consumption or for transport to Calcutta from stations on the East Indian Railway.

25. *Hazaribagh District.*—Chatra, about 36 miles north-west of the civil station, is the chief market of the Hazaribagh district. Situated on a comparatively level tract between the central plateau of the district and the tangled mass of rock and ravine which forms its western frontier in such a way as to command the openings of the passes from the north-west, west, and south-west, it is well suited by its position to be the distributing market for the country produce of Palamow and the Tributary States. The principal articles imported into Chatra are the following:—Rice, Indian-corn, oilseeds, pulses, and mohua petals are imported from Lohardugga and the Tributary States of Gangpur, Jushpur, and Sirgoojah. From the same places are also brought stick-lac, resin, tusser silk, cocoons, gum, cotton, and unwrought iron. The districts of Gya and Shahabad send wheat, gram, masur (*ervum lens*), khesari (*lathyrus sativus*), and similar cereals, as well as turmeric, pepper, and other vegetables. Zinc and tin are also sent in small quantities from these districts. Tobacco is imported from Patna. English cloth, brass or bell-metal, household utensils, salt, pepper, and *supari* or betel-nut are imported from Burdwan, Ranigunge, and Calcutta. The export trade supplies Lohardugga and the Tributary States with English cloth, salt, pepper, tobacco, household utensils, turmeric, &c. Rice, Indian-corn, marua (*eleusine coracana*), pulses, mohua flowers, and ghee are sent to Gya and Shahabad. Oilseeds, ghee, mohua flowers, gram, oil, and molasses are also exported to Burdwan and Ranigunge. Patna takes iron and certain proportion of stick-lac; but the bulk of the lac which finds its way into the Chatra market is sent to the great lac factories of Mirzapore district. Almost the whole of the Chatra trade is carried by pack-bullocks, as the passes leading up to the town on all sides, except the east, are at present inaccessible to carts.

26. *Trade of Chatra.*—The following estimate of a year's trade between Lohardugga and Chatra is taken from Mr. Spring's notes on the alternative line from Surti through the Damooda valley, Lohardugga, and Sirgoojah (Collection of papers on railway surveys, page 47):—

Exported from Lohardugga to Chatra.	Maunds.	Imported to Lohardugga.	Maunds.
Grain of sorts ...	40,000	Salt ...	7,000
Oilseeds of sorts ...	35,000	Tobacco ...	6,000
Cotton ...	4,000	Goor ...	3,000
Lac ...	3,000	Wheat, spices, cloth...	1,000
Iron, gum, mohua, leather, &c. ...	6,000		
Total ...	88,000	Total ...	17,000

Mr. Spring also notices "a comparatively active iron industry" in the town of Tandwa, about 18 miles south-west of Hazaribagh. Tandwa is the centre of the indigenous iron manufacture of the Karanpura valley, and supplies Chatra with a large proportion of the iron afterwards exported to Behar. The export trade of those parts of Hazaribagh, which do not deal through Chatra, is collected at Chumparan, Burhee Barsot, Barkatta, Atka, Bagodor, and Dumri on the Grand Trunk Road; at Mirzagunge, Pachumba, and Giridi in the north-east of the district; and at Gola and Pitarbar in the south-east. The marts on the Grand Trunk Road deal for the most part direct with Ranigunge, but a small proportion of their produce is taken on to the East Indian Railway at Barrakur. Mirzagunge and Pachumba despatch their surplus from Giridi; while Gola and Pitarbar trade with the important mart of Jhalda, 28 miles west of Purulia. Hazaribagh itself exports both by Giridi and along the Grand Trunk Road. It is difficult to foresee the precise effects of the proposed railway extensions on the trade of the Hazaribagh district, but it may be assumed that the Sitarampore-Nagpore line will deprive Chatra of the export trade which it now attracts from South Lohardugga, Jushpur, and part of Sirgoojah, and that the extension of the Patna-Gya line into Palamow will still further curtail the agency business from which the town derives its importance. At present the railway station at Giridi is cut off from the main stream of trade along the Grand Trunk Road by the unbridged Burrakur river, which is impassable for days at a time during the rains, and very destructive to carts even during the dry season, on account of the steepness of its rocky banks and the depth of sand in its bed. Carters from Chatra and the marts on the Grand Trunk Road, halting at Gobindpore on their way to Ranigunge, have repeatedly assured me that, if the Burrakur were bridged, they would take their goods to Giridi. We may expect then that, when the recently sanctioned bridge over the Burrakur is completed, the traffic of the Giridi station will shew a remarkable increase; while a corresponding diminution will take place in the trade of Ranigunge. The trade of Gola and Pitarbar will, I think, ultimately come on to the Sitarampore-Nagpore line, either at Raghunathpore or Purulia. The old Trunk Road, running from Raghunathpore through Chas to Hazaribagh, has recently been repaired in Manbhoom, and promises to serve as an important feeder to the railway. At present it joins the road from Ramgurh through Gola, to the village of Mahoosr on the Hazaribagh border, but the old line running direct to Hazaribagh is still in existence, and the question of putting it in thorough repair will have to be considered when the railway comes into working.

27. *Lohardugga District.*—The principal seats of trade in Lohardugga district are Garwa, Hosenabad, Daltongunge, and Mohurajgunge in the Palamow sub-division, and Ranchee, Lohardugga, Palkot, Lodhma, Biru, Bandu, Tamar, and Silli in the head-quarters sub-division. Garwa, in Palamow, forms the distributing trade centre for the surplus produce of great part of Sirgoojah, of the Tributary States further west, and of Palamow sub-division itself. Garwa market is held during the dry season on the sands of a river, and is one of the largest in the Chota Nagpore Division. Stick-lac, resin, catechu, cocoons of tusser silk, hides, rice, oilseeds, ghee, cotton, and iron are collected there, and at the other Palamow marts mentioned above, for export to Chatra and Gya. Piece-goods, brass vessels, blankets, silk, salt, tobacco, spices, drugs, and beads are imported from Behar for local consumption, and to supply the stocks of itinerant merchants who take these articles into Sirgoojah and Korea. Nearly all the trade of the head-quarters sub-division flows eastward to the mart of Jhalda in Manbhoom, and thence through Purulia to Bankoora and Ranigunge. The only exceptions to this rule, are—

(i) A small area in the west of the district roughly marked off on the map by the dotted line drawn from Biru through Palkot to a point about 12 miles east of Lohardugga town, which at present sends its surplus produce by pack-bullocks to Chatra; and

(ii) a still smaller area in the south-east which exports through Patcoom to Chandil, and thence by Burrabazar and Maubazar to Bankoora.

28. It appears, however, that, as the roads leading eastward are gradually improved and rendered passable for carts, the proporsion of the export trade flowing towards Ranchee and Jhalda is even now tending to increase, while the attraction of Chatra shews signs of declining. At present, no doubt, the tendency I speak of is not very conspicuous; but in the ordinary course of events the primitive modes of transport on which the Chatra trade depends are bound to be beaten out of the field by wheeled transport plying along more direct and more convenient routes. Chatra owes its predominance as a trade centre for Western Chota Nagpore to the various causes which have delayed the construction of cart roads in the west and south-west of Lohardugga district. As soon as the system of roads planned for the district is completed, it may be assumed that the entire traffic of the head-quarters sub-division and of the Tributary States, except Chang Bhakar and North Sirgoojah, will flow eastward towards Jhalda. At what points it will strike the new railway is a difficult question to determine beforehand; but I may mention that the Deputy Commissioner of Lohardugga agrees with me in thinking that the trade of the northern portion of the area in question, including the marts of Lohardugga, Ranchee, and Silli, will go to Purulia; that the traffic of the south, collected at Palkot and Biru, will come on to the line at Lungarth and Chakradhurpore, and that the south-eastern corner of the district represented by the mart of Tamar will export by way of Kharsawan or Chandil. As soon as the railway is sanctioned, the District Road Committee will probably set about aligning feeder roads to some of these points.

29. *Singbhoom District.*—The chief marts of Singbhoom district are Chyebassa Chakradhupore, Sonua, Kharsawan, Saraikola, and Haldipukar in Singbhoom proper, and Ghatsilla and Bharagora in the outlying pergunnah of Dhalbhoom Dhalbhoom, which is cut off from the rest of the district by a range of hills traversed only by a single pass, trades with Midnapore. The exports of the central and western portions of the district are sent as a rule to Ranigunge and Bankoora. Produce is also said to be exported to Gya through Ranchee, Tandwa, and Chatra. Most of the district trade is at present in the hands of petty itinerant traders, who move about from village to village during the cold weather, purchasing country-produce or taking it in exchange for salt, which they import monthly on pack-bullocks from Ghatal and Midnapore. When the railway is opened, it will probably absorb the whole of the district trade as soon as the local dealers have had time to realize the changed conditions. At first, perhaps, the eastern villages of Dhalbhoom will continue to trade with Ghatal and Midnapore; but when a good road has been made through the Kapargadi pass, and a few more Marwari merchants have settled at Chyebassa, that town will become the main centre of trade for Singbhoom, Keonjhur, and Mourbhunj

30. *Manbhoom District.*—The peculiar position of Manbhoom in relation to the trade of Chota Nagpore has been remarked upon above in explaining the routes by which the produce of Lohardugga and part of Hazaribagh reaches the East Indian Railway. Three main lines of export cross the district from west to east—the Grand Trunk Road with *chattis* or roadside marts of Topechansi, Rajgunge, Govindpore, Nirsa, and Chirkunda; the provincial road from Ranchee to Bankoora passing through Jhalda and Purulia; and a southern line, imperfectly defined by any finished roads, which brings produce from the south and south-east of Lohardugga through Chandil, Barabazar, and Manbazar to Bishanpore and Bankoora. From south to north these lines are crossed by the main road from Chyebassa through Purulia to Burrakar, passing the marts of Chandil, Purulia, and Raghunathpore. An incomplete line running from north-west to south-east through Chas and Raghunathpore towards Raneegunge promises to bring the produce of south-eastern Hazaribagh, and perhaps of a larger area, on to the railway at Raghunathpore. A glance at the annexed trade map will shew the positions of the chief marts in Manbhoom and their relations to the existing roads and the new railway. Clearly the traffic along the Trunk Road will not seek the new line. Indeed, by the time the line is open the volume of this traffic will probably have been much reduced by the bridging of the Burrakur river between Dumri and Giridi, so that the portion of the Trunk Road passing through Manbhoom will merely serve the local trade of the Govindpore sub-division, and the large export of coal from the collieries between Nirsa and Burrakur. All the traffic on the other routes described will be carried by the new railway. How far the influence of the line will extend in an easterly direction depends upon causes which it is impossible to analyse here. My own opinion is that, after a short period of adjustment, during which new centres of trade will be formed at Chandil, Purulia, and Raghunathpore, the entire trade of Eastern Manbhoom and of the western pergunnahs of Bankoora will be drawn on to the new line, that is to say, the centres of attraction for trade purposes will move to the west and occupy points on the railway.

31. *Import trade.*—In describing the trade routes of the division, I have discussed the question almost entirely in terms of export. The import trade follows the same main lines as the export trade, and needs no special description. Places which export to stations on the East Indian Railway procure their imports from the same source, and this holds good equally in the case of the areas exporting to Gya, Mirzapore, and Midnapore.

32. *Attraction of Raneegunge.*—It was remarked above that some of the exports of Chatra and Hazaribagh are sent to by cart along the Grand Trunk Road to Burrakur or Ranigunge. The preference for Ranigunge over the two nearest stations on the line is mainly due to the fact that the trade of Ranigunge is incomparably larger than that of either Burrakur or Giridi, and that consignors can count upon disposing of their entire produce to a single wholesale dealer, and getting at once whatever they may require for the return journey. At Burrakur or Giridi, where the machinery of trade is as yet imperfectly developed, a consigner of country produce would probably have to dispose of his stock in driblets, and to pick up his return load of piece-goods, salt, and tobacco from half of a dozen different dealers. For this reason, and probably also because the consignors have running accounts with the large merchants at Ranigunge, the majority of carts exporting country produce travel for their market 70 miles beyond Giridi, their nearest railway station, and 25 miles beyond Burrakur. The point is chiefly of importance as illustrating the indifference to delay, and the reluctance to abandon traditional routes and methods which are so characteristic of the ordinary country trader.

33. The articles thus sent are oilseeds, gram, ghee, mohua, molasses, and lac—oilseeds forming about 90 per cent of the trade. For the most part the carts go direct to Ranigunge, passing within 26 miles of Giridi, and within one mile of Burrakur station. They return to Chatra with salt, piece-goods, brass utensils, pepper, turmeric, and tobacco. While at Ranigunge, I asked some of the leading merchants why this considerable body of trade was diverted from Gya, apparently its natural outlet, to so distant a point as Ranigunge. The answer was that oilseeds, the staple export being largely grown in Gya, were sold there in ordinary years at the same price as in Chatra; while at the ordinary rates of cart-hire a profit could be made by sending them to Ranigunge.

34. *Minor trade agencies.*—It is not pretended that the foregoing paragraphs give anything more than a very general outline of the operations of trade over a large province. No reference has been made to the weekly markets held in all large villages, to the small

travelling dealers (*beparis*) or to the agents of large merchants who settle for a time at convenient centres and buy up the produce of the neighbourhood. In a country where but few large centres of trade exist, it is from sources such as these that the chief marts shewn in the map derive their stocks for export, and the imports are distributed through the same channels. No statistical record of these operations is possible. As Chota Nagpore is gradually opened up by the railway and by improved roads, we may expect that new marts will spring up, and that the trade of the division will tend to concentrate itself; while its itinerant dealers, and transport by means of pack-bullocks, will tend to disappear.

35. *i. District trade reports. Data for estimate of trade.*—I will now examine at length the various data which exist for estimating the probable yearly goods traffic which the Nagpore Railway may count upon carrying from and to places in Chota Nagpore. The first and most obvious source of information is the reports of the district officers, which take the form either of special reports on the trade of the district, or of sections devoted to that subject in the General Administration Reports. In most cases the information given is of the vaguest character, and throws very little light even on such an elementary matter as the main lines which the trade follows. In Manbhoom considerable attention has been paid to the question of trade statistics, and for the last three years, special reports on the subject have been drawn up by a native officer of great local experience. Some of these figures will be reproduced and examined below. Clearly they have been compiled with great labour, and aim at a higher standard of completeness than those supplied from other districts of the division. They are based almost entirely on the following data:—

(*a*) Statements of local traders resident in Purulia as to the quantity or value of the stocks passing through their hands during the year, and the proportion of such stocks drawn from, or exported to, districts other than Manbhoom. Traders from the interior of the district were questioned on these points when they visited Purulia, and in all cases from 30 to 50 per cent. was added by way of correcting the mahajan's natural tendency to understate his stocks.

(*b*) Estimates made by local traders, at the instance of the compiling officer, of the quantity or value of particular articles exported from, or imported into, the whole district.

(*c*) Estimates framed by the compiling officer of the quantity or value of particular articles which the population of the district ought, on an average, to consume.

(*d*) In some instances the traders' books were referred to.

36. With regard to (*a*), it would be waste of time to dwell upon the various sources of error which such a method of enquiry involves. Every local trader is possessed with a constant dread of enhanced license-tax, and regards statistical enquiries of any kind with the more suspicion, because he is quite incapable of understanding the remote general objects which such enquiries have in view. He may believe that the officer with whom he is talking at the moment has no ulterior designs in respect of taxation, but nothing would persuade him that incautious disclosures made by him as to the extent of his dealings might not hereafter be used by another officer or another department for the purpose of assessing a new tax or enhancing an old one. The clumsy expedient of adding a uniform percentage to the statements of stock could only yield correct results if every man lied in exactly the same ratio to the truth. In the present case, as the mahajans were informed that this correction would be applied, there can be little doubt that many of them made allowance for it in framing their statements. As to (*b*), no one who has seen anything of the mahajan class in Chota Nagpore can have failed to be struck by their peculiar inability to take a general view of any subject. Each man knows his own business, and nothing more; and it is simply preposterous to expect him to be able to estimate the exports or imports of a whole district, which to him represents merely a set of arbitrary boundaries laid down for the convenience of the courts. Least of all would he be able to distinguish local exports and imports from goods in direct or indirect transit to other districts. At the best, moreover, the enquiry was only partial. It is not pretended that all the traders in the district were consulted, and that the figures represent the total of their statements and estimates. On the contrary, the compiling officer admits that he never left Purulia, and that he merely took any opportunity that offered of questioning traders from the interior who happened to come to the district head-quarters.

36. *ii. Special enquiries from mahajans.*—In January last I spent several days in Ranigunge in attempting to ascertain from the local merchants, not the actual quantities of goods consigned to them from Chota Nagpore, but the *proportion* of the traffic passing through their hands which come from that part of the country. To ask them actual quantities would, of course, have been futile, as even if they had placed their books absolutely at my disposal, it is doubtful whether the necessary particulars would have been on record, and in any case the labour of compilation would have been prohibitory. I hoped, moreover, to disarm their suspicions by abstaining from all enquiries as to the extent of their business, and confining my questions to the *percentage* drawn from, or exported to, Chota Nagpore. After visiting every substantial merchant in the town, I gave up the attempt as hopeless for several reasons.

37. In some cases the dealers themselves had the vaguest ideas as to the source and destination of their own business; they did not know which of the Chota Nagpore marts

served particular districts, or what extent of country was included in the Chota Nagpore Division. Though shrewd enough in points of detail as to prices and carriage, they were curiously ignorant as to the general course of trade, and the possible changes arising from the extension of railways. Goods came to them because they had always come, and they saw no reasons for anticipating changes. It might be that the opening of the Gya Railway had reduced the trade with Chatra, but they could not say to what extent, or whether the reduction was likely to be permanent. Others affected great readiness to impart information, and improvised extravagantly large statistics of the traffic, which a glance at the railway figures shewed to be impossible. The Marwaries, among whom are the chief merchants of Ranigunge, took a different line. Their leading man went through the railway statistics with me, and after consulting his countrymen, gave me a rough statement of the percentage of each article entered in those returns which was exported from, or imported into, Chota Nagpore. He said, for instance, that 25 per cent. of the piece-goods, salt, flour, betel, and turmeric, appearing in the railway returns was intended for Chota Nagpore, and that 18 per cent. of the oilseeds came from Chota Nagpore. He let out, however, in conversation that, in his opinion, a line joining the East Indian Railway at Sitarampore would in a few years ruin the native trade of Ranigunge. All the traders along the new line of rail, who now employ agents in Ranigunge, would, he said, deal direct with Calcutta, while men off the line would arrange their business through agents at Purulia, Chyebassa, and other new centres of trade. Ranigunge would cease to be the chief distributing centre for Chota Nagpore, and the men in whose hands the trade is now would either have to accept the loss of a safe and lucrative commission business, or to start afresh in one of the new centres further west. The latter alternative would be hardly less distasteful to them than the former. Large sums have been spent by men of this class on substantial masonry buildings in Ranigunge. Most of them have permanently settled in the place, and do not contemplate returning to their own country. If they are driven to transfer their seats of business to places on the line, they can only do so at a heavy loss; nor will the new business at any one centre be such as to compensate them for the loss of the old. The effect of the new railway will be to dissipate and distribute among several centres the business hitherto concentrated at Ranigunge. From the tone adopted in discussing the matter by the most influential and intelligent native merchants, I am satisfied that they are, on the whole, opposed to the project for a line to Sitarampore, and that their statements as to the proportions of the existing trade which are concerned with particular localities cannot be regarded as trustworthy. Information derived from them is vitiated by their special bias against the present scheme, as well as by the general prejudices which they share with the rest of their class.

38. *iii. Estimates from population not generally applicable.*—To argue from the recorded population of a district to its probable ultimate consumption, is no doubt a legitimate process, but it can only be applied with confidence in the case of salt, and perhaps of some staple food-grains. Thus in the case of salt, we can say that *17lbs. is the amount required during the year by an adult*, and that 12lbs* is the average annual consumption in India per head of population, and we may infer from this that, with improved communications and a low duty, the Chota Nagpore Division may be expected to consume perhaps 700,000 maunds of salt. An attempt has been made by the compiler of the Manbhoom trade reports to calculate the import of European piece-goods on a somewhat similar method. Taking the population of the district at 1,042,117, as recorded in the last census, and deducting 281,174 for children and persons who do not wear European cloth, the remaining 760,943 persons are divided into four classes, expending, respectively, Rs. 75-4-1 and 8 annas per head on European cloth during the year. The number of persons in each class is then estimated, and their consumption calculated on the following scale:—

* NOTE.—This is the standard taken by Sir John Strachy, at page 230 of "The Finances and Public Works of India." Mr. Power, the Deputy Commissioner of Lohardugga, has enquired into the subject in that district, and finds that the "average annual consumption, if anything, exceeds Sir John Strachy's standard." The Bengal Trade Report for 1881-82 puts the average consumption per head as follows:—

Bengal.	Orissa.
Behar.	Chota Nagpore.

			Rs.	A.	P.	Rs.
2,000	of the upper class	spending per annum	75	0	0	1,50,000
200,000	„ middle	„ „	4	0	0	8,00,000
200,000	„ cultivators	„ „	1	0	0	2,00,000
358,943	„ poorer classes	„ „	0	8	0	1,79,471
760,943	persons spend per annum	...	.....			13,29,471

Deducting from this Rs. 3,62,000, being the value of twist imported from Calcutta, to be made into cloth in the district, the remainder, Rs. 9,67,471, is taken as the minimum value "of piece-goods imported from Calcutta for the consumption of the people of Manbhoom." It is not clear why a smaller amount was entered in the figured estimate for 1881-82, and subjected to a further deduction on account of re-exports; but the whole calculation rests upon such highly conjectural data that it would be waste of time to examine it in detail. Again, the import of salt is calculated on the assumption that 999,452 men consume 1 tola a day, or 4·56 seers (say 9lbs.) in the year. I have not ascertained why the salt-consuming population was taken at this particular figure, which corresponds neither with the total population of the district, nor with the total number of males or heads of families recorded in the last census.

39. A similar form of argument is used by Mr. Parker in paragraphs 84 to 87 of his report * on the preliminary surveys for the Nagpore Railways and the annexed statement, and is mentioned in the Bengal Government letter forwarding the report to the Government of India as on the whole the most reliable method of estimating the probable receipts of the line. To this I would add that, while Mr. Parker's calculation is probably sound enough as an estimate of the minimum traffic, it must necessarily reproduce the defects of the returns upon which it is based. These returns, I believe, are largely derived from a system of road registration. I have had some experience of road registration in Manbhoom, where it is conducted under fairly favourable conditions, and the stations are so placed as to be open to constant supervision. In my opinion every system of the kind greatly understates the amount of the traffic which it professes to record. The men who keep the registers are ignorant and ill-paid, they do not understand the object of their work, and they take as little trouble over it as possible. Numbers of carts evade the registering station, or slip past it during the night, and the carters themselves understate the quantities of goods they are carrying. What the percentage of error may be it is impossible to say precisely, but in many cases I believe it to exceed 25 per cent. Of course it would be a random mode of procedure to add that percentage to Mr. Parker's figures; but if this were done, I believe it would be borne out by the working results of line.

* No. 684, dated 14th June 1882.

40. *iv. Statistics of the East Indian Railway.*—I have already explained, in paragraph 23 above, that the great bulk of the existing trade of Chota Nagpore finds its way by various routes to the stations on the East Indian line between Burrakur and Burdwan. In order to ascertain what light the traffic returns of the East Indian Railway would throw upon the prospects of the new line, I obtained from Mr. Bradford Leslie a statement shewing in detail the quantity of each article exported from, and imported into, each of the stations from Burrakur to Burdwan inclusive during the year 1882. Taking this statement as a basis, I hoped to be able to ascertain from the chief dealers at each station what proportion of the goods shewn in the railway statistic came from, or went to, Chota Nagpore. My experience at Raniganje shewed that it was impossible to separate the Chota Nagpore traffic from the traffic of the area intervening between the proposed new line and the East Indian Railway. Raniganje was the most promising place for the experiment, as the Chota Nagpore trade goes there direct by cart, and is not filtered through a number of different marts before it reaches the rail. In the case of Panagarh, Mankur, and Burdwan, the statistics probably include a certain proportion of Chota Nagpore goods; but these are consigned, in the first instance, to merchants at Bankoora, Bishenpore, Sonamukhi, Krishnagore, and other intermediate marts, and reach the railway as exports from those places, not from Chota Nagpore. At these stations the attempt to trace back any branch of trade to its sources would have been even a greater failure than at Raniganje. For these reasons the returns of the East Indian Railway are not of very precise statistical value for my present purpose, except in the case of articles produced exclusively in Chota Nagpore, and of stations like Sitarampore and Burrakur, which deal only with that part of the country. They suggest, however, some important inference as to the traffic of the new line, and they serve to illustrate and supplement the defects of the statistics collected by actual registration in Manbhoom district. I shall refer to them largely in discussing the trade of particular articles.

41. *v Statistics of local registration.*—The registration figures, imperfect though they are, form the only local statistics which can pretend to even approximate accuracy. The system on which they are collected requires some explanation. For the last thirty years or so, *serais* or rest-houses for carts and travellers have been kept up at regular intervals along the Grand Trunk Road. In that portion of the road which passes through Manbhoom, it has been the practice for many years past to prohibit carters from halting for the night anywhere except in a serai. How far this practice is based upon any formal order is a point I have never been able to clear up. Certainly no such order is on official record in the district. But the custom, which dates back to times when the Trunk Road was unsafe for travellers, is well known, and is in the main enforced by the mounted patrol on the road. A fee of one pice is paid for each cart, and the right to collect these fees is farmed out yearly by public auction, the serais, wells, &c., being repaired from the proceeds. In February 1881, while in charge of the Govindpore sub-division, I made arrangements for recording daily the number of carts passing through the serai at Govindpore on the Grand Trunk Road, with the starting place and destination of each cart, and the quantity of goods carried. The system was carefully supervised, and the figures are believed to be substantially correct. They certainly do not exaggerate the traffic, as it was to the interest of the farmer of the *serai*, by whom the register was kept, to understate the number of carts, and thus reduce the apparent profit on his lease. On the other hand, the conformation of the country at Govindpore renders it impossible for carters to evade the serai by going off the road, while the patrol system prevents them from halting at intermediate points, and passing the serai during the night, perhaps 10 or 15 per cent. might be added to make up for carts which escaped registration, or were purposely omitted by the farmer; but, on the whole, the conditions are so favourable to correct registration, that it is doubtful whether any connection need be applied. In August 1881, before leaving for Hazaribagh, I compiled the statistics thus collected for the six months from February to July 1881 inclusive, and submitted a report on the subject to the district officer, suggesting the introduction of a system by which it was hoped that the whole of the traffic likely to be carried by the proposed railway (southern route) might be regis-

tered at certain points in the Manbhoom district by a salaried agency, such as is employed to record the trade on the roads leading into Calcutta. Nothing was paid to the farmer of the serai at Govindpore. He was merely supplied with paper and told to record certain particulars, it being further understood that the totals were made up for my information only, and were not to be made use of at the yearly auction of *serais*. The proposal was recommended by the late Deputy Commissioner to the Commissioner of the Division, but it was lost sight of in consequence of Mr. Hewitt's absence on leave. In October 1881 a new Sub-Divisional Officer stopped the registration of traffic at Govindpore. On my return to Manbhoom in April 1882, I moved the Deputy Commissioner to start registration in the head-quarters sub-division on the Govindpore unpaid system, and since June 1882 traffic has been recorded at the serais at Govindpore, Purulia, and Nadiara. These points are marked with red flags on the map.

42. If the system had worked at head-quarters as well as it did at Govindpore, the returns from Nadiara on the direct road from Ranchee to Bankoora, Ranigunge, and Burrakur would have shewn approximately the whole of the trade with Jhalda, Ranchee, and other centres farther west; while the Purulia station would have recorded the trade of Southern Manbhoom and of all Singhbhoom, except the area which deals with Midnapore. Experience, however, has shewn that of the Singhbhoom trade a large portion evades the Purulia serai by taking advantage of a cross-road skirting the south of the town and joining the main road to Bankoora some two miles to the east of the serai. Considerable quantities of goods from Singhbhoom are consigned to merchants at Chandi, and find their way to Bankoora by a rough tract through Burrabazar and Manbazar; some are consigned to merchants at Purulia, and are never registered at all, as the carts have no occasion to use the serai. Moreover, serais have only been introduced into the head-quarters sub-division within the last two or three years; the carters do not see the advantages of them, and prefer camping out under trees; they will even make a considerable detour to avoid paying the fees, and in this part of the district we have neither ancient custom nor a regular road patrol to enforce the order that carters must halt at night in a serai. It would be out of place to discuss, in this report, the policy of putting pressure on the cartmen to induce them to use the serais; but I may mention that I made enquiries on the subject in Ranigunge, and found that the leading merchants there not only approved of the system, but had so far recognised it as to admit charges for serai fees as part of the standard cart hire from Ranigunge to Raghunathpore and places further west.

43. It follows, from what has been said in the last paragraph, that the percentage to be added to correct understatements in the Purulia and Nadiara figures, is much larger than in the case of the statistics collected at Govindpore. I would estimate it at from 40 to 50 per cent. in the case of Purulia, where several sources of error effect the total, and at about 25 per cent. in the case of Nadiara, where the routes available for evading the sarai are fewer, and we have only the novelty of the system to look to. In dealing with the trade in particular articles, I have in every case shewn the actual figures, and have not attempted to correct them by adding a conjectural percentage.

44. In the following, paragraphs the statistics, such as they are, derived from the railway returns and the records of local registration, are reproduced and compared, and an attempt is made to estimate approximately the quantity of each article which the proposed railway may be called upon to carry. From the nature of the case, only an approximate estimate is possible. I have endeavoured, however, to bring together under the head of each article all general information that has any bearing upon its distribution in Chota Nagpore, and thus to supplement, as far as possible, statistical defects. For convenience of reference, I have followed the alphabetical arrangement of the railway returns :—

Imports.

45. *Beer.*—During 1882 the net imports of beer, other than commissariat beer, into the stations from Burdwan to Burrakur inclusive, amounted to 2,075 maunds. The largest quantities were to—

	Mds.		Mds.
Burdwan	.. 341	Assensole	.. 960
Ranigunge	.. 372	Burrakur	.. 321

Probably no portion of the imports of Burdwan or Assensole passed on to Chota Nagpore. At both places there is a large European community, and the imports shewn in the returns may be taken to have been consumed locally. At Ranigunge the European community is now very small, owing to the transfer of all railway servants to Assensole. Lohardugga and Singhbhoom get their supplies from Ranigunge; while Manbhoom for the most part imports through Burrakur. Having regard to the numbers of the Europeans in the three districts, the imports of beer may be taken on a moderate estimate, at from 300 to 400 maunds a year. Beer is not separately shewn in the statistics of trade registration. It comes up in boxes, of which neither the cartmen nor the serai farmers would know the contents.

46. *Betel-nuts and leaves.*—The railway figures shew the following net imports for 1882:—

	Mds.		Mds.
Burdwan ..	2,351	Sitarampore ..	576
Panaghur ..	380	Burrakur ..	599
Durgapore ..	81		
Ondal ..	4		16,649
Ranigunge ..	11,874		
Assensole ..	784		

Pán (piper betel) and *supari* (areca catechu) are hardly grown at all in Chota Nagpore, the climate being too dry for either to flourish; consequently the entire province, except the areas dealing with Gya, Giridi, and Midnapore, draws its supplies of this indispensable luxury from Bengal proper. All natives agree in describing the consumption as very large. We know that numerous quantities of betel are grown in Bankoora and Burdwan, and in view of this fact, it would hardly be unfair to assume that these districts produce enough to supply themselves, and that the railway imports represent the amount sent westward to meet the demand from Chota Nagpore. It is possible that this may understate the case, and that Chota Napore not only takes off the entire surplus of Burdwan and Bankoora, but imports through the East Indian Railway besides. The Ranigunge dealers, whom I consulted on the point, thought that one-fourth of the imports by rail into Ranigunge passed on into Chota Nagpore, but their bias against the line was so pronounced, and their incapacity to deal with large estimates so apparent, that I attach little importance to their opinion. On the whole, I think 8,000 maunds would be a reasonable estimate of the amount the railway will carry during the year. Under the head of betel the road registration returns shew for the last seven months of 1882—

153 maunds registered at Purulia.
28 „ „ at Nadiara.

153

or a yearly average of 252 maunds. This does not necessarily affect the correctness of the rough estimate given above. Both *pán* and *supari* are usually brought up in the same carts with salt, but only the salt which makes up the chief part of each load is declared by the cartmen; while the *pán* and *supari* escape registration.

47. *Blankets, country.*—The railway imports are—

	Mds.		Mds.
Burdwan ..	41	Sitarampore ..	64
Kanoo ..	42	Burrakur ..	430
Panaghur ..	27		
Ranigunge ..	395	Total ..	1,095
Assensole ..	96		

The whole of the imports of Sitarampore and Burrakur, and 200 maunds out of the imports of Ranigunge, may be taken to represent the Chota Nagpore demand—in round numbers 700 maunds. There is a large and steady demand for blankets in Chota Nagpore. On the plateau of Hazaribagh and Ranchee the cold is intense in winter, and a large supply of blankets is required every year for coolies migrating to Assam.

48. *Brass and brass-ware*—Are imported from Ranigunge and Bankoora. The Chota Nagpore braziers do not make enough for local wants, and their workmanship is clumsy. A good deal of brass is imported to be worked up locally into the massive ornaments worn by women of the aboriginal races. The railway figures for 1882 shew the following net imports:—

	Mds.	
Burdwan	103	
Kanoo	886	
Mankar	3	
Panaghur	587	Supplying Bankoora.
Durgapore	1,008	
Ranigunge	456	
Burrakur	538	
Total ..	3,582	

Local registration shews 197 maunds at Purulia and 566 at Nadiara for the last seven months of 1882, or an average of 1,308 for a year. Comparing the two sets of figures, and allowing for the large omissions in registration at Purulia, arising from the causes explained in paragraph 42 above, I think 2,000 maunds may be taken as a minimum estimate of a year's imports.

48½. *Cotton and yarn.*—Under this head the railway figures amount to 30,945 maunds, of which Ranigunge contributes 12,645 and Burrakur 10,065, while the local registration returns shew—

	Mds.
At Purulia	3,475
At Nadiara	661
Total ..	4,136

or an average yearly import of 6,440 maunds. With regard to the latter figures, it must be remembered that Raghunathpore and Chasnanda, the two chief centres of the local weaving trade, take up large quantities of thread which never reach the registration stations at all. Taking this fact into account, and particularly having regard to the large import into Burrakur, which supplies Chota Nagpore, I would estimate the imports of cotton and yarn at about 12,000 maunds in the year. The quantities registered locally came from Burrakur, Ranigunge, and Bankoora, and were destined for Purulia, Jhalda, Chyebassa, and two small marts in Manbhoom, which are not shewn on the map.

49 *Grain, oats.*—During 1882 14,850 maunds of oats were imported into Burrakur. It is said to be ground up with gram and Indian-corn into a peculiar kind of *suttoo*. Most of the import of oats went to Jhalda.

50. *Grain, wheat.*—The railway returns shew a net import into Raneegunge of 28,271 maunds of wheat during 1882, and of 120 maunds into Burrakur. Wheat is not very much grown in Chota Nagpore, as it requires irrigation and more care than the average cultivator is willing to bestow upon any crop. The average import may be taken at 10,000 maunds.

51. *Other grains and pulses.*—Under this head the railway figures shew net imports amounting to 2,99,354 maunds distributed among the following stations :—

	Mds.		Mds.
Burdwan ..	1,26,451	Assensole ..	4,662
Kanoo ..	263	Sitarampore ..	4,151
Mankar ..	3,400	Burrakur ..	20,661
Panaghur ..	10,107		
Durgapore ..	2,347	Total ..	2,99,354
Ondal ..	14		
Ranigunge ..	1,27,098		

It is impossible to analyse these figures. At Burrakur I was told that *khesari*, *musari*, *kalai*, and peas were included under the head of "Others." In 1881-82 the import of grain into Manbhoom was estimated at 8,000 maunds. Large quantities are also sent to Singbhoom and Lohardugga. Only 948 maunds, equivalent to a yearly average of 1,620 maunds, were registered locally. All of this was consigned to places in Manbhoom. Arguing from the railway figures, it seems probable that the 25,000 maunds imported into Burrakur and Sitarampore were destined for Chota Nagpore, but no more definite conclusion than this can be drawn from the materials as they stand.

52. *Gunny-bags.*—The railway statistics give a net import of 6,949 maunds, of which—

	Mds.
Ranigunge took	1,931
Sitarampore	484
Burrakur	364
Total ..	2,779

Only 60 maunds were registered locally, all for Jhalda. Doubtless there is a steady demand of gunny-bags for use in the export trade, but no reliance can be placed on any estimate of quantities. It deserves notice that the large traffic carried by pack-bullocks depends of quantities. It deserves notice that the large traffic carried by pack-bullocks depends entirely upon gunny-bags. There are several devices for carting grain, stick-lac, tusser, cocoons, &c., in bulk, but the couple of maunds or so which form a bullock's load must be packed in bags, and the bags must be equal to standing a considerable strain and much knocking about.

53. *Jaggree and Molasses.*—The net imports by rail were—

	Mds.		Mds.
Burdwan ..	2,053	Assensole ..	129
Mankur ..	255	Sitarampore ..	83
Panaghur ..	989	Burrakur ..	669
Durgapore ..	88		
Ondal ..	49	Total ..	28,585
Toposi ..	15		
Ranigunge ..	23,808		

The local returns shew 784 maunds registered in seven months, being an average annual import of 1,344 maunds. Sugarcane cultivation is very backward in Chota Nagpore. Inferior kinds of cane are grown, manure is very sparingly used, and the methods of

extracting the juice are primitive and wasteful. These facts may serve to explain the large imports of jaggree and molasses into Raniganje, a place which clearly does not require 23,000 maunds for local consumption. I would estimate the Chota Nagpore demand at about 15,000 maunds in the year

54. *Oil in barrels, cases, and skins*.—Under this head, which includes kerosine oil, the railway returns shew a net import of 16,246 maunds, Ranegunge taking 5,697, Assensole 1,910, Sitarampore 1,263, and Burrakur 207. Thus the import of the stations which ordinarily supply Chota Nagpore comes to 9,077 maunds. Only 185 maunds were registered locally. Kerosine oil is widely known and much used all over the division, not only for lighting purposes, but for outward application in diseases affecting the skin. On the data as they stand, 5,000 maunds might be taken as a rough estimate of the annual imports of oil; but the estimate would have no statistical value. We can only say that both kerosine and cocoanut oil are imported from Bengal, and that the import will certainly increase largely when the railway is opened.

55. *Oil-cake*.—The same remarks apply to oil-cake. A small import of 284 maunds was registered, while the railway figures give a total of 68,070 maunds, of which—

	Mds.
Raniganje took	31,224
Sitarampore „	1,760
Burrakur „	2,136
Total ..	35,120

Here, again, no estimate is possible, but it is tolerably certain that a large portion of the imports of these three stations found its way to Chota Nagpore.

56. *Paper*.—The railway figures shew net imports of 733 maunds to Burdwan, 28 to Panaghur, and 246 to Raniganje—in all 1,007 maunds during 1882. For the official year 1881-82, the value of imports of paper into Manbhoom district was estimated at Rs 10,000. No estimate of quantities can be framed. So far as I can ascertain, paper is not manufactured locally.

57. *Piece-goods*.—Under this important head the net imports for 1882, according to the Railway returns,, were as follow :—

	Mds.		Mds.
Burdwan ..	14,118	Assensole ..	516
Kanoo ..	55	Sitarampore ..	154
Mankar ..	720	Burrakur ..	22,587
Panaghur ..	3,925		
Rajbandh ..	24	Total ..	62,823
Durgapore ..	283		
Raniganje ..	20,441		

During the last seven months of 1882 there were registered in Manbhoom—

At Govindpore 433 maunds for Chatra and Ranchi,
At Purulia 3,036 „ for Purulia and Jhalda,
At Nadiara 4,164 „ for Jhalda and Ranchi,

giving a yearly average import of 13,000 maunds. Comparing the two sets of figures, and having regard to the fact that the imports of Singbhoom seem to have escaped registration, I should estimate the Chota Nagpore imports of piece-goods at 30,000 maunds. This estimate is, I think, borne out by the large imports into Raniganje and Burrakur. Roughly speaking, the whole of the Burrakur imports go to Chota Nagpore, and in this case I should assume that half of the Raniganje imports finds its way to this division. I have not attempted to account for any portion of the imports of Burdwan and Panaghur, but there can be no doubt that some of these goods come into Chota Nagpore through Sonamukhi, Bisenpore, and Bankoora. The consumption of European piece-goods has increased greatly of late years among the aboriginal and semi-aboriginal races of the division. In particular the exports from Lohardugga to the Tributary States are said to be developing rapidly ; but as they enter and leave the district at numberless points no accurate account of the quantity can be kept. It is extremely difficult to register trade carried on pack-bullocks, as the drivers can leave the road at will to avoid the annoyance of being stopped and questioned about their loads.

58. *Potatoes*.—The Railway returns shew net imports amounting to 21,167 maunds during 1882, of which—

	Mds.		Mds
Raniganje took ..	13,247	Burrakur ..	2,306
Assensole ..	2,363		
Sitarampore ..	550	Total ..	18,466

Only 63 maunds were registered at Purulia as imported from Bankoora and Raniganje, but this very much understates the facts. Potatoes are very little grown in Chota Nagpore, and the existing imports, whatever their amount may be, will increase enormously directly

the Railway is opened. Perhaps 8,000 maunds may be taken as a conjectural estimate of the demand.

59. *Salt.*—The Railway statistics give the net imports for 1882 as follows :—

	Mds.		Md.
Burdwan ..	82,192	Assensole ..	2,950
Mankar ..	7 6 84	Sitarampore ..	2,486
Panaghur ..	19,941	Burrakur ..	73,511
Durgapore ..	3,839		
Ranigunge ..	2,51,994	Total ..	4,44,597

Local registration yields the following results :—

	Mds.
Govindpore	33,975
Purulia	10,375
Nadiara	27,796

representing an average annual import of 1,23,528 maunds. Of the quantity registered at Govindpore, 22,116 maunds were destined for Chatra, the remainder being consigned to Rajgunge, Topechansi, Dumri, Bagodar, Atka, Barkata, Burhee, and Chauparun, all marts on the Grand Trunk Road. The chief sources of supply were Ranigunge (30,101), Burrakur (2,336), Burdwan (1,280). The Purulia returns include 6,043 maunds for Purulia, 1,470 for Balarampore, 849 for Sirkabad, 418 for Chyebassa, and smaller amounts for Jhalda, Chandil, and Ranchee. Burrakur supplied 4,924 maunds, Raneegunge 2,539, Bankoora 1,840, and Mejha 875. Out of the quantity registered at Nadiara, 19,910 maunds were for Jhalda, 6,305 for Ranchee, 734 for Toolin, and smaller amounts for Bagmundi and Jaipore in Manbhoom, and Bundu and Tamar in Lohardugga. The supply was drawn from Ranigunge (18,264), Burrakur (2,579), Bankura (2,224), Krishnagore (1,909), Sonamuki (1,348), and Mejha (402).

60. On the face of the returns it is clear, that, for the reasons explained in paragraph 42 above, the salt supply of Singhboom has escaped registration. If Chyebassa imported so much as 418 maunds by this route, it is morally certain that much more must have been imported. The point, however, is not very material. In order to estimate the demand for salt after the Railway is open, we may assume that the line will supply Manbhoom, Singbhoom, the head-quarters sub-division of Lohardugga, the south-eastern corner of Hazaribagh, and the Tributary States of Bonai, Gangpur, Udaipur, and Jaspur. It will probably supply parts of Sirgoojah and Korea as well, but I have left these out of account as a set-off to possible over-estimates in the area already assumed. Now, the population of the tract I have described, according to the last census, is, as nearly as I can calculate, 3,174,444. Taking the average annual consumption per head at 12lbs, as given by Sir John Strachey, the total yearly demand will be in round numbers 2,38,000 maunds, the whole of which will have to be carried for varying distances by the new railway.

61. *Spices.*—The net import according to the Railway returns is 17,066 maunds, including 14,040 maunds to Burdwan, 1,545 to Ranigunge, and 1,069 to Burrakur. Local statistics shew a total of 754, or an average annual import of 1,284 maunds. Probably 1,500 maunds may prove a fair estimate.

62. *Sugar.*—A total import of 2,787 maunds appears in the Railway returns, including 1,366 maunds to Ranigunge, 681 to Assensole, and 25 to Burrakur. The local statistics shew 219 maunds—all for Purulia and Chyebassa. Probably 500 maunds would be a fair estimate of the normal demand.

63. *Tamarind.*—The railway returns give a net import of 881 maunds, 241 to Ranigunge and 23 to Burrakur. Tamarind is not shewn in the local statistics, and has probably been included under the head of spices.

64. *Tobacco.*—The total net imports of tobacco according to the railway figures is 87,745 maunds, distributed as follows :—

	Mds.		Mds.
Burdwan ..	47,482	Assensole ..	549
Kanoo ..	11	Sitarampore ..	436
Mankar ..	443	Burrakur ..	15,886
Panaghur ..	287		87,475
Rajbandh ..	82		
Durgapore ..	170		
Ranigunge ..	22,350		

The registration returns of Manbhoom shew 2,195 maunds (giving a yearly average of 3,756 maunds) chiefly for Purulia and Jhalda. Considering how little tobacco is grown in Chota Nagpore, the annual imports cannot well be less than 30,000 maunds, and we may assume that the railway will carry at least this amount.

65. *Turmeric.*—Net import according to railway figures 9,109 maunds including 5,290 to Ranigunge and 3,065 to Burrakur. Registered locally 1,257 maunds, or a yearly average of 2,148 maunds. These imports went to Purulia, Jhalda, and Ranchee. Probably 5,000 maunds may be taken as the normal average import.

66. *Wines and spirits.*—Net imports by railway 1,802 maunds including 299 to Ranigunge, 810 to Assensole, 13 to Sitarampore, and 20 to Burrakur. Only 24 cases

shewn separately in local returns, the rest being included in the items "Boxes" and "Miscellaneous."

EXPORTS.

67. *Babooi string.*—This string, made from jungle grass, is not separately recorded in the railway returns. The trade is believed to be increasing. Large quantity of *babooi* pass through Purulia from Singbhoom, and the article is in great demand in Bancoora and Burdwan for use in thatching. During the seven months, from June to December 1882, 585 maunds were registered at Nadiara and Purulia. Most of this came from Jhalda, and the Singbhoom exports appear to have escaped registration. I have ascertained by special enquiries that between the 20th November 1882 and the 19th March 1883, 478 maunds of this article passed through Chandil from Singbhoom. Much of the trade is carried on *sagars* or block-wheeled carts, and on pack-bullocks or ponies. It is, therefore, peculiarly difficult to register, as *sagars* can go almost anywhere, and their owners, as a rule, dislike the *serais*. In the district trade reports already referred to, the exports of this article from Manbhoom alone were estimated as follows:—

	Mds.
In 1879-80	10,000
„ 1880-81	20,000
„ 1881-82	40,000

These figures are admittedly conjectural; but having regard to the peculiar conditions under which *babooi* string is exported, and the known defects of our system of registration, I believe the railway may count upon carrying between 10,000 and 20,000 maunds of this string during the year. Of course the estimate is not based upon any statistics, but I have myself seen such large quantities of *babooi* passing along the roads, that I am sure the registration returns gave no idea of the magnitude of the trade.

63. *Coal.*—The Railway returns shew a large export of coal from Burrakur and Sitarampore. Most of this comes from collieries close to Burrakur, and will not affect the new line. Some coal will probably be carried on the section of the line between the Damooda river and Sitarampore, but the statistics available do not enable me to say how much, as there are no separate returns for the collieries lying near this section. In paragraph 8 above, I have made some general remarks on the possible development of the Jheria and Hingir fields. No estimate can be framed of the quantity of coal which those fields might throw upon the Railway. It would probably be very large. In a note upon the prospects of a Railway through Lohardugga and Sirgoojah to the Central Provinces, the Commissioner of Chota Nagpore has laid some stress upon the importance of encouraging the use of coal for cooking purposes by the people of India. Wood fuel is known to be getting dearer almost yearly; the clearing of jungle progresses rapidly, and the operations of the Forest Department, for preventing and remedying the effects of wasteful management, cannot be expected to produce any tangible result for years to come. If the people themselves could be induced so far to modify their habits as to use coal for cooking, not only would the incessant clearing of jungle, with its evil effects on the rainfall and on the moisture of the soil, be put a stop to, but there might be some prospect of the manure, which is now used for fuel, being put upon the land. While in Ranigunge, in January last, I ascertained that coke is very largely used there for domestic purposes. Every man who works in the coal mines gets a basket or two of small coal given him free of charge, and most of the miners are reported to help themselves liberally into the bargain. This coal is made into coke and used for cooking. Again, in the east of Govindpore sub division, there are a number of small coal-pits under native management, which export coke to Hooghly and Howrah, where it is sold by retail for cooking. These, no doubt, are only small beginnings among people who are accustomed to see coal in continual use, who feel the pressure of the high price of wood, and who, as a rule, are not in a position to supply themselves with cow-dung fuel. But the fact that a beginning has been made in a matter where native prejudices are peculiarly strong, seems to point to an almost indefinite expansion of coal traffic, directly railways have opened up fresh supplies of coal and made it worth the while of producers to work for the native retail demand. Even now, I believe, much might be done in the way of popularising the use of coal, if the matter could be brought to the notice of natives in some practical way.

69. *Dye-woods.*—Both Hazaribagh and Lohardugga produce excellent indigenous dyes which are used in the manufacture of carpets carried on in the Hazaribagh Jail. A list of the Lohardugga dyes is given at pages 349-50 of my statistical account of Lohardugga district, forming Volume XVI of Dr. Hunter's Statistical Account of Bengal. The trade may be expected to develop when the railway opened, but no estimate of the probable exports can be framed.

70. *Grain, Rice.*—The railway returns for 1882 shew the following net exports:—

	Mds.		Mds.
Burdwan ..	5,85,684	Ranigunge ..	5,91,574
Kanoo ..	41,496	Asansole ..	1,651
Mankur ..	39,879	Sitarampore ..	9,026
Panaghur ..	4,572	Burrakur ..	41,817
Rajbundhi ..	441		
Durgapore ..	34,007	Total ..	18,49,791
Ondal ..	4		

Only 4,098 maunds were registered locally, mostly from Purulia and Jhaldah, shewing a yearly average export of 7,020 maunds. The large rice trade from Singbhoom appears to have escaped registration altogether. I have ascertained that 3,000 maunds passed through Chandil between November 1882 and March 1883, destined for Ranigunge and Burrakur. In the District Trade Report for 1881-82, the export of rice from Manbhoom only was estimated at 20,000 maunds in 1879-80, and 10,000 maunds in 1880-81. In 1881-82 exportation was said to have stopped owing to the reduced demand consequent on good harvests in Bengal Proper, and the local surplus was believed to have been stored awaiting a rise of prices. The district officer on the other hand doubted the existence of any considerable surplus, thinking that most of the rice exported from Manbhoom came really from Singbhoom. The registration returns shew that rice is exported from Manbhoom, but I think they materially understate the quantity. The existence of a large export from Singbhoom is generally admitted. I would estimate the normal exports of both districts at 50,000 maunds, but I anticipate a large increase when the railway is open.

71. *Hides.*—The exports of hides according to the railway statistics, are—

	No.		No.
Burdwan ..	14,386	Assensole ..	601
Kanoo ..	225	Sitarampore ..	593
Panaghur ..	191	Burrakur ..	1,181
Durgapore ..	16		
Ranigunge ..	30,555	Total	47,748

The local figures shew 9,980 *hides* (not maunds) registered at Purulia, and 33,289 at Nadiara, being a yearly average of 74,172 hides, or, taking six hides to a maund, of 12,000 maunds. This, however, does not fairly represent the trade of the division. While at Ranigunge in January last, I saw some of the leading hide-merchants there, and their statements, though statistically indefinite, went to shew that a large proportion of the Ranigunge exports is derived from Chota Nagpore. On a comparison of the railway figures with the registration returns, and paying due regard to the general opinion as to the magnitude of the trade, I would estimate the quantity of hides to be carried by the new railway at from 25,000 to 30,000 maunds.

75. *Horns.*—Net exports, according to railway figures, 1,764 maunds—1,386 from Ranigunge, and 320 from Burrakur. None registered locally. The export in 1881-82 was estimated at 1,000 maunds in the District Trade Report.

73. *Hurrah or myrabolams.*—The railway figures shew an export of 7,344 maunds, of which 7,235 are from Ranigunge, the rest being divided between Burdwan, Panaghur, and Mankur. Only 108 maunds, destined for Bankoora, were registered locally. The trade, however, is known to be large. The tree (*terminaha chebula*) which yields myrabolams grows almost exclusively in Chota Nagpore; and it may safely be inferred that the whole of the export shewn in the railway returns came originally from the districts of this division.

74 *Lac, including lac-dye, shellac, stick-lac, and refuse.*—Net exports, according to railway statistics, 1,03,181 maunds, divided among the stations as follows:—

	Mds.
Burdwan	141
Mankur	985
Panaghur	23,033
Ranigunge	27,348
Burrakur	48,034
Total ..	99,541

The local registration returns shew—

	Mds.
Govindpore	4 088
Purulia	7,689
Nadiara	24,132
Total ...	35,009 for seven months,

representing an average annual export of 61,548 maunds. There is, however, good reason for believing that the local registration understates the magnitude of the trade. The lac-factories at Nirsha, Chas, and Raghunathpore lie outside the circle commanded by the registering stations, and their exports have not been recorded. Again, very little stick-lac is grown in Burdwan and Bankoora. Shellac, it is true, is manufactured in large quantities, but the raw material is drawn from Chota Nagpore. It may be assumed therefore that the whole of the railway exports—in round numbers 1,00,000 maunds—come in one shape or other from Chota Nagpore, and that this quantity will be carried by the new railway for varying distances.

75. *Lime.*—The exports of lime from Burrakur during 1882 amounted to 2,34,866 maunds, all of which came from places in Govindpore to the west of the Burrakur river. In the villages along the Grand Trunk road, between Nirsha and Chirkoonda, there are

large surface deposits of *ghooting* or nodular limestone, which are worked for lime. It will be seen from the annexed map that Ritter von Schwarz, Superintendent of the Government Experimental Iron Works at Burrakur, has discovered numerous deposits of pure limestone on the south of the Pachete hill. When the railway is open, these quarries will be able to undersell the small Govindpore quarries mentioned above. They will be closer to the rail, and they will send their produce direct to Sitarampore. Assuming the demand to remain the same—and it would probably increase—the railway might count upon carrying, say, 3,00,000 maunds of lime a year from near the Pachete hill to the Sitarampore station. Again, if the Burrakur Iron Works are started on a large scale, I understand they will require 75,000 tons of limestone a year to supply one large and two blast-furnaces, or 120,000 tons for two large and two small furnaces, as has been recommended by Ritter von Schwarz. The whole or a large portion of this would be carried by the railway, though only for a short distance. The railway would also carry all iron manufactured by the Burrakur works which may be sent westward. The demand of the Central Provinces is estimated officially at 15,000 tons a year.

76. *Seeds, including mustard, surguja, and other oilseeds.*—The railway returns shew the following statistics:—

Stations.	Exports.	Imports.
Burdwan	8,176	1,74,472
Kanoo	.....	.....
Mankur	164	26,090
Panaghur	7	6,633
Rajbandh	.....	35
Durgapore	102	2,311
Ranigunge	56,696	58,724
Assensole	.....	1,876
Sitarampore	14	327
Burrakur	.....	5,217
Total ...	60,159	2,75,685

Local registration gives the following results:—

Govindpore	32,483
Nadiara	30,979
Total ...	63,492

or a yearly average export of 1,08,792 maunds. Most of the exports registered at Govindpore were from Chatra, Bagodar, Burhi, and other marts in Hazaribagh; their destinations being Ranigunge, Burrakur, and Burdwan. The exports through Nadiara were mostly from Jhalda for Ranigunge, Bankoora and Sonamukhi. It must be admitted that the figures quoted above are rather puzzling. Oilseeds are the chief and most conspicuous export of Chota Nagpore. One sees enormous quantities of them on every road during the cold weather, and as pack-bullocks are largely employed to carry them, it may be assumed that a considerable proportion of the export escapes registration. Taking the registration figures as they stand, without making any allowance for omissions, and merely correcting them so as to represent a full year's export, it will be seen that nearly 50,000 maunds do not reach the East Indian Railway at all. On the other hand the railway figures shew an enormous importation of oilseeds into Burdwan and Bankoora, from which we may infer that these districts grow oilseeds comparatively little and require large quantities of oil. The amount, then, by which the local figures exceed the railway statistics, represents the consumption of the tract of country lying between the registration stations and the East Indian Railway. The cultivation of oilseeds will probably extend itself remarkably when the railway is opened. It is a kind of cultivation which gives little trouble, and which the people understand. No irrigation is needed, and I have seen excellent crops grown between the stumps on land recently cleared from jungle. Within a few years the railway may count upon carrying some 5,00,000 maunds yearly.

77. *Tea.*—The railway figures shew an export of 3,273 maunds, all from Lohardugga and Hazaribagh. In 1880-81 there were thirty-six tea plantations in these two districts. The industry can hardly be described as remarkably flourishing, but it has the great advantage of cheap labour, and is not likely to die out until the local rates of wages and system of hiring labour undergo some more material changes than can be foreseen at present.

78. *Timber.*—The railway returns shew a slight preponderance of imports over exports, and thus throw no light upon the Chota Nagpore trade. The local registration figures give a total of 11,542 sleepers, registered thus—

At Govindpore	8,106
„ Purulia	547
„ Nadiara	2,889

Besides sleepers, there is also a considerable export of *rollahs* (sál saplings) to Burdwan and Bankoora, where they are used for house-posts, rafters, &c. The large demand for these

young trees probably does more harm to the forests than that for heavy timber, which can only be cut from mature trees. It would be useless to attempt to speculate upon the timber trade that may be carried by the new line. Sources of supply hitherto untouched will be opened up, but the extent to which these will be drawn upon depends upon factors at present unknown—such as the extension of railways, the system of forest conservancy introduced in zemindari forests, the cost at which iron sleepers can be made, and the like.

79. *Tusser silk cocoons*—Are exported to Bankoora, Burdwan, Beerbhoom, and Azimgarh in the North-West Provinces. The exports for the three years ending 31st March 1882 were estimated as follows in the District Trade Report already referred to:—

1879-80	...	...	30,000 kahans of 1,280 cocoons each.
1880-81	...	...	15,000 ,,
1881-82	...	...	7,500 ,,

No reliance, however, can be placed on these figures, nor is there any reason for believing that the exports declined during this period so remarkably as the estimate would shew. Some special registration started by me in Chandil, in November last, as a sort of rough check upon the returns given by the serai farmer in Purulia, shews that 4,077 *kahans* of cocoons passed through the Chandil market between the 20th November 1882 and the 19th March 1883. Cocoons are very light, and take up much space in proportion to their weight, so that the trade would not be very important to the railway.

80 *Summary*.—For the sake of comparison, the estimates of the trade in particular articles, attempted in the foregoing paragraphs, are collected and re-stated below in a tabular form. This mode of statement brings out clearly enough the fragmentary and imperfect character of the estimates. No one who possesses a fair general knowledge of Chota Nagpore, and has watched the trade which passes along the main roads, will accept my estimate of imports as fairly representing the true demand. At the same time it is difficult to see how the quantities can be materially raised without putting the existing data altogether aside and framing an estimate by mere guesswork. No attempt has been made here to anticipate the enormous extension of the import trade which will follow upon the opening of the railway. At present Chota Nagpore is in a primitive stage of economic development. The price of almost all articles, excepting, perhaps, salt, is determined more by custom than by competition, and everywhere the tendency is for a small ring of mahajans to frustrate or minimize the operation of pure economic causes by manipulating this customary price in accordance with their own interests. Within the last two years several public markets have been opened in Manbhoom, and the determined opposition offered to these by small cliques of petty dealers has shewn very clearly how the country stands in need of the wholesome competition which a railway is likely to introduce—

81. It will be seen that, under the head of exports, no attempt has been made to estimate the quantities of coal, dye-woods, iron, limestone, and tusser-cocoons which the railway may be called upon to carry. The possible development of rival coal-fields, the success of the Burrakur Iron Works, the demand which may spring up for indigenous dyes, and the prospects of tusser-silk in the European market—all these are causes too obscure and too complicated for it to be possible to anticipate their results and express them in a statistical form. It can only be said that these factors may have an important influence on the future of the railway, and that some of them stand a fair chance of coming into play on a large scale within the next ten years.

82. *The Midnapore route.*—In conclusion, I would add a few remarks upon the so-called Midnapore route, or, to speak more accurately, upon the proposal to substitute for the route from Chyebassa to Sitarampore, as laid down by last year's survey, a route from Chyebassa to Calcutta through or near the town of Midnapore. The engineering difficulties to be encountered on this route form, I understand, the subject of a special report by Mr. F. J. E. Spring, and need not be further referred to here. The competition of the canal on the sections from Midnapore to Calcutta has often been discussed before, and it has already been shewn that, owing to the additional outlay involved in crossing a country intersected by huge tidal rivers and liable to be flooded on a large scale, the carriage of a ton of wheat from the Central Provinces to Calcutta would be no cheaper by the Midnapore than by the so-called Burrakur route. One point, however,—and that, perhaps, the most important of all—has not yet been prominently brought to notice. Under ordinary conditions, any railway may reckon upon carrying the trade of a strip of a country lying upon either side of the line. How broad the strip may be depends upon circumstances, but it is always a strip. This may be called the normal relation of a railway to the country which it serves, and it is the relation which obtains in the case of the Midnapore route. On the section from Chyebassa to Midnapore the traffic-yielding strip will necessarily be narrow, as it is hemmed in by the hills of the Orissa Tributary States on the one side, and of the Chota Nagpore plateau on the other. The section from Midnapore to Calcutta would command a wide belt of traffic, but here the competition of cheap and easy communication by water has to be considered. On the other hand, the route from Chyebassa to Sitarampore not only has no water communication to fear, but owing to the peculiar conformation of the country both commands the traffic of its own strip and cuts off, so to speak, the traffic of an enormous tract of country to the west, which can only find an outlet by flowing towards the new line. It crosses, as it were, the mouth of an estuary of trade and intercepts its entire contents. This argument, the force of which will be evident from a glance at the annexed trade-map, applies equally to the route through Midnapore itself, and to the alternative scheme suggested by Mr. Wilson, Collector of Midnapore, for taking the line to Geuakhali, at the junction of the Hooghly and Roopnarain, and connecting it by a steam-ferry with the Diamond Harbour line. The latter route may be cheaper than the former, but it has special inconveniences of its own; and if it can be shewn that neither will command such a large body of traffic as the Sitarampore route, both are equally condemned.

No. 240, dated Nagpur, the 11th July 1883.

From—J. B. FULLER, Esq., C.S., Offg. Director of Agriculture, Central Provinces,
To—The Secretary to the Chief Commissioner, Central Provinces.

REFERRING to the Government of India letters marginally noted, I have the honour to submit the following report on the trade and trade resources of Chhattisgarh in connection with the projected lines of railway now under consideration.

No. 837A., dated 9th April 1883.
No. 77, Statistics, dated 4th May 1883.

2. These lines are three in number, running respectively north, east, and south-east. The first will connect Chhattisgarh with the East Indian Railway at Katni, *vid* Riwa territory; the second will connect Chhattisgarh with Calcutta, and, together with the present Nagpur and Chhattisgarh State Railway, will form part of a line of through connection between Calcutta and Bombay. The third line runs to the littoral of the Bay of Bengal at Vizagapatam. The prospects of this line have been already dealt with by the Chief Commissioner in a Minute dated 7th April 1883, and the present report is therefore confined to the lines running northward to Katni and eastwards to Calcutta.

3. The country known as Chhattisgarh consists of an undulating plain surrounded by a belt of hills on the west from the boundary of the Bhandara and Balaghat districts, and have been pierced by the only two good trade outlets Chhattisgarh possesses, first by the Great Eastern road to Nagpur, and lately by the Nagpur and Chhattisgarh State Railway, which has now been pushed some 50 miles beyond the hills into the Chhattisgarh plain. On the north the hills form an extensive block of wild and uncultivated country stretching over the whole of the northern portion of the Bilaspur district, as well as the greater portion of the adjacent district of Mandla, and running eastwards in a broad belt along the border of Riwa and Chota Nagpur. The only trade outlets through this line of hills, which in any way deserve mention, are those running from the Bilaspur district over the Borla Pass to Mandla and Jubbulpore, and over the Komo Pass to Sohagpur in Riwa territory. But the trade which the difficulties of these routes admit of is at present unimportant. On the east, Chhattisgarh is bounded by the Eastern Ghats, which form the boundary between the Central Provinces and Orissa and Ganjam. These Ghats are traversed by a road connecting Sambalpur with Calcutta, which was formerly used for the Bombay mails, but is now almost wholly deserted, and most of the traffic which crosses this part of the frontier is carried by the river Mahanadi, which is a trade route of considerable importance. The border country towards the south-east and south is, perhaps, the wildest of any, forming, in places, stretches of uninhabited hill and forest reaching as far south as the Godavari. The only traffic route in this direction is that running towards Vizagapatam *vid* the Kalahandi State, along which a moderately large but decreasing traffic is carried by means of pack-bullocks. This route very nearly coincides with one of the lines projected for the railway between Raipur and Vizagapatam.

4. Under these conditions, it is to be expected that the population should be densest and cultivation most continuous in the centre of the plain, and that both should fall off as one left

the centre for the circumference. This is precisely the case. The thickly populated part of Chhattisgarh forms two blocks separated by a broad belt of jungle. One block constitutes the *khalsa* portion of the Raipur and Bilaspur districts,—the portion, that is to say, held by malguzars direct from Government,—and the other block similarly constitutes the *khalsa* portion of the Sambalpur district. These blocks of khalsa territory are bounded and separated from one another by tracts held in so-called *zemindari* right, that is to say, by proprietors intermediate between the malguzars and Government. Beyond the zemindaris again are a number of feudatory chiefships which are connected with this administration by political relations. The average density of population in these different regions is clearly shewn by the following sketch map,* in which zemindaris are denoted by dots and chiefships by cross lines. The sub-divisions into which the *khalsa* area is divided are tehsils, which are four in number in Raipur, three in Bilaspur, and two in Sambalpur. The general average density of population in the Dhamtari (Raipur) and Bilaspur tehsils is lowered by their including a large portion of waste country on their southern and northern borders respectively.

* Marked A.

5. The total area of Chhattisgarh is nearly forty thousand square miles, and its population is over 4½ millions. But it is not probable that the projected lines of railway will derive much traffic from any part of Chhattisgarh outside the khalsa except from the chiefships of Nandgaon and Khairagarh, which are of exceptional fertility. So far as railway prospects are concerned, attention may therefore be confined to the khalsa portion of the Raipur, Bilaspur, and Sambalpur districts, which, although only comprising one quarter of the total area of Chhattisgarh, include nearly half of the number of its inhabitants.

6. The character of the country included in the khalsa of these three districts is by no means uniform. The most productive portions are those where the black so-called "cotton" soil of Central India occurs, since here not only rice, but spring crops, such as wheat and linseed, can be profitably grown. Black soil occurs in isolated patches in several parts of Chhattisgarh, but only forms a continuous stretch at the western extremity, where it extends over the eastern portions of the Drug and Simga tehsils, the greater part of the Mungeli tehsil, as well as over a large portion of the Nandgaon and Khairagarh chiefships. This tract may be certainly pronounced to be by far the most productive portion of Chhattisgarh. West of this belt the country stretches in a series of gentle undulations, the uplands consisting of poor reddish soil only suited for inferior crops, and the low lands of a yellow or reddish clay excellently fitted for the production of rice. Further east the broad strip of jungle is met with, which is the eastern boundary of the Raipur *khalsa*; and beyond it comes the Sambalpur *khalsa* which has for its prevalent soil the yellow clay mentioned above, and is almost wholly devoted to the production of rice.

The extent of cultivation and its distribution amongst the more important crops in the khalsa of each of the three districts is shewn in tabular form below:—

District.	Total area.	Area cultivable, but not cultivated.	Area cultivated.		Percentage of cultivated area to total area.	
			At present.	At settlement (1868-69).	At present.	At settlement (1868-69)
	Acres.	Acres.	Acres.	Acres.		
Raipur	82,60,878	10,66,422	19,28,361	16,23,518	59	49
Bilaspur	19,28,930	7,04,295	10,84,216	9,59,431	56	49
Sambalpur	5,63,993	1,27,775	4,36,218	.....	77	.....

Districts	Cropped area (excluding cultivated area by the extent of land bearing two crops within the year).							Percentage of area under rice to total cropped area.
	Under wheat.	Under rice.	Under other grains.	Under oilseeds.	Under cotton.	Under other crops.	Total.	
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	
Raipur ...	1,81,214	11,74,770	5,32,852	2,25,069	15,518	9,850	21,54,979	54
Bilaspur ...	51,0-0	7,78,489	2,59,034	85,094	18,355	22,960	12,12,960	64
Sambalpur ...	...	3,63,540	35,849	19,594	17,235	.....	4,36,218	83

None of these figures are entitled to strict credit. Those for Raipur and Bilaspur have been compiled from the village returns for 1882-83, and though very far from accurate, may be taken as approximately true. The village area of Sambalpur has never been mapped or measured, and the figures given for this district are merely estimates.

7. The average size of a single holding in the Raipur and Bilaspur districts is not less than 20 acres, that is to say, more than double the average size of a holding in the Bundelkhand districts of the North-Western Provinces, in which, as in Chhattisgarh, irrigation is but seldom practised, and which therefore offer a fair standard of comparison. The rainfall has an average of about 40 inches, and the hills which encircle the districts generally ensure an adequate or nearly adequate supply. The soil is, as a rule, fertile, and in places is of more than average fertility. These causes have contributed to give Chhattisgarh the reputation of enjoying the largest surplus produce of any part of the Provinces.

In 1868 the officer who had just completed the settlement of the Bilaspur district (Mr. Chisholm) wrote :—

"The adventurous carrier class (Banjaras) following their strings of bullocks through the hilly wilds which shut in the Chhattisgarh plain, in order that they may return laden with grain, have not inaptly termed the country "Khalauti" (the land of threshing-floors). They find here a surplus produce, which, from the absence of facilities for export, seems inexhaustible, for in a great number of villages they cannot fail to observe the prominent and capacious grain stores well raised above the ground, walled, and thatched, and containing from 50 to 200 cartloads of the great staple—rice. Wheat, oilseeds, and pulses are produced in great abundance, and there is a kind of reckless improvidence in many places in feeding, free of cost, all travellers who pass, that indicates a condition in which it may be said that want is almost unknown."

A rough idea of the extent of the annual surplus in the khalsa alone may be gathered from the following calculations. The average outturn per acre for wheat, rice, other miscellaneous grains and oilseeds was estimated by the Settlement Officer of Bilaspur as 7, 6, 6, and 7 maunds respectively and by the Settlement Officer of Raipur as 7, 10, 6, and 3* maunds. It would be safe to assume 7, 8, 6, and 6 maunds as the rates of produce in ordinary years. In estimating the amount locally consumed, wheat must be altogether omitted, for little or none of it is eaten in Chhattisgarh, and it its grown almost wholly for export. Of rice 4½ maunds and of other grains, principally small millets, 2 maunds, would be an ample allowance per head of population, since this gives a daily ration of ¾ seer (or 1½ lbs.) to each person of whatever age, and it should include a margin for wastage. For the consumption of oil, half a maund per annum per house is a liberal estimate; this is equal to 1½ maunds oilseed. Making a further deduction for seed, the resulting surplus is as below :—

	Total produce.	Amount consumed locally.	Amount used for seed.	Annual surplus.
Wheat	16,26,121	.....	2,32,303	13,93,818
Rice	1,56,02,072	89,68,084	29,25,378	37,08,610
Other grain	48,15,036	37,76,036	3,96,253	6,42,747
Oil-seeds	19,20,978	8,67,287	32,016	10,21,675

In considering these figures, it should be borne in mind, *firstly* that they only relate to the khalsa portion of the Raipur and Bilaspur districts, and that the surplus produce of zemindaris and chiefships is not included. This surplus is very large indeed in the case of the Nandgaon and Khairagarh chiefships, where wheat is extensively grown for export. *Secondly*, the surplus is rendered smaller than it should be by the inaccuracy of the statistics of area, which err very largely on the side of understating the extent of cultivation. Thus the area under wheat in Bilaspur is represented to have not increased since settlement, whereas it is a well-known fact that there has been a very considerable increase : On the subject of these statistics the Commissioner writes :—

"From my own experience I can answer for the statistics of new cultivation since settlement being incorrect. For instance, in the low country I found, two years ago, that the village papers shewed little or no increase of cultivation, but when I went over the ground with the village books in my hand, I found that in many instances there was no cultivable land left uncultivated. Another proof of increase in cultivation is the fact that all wild animals, such as buffaloes and bison, have been driven from east of the Mahanadi. Ten years ago buffaloes swarmed in the Lon country (east of Balodo) : now they are almost unknown west of the river."

8. Of the present trade of Chhattisgarh, there is very little definite information. The principal existing marts and trade routes are shewn in the following sketch-map.* The khalsa of Raipur and Bilaspur varies very greatly in fertility, and is very far from yielding a surplus produce over the whole of its area. The position of the most fertile tracts is indicated by shading on the map. For the wheat-producing tract on the west, Mungeli, Dongargarh, and Nandgaon are the principal marts. For the rice-growing tract on the south, Dhamtari and a number of smaller marts ; while Baloda is the collecting centre for the rice-country towards the north-east (containing the fertile tract of Lon), and is, perhaps, the most thriving market in the two districts. The trade which Raipur town itself transacts is very considerable, but is drawn from the country north-east and south of it, and not from the tract in its immediate vicinity.

Marked B

* This estimate is believed to be for linseed grown as a second crop after rice. The Bilaspur figure represents the return gathered when linseed was the only crop sown in the year.

9. Until the opening of the Nagpur and Chhattisgarh State Railway, the road between Raipur and Nagpur was the main traffic outlet of the Chhattisgarh plain. Trade on this road was registered during the years 1871—1877, with the following results:—

Year.	To Chhattisgarh.		From Chhattisgarh.				
	Salt.	Total all commodities	Wheat.	Rice.	Other grain.	Oil seeds.	Total all commodities.
1871-72 ...	1,47,428	1,64,428	2,82,748	3,45,791	85,185	53,279	8,00,839
1872-73 ...	2,21,698	2,26,659	3,66,198	4,01,759	1,34,553	25,653	10,25,003
1873-74 ...	1,21,702	1,33,023	2,92,439	3,79,203	1,71,192	1,61,479	10,42,048
1874-75 ...	1,37,512	1,67,305	2,20,059	2,66,025	2,68,671	1,95,126	10,32,510
1875-76 ...	84,329	1,04,300	2,50,502	2,41,472	69,496	5,70,662	11,67,901
1876-77 ...	.....	1,07,752	.....	.....	.....	.....	12,48,429

The very considerable stream of traffic along this road was one of the principal reasons for the construction of the Nagpur and Chhattisgarh Railway, which runs almost parallel to, but at some distance from, it. The railway first commenced to carry Chhattisgarh traffic when opened to the Amgaon station on the western side of the line of hills bounding the Raipur plain. This took place in November 1881, and in December 1882 the line was carried through the hills to Nandgaon, 50 miles on their eastern side. An indication of the effect which the railway has had on the traffic running parallel to it by road is given by the receipts at a toll-bar situated on the Raipur-Nagpur road, almost exactly midway between these places, which are compared below with the exports from the Nandgaon and Dongargarh stations (within the Chhattisgarh plain) and the Amgaon station (immediately outside it) up to the end of June 1883:—

		Exports from—			Total receipts on the Nagpur road
		Amgaon.	Dongargarh.	Nandgaon.	
		Mds.	Mds.	Mds.	Rs.
1881	Half-year ending June 30th ...	.....	.....	.....	10,476
	Ditto December 31st ...	1,976	.....	.....	2,683
1882	Half-year ending June 30th ...	34,949	.....	.....	9,547
	Ditto December 31st ...	3,590	10,351	4,724	1,056
1883	Half-year ending June 30th ...	*	7,54,655	14,92,653	2,486

The opening of the line to Amgaon had but little effect on the road traffic, but its extension to Nandgaon has decreased it by three-fourths. The exports from the Dongargarh and Nandgaon stations during the seven months since they were opened (from 4th December 1882 to 30th June 1883), have been great beyond all expectation, and would have been greater had the railway been able to carry more. They are shown below—

	From Dongargarh.	From Nandgaon..
	Mds.	Mds.
Rice	2,07,467	5,83,799
Wheat	3,68,950	5,14,417
Linseed	1,73,043	3,96,962
Total all commodities ...	7,69,586	15,21,518

Estimating the road traffic of the half-year at ¼ of its amount in 1876-77 (when the toll receipts amounted to four times their figure for the past half-year), the opening of the railway is shown to have increased export by 128 per cent.

10. The remaining trade routes are of very minor importance. The Bilaspur district is connected with Jubbulpore to the north-west and with Sohagpur to the north by two roads which are only practicable for pack-bullocks—one running *vid* the Borla, and the other

* Complete figures are obtainable for Amgaon for this half-year, but the exports for the first quarter only amounted to 900 maunds.

vid the Komô pass. The traffic carried by both these routes was registered during the years 1871-1877, and the results are abstracted below—.

	Imports into Bilaspur.	Exports from Bilaspur.				
	Salt.	Total all commodities.	Wheat.	Rice.	Other grains.	Oilseeds.	Total all commodities.
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds	Mds.
1871-72 ...	1,266	10,430	11,890	79,281	985	.....	1,10,738
1872-73 ...	5,824	19,193	4,154	98,231	2,560	2	1,54,128
1873-74 ...	8,165	18,737	1,81,136	1,27,205	5,253	297	3,47,152
1874-75 ...	2,707	10,463	88,635	1,37,935	11,391	1,095	2,79,234
1875-76 ...	839	12,071	21,105	20,561	10,337	5,617	77,311

In comparison with the large annual surplus available for export the traffic is insignificant, but considering the difficulties of the road and the cost of transport it is rather a matter for surprise that there should be any traffic at all than that the traffic should be a small one. It has been calculated that there must be a difference in price between Bilaspur and Jubbulpur amounting to 200 per cent. before it can pay to carry a consignment of wheat from one place to the other.

No statistics whatever are available of the traffic of the Mahanadi, which is known to be not inconsiderable. It is fed partly from Seorinarain in the Bilaspur district, partly from the town of Sambalpur, and partly from the towns of Binka and Patna at the south-east corner of the Sambalpur district.

The exports principally consist of rice, in return for which large quantities of cocoanuts and some salt are brought up-stream to Binka, whence they are distributed by cart.

The remaining traffic route is that running towards the Madras coast from the south-east corner of the Raipur district, and the trade along this line has been already discussed in the Chief Commissioner's Minute on the projected railway between Raipur and Vizagapatam. It is not of any great present importance. The mainstay of the trade was the import of salt for consumption of the eastern portion of the Raipur and Bilaspur districts. This import is now giving way before the Bombay salt, which is thrown into Chhattisgarh by the railway from Nagpur. The eastern portion of the Bilaspur district has always hitherto consumed Madras salt, but during the last year Madras salt was altogether supplanted by the Bombay article.

11. So far then as existing traffic is concerned, railway lines running either north or east from Chhattisgarh will not have much to commence upon. But the insignificance of the trade at present is entirely due to difficulty of communication, and there is little doubt that a large export would be at once created by the removal of this difficulty. In this export trade wheat, rice, and oilseeds would form the staple commodities, but a considerable accession of traffic may be expected from forest produce, especially lac, which is at present exported to Mirzapur in large quantities. The return traffic is likely to be a light one for some years, since the population of Chhattisgarh is almost entirely rural, and will take time to become large consumers of foreign manufactures. They will require an annual supply of at least 4,50,000 maunds of salt, and their annual consumption of European cotton-goods and metals may be safely estimated at 1,20,000 maunds and 80,000 maunds respectively.

12. There are two sides from which the resources of Chhattisgarh deserve special consideration—one is in relation to its future position as a wheat-exporter, and the other is in relation to famine supply. For the production of wheat on a large scale, Chhattisgarh enjoys many striking advantages. The climate is suitable, and there is abundance of the black soil which produces the wheat of the Nerbudda valley, on which wheat can be grown year after year without either manure or irrigation. In order to ascertain the extent of this soil in the Raipur and Bilaspur districts, an elaborate investigation has been made, based on an examination of the settlement records of each village in the two districts. The general result of this enquiry is shewn below :—

Districts.	Area of black soil suitable for wheat.			
	Sown with wheat at present.	Sown with other crops (principally rice) at present.	Uncultivated at present.	Total.
	Acres.	Acres.	Acres.	Acres.
Bilaspur	51,089	3,13,413	2,17,194	5,81,696
Raipur	1,81,214	1,24,641	1,20,281	4,26,136

Were the production of wheat encouraged by increased facility of export there is little or no doubt that the area under it would be enormously increased, not only by the breaking

20 d
UNDER 20 PER CENT BLACK SOIL e

up of new land, but also by its appropriating the area of black soil on which rice is now grown, but which is, if anything, not so well suited to the production of rice as the yellow and red clays which abound to the centre and east of the districts. Where the cultivation of wheat extended to the full area of black soil available, and the whole of the produce exported, there would be, making a deduction for seed, an annual export of nearly 60 lakhs maunds or one million quarters. It may be held desirable to consult the interests of the wheat trade in aligning the railway: with a view to this a sketch-map* is appended, which shews the distribution of black soil in the Raipur and Bilaspur khalsa, based on calculations made village by village. It will be seen that the area of black soil is most continuous on the west of the Sheonath river. The percentage of black soil to the total area in each of the seven tehsils of the Bilaspur and Raipur districts is as follows:—

* Marked C.

Western Tehsils.		Eastern Tehsils.	
Bilaspur	19	Seorinarain	14
Mungeli	43	Simga	18
Drug	17	Raipur	7
Dhamtari	10		

A line leaving the Nagpur and Chhattisgarh State Railway at Dongargarh, and running round south of Mungeli to Seorinarain, would therefore be the one most suited to the requirements of the wheat export traffic. It may be noted that such a line would avoid crossing either the Sheonath or Mahanadi. The connection of Raipur with Nandgaon would in this case be left to an extension of the Vizagapatam line.

13. So far as famines are concerned, Chhattisgarh can afford to contemplate railway extension from the exporting side. The advantages which it enjoys in comparative certainty of rainfall have been already touched upon; and although, in the present paucity of communications, the occurrence of a famine in Chhattisgarh would be a terrible disaster, it is fortunately a contingency which does not require very serious consideration. But these reasons from another point of view are the strongest which could possibly be urged in favour of opening up by railways a tract which may be regarded as one of the granaries of India. The large exports of grain which poured from these provinces during the period of the Madras famine were largely drawn from Chhattisgarh at a time when the only means of communication between Raipur and Nagpur was a road involving a journey of at least 10 days either way. The enormous exports from the Nandgaon and Dongargarh stations during the last six months are an indication of the extent to which export of grain in famine times could be increased were roads supplanted by railways. The Government of India make special reference in their enquiries to the possibility of Chhattisgarh providing fodder for a large number of Northern Indian cattle in the event of a famine. Good cattle fodder is as scarce in Chhattisgarh as in most other rice districts, and the miserable condition of the village cattle in Raipur and Bilaspur testifies to the innutritiousness of rice straw as a diet. Under present circumstances, therefore, the capabilities of Chhattisgarh in the direction of fodder-supply would be limited to the grass in which its jungles abound, and which annually makes the hills and forests round its borders a favourite hot-weather pasture-ground for thousands of cattle.

Memorandum by the Chief Commissioner, Central Provinces, dated 1st August 1883.

The Government of India have asked for—

No. 337A. of 9th April 1883.

(1) The area of land in each pergunnah of each district now under wheat;

(2) The area *suitable* for wheat;

(3) Similar information regarding oilseeds and other produce likely to seek the railway for transport to Bombay or Calcutta;

(4) Information as to the protective character of the Nagpur-Bengal, Bilaspur-Katni,

No. 77 of 4th May.

Raipur-Vizagapatam lines of railway;

(5). Information as to the probable remunerativeness of the same lines.

Regarding the Bilaspur-Katni line, it is particularly enquired whether the Bilaspur terminus would always have a surplus of grain crops to draw upon, and whether fodder could, in case of necessity, be exported thence to the North-Western Provinces.

2. In order that reply may be given to the foregoing questions, it is necessary to examine—

(1) The capacity of the Chhattisgarh tract to produce surplus produce for export;

(2) Its capacity to absorb imports.

The enquiry is to a certain extent simplified by the circumstance that the trade of the Chhattisgarh tract is not mixed up with that of the outside world. Nothing comes into it from the outside to be re-exported. It forms an *enclave* or rather two *enclaves*, the larger including the districts of Raipur and Bilaspur, the smaller that of Sambalpur, and it is perfectly detached from the trade of the provinces round it. It exports its own produce and nothing else; it imports for its own consumption and no more; and this detached condition will probably be maintained in the future. Lines of railway may carry traffic from Calcutta to Bombay and from Vizagapatam to the north, but as far as Chhattisgarh

trade is concerned they might as well be made in the air. Their construction will not complicate the trade of Chhattisgarh in the least.

3. The Director of Agriculture has described the physical characteristics of the tract in the letter which accompanies this report. The following table gives statistics, so far as they are known, of area and population. The latter are, of course, based on the recent census; the former on village papers for khalsa and zemindari lands. In the case of feudatories, they are mere rough estimates. Much doubt has of late been thrown on the accuracy of village papers, but the results here and further on in this Memorandum have shewn at all events the appearance (with some few exceptions) of being roughly accurate. But it is probable, if not certain, that they err by under-estimating the cultivated area.

The proportion of land shewn as unculturable in Raipur and Bilaspur is extremely small, and we may conjecture therefore that the column "Culturable" contains a good deal of very inferior land. In Sambalpur this must be especially the case.

Districts.	Khalsa zemindari or feudatory.	Cultivated area.	Culturable.	Others.	Total.	Population.	Of which aboriginal.	
Raipur	Khalsa	1,928,361 / 1,623,518	1,004,422 / (b)1,227,223	266,093	3,260,878	1,141,683	165,729	(b) Taken from Mr. Hewitt's memo: of this said to be of exceptionally good quality and cleared.
	Zemindari	374,334 / 237,144	... / ...	... / ...	3,467,703	263,289		
	Feudatory	885,994 / ...	... / ...	... / ...	1,791,190	427,096	106,317	
	Total	... / ...	... / ...	... / ...	... / ...	1,832,257	272,046	
Bilaspur	Khalsa	1,084,216 / 996,359	704,293 / ...	130,719 / ...	1,928,230	746,130	157,647	* This figure is taken from Deputy Commissioner's letter, but it differs widely from the figures given by Settlement Officer in Appendix I of Settlement Report.
	Zemindari	266,276 / *264,574	... / ...	... / ...	2,647,190	271,197		
	Feudatory	152,998 / 139,103	... / ...	... / ...	651,157	109,181	26,156	
	Total	... / ...	... / ...	... / ...	... / ...	1,126,508	183,703	
Sambalpur	Khalsa	436,218	127,775	Nil.	563,993	362,058	46,643	(a) Estimated by the Settlement Officer of Sambalpur
	Zemindari	(a)130,222	...	... / ...	1,836,246	321,441		
	Feudatory	(a)1,208,740	...	...	7,314,080	999,461	47,297	
	Total	...	...	...	...	1,683,960	93,940	

N. B.—When figures are bracketed on the left, the figure above represents facts as now existing; that below, facts at time of settlement

The progress made in cultivation since settlement is less, especially in Bilaspur, than might have been expected: it has probably been somewhat understated. On the other hand, if it has been understated, then the amount of waste land which we have to count on in the future as likely to come under cultivation has been *pro tanto* increased.

4. Coming now closer to the matter in hand, viz. the production of Chhattisgarh, the following table shews the distribution of the crop area in *khalsa* tracts.

Districts	Cultivated area.	Crop area, i.e., area in column 2 plus part in which another crop is taken with rice.	Area under— Wheat.	Rice.	Other grains.	Oilseeds.	Cotton.	Other crops.	Remarks
Raipur	1,928,361	2,154,979	181,214 / 181,226	1,174,770 / 959,430	689,852	2,35,009	18,518	9,866	In this line of figures some double-cropped land is counted twice, whereas in the figures for the year of settlement the cultivated area only is given
Bilaspur	1,084,216 / 996,359	1,212,950 / 994,260	51,009 / 54,145	776,499 / 691,479	218,964 / 183,691	65,094 / 39,519	16,335 / 49,423	24,049 / 18,021	
Sambalpur	436,218	436,218	.....	368,540	39,849	19,094	17,235	.....	

N B.—When lines of figures are bracketed, that above represents existing facts; that below facts as at time of settlement.

From this table it will appear that Chhattisgarh is pre-eminently and emphatically a food-producing tract,—its non-food crops are quite insignificant in extent,—and that its great staple product is rice; that after rice comes "other grain," *i.e.*, chiefly kodu and kutki; after which come wheat and oilseeds. Looking at the districts separately, we find a fair amount of wheat and oilseeds in Raipur, a very small amount in Bilaspur, and scarcely any of either in Sambalpur, which practically produces rice only.

5. Before going further and enquiring what the produce of the areas just given is, it will be convement to refer to the case of Sambalpur, and to explain why it is that this district will play but a small part in our calculations. It has then to be stated that the Sambalpur district has at present, roughly speaking, no export trade to the west or north, and that what little import there is takes the line of the Mahanadi. Returns, it is true, shew a not inconsiderable export of grains by the river, but this all comes from the south-east corner of the Bilaspur district. And the Deputy Commissioner shews that, when the line to Calcutta is open, things will not, for some time at least, be greatly changed, for the Mahanadi being fordable only during two months of the year, and being even then impracticable for carts owing to its rocky channel, merchandise from the tract south of the river is, the cost and difficulty of ferrying it over being considerable, almost compelled to take the river line; and that it is all the more certain that it will do so because the affluents of the Mahanadi which traverse this tract are more or less navigable and afford an easy means of bringing

produce from the interior. Such produce arriving in boats would almost certainly be conveyed to the coast in the same way; and imports into this southern tract would, to a great extent, the Deputy Commissioner thinks, take this route. But imports, the population of the tract being so largely composed of wild tribes, would never be considerable. It is assumed then that, for a long time at all events, the part of Sambalpur which lies south of the river would contribute but little to railway receipts. The northern tract would draw all its imports by rail and might export something, but in the absence of better statistics than those of the summary settlement, it is impossible to say what amount, if any, of surplus rice would be available. The amount would certainly be small. Wheat is not grown at all in Sambalpur.

6. It follows from the preceding paragraph that we shall not go far wrong if we confine attention to the Raipur and Bilaspur districts. In the 7th paragraph of his letter, Mr. Fuller gives what he takes to be the surplus produce of the khalsa of these two districts.

As everything depends on this estimate, I give all the calculations in detail in the following table:—

	Acreage.	Outturn per acre, maunds.	Gross produce.	Consumption. Per head.*	Consumption. Total.	Seed. Per acre.	Seed. Total.	Surplus remaining.
				Raipur.				
Wheat	181,214	7	1,268,498	...	...	1	181,214	1,087,284
Rice	1,174,770	8	9,398,160	4½	5,423,939	1½	1,762,155	2,212,066
Other grains	538,552	6	3,231,312	2	2,283,764	½	269,276	676,272
Oilseeds	235,069	6	1,410,414	1½	552,709	4 seers	23,507	834,198
Total ..	2,129,605		15,304,384		8,260,412		2,236,152	4,811,820
				Bilaspur.				
Wheat	51,089	7	357,623	...	...	1	51,089	306,534
Rice	775,489	8	6,203,912	4½	3,544,117	1½	1,163,233	1,496,562
Other grains	259,954	6	1,559,724	2	1,492,260	½	129,977	—62,513
Oilseeds	85,094	6	510,564	1½	314,578	4 seers	8,509	187,477
Total ...	1,171,626		8,631,823		5,350,955		1,352,808	1,928,060

* In the case of oilseeds consumption per house is taken. The number of people and houses in the two district is—

	Population.	Houses.
Raipur	1,141,889	368 473
Bilaspur	746,130	209,719

The Deputy Commissioner, Raipur, calculating for *all* food-grains and assuming—

	Mds.	Srs.
Average outturn per acre	8	30
Consumption per head	6	34
Seed per acre	1	5

estimates the available surplus of his district as follows:—

	Mds.
All food-grains	66,30,876
Oilseeds	3,47,406
Other produce*	21,850
	70,00,132 maunds,
	or, say, 259,263 tons.

The Deputy Commissioner, Bilaspur, assuming the following factors:—

	Outturn per acre.	Consumption per head.	Seed per acre.
	Mds.	Mds.	
Rice	6	4½	1
Wheat	5	1½	1

makes the surplus for export—

	Mds.
Rice	5,19,320
Wheat and other grains	3,85,784
	9,05,104 maunds.
	or, say, 33,522 tons.

* Hides, honey, lac, &c.

Hence we have the following estimates independently made :—

	Surplus for export according to	
	Deputy Commissioner.	Director of Agriculture.
	Mds.	Mds.
Raipur	70,00,132	47,81,820
Bilaspur	9,05,104	19,28,060
Total ...	79,05,236	67,09,880

These estimates are not strictly comparable because, while that by the Deputy Commissioner, Raipur, includes all export, that by the Deputy Commissioner, Bilaspur, includes food-grains only, and Mr. Fuller includes food-grains plus oilseeds, but for all practical purposes they may be accepted as for purposes of comparison ; and the conclusion to which I am led is that, while the Deputy Commissioner, Raipur, has erred on the side of excess, and the Deputy Commissioner, Bilaspur, in the opposite direction, Mr. Fuller's estimate is a fair approximation to fact.

7. The Settlement Report of the Bilaspur district supplies a means by which the figures for Bilaspur may be tested. Thus, Mr. Chisholm gives (paragraphs 142 and 180 of report) :

	Total produce.	Available for export
	Mds	Mds.
Khalsa	52,72,657	.. ...
Zemindari	24,48,823	.....
Total ...	77,21,480	14,04,000

so that the amount available for export from the khalsa portion of the district would be about ⅓rd of the total, or, say, 10,00,000 maunds. But since settlement cultivation has increased say, ¼th according to the returns, and as these are believed to be under the mark, and as it is probable that cultivation has increased more rapidly than population, and, therefore, than consumption, we may, I think, add at least ¼th, if not ⅓rd to Mr Chisholm's estimate, thus bringing the present khalsa surplus to 12,50,000, or perhaps 14 00,000 maunds.

The reason why Mr. Fuller's estimate exceeds Mr. Chisholm's is that he takes the outturn per acre for rice at 8 maunds,* while Mr Chisholm took it at 6 maunds. My idea is that Mr. Chisholm's estimate is nearer the mark. If the surplus production of rice in *a single* year is 14,96,562 maunds from the khalsa of Bilaspur alone, it seems strange that the people should have gone on cultivating rice to so large an extent ; that the price of rice should have ruled even as high as it has ; that more rice should not have in the years before the railway forced its way to †Jubbulpur and Nagpur ; and that now that the railway has touched Chhattisgarh, though not the true rice tract, more rice should not have been offered for export (*vide* table in paragraph 9 of Mr. Fuller's letter). If Mr. Fuller's estimates are wrong, it is in respect to rice, and I should be disposed to reduce the outturn per acre to 7 maunds (if not to 6 maunds), and so to reduce the surplus by 19,50,259 maunds.‡ making the total available surplus 47,89,621 or 176,282 tons.

* Mr Hewitt, Settlement Officer of Raipur, took it at 10 maunds, but this was, I believe, certainly an over-estimate.

† The trade to the north from Bilaspur was so small that all attempt to register it was given up.

‡ The number of acres under rice in the two districts.

8. Such being the present exporting capacity of the *khalsa* produce of the two districts, we have to add a large amount for the surplus of the zemindaris and feudatories. Nothing more than a guess can be offered ; the cultivated area being (*vide* table in paragraph 3)—

	Khalsa.	Zemindaris and Feudatories
	Mds.	Mds.
Raipur	19,28,361	10,30,330
Bilaspur	10,84,216	4,37,569*
Total ..	30,12 577	14,67,899

The surplus from the zemindaris and feudatories should be about half that of the khalsa, but I should not be disposed to take it at more than ¼th, because, with some considerable exceptions, cultivation in the zemindaris and feudatories is poorer than in the khalsa lands. A large proportion of their inhabitants consists of aboriginal tribes, and grains of inferior class, and not suitable for export, are largely cultivated there. Taking the proportion at ¼th, we have—

	Tons.
Khalsa export ..	176,282
¼th for zemindaris and feudatories ..	44,070
	220,352

No attempt can be made to shew the proportions in which the various grains will contribute to this export ; but the following figures relating to *zemindaries*, taken from the

* I take the area of the zemindaris in Bilaspur as at settlement, since the figures for area now under cultivation are obviously wrong

Settlement Report of Raipur, shew that very little wheat and no very large amount of rice is to be expected from the zemindaries—

		Acres.
Cultivated area	.. ..	237,144
Of which under wheat	.. ..	16,922
Ditto rice	.. ..	82,677

9. The *present* exporting capacity of the two district zemindaris and feudatories included having been estimated, it remains to enquire what additional export may be expected as cultivation under the influence of high prices, advances.

As to Raipur, Mr. Hewitt states that at settlment there were 1,217,223 acres culturable land, of which ⅓rd was of exceptionally good quality and cleared. This area has now been reduced to 1,066 422 acres, and we may assume a large part of the specially good land has been occupied. The area remaining is about half the cultivated area. The culturable area in the zemindaris and feudatories is not given.

Bilaspur—The culturable area of the zemindaris at settlement is given at 733,014 acres: that of the feudatories is not given.

Considering the small amount of land shewn as unculturable (column 5 of table in paragraph 3), I cannot, as already remarked, but conclude that, under "culturable," much land of very inferior quality was shewn; but making all allowances, we may, I think, assume that the 220,000 tons of present export may, as Mr. Hewitt has predicted, rise to 300,000 under the stimulus of railways

10. In trying to estimate the effect of this available surplus on railways, the most important point for consideration is, is the quality of Chhattisgarh rice such as to secure it a favourable reception in the markets of India? Wheat and oilseeds are most important articles of export, but as Chhattisgarh is, as I have said, emphatically a rice-producing tract, the most important point for us to know is, will all its surplus *rice* be exported? On the west, until the Nagpur district is reached, the rice of Raipur and Bilaspur has to pass through a rice-producing country: on the east the same remark holds good. How far then can it be carried at a profit?

The question I have put will not appear quite uncalled for to any one who remembers that, in the case of articles like food-grains, the demand for which, while it is imperative up to a certain point, ranges between very narrow limits, a small excess or defect in supply creates enormous differences in price. A deficiency of $\frac{1}{10}$th in the food-supply of a population will run the price of the whole up to famine point, and a small excess over possible consumption will depreciate prices proportionately. Prices in Chhattisgarh have been abnormally low, owing to the constant presence of such an excess, and they will rise most rapidly, and quite apart from the effect of prices in other markets on them, when the surplus begins to diminish. I can scarcely doubt that nearly all the surplus rice, as estimated above, will bear exportation; but much depends on its quality, and on this point fuller enquiry will be made. It is, as I have said, remarkable that so little was offered for export during the last season.

11. I now come to the subsidiary point, whether wheat cultivation will extend, and whether it will extend at the expense of other crops. I do not quite understand why this question should have been deemed of special importance. The wheat trade with Europe has of late assumed large proportions, but rice is as profitable to railway to carry as wheat, and is, if anything, in more general demand; and it would certainly seem that the idea of asking cultivators to exchange a crop which they grow at advantage for one which they will grow at less advantage is a mistake. In fact, to suggest this change is to suggest that all surplus rice will not be exported, and therefore that what ought to be the sheet anchor of the railway will fail, and that the most direct benefits of the railway will be confined to a fraction of the agricultural population, *viz.* those growing wheat and oilseeds.

12. But taking the question as it stands, I note that Sambalpur grows no wheat at all; that the area under wheat in Bilaspur is very small, and shews no tendency to increase; and that the area in Raipur, though considerable, is as nothing compared with that under rice, and has increased in a proportion but slightly more rapid. I have no doubt whatever that the new demand for wheat will produce its effect and very quickly, and I, of course, appreciate the importance of variety of crop; but I do not quite see how the change will affect the total amount of export, the thing with which we are now concerned. One advantage, it is true, wheat has over rice, viz. that it will for the most part be carried right to Calcutta or Bombay; while rice may stop short at Nagpur or some point short of Calcutta on the other side. This is undoubtedly an important consideration in estimating railway receipts.

A little is, it is believed, grown in Kalahandi

13. It has been usually assumed that wheat is grown only in land classed as kanhar, but it appears that it is sometimes sown in 'dorsa' as well as in kanhar. The figures are—

	Kanhar.		Dorsa.	
	Cultivated.	Culturable.	Cultivated.	Culturable
	Acres.	Acres.	Acres.	Acres.
	305,854	120,281	728,813	523,099
Raipur	364,502	217,194	*Not given.	
Bilaspur				
	670,356	337,475	.....	.....

Taking the entire culturable area of the two districts at 4¾ million acres, 1 million acres are capable of wheat, but in only 230,000 acres it is at present cultivated. If the zemindaris and feudatories are included, a very considerable addition has to be made to these figures. It is noticeable that Bilaspur with a larger kanhar area than Raipur grows far less wheat.

14. The following table of prices will prove the point urged above that there is no apparent reason why rice should not be exported as freely as wheat. The former grain, as might have been expected, seems to have the advantage in difference of price in the beginning of the cold weather, the latter in the beginning of the hot weather; and, clearly, if rice is not to be freely exported from Chhattisgarh, we shall, besides losing the financial sheet anchor of the railway, find export limited to a few months of the year after the ripening of the spring crop. I should not be disposed to align the railway with special reference to wheat cultivation.

Wholesale price per ton of undermentioned food-grains on 30th November and 31st May.

ON 30TH NOVEMBER.

15. Turning to imports, the estimate given by the Director of Agriculture in paragraph 11 of his letter is certainly not excessive. Mr. Fuller gives—

	Mds.
Salt	450,000
Piece-goods	120,000
Metals	80,000
Total ...	650,000

to which may be added 1,00,000 for miscellaneous articles and cocoanuts, which now come in large quantities from Cuttack, but which the railway will attract. The total import trade may therefore be taken at ¾ million maunds or 27,777 tons.

16. Coming now to the question whether the traffic estimated as above would render a through line to Calcutta on the broad-guage remunerative, it would require very special knowledge, and a very careful enquiry with regard to every article of trade, to fix the point at which the attractions of Calcutta and Bombay would be equal, and where therefore trade would divide east and west. Mr. Hewitt makes an estimate much more favourable to Calcutta than I should be disposed to adopt. But I shall probably not be far wrong if I assume that Raipur forms the point of bifurcation,* and that three-fifths of the traffic goes to Nagpur and two-fifths to Burrakur.

* I ought, perhaps, to put it nearer to Bilaspur

The calculation will then stand thus—

	Tons.	
Total immediate export	220,000	
Going to Burrakur, two fifths	88,000	(*a*)
Ditto Nagpur, three-fifths	132,000	(*b*)

Rate per—

	Tons.	Miles.	Rs.	Miles.	Rs.
(*a*)	88,000	× 9† =	4,125	× 400 =	1,65,000
(*b*)	132,000	× 9 =	6,187	× 190 =	11,75,580
					28,25,580
Deduct 65 per cent. working expenses					18,36,594
Profit					9,88,936

† I take the rate per ton per mile at 9 pie

To this has to be added imports 27,777 tons, which I would divide thus—

	Tons.		Gross profit. Rs.
From Burrakur	6,666	giving	1,25,000
From Nagpur	21,111	„	1,88,000
Giving— Total			3,13,000
Deduct 65 per cent. working expenses			2,03,450
Balance			1,09 550
Grand Total Profits			10 98,486

It will be a special feature of the line in both directions that any goods that come on it will be carried long distances, *i.e*, nearly 400 miles on one side and 190 on the other. I have, of course, by assuming that everything is loaded at Raipur, made matters too favourable; but the error will not be very large, and I have not taken into account on the other hand the local goods traffic of Chhattisgarh.

17. It appears therefore to be probable that, as soon as the line is made and in fair working order, *receipts derived only from the goods traffic of the Chhattisgarh tract* will contribute 2 per cent. to the guarantee which Government is asked to grant, and that there is every reason to believe that before long* this contribution will rise to 2½ per cent and it can scarcely then be doubted that, if we add to these receipts the following:—

* *i.e*, as the export rise, from 220,000 tons to 300 000, and imports (as they will do) rise somewhat also

(*a*) from through traffic between the east and west of India;
(*b*) traffic, goods and coaching, of the tract between the Central Provinces frontier and Burrakur;
(*c*) coaching traffic in the Central Provinces;
(*d*) mineral (*i.e.*, coal) traffic, and timber and forest produce,

the line will return an ample interest on the cost of its construction.

And then I think that, in considering the question of profit, the Government of India should include among its *direct* receipts the income which it will receive from the immensely increased traffic which will be thrown on the G. I. P. (I forget how the case stands with the E I. Line). At least half of the three-fifths of the Chhattisgarh exports, which I have assumed to go to Nagpur, will, I believe, go on to Bombay, and if the earnings of the G. I. P. are under 5 per cent., the net earnings on this traffic will all go into the pocket of Government, and if the Company is earning over 5 per cent., half will go. If any private person were trying to estimate the financial advantages of the project, he would certainly take this as a direct asset, and I do not know why Government should not do the same.

18. The following conclusions may now be recorded:—

(1). That we might continue our narrow-gauge line *viâ* Bilaspur to a point north of Sambalpur, say Kolugiri, with the certainty that it would pay over and over again;
(2). That we might turn this line into a broad-gauge line with full confidence;
(3). That we may even venture to continue it through the long and comparatively unproductive tract between the Central Provinces border and Burrakur, and still feel confident that the project will be financially successful.

19 Doubt begins to arise only when the lines north from Bilaspur to Katni and south to Vizagapatam are taken into consideration. We may predict with considerable confidence that, so long as the through line to Calcutta carries the whole of the Chhattisgarh traffic, it will pay; but we have to admit that the line north from Bilaspur could, for some years at all events, only pay (except as a mineral line) by reducing receipts on the other line. Every maund of grain carried north will be a maund less carried east or west. The Katni and Vizagapatam lines will drain the through line of traffic, not feed it; and if the Katni line is to have its southern terminus in a region of surplus produce, it will do so at the expense of the main line.

20. The question whether the interests of the Central Provinces would be better served by the construction of the line to Calcutta, or by the opening of the line to Katni,* with a branch from Bilaspur to a point north of Sambalpur, is one of much difficulty. The northern line is urgently wanted. It will bring Chhattisgarh into connection with the railway system of Northern India, and open to its products markets which, if the main line only is made, will remain closed to them. But the main line also would confer immense benefits on the Central Provinces, and when local interests are thus balanced, Imperial considerations may very properly turn the scale, and these, there can be no doubt, demand the construction of the main line. I would therefore advise that this line should be pushed on with all possible speed: that, in the meantime, such tramways or light lines should be laid down as would enable the Bilaspur and Rewah coal to be worked, and would form part of the track of the Bilaspur-Katni line when the time for completing it arrives. The Vizagapatam line I would put last of the three.

* I assume that the line from Nagpur will, in any case, be carried to Bilaspur.

21. The indirect advantages which free railway communication between Chhattisgarh and the outer world will bring both to Government and to the people of that tract have been so ably so often sent forth by my predecessor, Sir J. Morris, that I need only say that I most fully concur in everything that he ever wrote on this subject. What railways to the coast

are, in America, to the farmers of the West, that the line which shall traverse Chhattisgarh will be to the people of that tract. And as the settlements of all the three districts of the Chhattisgarh division have only a few years to run, the interests of Government demand that railways should not only be made, but made without a day's delay. Already the time, before settlements fall in, is all too short—so short that, knowing that rents and the value of land are being violently modified, but have not reached their true level, we may not improbably find it necessary to resort to some temporary expediency for postponing the final revision of jamas. I should think, too, that military importance of the through line would not be inconsiderable, since, in the case of commotion in Upper India, it would afford an almost unassailable line of communication between Calcutta and the west of India.

22. As to the protective effect of railways, I need only refer to what Mr. Fuller has written. The following extract from the Central Provinces Administration Report of 1869-70 is also in point—

> "The experience gained during the past year has thrown much light on one of the most difficult problems which present themselves in times of scarcity—the amount of the reserve grain-supplies of the country. This subject will be fully discussed in the Famine Report which is now being compiled; but it may be mentioned here that the grain stores in hand when the famine began exceeded expectation, and that their amount varied from district to district according as the means of communications with great grain markets were difficult or the reverse. The granaries of the Nerbudda valley held out well, but those of Chhattisgarh seemed quite inexhaustible
>
> "The enforced accumulations of previous years of plenty became the salvation of this remote tract in the time of scarcity; and paradox as it appears at first sight, it is nevertheless true that those same natural obstacles which prevented surplus from being sent to Chhattisgarh when famine came, had prepared this region for the calamity by retaining its surplus produce in its local granaries."

23. In concluding this Memorandum, I would just say that I have written under the great disadvantage of never having seen Chhattisgarh. It is, however, my intention to spend almost the whole of the approaching marching season there, and to devote special attention to the resources and requirements of this always interesting and now most important tract.

No. 729RC, dated Simla, the 17th August 1883.

From—Colonel W. S. Trevor, R.E., Secretary to the Government of India, Public Works Department,

To—The Secretary to the Bengal Chamber of Commerce.

With reference to your letter dated the 2nd May last, and to your previous communication specified marginally, I am desired to request that you will communicate to the Committee of the Chamber of Commerce the assurance that the question of railway communication between the Central Provinces and Bengal, and of the best route which such communication should follow, has for long past engaged the earnest attention of the Government of India.

Dated 29th November 1881.
" 9th March 1883.

2. This question, indeed, is of very old standing. As long ago as 1868, when railway extensions in Bengal were under consideration, a preliminary investigation took place. Mr. Leonard, C. E., Superintending Engineer, South-Eastern Circle, and Mr. Vernon Schalch, concurred in preferring the Burrakur to the Midnapur route on account of "the enormously heavy waterway required" on the latter, and Mr. T. E. Ravenshaw, the Commissioner of Cuttack, pointed out the "enormous cost" which it would involve.

3. Passing over the intervening period during which the Midnapur district was thoroughly examined and surveyed, in connection with the canals and protective embankments which have been constructed, I am to mention that the Government of India, when instructing the Government of Bengal in August 1881 to cause the three lines which had been suggested for connecting Burrakur and Bilaspur to be surveyed, added that—

> "The Government of India, in considering the question of the direction of these lines, has preferred the northern lines to any running from Calcutta and Midnapur *vid* Cuttack, because, the railways being undertaken to a great extent for famine protective purposes, it seems that the coast system of canals will partially protect this latter country, while it will be easy in the future to make a junction of the northern line from some point north of the Mahanadi river with Cuttack, should such a measure prove eventually desirable."

4. In consequence, however, of a desire that the line from the Central Provinces should pass from the neighbourhood of Chyebassa direct to Calcutta, rather than *vid* Burrakur or Sitarampur, being still entertained in some quarters, orders were issued to the Engineer-in-Chief, Nagpur Railway Surveys, that, in addition to locating the line from Sitarampur *vid* Dugni and Raigarh to Bilaspur, provision should be made for a careful reconnaissance from Dugni *vid* Midnapur to Howrah during the past cold season.

5. I am now desired to forward to you, for the information of the Chamber, the report of this reconnaissance, together with the comments of the Bengal Government thereon, and certain other information of importance in connection with the proposed line.

1. Letter from the Bengal Government, No. 2946R, dated 28th July 1883.
Mr. Spring's report and estimate for the route from Dugni to Howrah, dated 17th July 1883.
Note by the Chief Engineer thereon, dated 28th July 1883.
Mr. Parker's abstract estimate of the probable cost of a broad-guage railway from Sitarampore to Bilaspur.
2. Report by Mr. H. H. Risley, Deputy Commissioner of Manbhoom, on the trade of Chota Nagpore, No 408R, dated 7th May 1883.
Report by J. B. Fuller, Esq., Director of Agriculture, Central Provinces, on the trade and trade resources of Chhattisgharh, No. 240, dated 11th July 1883.

6. From these documents the following comparisons may be obtained :—

	Miles.	Miles
Distance—		
Howrah to Sitarampur by East Indian Railway ...	138	
Sitarampur to Dugni	95	
		233
Howrah to Dugni *vid* Midnapur		162
Difference of distance in favour of Midnapur route ...		71
New line required—		
Howrah to Dugni *vid* Midnapur		162
Sitarampur to Dugni		95
Difference, less construction, in favour of Sitarampur route ...		67

	Rs.
New capital required—	
Howrah to Dugni *vid* Midnapur	2,08,16,717
Sitarampur to Dugni	80,14,942
Excess by adoption of Midnapur route	1,28,01,245

In addition, however, to the new line, if taken *vid* Midnapur, being weighted by the necessity of raising and rendering remunerative 128 lakhs of additional capital, there can be no doubt that the expenses of working would be seriously enhanced by the absence of the cheap coal obtainable at Sitarampur and the maintenance of the bridges and embankments in so difficult a country as that between Midnapur and Howrah That country is intersected by canals and formidable rivers. The locality receives, moreover, the flood waters of a very large tract of country to the north, and is at times under water for miles. The flood especially passes between the Roopnaraien and Damooda, where even spring-tides go two feet above the level of the county. These rivers are both tidal and navigable, and the former is very large The bridges and flood-openings between Midnapur and Howrah will cost 65 lakhs of rupees in construction and much in maintenance, and will be permanently subject to danger from floods, and even cyclonic waves, such as that which, in 1874, flooded the station of Midnapur. Possibly some of these objections might be partly met by taking the line more to the north, but this would involve an increase of distance, without materially reducing the estimate.

7. As regards traffic, the section of the Midnapur route from that place to Dugni is very inferior in population and resources to the Sitarampur route; while the remainder is already well served by canals, on which steamers as well as boats can ply—conveyances, it may be observed, which might be formidable competitors of the railway. The contrast between the two is truly and effectively drawn in the 82nd paragraph of Mr. Risley's note. While considerations regarding local traffic are thus in favour of the Sitarampur route, those regarding through traffic shew no balance in favour of its rival Passengers and goods would, indeed, gain somewhat in time in reaching Calcutta, but they would arrive at Howrah on the west side of the Hooghly, instead of coming straight into Calcutta itself over the bridge now under construction. But in cost it is probable that neither passengers nor goods would be gainers. The rates by the direct route would have to be calculated to cover interest on the extra 128 lakhs of rupees of capital ; while the rates by the Sitarampur route would only bear interest on a share of the capital spent on the section of the East Indian Railway between Sitarampur and Calcutta, which would certainly amount to much less than the above difference. The working expenses also would, for the reasons already given, be higher, mile per mile, than on the Sitarampur line. It may be assumed therefore that no reduction in through rates would be likely to result from the reduction in distance, and that a ton of wheat from the Central Provinces could be carried as cheaply by the Sitarampur route as by the Midnapur.

8 It has been supposed in some quarters that the difficulties which the East Indian Railway has lately experienced in meeting the export trade were proof of the necessity for either two additional lines of rails, or a separate railway, in order to meet the extra traffic which the Nagpur Railway would bring to Calcutta. But those difficulties have arisen, not from inability in the East Indian Railway to carry, but from inability to discharge at Howrah with sufficient rapidity. With additional stock and shorter intervals between trains which will, of course, be provided as required, a double broad-gauge line can convey a far larger traffic than this Railway has ever been called upon to meet. It is very possible that at some future date, when the trade of the Upper Provinces and Chota Nagpur has attained a far larger development, a line from Dugni to Howrah or Hooghly may be found profitable, but at present there appears no ground for preferring it to the substantial advantages of the Sitarampur route.

9. Such being the conclusions irresistibly arrived at on the facts presented, it does not seem necessary to notice at any great length Mr. Prestage's proposals accompanying your letter. I am, however, to offer the following brief remarks on a few points :—

(*a*) Mr. Prestage's estimate of the cost of constructing the direct line is evidently much too low. It should be increased by 20 to 25 per cent ;

(*b*) There are strong reasons for preferring the Calcutta side of the river to the Howrah side for Wet Docks ;

(*c*) The estimate of 5,000 tons of wheat per diem obtainable from the Central Provinces appears very questionable.

(*d*) The prime cost of wheat must be the same wherever it is shipped from. It cannot vary in the proportion of 22·32 to 6·2, as stated in paragraph 3 of the Note of 9th March.

(*e*) The supposition that after the opening of a through line the Great Indian Peninsula Railway would maintain their present rates for wheat, and consequently allow Sheogaon, only 340 miles from Bombay and 832 miles from Calcutta, to be the point from which the traffic would divide, is altogether inadmissible.

(*f*) The assumption that it would take two additional broad-gauge lines from Sitarampur to Calcutta to convey the traffic brought to the former by a double metre gauge line is unintelligible. Moreover, if two extra lines will, as stated in paragraph 18 of the same Note, be required for the traffic below Patna, it is evidently wrong to debit them in paragraph 26 to the Sitarampur project.

(*g*) If there be a likelihood of any such traffic as Mr. Prestage assumes, it is obvious that the broad-gauge would be preferable to the metre. Metre-gauge stock of such a nature that the paying hauled load per train shall be fully equal to that on the broad-gauge, which Mr. Prestage is understood to contemplate, is at least beyond present experience. There is, however, every reasonable probability of traffic sufficient to warrant a line on the latter gauge, which is the more necessary, in that the connection at either end will be with broad-gauge lines.

(*h*) The reason for debiting the Sitarampur project in paragraph 26 with the whole cost of the bridge at Hooghly and of Docks at Diamond Harbour (or elsewhere on the east of the river), and with two-thirds of the cost of a central passenger and goods station at Calcutta is not apparent, seeing that these are in course of being provided independently of it.

(*i*) The concessions and conditions proposed in the memorandum No. 2 do not appear likely to commend themselves to the money market, neither are they such as the Government of India could entertain.

The above remarks are not intended to be in any way exhaustive, but merely to indicate some of the principal preliminary objections to Mr. Prestage's proposals.

PRICES CURRENT OF FOOD-GRAINS, FIREWOOD, AND SALT IN THE DISTRICTS OF BENGAL FOR THE FORTNIGHT ENDING 15TH SEPTEMBER 1883.

H In Satkhira and Khoolna sub-divisions retail price of salt 11 seers.
I In the sub-divisions retail prices of salt are as follow:—Jhenida, Magura, and Narail 12 seers, and Bongong 13 seers.

Rainfall, Weather, and State and Prospects of the Crops

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different Districts of Bengal, as reported to Government during the week ending the 22nd September 1883.

No.	District, and date of return.	Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
BENGAL.			
	Western Districts.		
Burdwan Divs. 1	Burdwan, Sept. 22 '83	Nil	Weather—very close. Rain is very much wanted, especially for the crops on the higher lands. If rain falls prospects will be good, otherwise they will be poor.
	Culna	Nil	
	Cutwa	0 25	
	Raneegunge	2 50	
2	Bankoora, „ 22 „	Nil	Weather—hot and muggy. There has been very little or no rain during the week. This sudden break in the rains has threatened the cultivators to a certain extent, but clouds are gathering, and some rain is soon expected. No damage has yet been done to the crops. The *aus* paddy is being reaped. Public health fair.
	Bishenpore	0 60	
	Maliara	1·75	
	Khatra	0 11	
3	Beerbhoom, „ 21 „	0 03	Weather—hot and dry. Rain wanted for rice crop in many parts of the district. Prices of food-grains moderate. Health of district good on the whole.
	Rampore Haut	0·73	
4	Midnapore „ 22 „	0·19	Weather—hot. Rain is wanted everywhere. Prospects of paddy not yet bad. Public health good.
5	Hooghly, „ 22 „	0·30	Weather—seasonable. Crops good, but rain wanted in Jehanabad sub-division and in thana Ballaghur. Some cases of cholera in Serampore, and fever has appeared in Jehanabad. Otherwise public health pretty good.
	Howrah „ 25 „	0 21	Weather—sultry and oppressive.
	Oolooberiah	0·61	Transplanting of *aman* rice complete. More rain required. Sugarcane good. Jute and *aus* rice being cut. Crops fair.
	Central Districts.		
6	24-Pergunnahs, Sept. 24 '83	0·15	Weather—hot and clear. Prospects of early and late crops good. Harvesting of *aus* crop nearly over. Transplanting of *aman* finished. Rain wanted. Public health generally good.
Presidency Divs. 7	Nuddea, „ 22 „	.....	Weather—fine, cooler, with only occasional slight showers. Harvesting of *aus* nearly completed. Rain much wanted for *aman*. Fever has slightly increased.
8	Khoolna, „ 22 „	1·06	Weather—sultry and dry. Rice crop in the higher lands is beginning to suffer from want of rain. Other crops are doing well. Public health good.
9	Jessore, „ 22 „	0 55	Weather—hot and very dry for the season of the year. *Aman* crop is suffering from want of rain and absence of inundation. Prospects of this crop are not good. Public health good.
	Jhenida	Nil	
	Magura	Nil	
	Narail	1·3	
	Bongong	Nil	
10	Moorshedabad, „ 22 „	Nil	Weather—very hot and close. *Aman* is suffering much for want of rain. *Bhadoi* harvest is almost completed; outturn expected to be fair. Public health good.
11	Dinagepore Sept 21 '83	2·16	Weather—cloudy, with occasional rain. Cutting of *bhadoi* still continues. Late rain has done much good to *aman*, which is now doing well. Rice selling at from 17 to 23 seers per rupee.
Rajshahye and Cooch Behar Divs. 12	Rajshahye, „ 22 „	0·18	Light winds; clear sky. Prospects good, but rain required, more especially in the north. Public health, with some exceptions, good for the time of year.
	Nattore	Nil	
	Nowgong	Nil	
13	Rungpore „ 21 „	6 47	Weather—hot and cloudy, with occasional rain. Prospects of winter rice and sugarcane not favourable. Jute is still being cut. Fever prevalent.
	Kurigram	2·12	
	Gaibanda	1·27	
	Nilphamari	7·8	
14	Bogra „ 22 „	0·32	Weather—still very dry and hot, as the rain keeps off. Rain very badly wanted. State and prospects of *aman* crop very unpromising. Fever still prevalent.
15	Pubna, „ 22 „	Nil	Weather—hot and sultry. Prospects of crops not good. Rivers have risen considerably. No local rain.
16	Darjeeling, „ 22 „	1·33	Weather—cloudy, with occasional rain. Crops in the hills promise well. More rain wanted for winter crops in the Terai. Public health good.
17	Jalpigoree, „ 22 „	16·76	Unusually heavy rain for the season. The reports as to *bhadoi* harvest and late rice are favourable; other crops poor. Public health good.
	Cooch Behar „ 21 „	6 56	Heavy rain during the week. The late rice will benefit much by the late heavy rain, and transplanting even yet going on, cultivators having been enabled to plant out in places where all hope of a crop had been given up. Tobacco seedlings have, however, suffered in places. Public health good.
	Dinhatta up to 19th.	5·41	
	Mathabhanga up to 15th.	8·20	
	Morkigunge up to 15th	4·36	
	Eastern Districts.		
Dacca Divs. 18	Dacca Sept. 22 '83	0 08	Weather—hot. Sowing of *rosalia* paddy completed and that of *maskalai* continues. *Aus* paddy and jute are being cut. Prospects of crops are good.
	Manickgunge	Nil	
	Munshigunge	0·13	
	Narainguage	Nil	
19	Furreedpore, „ 22 „	0·38	Weather—dry, and excessively hot. The rivers luckily rose pretty high at the beginning of the week, or the continued want of rain would have become serious. They have now fallen. *Aman* is still pretty fair, and sugarcane is doing well. Fever prevalent.
	Goalunde	0 10	
	Madaripore	0 36	
20	Backergunge. „ 20 „	0·21	Weather—seasonable. *Aus* crop has almost been gathered. Transplanting of *aman* still continues. General health good.
21	Mymensingh. „ 21 „	0·23	Weather—sultry, with heavy, leaden sky and still air. Rain wanted in west of district. Elsewhere prospects good. Steeping of jute and transplanting of rice going on. Health fair.
	Jamalpore	0·42	
	Kishoregunge	0·58	
	Attea	Nil	
	Netrokona	0·48	

No.	District, and date of return		Rainfall at Sudder Station in inches.	Character of the weather, state and prospects of the crops, and state of health at date.
	BENGAL—*concld.*			
	Eastern Districts.—concld.			
	CHITTAGONG DIVN.			
22	Chittagong,	Sept. 25 '83	1·22	Weather—hot. Prospects good. Outturn of *aus* fair. Transplanting of *amun* finished. Prices steady. Cattle-disease still continues
23	Noakholly,	„ 20 „	1·64	Weather—warm and sultry; rains getting rare and scanty. Reaping of *aus* rice still continues. Transplanting of *amun* paddy nearly completed. State of the young plants promising.
24	Tipperah,	„ 20 „	1·98	Light rain, and frequent wind, southerly and very light. Crops reported good; also health.
	Brahmunbaria	..	0·04	
	Chandpore	..	2 70	
25	Chittagong Hill Tracts.	„ 18 „	3·48	Weather—occasional showers and cloudy throughout the week. A very heavy shower of rain this morning (18th). Harvesting of *jum* paddy crop still continues. Plough paddy doing well. Prospects of cotton crop not good.
	Hill Tipperah	„ 19 „	0·25	Weather—close and cloudy. Transplanting of *amun* paddy still continues. Prospects of sugarcane fair. Public health good.
	BEHAR.			
	PATNA DIVN.			
26	Patna,	Sept. 22 '83	2·75	Weather—hot. Transplanting of paddy over. Reaping of *bhadoi* crops is being pushed on. Sugarcane and cotton are growing well. Cholera reported from Behar and Islampur thanas.
	Barh	...	2·09	
	Behar	...	2 07	
	Dinapore	...	1·05	
27	Gya,	„ 22 „	0·19	Weather—cooler, with clouds and clear atmosphere. The rice crop must be very short. Prices fluctuating, have fallen slightly in Gya town. Health improving.
28	Shahabad,	„ 21 „	1·5	Weather—hot and cloudy at intervals. Late rain has improved prospects of crops in Arrah and Buxar. In Bhabooah rain is much wanted.
	Buxar	..	3·55	
	Bhabooah	..	Nil	
	Sasseram	...	4 11	
29	Durbhunga,	„ 22 „	0·96	Weather—hot and seasonable. *Bhadoi* crop is being harvested with a fair outturn. Late rain has done much good to paddy on high lands, but more is wanted. Prices of food-grains stationary. Public health fairly good
30	Mozufferpore,	„ 22 „	4·00	Sky heavily overcast, with occasional thunderstorms; wind light or absent. Heavy, but irregularly distributed, showers have greatly improved the prospects of all crops in the sudder and Hajeepore sub-divisions. Rain much wanted in the Seetamarhi Sub-division In the inundated tracts transplanting of rice for the second time has been almost completed; in the worst parts the land is still lying waste.
	Hajeepore	...	2·32	
	Seetamarhi	...	0·84	
31	Saran,	„ 22 „	1·23	Weather—close and sultry, with occasional showers. *Bhadoi* being harvested. The late rain has done much good to paddy. More rain still required. Cases of fever reported. Public health otherwise good.
	Sewan	..	3·05	
	Gopalgunge		1·67	
32	Champarun	„ 22 „	0 43	Weather—cloudy, with a little rain. Heavy rain is said to have fallen in different parts of the district, but these reports are as yet not confirmed. Rain is much wanted still. General health on the whole good
	BHAGULPORE DIVN.			
33	Monghyr	Sept. 22 '83	0·26	Weather—seasonable Prospects of rice crop generally good. Much benefit done by heavy rain in Jamui sub division, but rain in Begusarai too heavy for low land crops on the ground. Public health good.
	Begusarai	..	6·62	
	Jamui	...	4 59	
34	Bhagulpore,	„ 22 „	1·17	In the Sudder sub-division more rain is wanted for the winter rice. The heavy rain in the northern and southern sub-divisions has done much good, and the prospects are favourable. The autumn crop has yielded about from 8 to 10 annas.
	Pirtanka	...	2 57	
	Soopole	...	5·75	
	Muddehpoorah	...	3·35	
35	Purneah,	„ 22 „	3 80	Weather—normal. Prospects much improved by recent rain. Slight fever in many places.
	Kissengunge	...	2·85	
	Arrareah	...	4 03	
36	Maldah,	„ 22 „	0·48	Rainfall very scanty and weather very dry for this season. For want of sufficient rain the transplanted rice crop is being watered where practicable by artificial means. Sowing of *kalai* has begun in the *diyara* tract of the district. Public health good.
37	Sonthal Pergha..	„ 22 „	0·45	Weather—cloudy, with bright breaks. More rain wanted at Jamtara and Godda. Elsewhere reports are favourable.
	Deoghur	..	2·62	
	Godda	...	1·31	
	Rajmehal	...	1·96	
	Jamtara	...	1 05	
	Pakour	...	1·10	
	ORISSA.			
	ORISSA DIVN.			
38	Cuttack	Sept. 21 '83	0·15	Weather—seasonable. *Beali* being reaped *Sarad* being weeded and thriving well. Price of rice has risen a little. Common rice selling at from 20 to 24 seers per rupee. Public health generally good.
39	Pooree,	„ 20 „	0·25	Weather—very hot. State of crops continues good. Some slight damage done to *sarad* in places by insect. Cattle-disease reported from thanas Pipli and Pooree. Small-pox still bad in Ranpur and is reported to be spreading towards Khoorda. Common rice selling at from 21 to 42 seers per rupee.
	Khoorda		0·70	
40	Balasore,	„ 21 „	0·2	Weather—hot and close. State of crops continues good, except in pergunnah Bhagrai, where the late flood of the Subarnarekha caused much damage to the crops. A few cases of cholera reported from the interior, otherwise public health good.
	CHOTA NAGPORE.			
	South-West Frontier Agency.			
41	Hazaribagh.	Sept. 21 '83	1·66	Weather—warm and seasonable. Prospects of rice continue good. *Bhadoi* crops still being harvested. General health good.
42	Lohardugga.	„ 22 „	1·84	Weather—close. Rain in Palamow has done immense good, elsewhere prospects fair. Slight fever in Lohardugga.
	Daltongunge	...	5 73	
43	Singbhoom,	„ 21 „	0·46	Weather—fine, bright, slight rain, very hot, and oppressive. All crops doing well, and agricultural prospects continue favourable. General health fairly good.
44	Manbhoom,	„ 22 „	0·74	Weather—bright and warm. Prospects of all crops excellent. Small-pox continues at Topechanci, otherwise public health good.
	Govindpore	...	1 66

Explanation of Summary.—The normal means of air pressure and temperature are the arithmetical averages or means of the readings during the same. The *humidity* of the atmosphere is expressed as a percentage, saturation being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10. *Rainfall.*—The normal means are the numerical means or averages of the rainfall in that district determined from the returns sent in by the subdivisional stations in that district, viz.) the total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy

for the week ending Friday, the 21st September 1883.

Explanation—Indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If some of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING FRIDAY, THE 21ST SEPTEMBER 1883.

At the close of the previous week, as had been noticed in the usual report, a well pronounced break in the rains had commenced in Orissa, South-West Bengal and East Bengal, though rain had continued to fall, and in many cases in considerable amounts, in Behar and North Bengal. These conditions have continued to hold throughout the week now under review, and even up to its close there were no signs of any probable alteration, or of the break in the rains giving way in the districts above-mentioned, but rather the area of rainfall has been gradually contracting, and during the last day or two only North Behar and North Bengal were receiving any noticeable amounts of rain. As was also pointed out in the summary for the previous week, pressure had been steadily increasing for many days in all districts, and at the commencement of the present week, it was fully equal to the normal. This slow increase of pressure has continued almost without a break during this week, and, as a consequence, the barometer now shows a pressure in all districts very appreciably above the normal. With the establishment of this comparatively high pressure over the Province, the monsoon winds have also been steadily diminishing in force throughout this period, and only light, and in many cases variable, winds have prevailed in almost all districts for the greater part of the week. The area of rainfall, as noticed above, has therefore also steadily diminished, and thus a strongly marked break in the rains over a very large portion of the reporting area has been brought about. This is the first general break in the rains of any considerable importance which has occurred during the present monsoon in the Lower Provinces, and as the indications or conditions are not at present favourable to any immediate inrush of moist monsoon winds over the land area, it is probable that the break in the rains will become even more marked than it has been during this week.

It is of course evident that a very week monsoon current must have been blowing in Bengal during the past week, and if the strength and volume of the current can be at all accurately judged by the wind velocities, it would appear, from the numbers in the meteorological tables of this and of the previous week, that the average wind velocity or the strength of the monsoon current of the past week is certainly not two-thirds of that of the previous week. The reduction of wind velocity during the past week is at some stations almost startling. Thus at Chittagong, in the week ending September 14th, the average daily wind velocity was 158 miles, during the past week it has been 79 miles only; again at Dacca the daily wind velocity in the second week of September was 113 miles: this week it has been 62 miles. It is therefore clearly evident that there has been a comparatively sudden, and at the same time a serious, reduction in the strength of the monsoon current during the past week, and, as is usually the case when a light monsoon is blowing, great irregularities in the distribution of the rainfall have occurred in those areas which have been receiving rain. Thus, to take one instance only, while Siliguri reports a rainfall for the week of 2·98 inches, Julpigori, which is the nearest reporting station to it, and is in fact only 24 miles away from it, has received 16·76 inches during the same period. These irregularities will be again referred to when the district rainfalls are being considered.

As has been already stated, pressure was at the commencement of the week about equal to the normal, and there has been a steady though slow general increase since. Consequently the average pressure for the week is above the normal at all stations except one; the exception, which appears to be a purely local one, is at Gya, which has reported a pressure below the normal by ·003″, but on the other hand the neighbouring station of Patna reports an excess of 0·020″. The excess pressure over the whole Province averages 0·034″, which is of course considerable, while at the respective stations the excess ranges from 0·078″ at Durbhanga to 0·014″ at False Point. With the comparative and at many stations complete absence of rain from Orissa, South-West Bengal and East Bengal, and which of course has been accompanied by a considerable clearing of the sky, temperature over these areas has been steadily rising, and on the average for the week it has been distinctly above the normal. In Behar and North Bengal, on the other hand, where at many stations heavy rain has been falling, the temperature has been below the normal by as much as 2° to 3° in several cases, though the average amount is smaller than this.

The following table gives the usual summary of the temperature and rainfall data for each of the seven meteorological divisions of the Province :—

Meteorological District.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Average for week			Average mean of week above or below normal mean week.	Of week.			Rainy days.			Since 1st of month.		Since May 1st.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number.	Variation.	Average.	Normal average.	Average.	Normal average.
Orissa ...	92·9	75·6	88·7	80·2	84·4	+0·8	1·17	2·67	−1·50	2·5	3·7	−1·2	7·47	7·47	50·97	42 96

As has been mentioned above, there has been a distinct break in the rains during the greater part of the week in South-West Bengal, Orissa, and East Bengal. but rain has continued to fall in considerable amounts in North Bengal, Behar, and Chutia Nagpur. The numbers given in the preceding table shew this fact clearly, and while the first three divisions are there shewn to have received a rainfall in defect of the normal, the other divisions have recorded a considerable excess. Expressed in percentages of the normal fall, the rainfall during the week in South-West Bengal has been 77 per cent in defect, in Eastern Bengal it has been 66 per cent in defect, and in Orissa 56 per cent below the normal. On the other hand, North Bengal has received a rainfall 53 per cent in excess of the normal amount, Chutia Nagpur a fall 81 per cent in excess, while the whole of Behar has received a rainfall over 90 per cent in excess of the normal fall, a nearly double the usual quantity. The number of rainy days in each division follows pretty closely the numbers above given, that is, there has been an excessive number of days of rain in those districts receiving excessive rain, and a very small number of days of rain in the districts of deficient rainfall.

Taking up the rainfall distribution more in detail, it will be found that in very many instances, the variations from the normal fall and even from the average falls of the districts as shown in the above table have been during the past week excessive In Orissa, the Balasore district has been more largely in defect than the Pooree or Cuttack districts, and at Sorah and Balasore rainfall has been practically absent. In South-West Bengal, in the Nuddea district, out of six reporting stations only two stations received slight showers during one day, the largest rainfall in this district for the whole week being two-tenths of an inch at Kooshtea. The greater part of the Burdwan district was in an almost similar condition, and Raneegunge was the only station which received one heavy shower in one day in the week. The Hooghly, Beerbhoom, Khoolna, Moorshedabad, and Midnapore districts were almost equally rainless, but the 24-Pergunnahs districts received decidedly more rain. In East Bengal, the greatest deficiency was in the Dacca and Furreedpore districts, while the Chittagong district actually received a fall equal to the normal. Passing now to the divisions which received a rainfall in excess of the normal, in North Bengal the abnormal variations are quite extraordinary. Thus, the districts of Pubna, Bogra, Rajshahye, and Maldah were practically rainless during the week, and on only one or two days at isolated stations slight showers fell. On the other hand, the Dinagepore, Rungpore, and Darjeeling districts received considerable amounts of rain in almost every day in the week, and the Julpigoree and Coooh Behar districts were positively deluged with rain. Thus, Julpigoree reported 16 76 inches Cooch Behar 16·45 inches, Matabhanga 14·09 inches, and Micklegunge 11·38 iqches during the week. In North Behar, the excess rainfall seems to have been particularly heavy in the Purneah and North Bhagulpore districts, but elsewhere there are no other extreme variations to remark. In South Behar and in Chutia Nagpur also, when considering the district rainfalls, there are no striking variations from the average excess shewn above, though the stations of Gya, Nowadah, and Monghyr have received comparatively small amounts of rain.

Saturday, 15th September.—Pressure increased generally by small amounts The increase was largest in East Bengal and Orissa, but the changes scarcely affected the relative distribution of pressure, which did not vary largely from the normal, though there was a slight defect from the normal at some stations in South-West Bengal, and a slight excess pressure in Orissa. Temperature was abnormally high in South-West Bengal and in Orissa, but was comparatively low in Behar and Chutia Nagpur. Temperature was in excess by 2° to 3° in South-West Bengal, and equally below the normal in South Behar. Winds had not changed in direction much since the 14th. South-westerly winds generally prevailed in Orissa, South-West Bengal, and Chutia Nagpur; south-easterly winds in East and North Bengal: while the winds in North and South Behar were a little irregular. In most districts wind velocities were small and had

scarcely changed, but in North Bengal they had increased, and in Behar they had decreased in force. Humidity was fairly low in Orissa, East and South-West Bengal, but was high in North Bengal and at most stations in North Behar. The amount of cloud was increasing slightly, and was rather large in most districts. Orissa was almost completely rainless, while a few local showers fell in South-West and East Bengal, in South Behar and in Chutia Nagpur. The most general rain fell in North Bengal and North Behar, where at many stations considerable amounts were reported. The heaviest rainfalls to-day were—Julpigoree 4·34 inches, Cooch Behar 3·33 inches, Raneegunge 2·5 inches, Banka 2·36 inches, Mozufferpore 2·05 inches; while the following stations received amounts in excess of one inch :—Maliara (Bankoora district), Churamon, Raigunge, Kurigram, Bagdogra, Purneah, and Mahoudi Hills.

Sunday, 16th September.—Pressure again increased by small amounts at most stations, and generally speaking the increase of pressure was least at the southern stations. Pressure was slightly above the normal in most districts except in South Behar. Temperature continued rather high in South-West Bengal, and was above the normal, though it had fallen slightly during the past twenty-four hours. Temperature was considerably below the normal in Behar, the defect at Gya being more than 3°. Winds were light, and in some districts rather variable. In South Behar, in particular, wind directions were decidedly unsteady. In East and North Bengal wind directions were mainly south-easterly, and in Orissa and South-West Bengal they were southerly and south-westerly. In all cases winds were moderate in force. The larger portions of South-West Bengal and Orissa were again rainless. East Bengal and North Behar reported a few local showers only, while very heavy rain was falling over the greater part of North Bengal, South Behar, and Chutia Nagpur. Thus Rungpore reported 4·63 inches, Mickligunge 4·56 inches, Dinhatta 3·99 inches, Sasseram 3·76 inches, Matabhanga 3·49 inches, Begooserai 2·99 inches, and Julpigoree 2·54 inches; while the following stations reported amounts in excess of one inch ;—Ranchee Hazaribagh, Pachamba, Behar, Aurangabad, Bhabooah, Dehree, Tajpore, Siliguri, Buxa, Cooch Behar, Cox's Bazar, Narail and False Point.

Monday, 17th September.—The changes of pressure were a little irregular, though on the whole the barometer was rising. Pressure was comparatively low in South Behar and in Orissa. Pressure was, however, above the normal of the day by amounts which varied from ·099″ at Durbhanga to ·011″ at Hazaribagh. Temperature was generally rising in most districts by small amounts. It was decidedly above the average in South-West Bengal, in Chutia Nagpur, and at some stations in East Bengal, though it was below the normal in North Behar. Winds continued southerly and south-westerly in Orissa and South-West Bengal, and south-easterly in East and North Bengal, but in Behar wind directions were rather variable. At some stations in Behar and Chutia Nagpur calms were reported. Wind velocities had scarcely changed, and in most districts light to moderate winds were blowing. Humidity was generally almost unchanged, though in South Behar it had increased. The amount of cloud had also decidedly increased in most districts. South-West Bengal was again practically rainless ; a few local showers were received in Orissa and East Bengal, but again heavy rain continued to fall in some parts of North Bengal, in Behar, and in Chutia Nagpur. The heaviest rain was received in South Behar. The following are the largest amounts reported :—Aurungabad 3·57 inches, Jamui 2·30 inches Jajpore (Cuttack district) 1·88 inches, Mozufferpore 1·83 inches, Gobindpore 1·5 inches; while the following stations received amounts between one and one-and-a-half inches :—Hazaribagh, Pachamba, Palamow, Deoghur, Pakour, Godda, Rajmehal, Dehree, Kissengunge, Matabhanga, and Bagdogra.

Tuesday, 18th September.—Pressure continued to rise over the greater part of the Province, but a fall commenced at the southern stations in Orissa, and at some of the stations in East and North Bengal. Pressure was above the normal at all reporting stations by amounts ranging from 0·114″ at Durbhanga to 0·026″ at Gya. Temperature had risen considerably in Orissa, though in the other divisions the changes were variable and not large. Temperature was considerably above the normal in South-West Bengal and Orissa, though it was much below the normal in Behar and at some stations in East Bengal. Winds became more southerly in Orissa and South-West Bengal. They remained south-easterly in East and North Bengal, and were rather more normal in direction in Behar. Wind velocities, however, in all cases continued small. Humidity remained moderate in Orissa and South-West Bengal, but increased at many stations in North Behar and North Bengal. The amount of cloud was small in Orissa and South-West Bengal, and was fairly high in other districts. A few light local showers fell in South-West Bengal and Orissa; showers were a little more numerous in East Bengal, while fairly general rain, generally moderate in amount, fell in some districts of North Bengal and in most districts of Chutia Nagpur and Behar. Rainfall was not, however, so widely distributed or so heavy in these districts as on the 17th instant. Soopool (North Bhagulpore district) received 2·55 inches, Kanganati 2·38 inches, Chittagong 1·88 inches, Setangkur 1·32 inches, Matabhanga 1·24 inches, Dehree 1·18 inches, Bagdogra 1·15 inches, and Comilla 1·13 inches.

Wednesday, 19th September.—Pressure now fell in all districts by amounts which averaged from three to four hundredths of an inch. Notwithstanding the decrease of pressure, the barometer was still above the normal in all districts by amounts ranging from ·05″ at Chittagong to a nearly normal pressure at False Point. Temperature continued to increase by small amounts in South-West Bengal, Orissa, and Chutia Nagpur, though it had not changed much in the other divisions. It was decidedly above the normal in Chutia

Nagpur, South-West Bengal, and Orissa, and was below it in East Bengal. Winds had become a little more irregular in South-West Bengal and Orissa, and were not so strongly southerly as on the 18th. In East Bengal, winds were strongly south-easterly, while in North Bengal and Behar they were little irregular In all cases, however, wind velocities were very small Humidity continued high in North Bengal, Behar, and Chutia Nagpur, but in other districts it was moderate for the time of year. The amount of cloud was also rather large in the last-named districts, though much smaller in East Bengal, Orissa, and South-West Bengal.

Rainfall was to-day almost entirely confined to certain districts in North Bengal and North Behar, and to South Behar, where the rainfall was most general. In other divisions only local showers occurred. The rainfall was particularly heavy at the foot of the hills where Julpigoree reported 6 45 inches. The other rainfalls which call for notice are Banpur 2·52 inches, Soopool (North Bhagulpore) 2·29 inches, Hajipore 1·72 inches, Begoosarai 1·67 inches, Hazaribagh 1 45 inches, Patna 1·30 inches, Behar 1·18 inches, and Arrareah and Purneah 1 08 inches.

Thursday, 20th September.—Pressure continued to fall slightly at the majority of the reporting stations, though at some stations in North Behar and North Bengal an increase had commenced. Pressure was relatively low in Orissa, where it was below the normal by rather more than 0 01″. In all other divisions it was above the normal by amounts which varied from ·001″ at Saugor Island to ·067″ at Durbhanga. The changes of temperature were small and variable. Temperature still remained rather above the average in Orissa, in South-West Bengal, in Chutia Nagpur, and at some stations in East Bengal, but was generally below the normal in Behar. Winds were more regular in direction in Behar, where south-easterly winds generally prevailed. They were, however, still irregular in Orissa. In other districts wind directions were usually southerly or south-easterly. Wind velocities continued moderate in all divisions. Humidity and cloud proportion were about equal to the average in all districts, except North Behar, where humidity was rather high.

Rain was almost entirely absent from South-West Bengal, South Behar, Chutia Nagpur, and East Bengal. Light local showers fell in Orissa, but general, and in many cases very heavy rain fell in several divisions of North Bengal and North Behar. The rainfall was excessive in the Cooch Behar district: thus Cooch Behar reported 8·37 inches, Micklegunge 4·82 inches, and Matabhanga 3·92 inches. Julpigoree also received 2 68 inches, Maddapore 2·20 inches, Kurigram 1·19 inches, and Arrareah 1·18 inches

Friday, 21st September.—Pressure now increased by small amounts at almost all stations. The rise was greatest at some stations in South Behar, and least in East Bengal. Pressure still remained comparatively low in Orissa. Temperature had increased considerably in North Bengal, and to a smaller extent in East Bengal. In other divisions the changes were slight only. Temperature was above the normal in all divisions, except Behar. Winds were again a little irregular in most districts. In Orissa and Behar the irregularity was very marked. Wind velocities remained moderate in all districts, while in North Behar half the stations reported calms. Humidity was rather high in North Behar, and at some stations in North Bengal and South Behar, though it was moderate in amount in East and South-West Bengal. Cloud proportion appeared to be slightly increasing.

Rainfall was confined to the same areas as on the 20th, and with the exception of certain districts in North Bengal and North Behar, the whole Province was practically rainless. The heaviest rainfalls reported to-day were Matabhanga 3·27 inches, Kissengunge 3 10 inches, Cooch Behar 2·98 inches, Kurigram 1·68 inches, Arrareah 1·49 inches, and Chupra 1·25 inches.

METEOROLOGICAL OFFICE, BENGAL,
The 25th September 1883.

ALEXANDER PEDLER, F.C.S.,
Offg. Meteorological Reporter to the Govt. Bengal.

MEMORANDA.

THE principal features in the vital statistics of the first class Municipalities in Bengal for the week ending 8th September 1883, as indicated in the annexed table, are—

(1). That births and deaths were recorded in these Municipalities in the proportions per 1,000 of their population of 22·1 and 28·1, respectively, as opposed to 23 and 31·6 per 1,000 respectively, in the preceding week ending 1st September, indicating a reduction in the registration of both events, particularly of deaths.

(2). That the highest birth and death-rates were recorded in the under-mentioned Municipalities :—

Births.	Ratio per mille.	*Deaths.*	Ratio per mille.
Arrah	40·7	Uterpara	75 5
Comillah	38·5	Burdwan	53·4
Uterpara	37·7	Bhagulpore	44 4
Gya	36·9	Gya	41·7
Bhagulpore	35·3	Serampore	37·3
Patna	34·1	Chuprah	35 2
Chuprah	33·2	Patna	33·1
Durbhanga	31·5	Poori	32·1
		Rampore Beauleah ..	31·5
		Durbhanga ..	30·7
		Santipore	28·0
		Monghyr	26·2
		Suburbs of Calcutta ..	25·6
		Hughli	25·5

(3). That the mean mortality from the principal death-causes stands as follows, in comparison with the mortality during the preceding week from the same causes :—

	Ratio per mille during the weeks ending—	
	8th September.	1st September.
Cholera	1·6	2 6
Small-pox	·03	·03
Fever	14·8	14·9
Bowel-complaints	4·3	5·1
Injury	·5	·6
Other causes	6·9	8·4

exhibiting a decline in fatal results from cholera, bowel-complaints and the diseases recorded under the head of "Other causes," and no variation in the casualty rate from the other specified diseases.

(4). That while small-pox continued, as in the preceding week, to prevail only in the Bhagulpore town, cholera, fever, bowel-complaints, and the diseases classed under the head of "Other causes" proved conspicuously fatal in the under-mentioned Municipalities :—

Cholera.	Ratio per mille.	*Fever.*	Ratio per mille.	*Bowel-complaints.*	Ratio per mille.	*Other Causes.*	Ratio per mille.
Uterpara	18·9	Burdwan ..	38 1	Uterpara ..	18·9	Uterpara ...	28 3
Bhagulpore	10·9	Santipore ..	28·0	Monghyr ..	9·1	Poori ..	25·7
Serampore	9 8	Rampore Beauleah	23·6	Chuprah ..	8 8	Bhagulpore	13·6
Gya	4·8	Durbhanga ..	23 6	Hughli ..	8·1	Burdwan	10 7
Monghyr	4·5	Gya ..	22·5			Serampore	9·8
						Gya ..	9·6

(5). That the mortality referable to *Sex*, *Class* and *Age* stands as follows :—

According to Sex.	Ratio per mille.	*According to Class.*	Ratio per mille.	*According to Age.*	Ratio per mille.
Males ..	30·4	Christians ..	33·0	Under 1 year ..	261·4
Females ..	26·0	Hindus ..	28·8	1 and under 5 years ..	39·7
		Mahomedans ..	26·6	5 and under 10 „ ..	19·0
		Other classes ..	36·4	10 and under 15 „ ..	14·0
				15 and under 20 „ ..	19·9
				20 and under 30 „ ..	15·8
				30 and under 40 „ ..	18·3
				40 and under 50 „ ..	21·5
				50 and under 60 „ ..	22·7
				60 years and upwards ..	60 1

F. W. A. DEFABECK,

The 24th September 1883. *Officiating Sanitary Commissioner for Bengal.*

Return of Births and Deaths in the Five Class Municipalities in Bengal during the week ending 8th September 1883.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h, and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological office, and based on Regnault's modifications of August's formula.

The direction of the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o overcast, *g* gloomy, *t* thunder, *d* drizzling rain, *p* passing temporary showers.

ALEXANDER PEDLER,
For Meteorological Reporter to the Government of India.

GENERAL REMARKS AND EXPLANATIONS.

THE most notable feature in the traffic of the month is the heavy decrease in the despatches of jute, which at this period of the year is our main staple of traffic. The probable reason of this falling off is explained below.

From careful enquiries made from reliable traders in the Rungpore, Dinagepore, and Julpaigurí districts, it has been ascertained that this season's jute crop is estimated at six annas under that of last year, with the additional drawback of its being a late crop. It is, therefore, to be feared that this season's traffic will not equal that of last year.

Besides this loss to our traffic, decreases have taken place in Piece-goods, Salt, and Sugar. The total decrease in the month's traffic amounts to 4042·07 tons.

INCREASES.

Food-grain ... ... Tons 754·02

This increase is mainly in upwards traffic, which is due to a demand from the hill districts. Prices in the Calcutta market remain unchanged, with only a moderate demand.

Gunny-bags ... ... Tons 135·57

Though there has been but little demand for this article, the low freight at which it is carried enables despatchers to transact business.

Railway material ... ... Tons 910·97

The total quantity of railway material carried during the month was 3163·81 tons, of which 2764·91 tons was coal for the Locomotive Department. The balance is made up of materials for the Dinagepore extension.

Tea ... ... Tons 120·47

Very large sales of tea have taken place at Calcutta during the month at favourable prices, and hence there has been a desire on the part of consignors to sell.

Tobacco ... ... Tons 687·58

This increase will make up for the slack despatches in the beginning of the season, and is due to a brisk demand for export to Burmah.

All other goods ... ... Tons 5·62

This is not worth noticing.

DECREASES.

Ale ... ... Tons 28·06

The decrease under this head is in a great measure due to a falling off of public consignments.

Ginger ... ... Tons 14·86

There is no demand for this article.

Jute ... ... Tons 2137·82

Though the prices for both old and new jute have considerably advanced in Calcutta during the month, a large decrease has taken place owing, it is said, to despatchers being unable to procure the stuff in sufficient quantities or of proper quality. Universal complaints are made of the lateness of the season, of the shortness of the crop, and of the inferior quality of the stuff offered for sale.

Piece-goods ... ... Tons 419·92

The general tone of the market for piece-goods has become one of marked depression, which, it is hoped, will be improved by an enquiry during September for Poojah requirements.

Salt ... ... Tons 3926·62

It has been ascertained that this traffic is chiefly regulated by the traffic in jute. The majority of jute traders receive, in return for jute consignments, consignments of salt. The decrease of 2137·82 tons in the despatches of jute downwards will explain the above falling off in salt upwards.

Sugar ... ... Tons 29·02

The reduced rate for this commodity introduced from 1st July 1883 does not appear to be having an appreciable effect on this traffic.

TRAFFIC SUPERINTENDENT'S OFFICE; *Saidpur, the 12th September* 1883. G. S. LEONARD, *Traffic Superintendent.*

Report of Fluctuation of Traffic on the Tirhoot State Railway for the month of August 1883.

W. SEDGWICK, *Major*, R.E.,
Acting Manager.

W. E. HARTT,
Traffic Superintendent.

GENERAL REMARKS AND EXPLANATIONS.

THE total quantities of goods carried during the month of August 1883 aggregated maunds 3,61,338, as compared with maunds 4,23,062 carried during the corresponding period of 1882, and maunds 2,77,849 carried during the previous month, showing a decrease of maunds 61,724, and an increase of maunds 83,489 respectively.

Of the several increases and decreases, the following are the most prominent ones and worthy of special explanation :—

INCREASES.

Food-grains ... ... Mds. 6,788

The increase is due to the extension of the line to Motihari and Jhanjharpur, the chief part being from Jhanjharpur section.

Hides and horns ... ... Mds. 1,679

The increase under this head is due to the extension of the line to Motihari, and to the demand in the Calcutta market.

Piece-goods ... ... Mds. 2,317

The increase is due to the extension of the line to Motihari.

Salt ... ... Mds. 21,891

About half of this was booked to the stations on the eastern and western extensions, and the other half is an increase on the traffic to stations on the old line.

Tobacco ... ... Mds. 2,490

The increase is partly due to the Bachawi road having been rendered impassable by floods, which prevented tobacco being brought to Durbhunga as quickly as last years and partly to removal of the line to Semuriah Ghât, which necessitated the opening of a station at Begum Serai.

Lime and kunker ... ... Mds. 6526

This is chiefly due to the line being worked up to Muzuffurpore for the Hajeepore extension, and to kunkur sent from Bilaspur and Durbhunga for road cess.

Railway materials ... ... Mds. 28,123

The increase is due to stone posts for fencing the western extension, and to rails for the Hajeepore extension having been despatched during the month.

DECREASES.

Coal ... ... Mds. 4,821

This is due to contractors and indigo planters having got up all the coal they required for the season.

Iron ... ... Mds. 4,447

This is accounted for by there not having been any consignments of machinery for indigo factories imported during the month, while a large number were carried last year in the corresponding month.

Seeds ... ... Mds. 69,937

The decrease under this head is partly due to the inability of the Railway to carry the traffic, owing to paucity of rolling-stock and limited demand during the first half of the month in Calcutta.
